Saturday, Dec. 10, 1887

A special to the Mining Journal this morning announces that the MSSM&A has reached S. S. Marie. This is the third railway line to reach St. Mary's River this year, two from the American and one from the Canadian side, a fact that will make 1887 quite a memorable year for the communities on both sides of that historic stream - and yet people who are so impressed with the magnitude of their destiny that they don't seem to mind it much.
