#### Something of an Order

The DSS&A placed its first order for rolling stock for its new lines, and the order includes 20 Mogul engines from Brooks Locomotive Works; also three mammoth steam shovels. The line when completed gives another direct transcontinental route connecting with the NP near Ashland and the MC at the straits. The work is being pushed rapidly on the Sault division by 500 men, while O'Reilly & Co., and Henry & Balch have commenced on the contracts west of Marquette.
