Rumors of R. R. Changes

We are not at liberty to quote our authority for the statement, but there is a big deal on in railroad circles. The CM&StP having recently acquired the M&N, are now anxious to get into the copper country and to that end are bidding for the DSS&A from Nestoria to Houghton. Should these schemes take practical form a new country to the south and west will be opened up and Houghton will receive much benefit from the impetus thus given.
