New Appointments

"Mike" Meehan, one of the oldest and best engineer on the DSS&A as well as one of the most popular men on the road, has just received well warranted promotion by his appointment by the superintendent as road foreman of engines. It will be his duty to see that enginemen and firemen attend to their duties properly while on the road. To watch the performance of each engine on the road and to assist the superintendent of motive power and machinery by suggestions, accurate reports of the work performed by engines and their crews, etc.

Mr. D. C. Mulvihill, late of the PRR at Renova, Pa., has been appointed master car builder of the DSS&A. He is a first class man in every respect and is thoroughly conversant with the duties and responsibilities of his position.
