

WE Have decided to sell goods for the next 30 days at 20 per cent below regular prices. We will offer to the public this week Special Bargains in Suitings

We have the largest stock in the county to select from. Before buying your spring goods call at "THE STAR" Remember the place—Völker's Brownstone building, cor. Main street and Cleveland ave.

BLUMENTHAL & RUTTENBERG, IISHPEMING, MICHIGAN THE LARGEST STOCK of Dry Goods in Marquette County has just been received at Donahoe's. Prices lower than ever. Come and see the goods. Don't forget the Brownstone store, Ishpeming, Mich.

DEER LAKE COMPANY MANUFACTURER Lumber, Shingles, Lath, Pickets, -- Flooring, -- Ceiling, -- Siding, -- Mouldings, Doors and Glazed Sash, Lime, Plaster, Cement, Stucco, Brick and Plastering Hair.

FRANKLIN INSTITUTE 1885 LAMP TEST 1000 HOURS. Includes a diagram of a lamp and a list of specifications for various lamp models.

Jas. R. Dee & Bro., AGENTS Western Electric Arc and Edison Incandescent LIGHTING Telegraph, Telephone and Electrical Supplies

PALACE SALOON European Hotel. MATHIE'S BLOCK, MARQUETTE. The best brands of Wines, Liquors and Cigars.

A QUIET METROPOLIS. Such was Ishpeming yesterday—The Reporter Found Nothing Startling to Chronicle.

Foolish Talk. The incendiary rant about impeaching the water board, selling the fire engines, and doing various other reckless things, may be set down as the mouthings of a few shallow-headed persons who don't know what they are talking about.

New Ticket Case. A new ticket case has just been put in at the passenger depot of the Chicago & Northwestern railway. It contains spaces for 600 forms, of nearly as many different railroads.

The Business Men's association has not yet appointed a committee to watch for the approach of the new railroad that is to start from Marquette and run to this city.

A special meeting of the Knights of Labor was held Wednesday night for the purpose of initiating new members. From some of the leading members of the order the MINING JOURNAL learns that the talk about boycotting the local paper amounted to nothing more than the conjectures of a few persons whose ideas and statements were not founded on fact.

The pugilists who had the "mill" in a livery barn last week are still in the city, and though the arbitrary rulings of the referee and the untimely departure of the stakeholder have saddened them greatly, they may arrange for another encounter.

Miss Hannah Kennedy will have no formal opening of her millinery establishment this spring, but she has already received the most of her new stock, and has it unpacked for the inspection of her customers.

The L. A. & S. band, which showed at the concert Monday night how well it could play, should practice on a few overtures, and music of that class. The technical knowledge and skill of the players would allow them to very soon master compositions of the more ambitious character.

John W. Jochim has lately got in a gross of fancy store handles, finished in nickel, and bearing his name and address in raised letters. He presents to his customers as tokens of regard. It goes without saying that they are gratefully received.

The train arriving here from Marquette at 1 P. M., and leaving for the county capital at 3:10, is now resplendent in new paint. The coaches have been painted yellow, and the name of the M. & W. R. replaced by the initials of the M. H. & O.

Quite a number of miners are thinking of going to the Gogebic iron range soon, hearing that wages are better there than here. All stories about miners receiving \$3 to \$4.50 a day for work in the new mines there may be set down as false.

Carlson & Larson have got settled in their new office over the postoffice, and are in shape to see their friends and transact business with dispatch. The rooms are nicely fitted up, and as pleasant for office purposes as any in the city.

There was no meeting of the common council last night, the report spread by parties who got confused as to the date of the first meeting—which will take place next Wednesday evening—to the contrary, notwithstanding.

Mr. C. L. Sheldon has something of interest to say to the readers of the DAILY MINING JOURNAL this morning. It contains some good advice about where to purchase boots and shoes.

J. B. Tibor, the city recorder, now has his office with T. J. Dundon, in the McKee block, but will move into the office vacated by Mr. Carlson as soon as his new furniture arrives.

Diphtheria of a malignant type has broken out in Negaunee, and, owing to the defective sanitary condition of many of the houses here, is liable to appear in Ishpeming also.

Mrs. O. Elms offers for sale at reasonable figures the old Union store building, corner of First and Pearl streets. Fred J. Eggen is authorized to dispose of the property.

NOTED AT NEGAUNEE. A Foot Ball Club Wanted—Saturday Evening's Race at the Adelphi—Pretty Good Ore.

His Mates Remembered Him—Busy Insurance Agents—Before His Honor—A Veteran R. R. Man Retires—Miscellaneous.

Foot Ball. Three years ago this summer Negaunee had a first-class eleven that left the Ishpeming foot ball club. There is nothing to prevent the organization of the coming summer, as nearly all the players are still here.

In an Insurance Office. While the reporter was wandering about in the wet yesterday morning, he ran up against the mammoth sign of "Taylor & Fenwick, Insurance Agents."

A Touching Tribute. The desk and seat of Harry Roberts, who died of diphtheria last Monday, and who was a pupil in Miss Delf's department at the town hall, was draped with white and decorated with flowers furnished by his classmates the day following his death.

A New Organization. On Monday evening a new society, called the "Council of the Royal Knights of Temperance," was organized. D. C. Morse, an old member in the lower part of the state, is the prime mover in the organization here.

A Good Showing. A recent assay made at Marquette from one taken from the Milwaukee mine shows: Phosphorus, 62.20; Iron, 3.45; Silica, 3.45; Sulfur, 0.90; Lead, 0.20; Zinc, 0.10; Copper, 0.05; Nickel, 0.05; Manganese, 0.05; Potash, 0.05; Soda, 0.05; Lime, 0.05; Magnesia, 0.05; Alumina, 0.05; Fluorine, 0.05; Chlorine, 0.05; Bromine, 0.05; Iodine, 0.05; Strontium, 0.05; Barium, 0.05; Calcium, 0.05; Magnesium, 0.05; Sodium, 0.05; Potassium, 0.05; Ammonium, 0.05; Hydrogen, 0.05; Oxygen, 0.05; Nitrogen, 0.05; Carbon, 0.05; Silicon, 0.05; Phosphorus, 0.05; Sulfur, 0.05; Chlorine, 0.05; Fluorine, 0.05; Bromine, 0.05; Iodine, 0.05; NEWS OF THE DAY.

Collected and Colored For the Eye of the Inquisitive Reader of the Morning's Paper.

The Canvas for the New Directory and Guide to Marquette to Commence This Morning.

The Late Captain Judson-Harbor Scenes-A Settling Wall-Office Improvements.

They Commence To-Day.

Messrs. Holland and Swift will begin their canvass for the new directory and guide book of Marquette to-day and in calling upon the business and professional men of the city they will give a thorough exposition of their purposes.

As has before been outlined in the MINING JOURNAL, the system of numbering which these gentlemen use is the simplest and most easily understood of any extant. It is used in Philadelphia, Washington and many other large cities in which the city is laid out.

They will push the work as rapidly as possible so as to have it ready for the large number of visitors who come to our city each summer. It will be very useful to all such, and will at the same time acquaint them with many facts concerning the city which would be difficult to obtain through any other source.

The Late Captain Judson. The Cleveland Plain Dealer thus speaks of Captain George E. Judson, who died in this city Sunday evening at the age of 65, having sailed the lakes for fifty years, commencing at the age of twelve and retiring in 1883. He long sailed the E. B. Hale to this port.

About three years ago he retired from active work with a fortune of about \$150,000 and stock in the schooner Tilden and the steamer Chamberlain. He was a Free Mason and a Knight of Pythias, a member of the board of education, and was elected cemetery trustee in 1882. Deceased freely gave to charity and was a life-long democrat.

Captain Judson was a typical seaman in appearance and in his bluff, positive manner. He was a seaman with few of the weaknesses that come to many of the calling that he followed so long. His failure to be foolishly covetous made him one of the best of his kind, for he prospered and did his duty to the last, and he served. The late Adams Bradley had implicit confidence in Captain Judson, who had a pleasant habit of never running his ship into trouble and of avoiding shipwrecks. No man can spend years on those great inland oceans that must be traversed in reaching the iron regions without learning to admire their wonderful phenomena, and Mr. Judson had, aside from his professional duties, a side of him, a side that few except those who knew him intimately had seen, namely, a constant and close communion with nature. He was a philosopher and a thinker, and the writer will not be as one of the misfortunes of his professional life that he failed to imbibe in ink some of the intensely interesting talks with which Captain Judson entertained him when, as marine reporter, he began to patrol the docks. Vessels were not apt to receive a newcomer in marine journalism without roughly initiating him, and Captain Judson opened his kind heart to shelter the newcomer, and did him the greatest kindness that the wise man can do a learner. He taught him how much he had to learn. The city had no warmer friend of newspapers than Captain Judson, who was an uncommonly close reader.

It has been said that he was a philosopher, and that he uttered much that ought to have been preserved in print. He had a theory that the great lakes have their tides like the ocean, and his citations in proof of this were most interesting. He also had mapped out the currents that flow through the lakes—currents as decided as the gulf stream. The Henry Chisholm, one of the Bradley fleet of steamers, was the last boat he sailed.

Harbor Scenes. The work of fitting out the tugs for the coming season has commenced and rapidly goes on under way all four in the harbor. The City of Marquette has been hauled up and her old shot from sheathing removed. After recalcitrating the seams new sheathing will be put on as the old was badly worn and torn by the ice late last fall.

The Rose will be raised up for a new wheel and also for repairs at the dock. The last day she was out last fall she had to force her way back through three miles of ice which tore off her bow iron and wore away the sheathing which will have to be replaced by new.

The Dudley and Adams are in good condition and not much work will be necessary on them. Their engine rooms were open yesterday and men were busy on the machinery.

The ice around the docks is all honey-combed and some of the tugs are swinging at anchor clear from ice. Outside of the docks, however, the ice is covered by snow and seems as solid as ever.

Unusual Settling. A great deal of attention was attracted yesterday by the bulging out of the front of Edward Fraser's new stone warehouse on Lake street. It has sprung very noticeably, and there were many who thought that it would soon fall, while others thought that it would have to be taken down anyway. The warm weather probably caused the trouble by driving out the frost, as the wall was built in cold weather.

Mr. Fraser explained the trouble to a representative of the MINING JOURNAL, and is confident it is not serious. He says that the dressed brownstone front is only a veneering, and that the rough stone wall back of it settled more rapidly, causing the veneering to spring as described. He now has it securely fastened by wooden beams propped up against it, and says that it will not be a difficult matter to repair the damage, nor will it be expensive.

Chief Constable. In the case of People vs Goggin the jury brought in a verdict of "guilty of assault and battery."

The case of People vs. Notton was on trial in the afternoon and will be resumed this morning.

To-day's call, 8, 21, 24, 25, 26, 27, 31.

A Beautiful Little Offer. The coal office of James Pickands & Co., when the alterations in progress are completed, will be one of the finest in the city. The interior has been remodeled during the winter and now looks very neat, while the latest improvement will make a still greater change in its appearance. Masons

are now building a large outside chimney at the rear of the building for a fireplace and mantel, which will occupy the space formerly taken up by the back door. When the architect and master builder gets through with his labors he will have a great local reputation as a designer and builder.

REPORTORIAL PENCILINGS. Race on rollers at the Casino to-night. The "honk," "honk," of wild geese was heard yesterday showing that they are migrating northward again.

W. K. Stafford & Co. have a new lamp burner which, by those who have tried it, is styled the finest thing out. Two wicks are used, hence the name, "Duplex," and a very powerful light is obtained. Call and look at it.

There was a disturbance in a Washington street saloon at a late hour Tuesday night, and a Swede was badly cut in the face. He ran into the street, three men chasing him, and to escape them he was forced to take refuge in the Christie hotel.

Jay Hubbell is mentioned among the Michigan men who have been buying southern pine lands so largely of late. In connection with some Detroit capitalists he has purchased some 50,000 acres in Louisiana and Mississippi. Governor Alger has also invested heavily in the south.

Brown hung out his new sign on the Clifton House corner yesterday afternoon and, in honor of the day presumably, put in an electric night bell. Persons needing medicines at any hour of the night now can arouse the prescription clerk by pressing on the button placed at the right hand of the door.

Pencilings finds that the "ex" with which he prefaced Deputy Collector McVichie's title yesterday has been misunderstood in some quarters. It stood for "excellent," not "late," there isn't anything late about Dan, he's one of the "soonest of the soon" in looking after his official duties.

Pencilings isn't going to take in any more prize fights until he has his life insured and has taken out an accident policy as well. Reporting a fight is not without its pleasures but the next day the air seems to be filled with rumors of impending danger to the anatomy of the reporter, there's the rub!

The residents near the corner of Michigan and Spruce streets are in tribulation because of the water which is collecting there. Last spring the street commissioner found it necessary to dig a trench six feet deep, through the huge drift which always forms there, in order to let the water escape. It will have to be done again this season and should receive prompt attention.

About April 25th a new paper will appear in the Gothic country. It will be known as the Iron Tribune and will be published at Hurley, Wis., by the Tribune Publishing Co. The proprietors of the new paper are evidently men of keen discrimination; they request the Michigan localities to begin exchanging with them at once; they'll publish a good paper, no doubt of that now.

The steamer Atlantic was placed in the Wolverine dry dock Friday afternoon at Port Huron, and will receive a complete re-rig. It is said that the first trip of the boat will cost her owner over \$2,000 after paying the expenses of her crew and repairs. It is not unusual for a boat owner to send his boat out before the season opens. The boat is being "the first boat of the season" it is worth \$2,000 in marine circles this spring.

In the construction of a tunnel at Stockholm cold air has been applied in a novel manner. In passing under a bill of light weight gravel it is found that it is impossible to underpin the houses overhead. It was therefore decided to freeze the gravel by means of cold air, and put in the lining while the material was solid, the undertaking having been successfully carried out by the use of cold air machines. None of the houses passed under were injured.

Miss H. Howard has just got a trimmer from New York who is well versed in all the latest styles of trimming hats and bonnets. The ladies of Marquette will now have a chance to get their spring hats trimmed in true city fashion. As will be noticed by her advertisement Miss Howard has received a full line of the latest things in the millinery line, and a call at her store on Washington street, will prove that her stock has been very carefully selected.

The strike mania is spreading, even the children have been affected by it. Monday morning one hundred school-boys struck at Greenpoint, L. I., for an increase of fifteen minutes in the time for the morning recess. The doors of the school house were guarded and all scholars were kept out. The strike is apparently organized, however, when the mother of the ring-leader appeared upon the scene and, taking her hopeful by the ear, marched him into school and set him down in his seat, by no means quiet. The other boys then went to their regular routine. At Troy, N. Y., half the scholars in one of the ward schools struck Monday noon for one session, from 8 to 12 o'clock. The boys used their fists to compel other boys to join them, and delegations of strikers, after the approved method, went around to start the movement in the other schools. The police took a hand, however, and clubs proved tripping. In Marquette Penciling learns that the members of a church blessed with a prosy pastor are getting feverish and think of striking for shorter sermons and more spirited selections by the choir; if no concessions are made they intend to boycott the contribution boxes until the pastor comes to time.

An exchange gives "Petroleum V." the following good send off: "There was a time when D. H. Locke, the 'Nabob' of literature, was a devoted worshiper at the shrine of Bacchus. He used to carry a jar of whiskey with him in his vest, and several times when on his lecture tours the occasion found him too full for utterance. But 'Nabob' at last formed, and is now at the head of a most fervid temperance, from one extreme he went to the other, per ton..... \$6 50 'Soft' half per ton..... 3 50 'Canned Coal,' per ton..... 2 40 'Dry Hard Wood,' per cord..... 5 00 'Green'..... 4 50 F. B. SPEAR.

Just received, a large selection of millinery goods, such as bonnets and hats, new style trimmings, new style ribbons, new style laces, beautiful flowers of all colors, as well as plain ties and feathers are not to be worn this season; pure ostrich ties will be closed out at from five to six a bunch; also a line of fancy-work materials and stamping will be found at Miss H. Howard's store, Washington street.

NOTICE To jobbers, contractors, and families: You will save money by buying your grain, feed, flour, etc., of me. I have in stock Michigan winter wheat flour, 'Silver Star' and 'Key' Minnesota patent 'Pillsbury Best'; Wisconsin patent 'Waverly and Purdy'; 'Hay, Feed, corn, oats, and flour in car lots, delivered at any point on the D. M. & M. railway or M. H. & O. F. B. SPEAR.

SWEET CREAM. Two dollars per gallon, delivered in Marquette, Neagrace or Ishpeming by express on short notice. WILL H. THOMPSON, Port Howard, Wis. 3-20ml

W. C. Finney returned from Chicago yesterday. T. W. Hunt, of Fond du Lac, is a guest at the Mesnard.

Mrs. D. H. Merritt arrived home yesterday afternoon via the C. & N. W. A large delegation of Ishpemingites called down by the Notton trial, died at the Clifton yesterday. They were F. M. Notton, G. H. Arthur, P. C. Juedeko, C. H. Bloss, William Mainburg and M. C. Murphy.

Dr. H. S. Tall, of the Republic mine, was in the city yesterday as a witness in the case of The People vs. Goggin, who assaulted Ryan. Dr. Tall says that Ryan's neck is recovered, and that he is well on the road to recovery.

Captain Johnson Vivian, of Hancock, captain of the Franklin mine, registered at the Mesnard yesterday. He is on his way to

attend the annual meeting of the stockholders of his company which takes place on the 21st.

J. H. Sawbridge, G. H. Abee and M. A. Gibbs, of Neagrace, died at the Clifton yesterday; circuit court officers.

ENTRAVAGANCE. The Curse of the Million Heaping Up the Coffers of the Few. If there was no such thing as extravagance every man might have a shanty of his own, a wife, some children, a cow giving milk, \$100 in the bank, and land and flour enough to do him all summer, and no man might be under the necessity of using a clay pipe, or of smoking some other man's tobacco; nor might a man be brought so low in the world as to have reason to wish that his only wife and all her relations for \$50 a piece, cash down.

If there was no such thing as extravagance there would be no strikes, no Knights of Labor, no monopolists; poor-houses would be unknown, and the word "hunger" might be so rarely used that the man who didn't read much might have to look it up in the dictionary to see what it meant.

It is extravagance that makes some comparatively rich and that keeps thousands comparatively poor. A man worth fifty dollars or so; then in an hour of vice and dissipation he flings it all away. His appearance is more costly, some, and he is despised on every hand. His gaunt and starving wife, in some black and lonely hovel, looks in the cupboard and sees no bread. She hears her naked children cry, "Mamma, I am hungry," her heart breaks, she calls for the children, she wishes she were there and her children with her. Heaven views the scene and weeps; hell views it and rejoices. But in the meantime, through the extravagance of that man, and others of his class, the wealth of somebody else is increasing, and the daughter of the somebody else plays the piano, puts on style, and turns up their noses at rags and poverty when they meet them on the street.

A. S. WESTLAKE

OPERA HOUSE. DUNLAP HATS. E. H. Vaningen & Co. Imported - Woolens.

Dry Goods and Groceries. SPECIAL BARGAINS IN Black Brocade Silk Velvet. Black Silk Plushes. Black Silk Velvets. Black Gros Grain Silks. CORSETS, white and colored. Low Cost Wool Mixed Dress Goods
