FOREIGN NEWS BUDGET.

Dublin High Court Refuses the Ap-
peal for an Injunction Against
Magistrate Shannon.

GERMAN EMPEROR CUTS DOWN EXPEN-
SES BY A VISIT TO AUSTRIA.

Police Receive Another Letter From Jack the
Ripper—Promises to Furnish a Sensation.
Action of Labor Congress.

IRELAND.

DUBLIN, Oct. 1.—The appeal of
Messrs. Dillon, O'Brien and their fel-
low-accused to the high court of justice
for a writ to prohibit the magistrate of
Tipperary from proceeding with the
conspiracy cases on the ground of bias,
has failed of its object. Judge Holmes
decided this morning not to grant the
writ.

A note taker employed by the police
at Tipperary has made some damaging
admissions in regard to last Thursday's
collision in front of the court house.
He says that at the time the trouble
began he was inside the house. He
was attracted by the noise and rushed
to the street, carrying a revolver in one
hand and a stick in the other. He
made his way into the midst of the
melee and began to use his stick vigor-
ously. He said he must have struck a
half dozen persons, while he himself
received no blow. The note taker was
in plain clothes at the time and was
employed to take notes in short hand.

GERMANY.

BERLIN, Oct. 1.—The Reichs Anzeiger
says that Sir Francis De Winton has
been censured by the Reichstag for his
recent insult to the German flag, and
has sent an apology to the German gov-
ernment which the latter has accepted.
Negotiations are now in progress for
a railway convention between Austria
and Germany.

ENGLAND.

LONDON, Oct. 1.—All London is ex-
cited and particularly the Whitechapel
district, over the published announce-
ment that "Jack the Ripper," that mys-
terious man who has taken no less than
nine lives since he first appeared, has
declared his intention to resume opera-
tions. The Whitechapel police have re-
ceived formal warning from "The Rip-
per" that he is about to kill another
woman. The hand writing of the letter
is identical with that of the other let-
ters, which it had been the custom of
the murderer to send to the police
prior to the murder and mutilation of
some poor creature in Whitechapel.
As these warnings have invariably
been followed by a horrible crime, the
police patrol in the district frequented
by "The Ripper" has been doubled, and
every effort made to prevent another
murder, or in case a crime is commit-
ted, to arrest the assassin.

General Lord Wolsley, accompanied
by his staff, has gone to Dublin to
assume command of the troops in Ire-
land.

A SENSATIONAL CASE.

LONDON, Oct. 1.—A sensational case
came before the Westminster police
court this morning. The principal per-
son involved was Sir Thomas George
Freake, whose town house is at No. 87
Anslow Gardens. Sir Thomas was ar-
rested at the instance of a Mr. Gibson
who used to be his intimate friend.
The story told by Gibson is that Sir
Thomas lured him on one pretext or
another to the cellar of an empty house
in Kensington. There the baronet, as-
sisted by friends, overpowered Gibson
and put him in handcuffs. This done,
the assailants

examined GIBSON'S POCKETS
and took possession of his keys. With
these Sir Thomas proceeded to St.
George's club in Hanover square, went
to Gibson's private box, unlocked it
and took out and destroyed the letters
and photographs which Gibson had re-
ceived from a lady. After that he
sent a telegram from the club to which
he signed Gibson's name. The magis-
trate, after a brief hearing, remanded
Sir Thomas for a further examination.
It is asserted that Sir Thomas and
Gibson were rivals for the affections of
the lady whose letters Sir Thomas ap-
propriated, and that both of them had
been on terms of extreme intimacy
with her. It is further asserted that
the lady had tired of Gibson's atten-
tions, and that she was present in the
cellar at the time of the assault on
Gibson.

At today's session of the dockmen's
congress the subject of the new ship-
ping federation was earnestly discussed.
It was decided that the dockmen must
make a great effort to prevent the or-
ganization of the ship owners from
crushing the union, and with this end
in view it was determined to raise a
fund of £50,000 with which to fight the
federation. It is proposed to obtain
this sum by levying a tax of one pound
on each member of the union and by
making an appeal to the public for
help. The congress next considered
the advisability of boycotting all ves-
sels arriving at English ports from
Australia which have been loaded there
by non-union men. After a long dis-
cussion the congress decided not to
boycott Australian arrivals or to inter-
fere with the Australian trade in any
way.

SCOTCH FURNACES DUMPED.

LONDON, Oct. 1.—The furnaces are
being dumped in all the iron centers of
Scotland. The employers announce
that it is possible that they will be un-
able to fulfill their contracts. Every-
thing indicates a severe struggle be-
tween the workmen and the employers.
The Post says that the McKinley bill
will force into prominence the ques-
tion of commercial union between England
and her colonies.

AUSTRIA.

VIENNA, Oct. 1.—The emperor of
Germany arrived here this morning.
Emperor Francis Joseph, accompanied

by the Archduke William and Arch-
duke Renir met him at the railway sta-
tion. The greeting of their majesties
was affectionate. A state carriage,
which was in waiting, was entered by
their majesties and they were driven to
the hofburg. An immense crowd lined
the route and the two emperors re-
ceived an ovation.

This afternoon Emperor William vis-
ited the imperial mausoleum in the
Capuchin church and placed a wreath
upon the coffin of Prince Rudolph.
The German and Austrian emperors
and the king of Saxony started this
evening for Mueszteg. They are to go
on a hunting expedition in the Alps.

HUNGARY.

PESTH, Oct. 1.—Louis Kossuth, the
Hungarian patriot, has written a letter
in which he advises the Hungarian ex-
tremists to take their stand on the du-
alist principles enunciated in 1849.

IRON AND STEEL INSTITUTE.

Carnegie Delivers Address of Welcome—An
Excursion up the Hudson.

New York, Oct. 1.—The first session
of the International Iron and Steel In-
stitute was opened in Chickering Hall
this morning. The foreigners turned
out bright and early from their head-
quarters. Sir James Kitson, the presi-
dent of the British association, opened
the meeting. He said a few words of
congratulation to the members of his
society upon having an opportunity to
visit and see for themselves the resour-
ces of this country.

Andrew Carnegie then delivered the
address of welcome. General Sherman
came upon the platform and was intro-
duced to the chairman. The audience
gave him an ovation.

James Gayley, of Bessemer, Pa.,
then read his paper on the "Develop-
ment of American Blast Furnaces with
Special Reference to Large Yields."
Mr. Gayley thought the day was not
far distant when this country would be
able to show a record of 300,000 tons
from a furnace in three years and on a
single lining.

Sir Lowthian Bell, commenting on
Mr. Gayley's paper, said two weeks
ago, when he heard that a blast fur-
nace turned out 2,500 tons of pig iron
per week he did not believe it, but now
such facts and figures were put before
him that he was fully convinced of this
marvelous accomplishment. The presi-
dent announced that at this meeting
his term of office concluded and it was
necessary to elect a successor. He pro-
posed Sir Frederick Abel, of Woolwich,
Eng., who was unanimously elected.
The session then adjourned in order
to take a trip up the Hudson river.

New York, Oct. 1.—Hon. W. P.
Caruthers, of Denver, Col., appeared
before the British Iron and Steel In-
stitute to-day and on behalf of the gov-
ernor of Colorado invited the members
of the institute to visit that state and
inspect its mines while on their tour
through the country. Mr. Caruthers
acted as a special messenger from
the mayor of Trinidad, Col., inviting
the excursionists to visit Trinidad and
see the opportunities afforded for the
erection of iron and steel plants. A
number of the Britishers have signified
their intention of going there before
returning home.

ARCHBISHOP HEISS' SUCCESSOR.

Bishop Wigger of Newark, N. J., Said to
Have Received the Appointment.

MILWAUKEE, Wis., Oct. 1.—A dis-
patch from Newark, N. J., states that
Bishop Wigger, of the Newark diocese,
has received word from Rome of his
appointment to succeed Archbishop
Heiss, as the head of the Milwaukee
see. The report cannot yet be con-
firmed.

Bishop Vertin was seen last evening
by a MINING JOURNAL reporter in re-
gard to the alleged appointment of
Bishop Wigger of Newark as arch-
bishop of Milwaukee. He stated that
he had received from Rome no intima-
tion whatever on the subject. As
Bishop Vertin is the senior bishop of
this province the first official infor-
mation of the appointment of a successor
to Archbishop Heiss would be sent to
him.

NEWARK, N. J., Oct. 1.—Bishop
Wigger said this afternoon positively
that he would not go to Milwaukee.
His health is poor and he is happy and
contented where he is now.

WILL TRY TO SAVE McELVAINE.

Kemmler's Electroconvulsion Will Be Used to
Show That the Law Is Inhuman.

New York, N. Y., Oct. 1.—Charles
McElvaine, the convicted murderer, was
sentenced to death this forenoon. His
counsel made an effort to have the
verdict set aside, but Judge Moore denied
the motion and sentenced McElvaine to
death in the manner prescribed by law
at the Sing Sing state prison within
two weeks, beginning Monday, Novem-
ber 17th next. Efforts will be made to
secure the freedom of the convict in
view of the recent Kemmler electrocon-
vulsion. The attorneys for McElvaine
will claim that the electrical mode of death
is cruel and inhuman, as evidenced by
the physicians who witnessed the death
of Kemmler.

THREE TIMES AND OUT.

Third Convention of the Fourth District Ohio
Democrats Names a Candidate.

CLEVELAND, O., Oct. 1.—The demo-
cratic convention of the Fourth Ohio
district at Eaton nominated M. J.
Gautz, of Miami county, for congress.
This is the third convention held, two
others having adjourned without being
able to make a nomination.

IDAHO ELECTION.

Indications Point to a Republican Victory on
the Entire Ticket.

BOISE CITY, Idaho, Oct. 1.—The first
state election was held today in this
state congressmen and the entire
state ticket. The indications so far
seem to favor the republican ticket.

WHEAT'S CAREER WOUND UP

House Postmaster Found Guilty of
Charges by Unanimous Vote
of the Committee.

HE SEES THE SHADOW OF THE COMING
EVENT AND RESIGNS.

Senate and House Conclude the Business of the
Session and Adjourn—Veto Messages.
Tariff Bill Signed.

WASHINGTON NEWS.

WASHINGTON, Oct. 1.—The special
committee which has been investigating
Postmaster Wheat of the house has de-
cided by a unanimous vote to report to
the house that Wheat is guilty of the
offenses charged; and recommending
the passage of a resolution declaring
the office vacant.

Captain Wheat read the writing on
the wall and resigned. The representa-
tives of the house are very much dis-
tressed that the session should come
to an end in this disgrace, but the evi-
dence was so conclusive that the re-
publican members of the committee
without a dissenting voice joined with
the democrats in recommending Cap-
tain Wheat's discharge.

TARIFF BILL A LAW.

WASHINGTON, D. C., Oct. 1.—Presi-
dent Harrison at 3:22 p. m. signed the
tariff bill and the measure is now a law.

THE SENATE.

WASHINGTON, Oct. 1.—In the senate
today, after routine business, the vice-
president laid before the senate three
veto messages from the president, two
of them on bills referring to the court
of claims, the third one, the bill to pro-
hibit bookmaking and pool selling in
the District of Columbia for the pur-
pose of gambling. The messages were
laid on the table.

At five minutes before 3 o'clock the
tariff bill, enrolled, was received from
the house with the speaker's signature
and it was immediately signed by the
vice-president and sent to the president
of the United States for his signature.

Mr. Aldrich thereupon reported back
the adjournment resolution amended so
as to fix the time at 5 p. m. to-day, and
it was agreed to. Mr. Harris offered a
resolution tendering the thanks of the
senate to Vice-President Morton for the
dignified, impartial and courteous man-
ner in which he has presided over the
deliberations of the senate and it was
adopted unanimously, as was also a
similar resolution complimenting Sena-
tor Ingalls as president pro tem.

Mr. Sherman, in company with Mr.
Harris, reported that the committee of
the two houses had waited on the
president and had informed him that
the two houses had concluded their
business and were prepared to adjourn
if he had no further communication to
make to them; and that the president
had answered that he had no further
communication to make. A message
was received from the house announc-
ing its concurrence in the resolution as
to negotiations with Great Britain and
Mexico to prevent Chinese entering the
United States.

Mr. Morton then arose and made a
brief address, thanking the senators
for their patience and kindness toward
him. In conclusion he said: "I feel
that I may with good warrant congratu-
late the senate and the country upon
the large number of important meas-
ures which have received the careful
consideration of this body and become
laws. It only remains for me to declare,
as I now do, that the senate stands ad-
journed without a day." [Applause.]

THE HOUSE.

WASHINGTON, Oct. 1.—There was the
usual routine business in the house this
morning. During the early session Mr.
Allen criticized the republican cam-
paign handbook and sarcastically re-
ferred to the fact that it made no refer-
ence to the speech of the gentleman
from Ohio, (Mr. Kennedy) making
charges against the chairman of the re-
publican national committee, charges
which had never been denied.

Mr. Bayne (Pa.) denied the truth of
the charges. Attacks had been made
upon Lincoln, Grant, Blaine, Garfield,
and Conklin, and now attacks were
made upon another republican leader.
Not a name of a prominent republican
in the past twenty years had escaped calumny.
Not a prominent republican
whose name had added lustre to the his-
tory of the country had been exempt
from attack. Not a single man who
had done exceeding honor to this great
country had escaped the venom, the
spleen, the calumny and the mean-ness
of the democratic party. Who were
dishonored? The men who made the
attacks, not the men who were at-
tacked.

Pending discussion, Mr. McKinley
called up the resolution for final ad-
journment with an amendment fixing
the hour at 6 o'clock. Agreed to. The
report of the committee, declaring the
office of postmaster of the house vac-
ant, was then agreed to. The house
then took a recess. During the recess
nearly all the members left the hall to
make preparations for their departure
from the city; and when the speaker re-
convened the house that official looked
down upon a vast array of empty seats.
He merely stated that according to the
concurrent resolution he declared the
first session of the fifty-first congress
adjourned without a day.

Forecast of the Weather.

WASHINGTON, D. C., Oct. 1.—S. P. M.—
The signal service reports the following
as its forecast for the next 24 hours:
For Wisconsin and Michigan: Warmer;
fair weather; preceded by light rains in
southeast portion; southerly winds.

A Democratic Victory.

MACON, Ga., Oct. 1.—Absolute quiet
characterized the election here today.
The vote was light, there being
no opposition to the democratic nomi-
nees.

Schoolcraft	1,235	2
	38,095	79

By order of Congressional Committee. C. Y. OSBURN, Chm.
Dated Sept. 15, 1890. 9 16 2w

WITHIN the past twelve months, twenty-four iron furnaces have gone out of blast in Scotland, the number of furnaces now in operation in that country being but sixty. This denotes a rather unsatisfactory condition of the iron trade in Scotland, it being the result of a steadily diminishing demand for "Scotch pig," which no longer holds the place that it formerly did in the market, owing to the improvement in grades generally that has followed the adoption of better processes of manufacture.

ROBERT C. SPENCER, a son of the originator of the Spencerian system of penmanship, has been nominated for representative in congress by the republicans of the Milwaukee district. Mr. Spencer has been connected with the management of a prosperous business college in Milwaukee for years, and, being an educator by profession, is an exceedingly proper candidate to place before the people of the district on the issue that has arisen in Wisconsin this year.

THE Duluth & Winnipeg railroad company wants the citizens of Duluth to take \$500,000 of the company's stock, and the chamber of commerce of that city has appointed a committee to solicit subscriptions to help the railway company out. They are always ready to help anything that promises to help the town in Duluth, and though they sometimes get badly roped in, their public spirit is to be commended, and is doing wonders in building up the city. It is possible that the people of Duluth might be a shade more conservative in that regard, but it is better to be a little over-enterprising than too conservative.

JAMES M. SWANK, the American Iron and Steel Association's general manager, expresses himself satisfied with the metal schedule of the new tariff law, regarding which some apprehension has been felt by the manufacturers. It is a compromise schedule, but Mr. Swank says that it will be found fairly protective of the iron and steel industries, and contains many beneficial features that were not contained in the old law. The duty on steel billets he regards as too low, but considers the schedule all that could be desired with that single exception.

So much has been said and written for a year or two about the decadence of New England, that ex-Secretary George S. Boutwell, of Massachusetts, has concluded that it is time the facts were again presented which, he thinks, show that New England is in no danger of retrogression. In the Forum for October he sets down the statistics of many leading branches of industry, such as manufactures and agriculture, as well as the evidence given by deposits in savings banks and the amounts spent for education, to show that New England is not falling behind any other part of the country. Since most of the criticism of New England has been made by critics of the protective tariff, Mr. Boutwell maintains also that New England owes much of her prosperity to protection.

ABOUT the most complicated and interesting congressional contest that has yet developed this year is that now on in the Fifth Minnesota district, at present represented by Mr. Comstock, who has been re-nominated by the republicans. This is the district formerly represented by Hon. Knute Nelson, who dropped out two years ago, it will be remembered, because his tariff views did not coincide with those of his party. Since the nomination of Comstock, Gilman has come out as an independent republican candidate, and it is thought that he will be supported by Nelson, who is not well disposed toward Comstock, though this is not certainly

known yet. The Farmers' Alliance has also a candidate in the field, and the democrats have placed in nomination Senator Whiteman, of Duluth, who is unquestionably the strongest man in that party in the district. Whiteman declares that he is going to be elected, and is making a strong canvass, and it is no secret that Comstock's supporters regard the situation as perilous. It is conceded that the alliance candidate will draw much more heavily from him than from the democratic nominee, and if the Gilman movement cuts into his vote seriously there is danger that he will be defeated, notwithstanding the very large republican majority in the district.

THE report comes that the world's fair commission is getting away with the million and a half appropriated by congress for the great exposition so fast that there would be much left to apply on anything else when the commission gets through with the preliminary work. A congressional committee, appointed for the purpose, has just looked over the books of the commission, and finds that the money is going out at an alarmingly rapid rate. The committee made some suggestions to the commissioners that they did not take kindly, and there is some likelihood of a hitch if the commission doesn't get off its high horse and consent to go a little slower.

BUT for the risk of provoking the republicans to remind them of how Silcott made away with the salaries of several congressmen at the beginning of the session, the democrats would now have a chance to "chaff" their opponents unmercifully over the Wheat episode. The investigation into the charges against Wheat, the house postmaster, disclosed that he and his son Walter, who served as his assistant, worked the office for boodle with the most unblushing disregard for decency. They let a contract for carrying the mails with the stipulation that the man who secured it should accept \$1,800 per annum for the service, the precious father and son taking the balance of the \$4,000 that the government paid under the contract. It appeared that the amount which the contractor was forced to take was quite insufficient for the work, but the grasping postmaster refused to allow him even half what the government was paying for the service. A young man who was put in a sinecure position, the salary attached to which was \$100 per month, got \$10 as his share of the swag, the Wheats, *pa'er et filius*, taking the remaining \$90. Other instances of their rapacious dishonesty were brought to light, and the house was much shocked by the disclosure of rascality on the part of its postmaster that the investigation resulted in. Wheat was appointed from Racine, Wis., on the recommendation of Representative Caswell, who has been defeated for a re-nomination. If the character of this appointment is to be taken as evidence of the discrimination that Caswell exercises in recommending men for government places, the republicans of this district did wisely in retiring him.

FOR THE LEGISLATURE.

The republican representative districts of this county did their work well yesterday, the nominations made assuring us of trustworthy and capable men in the lower house of the state legislature. During the last session of the legislature Mr. Wagner, the nominee in this district, proved himself active, faithful and industrious, and it was largely through his vigilance and devotion to the interests of the city that we secured the special legislation required to enable the city to purchase and improve the valuable water power on Dead river which has since been utilized with such satisfactory results to do public and private lighting here. The nominee in the Second district, Mr. St. Clair, is a stirring business man of Ishpeming, and will make a valuable representative.

It now only remains to make an equally judicious choice of a candidate for state senator to insure us a highly satisfactory reputation in both branches of the state legislature. The MINING JOURNAL is gratified to know that there is every certainty that the selection made will be one that will meet the warmest approval of the people of Marquette county, as well as of the other counties of the district. Mr. Joseph Flesheim, of Menominee, has consented to accept the nomination, provided he is the choice of the republicans of his county. That renders his nomination sure, for there is not a man in the whole district whom the republicans of Marquette county would sooner have represent them in that capacity than Mr. Flesheim. The delegates chosen to speak for the county in the senatorial convention are understood to be for him to a man, and he will doubtless be nominated by acclamation. Mr. Flesheim is splendidly qualified for the office, and this paper is more than pleased to know that he is available for the place, feeling assured that where the interests of Marquette are concerned he will be found neither a traitor nor a laggard.

FACTS FOR FREE TRADERS.

A staple free trade argument against the protection system is that by imposing a tariff on the productions of other countries we practically shut our own

manufacturers out of foreign markets, and force them to rely on the home market. This is always asserted in such a manner as to convey the impression that the people of other countries are great consumers, consequently liberal buyers, while those of the United States are not—in other words, that the home market is not of much account, while that abroad, from which we are shut out by the mischief-working tariff, has wonderful absorbent qualities.

An article in the Age of Steel gives some facts and statistics showing the capacity for consumption of the United States that should teach the free traders more respect for the "home market," which they affect to hold in such contempt. THE MINING JOURNAL takes pleasure in reproducing the article, specially for the enlightenment of believers in the policy of opening up the American market to all comers in order that we may get a chance to occasionally sell something abroad, and generally because it is highly instructive and interesting.

The American market is a gigantic institution, and its business is in correspondence with its magnitude. In the consumption of food, clothing, tools, implements, and the innumerable articles that constitute the bric-a-brac of comfort and luxury, we surpass all other countries according to the ratio of population. We figure on the statistical state as less than one-twentieth of the world's inhabitants, but on the voice of consumption we are placed as absorbing from one quarter to one-half of the great staples of the world's production. In the matter of sugar the American alone for the granulated syrup is proverbial. The world's crop of sugar is placed at 5,114,830 tons, and of that enormous mass of prepared saccharine this country consumes 1,422,000 tons, or 28 per cent of the whole product of the planet. The coffee of Uncle Sam has a commercial history and an enormous absorbing capacity for the narcotic berry. The total production of the world's plantations foots up at \$56,000 tons; and of this amount we swallow a decoction of 265,000 tons, or 30 per cent of the product. Of what we wear as apparel and use in the millinery of home comfort, we figure high among the nations that wear clothes and have evolved their wardrobe from the fig leaf of the ancestral Adam. Our consumption of wool is more than a quarter of the world's known production, and if, as computed by some statisticians, we use 600,000,000 pounds of what the sheep's skin gives to man, our consumption of the whole would be nearly one-third. Out of 11,421,000 bales of cotton, of 400 pounds each, we use 2,685,000, a little over one-quarter of the total. The India rubber product of the globe gives one-third of its output to the United States. We buy up more than half the tin dug out of the earth, and burn 40 per cent of all the coal that finds its way from the mouth of a pit to the grate of a stove or the door of a furnace. The world's production of iron is 24,900,000 tons, and of that mineral product we consume 8,000,000 tons, or about a third. The steel industries of the world pay us the compliment of handing over of manufactured metal for American use 3,385,732 tons, out of a total product of 16,500,000 tons; being about a third of what the Vulcans of the globe run out of their furnaces. In the use of copper we take about 30 per cent, and of lead a much larger proportion. The means of purchase and of appropriating so huge a slice of the world's loaf for the American consumer are traceable to many causes, material as well as economic, and every phase of politico-economics claims the honor of appetizing the American market; on that point men have an ample margin to disagree, but none dispute the historic fact that the invoice of the national market is the index of its capacity and prosperity.

Woodward the piano tuner for reliable work.

There is more Catarrh in the section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease, and therefore requires constitutional treatment. HELL'S CATARRH CURE, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly upon the blood and mucous surface of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. CHENEY & CO., Toledo, O. Sold by Druggists, 75c.

PRONOUNCED HOPELESS, YET SAVED.

From a letter written by Mrs. Ada E. Hurd of Groton, S. D., we quote: "Was taken with a bad cold, which settled on my lungs, and I set and finally terminated in consumption. Four doctors gave me up saying I could live but a short time. I gave myself up to my Saviour, determined if I could not stay with my friends on earth, I would meet my absent ones above. My husband was advised to get Dr. King's New Discovery for Consumption, Coughs and Colds. I gave it a trial, took in all eight bottles; it has cured me and thank God I am now a well and hearty woman." Trial bottles free at H. H. Stafford & Son's drug store, regular size, 50c and \$1.00.

The World's Fair.

The excitement caused by this great event is scarcely equalled by that produced by the great discovery of Dr. Miles—the Restorative Nerveine. It speedily cures nervous prostration, change of life, pain, dullness and confusion in head, fits, sleeplessness, the blues, neuralgia, palpitation, monthly pains, etc. C. W. Snow & Co., of Syracuse, N. Y.; Talbot and Moss, of Greensburg, Ind.; and A. W. Blackburn, of Worcester, O., say that "The Nerveine sells better than anything we ever sold, and gives universal satisfaction." Dr. Miles' new illustrated treatise on the nerve and heart and trial bottle free at H. H. Stafford & Son's Drug Store.

100 Ladies Wanted, And 100 men to call on any druggist for a free trial package of Lane's Family Medicine, the great root and herb remedy discovered by Dr. Silas Lane while in the Rocky Mountains. For diseases of the Blood, Liver and Kidneys it is a positive cure. For constipation and clearing up of the complexion it does wonders. It is the best spring medicine known. Large-size packages, 50 cents. At all druggists.

For the cure of this common trouble, Tutt's Liver Pills have a reputation unsurpassed. Elegantly sugar coated. SOLD EVERYWHERE.

AN OPEN LETTER

From a Well known ragpicker - "Positive Cure for Stomach Troubles."

TO WHOM IT MAY CONCERN: In the summer of 1879 I was first afflicted with that most dreaded disease, dyspepsia, and for over fifteen years I suffered terribly at times. In the meantime I tried every so-called remedy imaginable, without finding relief. Having been in the drug business since 1868, I determined to help myself if I lay in the power of medicine. Two years ago I succeeded in discovering a remedy, it cured me. Until I had given ample time for possibility of doubt, however, I kept my secret almost to myself, putting up the medicine for only a few of my sorely troubled friends, every one of whom was cured. I now know the medicine to be a positive cure, and have decided to put it on the market, that my discovery may do humanity all possible good. It will be known as "Bruske's Positive Dyspepsia, Liver and Kidney Cure," which is guaranteed to cure all ailments of the stomach, liver and kidneys. I have a number of testimonials which afflicted parties may be interested in. E. BRUSKE, 416 Genesee Ave., East Saginaw Mich. Sold by all druggists. \$1 a bottle; three bottles, \$2.50.

Lake St., Chicago, Ill.

A NEGAUNEE TENEMENT HOUSE.

L. Corbit has Let the Contract for One That Will Provide Room for Eight Families.

A Finn Who Wanted Gore—Almost a Runaway—A Negaunee Man Got There.

A Large Building.

At last the contract for doing the frame work of L. Corbit's large tenement house on Lincoln street has been let, Louis Chausse being the lucky bidder. The first story and basement are finished, both being built of stone. The building will be 45 feet by 60 wide, and three stories high, exclusive of the basement and attic. The entire structure will cost about \$8,000, and will compare quite favorably with the other residences around it, though of such unusual size. The plans were furnished by Mr. Grip, of Ishpeming. The front elevation, which is the broadest, will face upon Healy avenue. This will be made attractive by a wide veranda on the first floor and extending along the entire front. The front door enters upon a long hall, extending the length of the building. There are similar halls upon the other floors, the halls really dividing the house into two distinct parts. The two divisions will be laid out similarly, so that it will practically be a double house. The basement will be divided by brick partitions into eleven supply rooms of equal size. The house has been laid out so as to accommodate eight families, with a large living and dining room, a kitchen and pantry and two bedrooms for each. Each family suite of rooms will be arranged so as to be entirely separate from and have no communication with the rest. The attic will contain six large rooms, which will be lighted by gable windows projecting out from the roof. The roof will be shaped like a truncated cone, which irregularity will soften the angular appearance of the structure. The building is situated on a rise of ground, and will command a fine view of the town.

A Ferocious Finn.

A drunken Finn created quite a little excitement on Main street yesterday morning. He opened up the disturbance by yelling, but stopped when cautioned by an officer. Later in the day he selected one of his companions as an object of assault, and threatened, so the man alleges, to kill him. He dogged the scared man around the streets for nearly two hours, until the fellow's nerves gave way, and he made a complaint to Marshal Cunningham. The murderous Finn was arrested as a suspicious character, and a long pointed knife after the pattern of an Italian stiletto was found concealed in his bosom. He was fined \$5 and costs by Justice Jones.

Deserved to be Cowhided.

A careless driver nearly caused a runaway on Main street yesterday afternoon. He was coming up street at a lively rate, and when two ladies in another rig attempted to pass him he allowed his horse to hold such a course that the wheels of the buggy became entangled. One of the wheels of the carriage which the ladies were driving was broken and the axle was bent to an angle of 45 degrees. Both ladies were nearly thrown from their seats by the collision, but the boorish driver who caused the trouble urged his horse on without ever looking to see how they fared. Luckily the horse they were driving was a quiet one or the accident might have had a more serious ending, especially as one of the ladies is an invalid. "Twas a good thing for the man in the other rig that he had made his escape before the crowd came up, for judging from the sentiments expressed, his face would have collided with somebody's fist if he hadn't got out of the way.

Mr. Richardson's Nomination.

It is a matter of profound satisfaction to the republicans of this city that the convention held yesterday at Ishpeming passed favorably on the claims of the Negaunee candidate for the nomination for sheriff. The members of the party here are not bolder grumblers, but they were beginning to feel that they were not being fairly treated, and to chafe somewhat in consequence. Mr. Richardson's nomination removes that feeling and satisfies the republicans of Negaunee that their party friends in the other cities desire to give the claims of this city fair consideration and treatment. The whole ticket will now receive an enthusiastic support in Negaunee, which will roll up a majority for every man upon it that will testify to the satisfaction of the republicans here with its make-up.

Mr. Richardson is both popular and capable, and will run well and make a first-class officer.

An amorous Swede was treated to a good ducking in Teal lake yesterday afternoon. He was standing on the dock carrying on a lively conversation with some girls who were in a row boat a short distance out. He became so absorbed in the flirtation that he forgot his perilous proximity to the edge of the dock. Presently he took a step too many in the direction of the fair beguilers and went plump into the water. He came up close to the dock and, frantically clutching one of the posts, began to yell lustily for assistance. The young ladies seemed to enjoy his discomfiture immensely, and kept up a fire of remarks until the thoroughly soaked swain was rescued from his position by the water works engineer. When he was safely landed on the dock he did not wait till his hat, which had floated off on the surface of the water, had been fished out, but started for town hatless and dripping, a wetter and, it is to be hoped, a wiser masher than he was before he got into the lake in pursuit of a conquest.

A colored picture of Charles Sundberg's new block is on exhibition in the window of his jewelry store, and attracts considerable attention from the passers by.

Joseph D. Moore, the republican candidate for state treasurer, accompa-

nied by Mr. Darius D. Thorp, were in town yesterday afternoon. A reception was tendered them at the Breiting, which was attended by all the prominent citizens of Negaunee. Over four hundred and fifty callers visited them at the hotel.

Mr. John Freeman, of this place, has been engaged by George Wagner, of Marquette, to conduct some extensive explorations for him in the vicinity of Crystal Falls.

An average of one deer per day has been received here from the vicinity of Cheshire Junction ever since the season opened.

A special meeting of the school board was held last evening, with but three of the members present.

A. Erickson has just added a five and ten cent counter to his already well stocked notion store.

C. L. Sporley has gone to Ironwood on a business trip, and will be absent till to-morrow.

J. R. David, of Marquette, was in town yesterday, visiting P. B. Kirkwood and family.

Born, to Mr. and Mrs. Robert Taylor, yesterday morning, a daughter.

The firemen will give a social hop in their hall to-morrow evening.

A little daughter of George Anderson died Monday and was buried yesterday.

A New Collar Bone.

A boy of 18 years was admitted to the Mount Sinai hospital suffering from a swelling over the region of the collar bone. It was evident that the bone was deeply affected and the only recourse was an operation, which was made. The entire bone was found dead, destroyed by inflammatory action, necessitating its removal, but in doing so the membrane immediately next to it and which nourishes the bone was carefully incised, stripped from the bone and replaced in the wound as nearly as possible in its original position, the object being to have it form new bone matter throughout its length and thus reproduce an entire collar bone. The wound having been dressed the arm was subsequently kept in the same position that a fracture of the collar bone would have required, the result being that ten weeks after the operation the patient was discharged with a brand new collar bone, completely reproduced with new joints at either end, and the perfect use of his arm.—New York World.

Some Mistake.

Sharpwit—I have a neighbor whom I want to drive out, so I can get his property cheap. I have tried keeping chickens, dogs and parrots, but without success. A neighbor of yours, however, tells me you have a pet which he will warrant to clear a neighborhood of inhabitants in less than no time, but I forgot to ask what it was. Have you any particularly noisy parrots or anything of that kind?
Suburban Woman—Indeed I haven't anything at all except a little kitten. There must be some mistake. Janet Janet! The baby has waked up. Go to him quick.—Good News.

Don't Toy with Your Eyes.

Many people are troubled with itching eyes and try all sorts of washes. The eye is one of the most valuable organs of the body. Unfortunately for careless humanity it is also one of the most delicate. It does not pay to trifle with it. The best way to treat itching is to use a cool, weak salt water wash every few hours. If this does no good go to a physician who makes a specialty of eye diseases.—Exchange.

Dr. Talmage receives \$15,000 a year from his Brooklyn congregation, \$12,500 from a firm for the advance publication of his sermons, \$5,500 for his contributions to a religious journal, besides what he earns on the lecture platform and from general literature work. He would lose money if he traded his income for that of the president of the United States.

IF

If gentle sleep cometh not,
If rosy lips has fled,
If weakness is ever present,
Use **Paine's Compound**. It gives new strength to the weak, new hope to the despondent, new life to the weary.

Ask Your Friends About It.

Your distressing cough can be cured. We know it because Kemp's Balsam within the past few years has cured so many coughs and colds in this community. Its remarkable sale has been entirely by its genuine merit. Ask some friend who has used it what he thinks of Kemp's Balsam. There is no medicine so pure, none so effective. Large bottles 50c and \$1 at all druggists'. Sample bottle free.

May Thank Her Stars.

The narrow escape of Mrs. B. M. Searles, of Elkhart, Ind., from a premature death is wonderful. She states that "for twenty years my heart troubled me greatly. I became worse. Had smothering spells, short breath, fluttering; could not sleep on my left side, had much pain in breast, shoulders and stomach. Ankles swelled. Had much headache and dizziness. Treatment did me no good, until I tried Dr. Miles' New Heart Cure and Restorative Nerve. The first bottle helped me, and I was soon virtually cured. For sale at H. H. Stafford & Son's drug store. A fine book on the heart and nerves free.

TALK OF THE TOWN.

Rain; stationary temperature, followed by cooler.

P. F. Mullally sent in a fine string of partridges yesterday to be divided among several friends.

The common council next Monday evening will open bids on the big Front street improvement.

Northern Passenger Agent Wilbur of the South Shore took possession of his office here yesterday.

Peter Anderson and Miss Mary Schmelzer, both of Bancroft, were married by Recorder Meads Tuesday evening.

The delegates to the county convention came home last night, all very well pleased with the ticket put in nomination.

Mr. A. R. Harlow's condition remains unchanged. It is feared that that pioneer of Marquette will never leave his bed again.

Stove men lie in fear these days of assassination by irate housekeepers who cannot get their heating apparatus set up as soon as they want it.

By an accidental ignition of phosphorus in the high school laboratory Tuesday Principal Wells received a painful though not dangerous burn on the wrist.

Chairmen of committees will be expected to say something at the meeting of the Citizens' Association next Monday afternoon.

Diamond & Winter have opened a general commission house in the basement of the Vierling block, occupying the office on Main street formerly tenanted by J. H. Gillett.

A ten year old son of Thomas McGuire broke his right forearm yesterday afternoon. He fell off the sidewalk while returning from school and struck upon a stone in the roadway.

When the new Harlow building is completed its second floor will probably be occupied by the South Shore offices. The chief engineer will then have the rooms now used by the passenger department.

The directors of the Michigan Polygraph Turning company have not yet decided upon a site for the new factory but will do so in a few days. All the stock of the company is subscribed and paid up.

The call for the fifth assessment on the opera house stock was issued yesterday. It should be paid up promptly as the contract has been let for the whole building and some heavy estimates will be coming in soon.

The upper peninsula exposition ideafinds favor with all classes of people. The coming winter a company should be organized to carry on that important work and have the exposition ready to open on October 1, 1911.

PERSONAL MOVEMENTS.

Arno Jaehning of Hancock was in the city yesterday.

Mrs. M. E. Stafford of Newberry is in the city visiting friends.

R. A. Montgomery of Lansing is in the city for a few days.

Russell C. Ostrander, the well-known Lansing attorney, is in town.

State Senator Thomas B. Dunstan of Houghton is in the city on business.

Van Dearing, district passenger agent of the South Shore with headquarters at Jackson, is in the city.

Darius D. Thorp, of the Lansing State Republican, is in the city in company with Joseph B. Moore.

Mr. F. N. Finney, vice-president of the South Shore and president of the Soo line, arrived in the city yesterday from Milwaukee, accompanied by Mrs. Finney. They left for Minneapolis last evening.

Mr. Joseph B. Moore of Detroit, candidate for state treasurer on the republican ticket, returned to the city last evening after a day spent at Ishpeming and Negaunee. He will remain here, calling upon friends, today and perhaps tomorrow.

MARINE MATTERS.

PORT LIST

Arrived—Hale, Bradley, Glidden, M. B. Grover, light; Forest City, McGregor, Coral; Cleared—Hale, Bradley, Swain, Eric; Alcona, Alta, Sumner, Ironton, Moonlight, Cleveland; Helvetia, Sandusky, all with ore; Glidden, Morse, Warrington, Ashland, light.

VESSEL NOTES.

The schooner Moonlight and Ironton, ore laden, left yesterday in tow of the tug Sumner.

The steamer Glidden, having discharged her cargo of coal at Lake Linden, returned here yesterday for the schooners Morse and Warrington, which had been discharging coal at this port. The trio of vessels then proceeded to Ashland where they will load ore.

Six vessels arrived and twelve cleared from this port yesterday.

All the reports to the contrary notwithstanding the South Shore is quite well satisfied with the ore business done at this port the present season. The management of the road appreciates the fact that the low water in the canal at the opening of the season was something that could not be helped. Certain persons who have alleged that the road has regretted building its new dock simply do not know what they are talking about. The dock is regarded by the South Shore company as an excellent investment.

PASSED THE SALT.

SALT STE. MARIE, Oct. 1.—[Special.]—U—Pickands, North Star, Clinton, Lisgar, Grimshy, Missoula, No. 107, Rube Richards, May Richards, Sawyer, Rosedale, Mariska, Oceanica, Onoko, Raleigh, C. H. Bradley, Brightie, Woolson, Escanaba, Fearless, Fountain City.

Down—Magnetic, Campana, Egyptian, Winslow, Rannev, Quayle, Lock, Columbia, New Orleans, Roanoke, Alberta, Newaygo, Zapotec, Maruba, George Spencer, Pennington.

AGENTS, local and foreign, for the sale of Ormamental

Salaries and Expenses paid weekly. Permanent references as to good character.

CHARLES H. CHASE, Rochester, N. Y. Mention this paper. 9-18-12

A HOUSEWIFE'S DUTIES.

SOME THINGS THAT EVERY YOUNG WOMAN SHOULD THINK OF.

A Talk That Is Brimful of Useful Household Suggestions—Things Which, If Neglected, Make a Big Difference in the Yearly Expenses.

A young housekeeper will never do any better than to begin her oversight and care at the very foundation of her house and home—with the cellar, the kitchen and the pantry. In fact she may even begin outside the kitchen.

The delectable to the county convention came home last night, all very well pleased with the ticket put in nomination.

Mr. A. R. Harlow's condition remains unchanged. It is feared that that pioneer of Marquette will never leave his bed again.

Stove men lie in fear these days of assassination by irate housekeepers who cannot get their heating apparatus set up as soon as they want it.

LIFE'S OCEAN.

Over the billows the proud ship sailed, With her sails to the wind set free, Only a ship amid countless ships, A speck on the fathomless sea.

A storm arose, the sea opened its arms, She sank with a crash and a roar; The waves closed o'er her, no trace was left, And the waters moved on as before.

Ab! so 'tis with us on life's ocean, As over its billows we ride, Only a life amid countless lives, Only a speck on time's vast tide, Today o'er its breakers we breast the foam, To-morrow we sink in its roar, The waves close o'er us, no trace is left, And the world moves on as before.

—Omaha World-Herald.

In Regard to Sunstroke.

Sunstroke is one of the afflictions to which humanity is liable in summer during the hottest of the weather. Heat and moisture together seem to be the conditions most favorable to its occurrence, for moisture in warm air prevents the radiation of heat from the body, and thermal fever, or sunstroke, as it is called, is probably an overheating of the blood, producing chemical or fermentative changes in it which are inimical to health and even to life.

When, therefore, during the heated term, one who has been exposed to the sun's heated rays in a humid atmosphere begins to suffer from headache, giddiness, nausea and disturbance of sight, accompanied with sudden and great prostration of the physical forces, sunstroke is probably imminent.

If such a one is wise he will, when the symptoms above given manifest themselves, immediately seek a cool place and make use of some simple restoratives, such as aromatic ammonia, etc., and he may avoid further trouble. But if he persists with his business he will be subjected to some very ill, which illness usually takes the form of heat exhaustion, heat apoplexy or genuine sunstroke, the thermic fever of some writers. Those who are exhausted by the heat have a cool, moist skin, a rapid, weak pulse and respiration movement, and the pupil of the eye is dilated.

In fact the symptoms are those of collapse. These patients will probably recover promptly, an event which may be hastened by the use of a tonic and restorative treatment.—Boston Herald.

A Slight Accident.

The combination of a small boy with almost anything has in it the possibilities of amusement, and especially is this true of a certain class of lads who are always lively. One of this sort was recently seen riding in a Boston horse car, twisting about upon the seat and distinguishing himself by the number of shapes into which he contorted himself in the shortest possible time.

He had his face in his hand, from time to time putting it down upon the seat, or into his mouth when he needed both of his hands in his gymnastics.

He was just in the middle of an unusually lively attempt to pick up a bit of paper with his left hand twisted under his right leg, when the conductor came along for the fares. The small boy left off his struggle to get at the bit of paper, sat up in the seat and began to gasp and choke in a manner really alarming. The conductor stood in evident doubt whether the boy was having a fit, when the little fellow managed to stammer out:

"You'll have to charge my fare to my father, Mr. X. Y., please. I've swallowed my nickel."—Boston Courier.

A Scared Young Woman.

But even with low rates a trip was bound to come to an end. One night it was announced that the next day we would be in San Francisco. I felt a feverish excitement, and many were the speculations as to whether there would be a snow blockade to hinder my trip across the continent.

A hopefulness that I did not know me for my days had come back when I rushed the purser, his face a snow white, crying, "My God, the bill of health is left behind in Yokohama."

"Well, well, what does that mean?" I demanded, fearing some misfortune. I knew not what "it means," he said, dropping nervously in a chair, "that no one will be permitted to land until the next ship arrives from Japan. That will be two weeks." The thought of being held two weeks in sight of San Francisco, in sight of New York almost, and the goal for which I had been striving, and powerless to move, was maddening. "I would cut my throat, for I could not live to endure it," I said quietly, and that spurred him on to make another search, which resulted in finding the report safely lodged in the doctor's desk.—Nellie Bly's Book.

According to Cushing.

I heard a pretty good story about a certain ignorant justice who does business up in Fulton county. The justice was elected over an able but very unpopular lawyer, and his first case was that of a prisoner charged with violating the fishery law.

The complaint and warrant were defective, and this the defendant's attorney took exception to in a masterly argument, winding up by moving the prisoner's discharge.

"Is the motion seconded?" asked the justice.

"It is," replied the prisoner.

"Gentlemen," continued the justice, "it is regularly moved and seconded, and the prisoner be discharged. All those in favor of the motion say 'aye.'"

"Aye," from the prisoner and his counsel.

"Opposed no."

"Silence for a moment, and after a short pause the scalesholder said: 'The motion is carried and the prisoner is discharged.' Whereupon, to the surprise and amusement of all, court was declared adjourned.—Amsterdam Democrat.

Clouds and Their Heights.

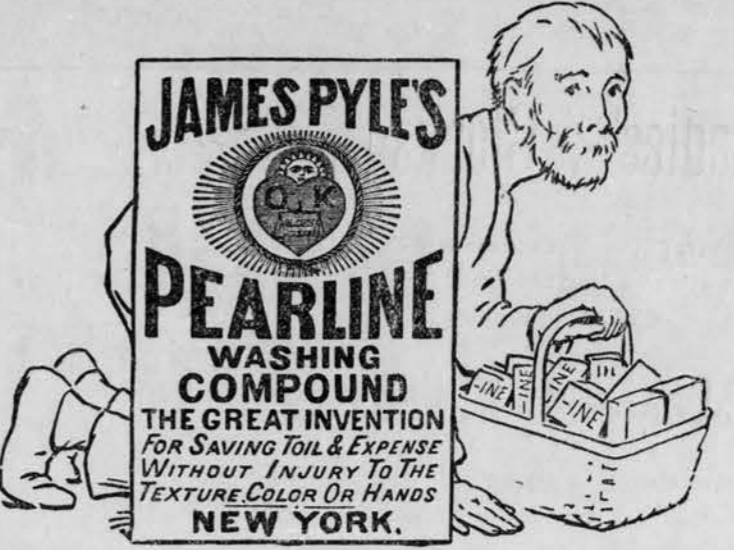

For practical purposes clouds are divided into four classes—cumulus, stratus, cirrus and nimbus. Meteorologists, however, recognize many differences of form in each class. Abercrombie gives these ten principal varieties with their mean height in wavy clouds, 27,000 feet; cirrostratus (thin, high, wispy, or striated, but at a low level), 15,000 feet; cumulo-cirrus (fleece cloud at low level), 12,000 feet; strato-cumulus (extended lumpy cloud), 4,000 feet at base; cumulo-nimbus (low rain cloud), 4,500; stratus (pure sheet cloud), 1,900 feet.—Exchange.

A Positive Advantage.

Louise—You have been so dreadfully flattered, Mr. Baretop, that I should think your head would be completely turned.

Baretop (bald but bearded)—A consumption of my head is to be wished, Miss Louise, for then I should have my hair where it is needed.—Pittsburg Bulletin.

Put one quart freshly slaked lime, a half pound washing soda and a half pound soft soap in a bucket and sufficient water to cover the articles, put in the tools as soon as possible after use and wipe them next morning or let them remain until washed.

There's safety behind it as well as in the use of it

But there's nothing ahead of it. The reputation of Pearline covers a multitude of imitations. Their names may end in "ine," but their use may end in trouble. Don't be persuaded that they are "the same as Pearline," or "as good as Pearline." The peddlers who try to sell them will tell you that they are; if you're reckless enough to try them, you will know that they are not. Get your Pearline of some good grocer, for it's never peddled. It's the best thing to get, and it's the only way to get it. Pearline is manufactured only by JAMES PYLE, New York.

The Money in Soap.

At Atlantic City, as almost everywhere, you see several soap kings. The soap king is peculiar to no country. His name in London may be Pear; in Philadelphia, Bazan or Siddals or Brooke; in Cincinnati, Procter; in Zanesville, Schultz or Hoag; in New York, Babbitt or Higgins, but the soap man sweeps and scrubs the deck. A simple riddle, namely, to get the discarded grease of improvident families and compound it with a little lye and potash, makes all the difference between the soap king and poverty. The soap king sometimes adds the candle business to his other trade. He deals in wax from the bees, and somewhat in coal oil, as an assistant to the home fuel business. But everywhere he compounds advertising with thrift if he would succeed, and it must be confessed that nothing suits mankind so much as good soap.

Cleanliness being next to godliness, soap is the priest of that cleanliness. There is a small amount of fine soap which hardly anything in this world has. As people go forward in the social and civilized scale they do not draw nearer to the angels, but nearer to soap. The bubbles of soap resemble the golden clouds and all the tints of the rainbow. There is a coherence about soap which holds a little drop of water together so that it can expand under the breath until it is as big as your head. Some men love their toilet and get good dividends out of attention to it, in white teeth, white hands, excellent complexions, and often the attention to the toilet in man is assisted by clean appetites.—Cincinnati Enquirer.

Emperor William's "Uncle."

It is said that the extraordinary deference and regard shown by the German Emperor William to King Christian, who is old, poor, dull, and of no political consequence, is due to the fact that ten years ago, at the castle of Rampehheim in Hesse, on occasion of some meeting of great states, young William, who had accompanied his grandfather as heir presumptive, and showed himself his presumptuous as well, was severely snubbed by the assembled royalties, with the single exception of "the beautiful majesty of Denmark," who greeted him in him, and treated him with an affectionate politeness and assumption of equality which won the heart of the youngster, who has ever since called his defender "uncle."—Harper's Bazar.

The Infant.

"I thought God made every one, mamma." "So He does, child. Why do you ask?" "Why, I heard papa telling another man that he was a self-made man."—West Shore.

Further Concerning the Michigan-Work to Begin on the Electric Railroad-Game To-Day.

County Convention.

The republican county convention assembled yesterday morning at 10:30 in the vacant store room in the Jones block, Canada street, the place having been placed at its disposal by Mr. John Jones. The convention was quickly organized, and delegates were found present from every ward and township in the county. The work of nominating the county ticket did not take much time, there being no contest except for the office of sheriff. It required a number of ballots to determine that nomination. There were three candidates before the convention, these being William C. Uren, of Ishpeming, John Glode, of Republic, and Joseph Richardson, of Negaunee. All are good men and true, and it was not easy to decide which had the best claims. The nomination was finally given Mr. Richardson, Negaunee delegates strongly urging in his behalf that their city was entitled to at least one county office. This argument had much weight, and aided Mr. Richardson in getting the nomination. The nominee is a thoroughly competent man, and if elected, as he doubtless will be, he will fill the position honestly and ably.

Mr. B. W. Wright, of Ishpeming, was nominated for county treasurer without a dissenting ballot. For county clerk and register of deeds Mr. Gad Smith met with no opposition, and was unanimously nominated. Presenting Attorney Mr. H. O. Young, of Ishpeming, was equally fortunate and was unanimously chosen the candidate of his party for the office which he is now holding for the second term. Mr. F. Zukoski, of Negaunee, was placed in nomination for county surveyor. The nominees for coroner were Mr. L. P. Cray, of Marquette, and Edmund Sterne, of Clarksburg.

Following this convention, which transacted its business very speedily, and with hardly any friction, came the legislative conventions. The county convention resolved itself into two bodies. Mr. George Wagner, of Marquette, was nominated for member of the lower house from the first district of Marquette county. Mr. Eugene G. St. Clair, of Ishpeming, was named as the choice of the convention for representative of the second. Regarding these nominations there can be no difference of opinion among republicans, and but little among members of other parties. Both are good men, and both will be elected. Regarding Mr. St. Clair, it is not necessary to say anything to Ishpeming people, but for the benefit of readers in other cities, the MINING JOURNAL will say that no man stands higher here, and the people of Ishpeming could not ask for a better man to look after their important interests at Lansing.

Delegates were elected as follows to the senatorial convention: Col. C. Y. Osburn, John Q. Adams, Geo. A. Newett, George Wagner, Capt. C. D. Blanchard, Geo. A. Royce, W. H. Rood, C. H. Hall, J. W. Read, H. O. Young, John W. Joachim, Nels Clifton, D. T. Morgan, A. E. Sterne, Walter Fitch, J. E. Dalliba, J. C. Fowle, Thos. Wallace, C. G. Griffey, H. M. Brady, Joseph Kirkpatrick, Peter W. Pascoe, Frank M. Maas, Ed. Lobb, Chas. Sundberg, William F. Anderson, Ben. O. Pearl, J. F. Neidhart, Jones Jones, Henry J. Atkinson, A. Bertrand, Jas. F. Foley and J. O. St. Clair. The delegates were not instructed, but there is apparently good reason for thinking that Joseph Flesheim, of Menominee, will be the nominee for representative of the thirty-first district. If so the counties of Marquette, Iron and Menominee will have a good man to represent them in the upper house at Lansing.

Delegates to the congressional convention were chosen as follows: Col. C. Y. Osburn, J. M. Wilkinson, George A. Royce, Peter Pascoe, H. O. Young, W. H. Rood, C. G. Griffey, John Jones, S. M. Billings, John W. Joachim, Joseph Kirkpatrick, Walter Fitch, Thomas M. Wells, Ed. A. Maas, A. E. Sterne and L. P. Cray.

The following resolution was introduced, and passed by a unanimous vote: Resolved: That we recognize in the Hon. S. M. Stephenson an honest and able representative of the interests of our congressional district, and the republican party and country at large. We cordially endorse his course in congress and his candidacy for a second term, and appreciate his earnest, faithful and efficient efforts in behalf of this district.

The conventions then adjourned, and the delegates returned to their homes, having held one of the most harmonious and business-like gatherings ever seen in the county. The ticket placed in nomination is a good one, and will command the hearty support of republican voters in all parts of the county.

At the Michigan. At the recently held meeting of the executive board of the Michigan Gold company, it was decided not to sink No. 3 shaft 200 feet, as proposed. The figures submitted by Capt. Trevithick called for an expenditure of \$55 per foot, or \$11,000 for the shaft. It would require about a year to do the work without the aid of power drills, and at such depth it would be impossible to operate drills with steam. The plan mentioned called for the sinking of this shaft at the expense of dropping all other mine work while it was being done. The directors have done wisely in deciding not to follow the plan outlined a few days ago.

At the next meeting, which will be held as soon as possible, Mr. Jas. R. Cooper, of Houghton, will be present. Capt. Sam Mitchell, of Negaunee, the fifth member of the board, will probably resign. His extensive iron interests, in conjunction with his poor health, render it impossible for him to devote

any time to the affairs of the Michigan.

In filling Captain Mitchell's place the board will be wise to select a practical mining man. At the coming meeting Mr. David M. Ford will submit plans and estimates for a compressor plant and set of three, five and seven drills. A compressor, boiler and five drills can be secured at a very reasonable price, and it is quite probable that they will be ordered. If this move is decided on it will be a step in the right direction, and if the plant is secured the mine will be opened up more rapidly than is possible with hand drilling.

It's a Go.

The Ishpeming & Negaunee Street Electric railway has filed its articles of incorporation with the secretary of state at Lansing, and the following directors have been elected: John Jones of Ishpeming, Andrew C. Seass of Negaunee, I. L. Athey, Thos. L. Johnson and Thos. J. Johnson of Cleveland. The three latter are members of the firm of Johnson, Athey & Co., which will build and equip the road, and turn it over to the Ishpeming & Negaunee Street Electric Railway company upon completion and successful operation.

While the season is so far advanced that not much can be accomplished before snow comes, the contracting firm will have men on the grounds in a few days, and as much work as possible will be done before cold weather interferes. The company guarantees to have the road completed in May next.

Base Ball.

There will be a ball game on the Association grounds this morning between the S. Johnson club and the Hughes nine for the championship of the city commercial league. The clubs met Sunday, and the Johnsons, heretofore the winners of every game they have played, went down after a close and exciting contest by a score of 17 to 16. The Johnson club is not satisfied with the outcome of Sunday's game, and the one to be played this morning has been arranged to give it satisfaction. A good game of ball can be looked for, as both clubs contain a number of very creditable amateur players.

Further Concerning the Michigan-Work to Begin on the Electric Railroad-Game To-Day.

County Convention.

The republican county convention assembled yesterday morning at 10:30 in the vacant store room in the Jones block, Canada street, the place having been placed at its disposal by Mr. John Jones. The convention was quickly organized, and delegates were found present from every ward and township in the county. The work of nominating the county ticket did not take much time, there being no contest except for the office of sheriff. It required a number of ballots to determine that nomination. There were three candidates before the convention, these being William C. Uren, of Ishpeming, John Glode, of Republic, and Joseph Richardson, of Negaunee. All are good men and true, and it was not easy to decide which had the best claims. The nomination was finally given Mr. Richardson, Negaunee delegates strongly urging in his behalf that their city was entitled to at least one county office. This argument had much weight, and aided Mr. Richardson in getting the nomination. The nominee is a thoroughly competent man, and if elected, as he doubtless will be, he will fill the position honestly and ably.

Mr. B. W. Wright, of Ishpeming, was nominated for county treasurer without a dissenting ballot. For county clerk and register of deeds Mr. Gad Smith met with no opposition, and was unanimously nominated. Presenting Attorney Mr. H. O. Young, of Ishpeming, was equally fortunate and was unanimously chosen the candidate of his party for the office which he is now holding for the second term. Mr. F. Zukoski, of Negaunee, was placed in nomination for county surveyor. The nominees for coroner were Mr. L. P. Cray, of Marquette, and Edmund Sterne, of Clarksburg.

Following this convention, which transacted its business very speedily, and with hardly any friction, came the legislative conventions. The county convention resolved itself into two bodies. Mr. George Wagner, of Marquette, was nominated for member of the lower house from the first district of Marquette county. Mr. Eugene G. St. Clair, of Ishpeming, was named as the choice of the convention for representative of the second. Regarding these nominations there can be no difference of opinion among republicans, and but little among members of other parties. Both are good men, and both will be elected. Regarding Mr. St. Clair, it is not necessary to say anything to Ishpeming people, but for the benefit of readers in other cities, the MINING JOURNAL will say that no man stands higher here, and the people of Ishpeming could not ask for a better man to look after their important interests at Lansing.

Delegates were elected as follows to the senatorial convention: Col. C. Y. Osburn, John Q. Adams, Geo. A. Newett, George Wagner, Capt. C. D. Blanchard, Geo. A. Royce, W. H. Rood, C. H. Hall, J. W. Read, H. O. Young, John W. Joachim, Nels Clifton, D. T. Morgan, A. E. Sterne, Walter Fitch, J. E. Dalliba, J. C. Fowle, Thos. Wallace, C. G. Griffey, H. M. Brady, Joseph Kirkpatrick, Peter W. Pascoe, Frank M. Maas, Ed. Lobb, Chas. Sundberg, William F. Anderson, Ben. O. Pearl, J. F. Neidhart, Jones Jones, Henry J. Atkinson, A. Bertrand, Jas. F. Foley and J. O. St. Clair. The delegates were not instructed, but there is apparently good reason for thinking that Joseph Flesheim, of Menominee, will be the nominee for representative of the thirty-first district. If so the counties of Marquette, Iron and Menominee will have a good man to represent them in the upper house at Lansing.

Delegates to the congressional convention were chosen as follows: Col. C. Y. Osburn, J. M. Wilkinson, George A. Royce, Peter Pascoe, H. O. Young, W. H. Rood, C. G. Griffey, John Jones, S. M. Billings, John W. Joachim, Joseph Kirkpatrick, Walter Fitch, Thomas M. Wells, Ed. A. Maas, A. E. Sterne and L. P. Cray.

The following resolution was introduced, and passed by a unanimous vote: Resolved: That we recognize in the Hon. S. M. Stephenson an honest and able representative of the interests of our congressional district, and the republican party and country at large. We cordially endorse his course in congress and his candidacy for a second term, and appreciate his earnest, faithful and efficient efforts in behalf of this district.

The conventions then adjourned, and the delegates returned to their homes, having held one of the most harmonious and business-like gatherings ever seen in the county. PREPARING FOR WINTER.

Snow Shoe Club's Annual Meeting Elects Officers and Will Make The Queen City Howl.

LAKE SUPERIOR COMMANDERY ORGANIZES A DRILL CORP.

About the Carelessness of Men—Six Million Dead Letters—Monroe-O'Meara Wedding—General City News.

Hi, Hi, Hi, Hi, Hi, Hi!

There was a rip-roaring enthusiastic annual meeting of the Marquette Snow Shoe Club last evening at which a large amount of routine business was transacted, after which the following named persons were unanimously elected officers: President, Peter White; vice-president, A. F. Maynard; secretary, E. C. Williams; treasurer, B. S. Packard; captain, A. O. Jopling; lieutenant, D. F. Charlton.

The reports of the treasurer and secretary showed that the whole receipts during the past year were \$693.68 and the expenses, \$676.58, leaving a balance on hand of \$17.10. The club owns its house and fittings and the lot of two acres on which the house stands. It is entirely out of debt, and enthusiastic and jubilant over the prospect of the near approach of winter with the certainty of deep snow and lots of fun in store. Last year the club had a rather quiet though successful year. The coming winter it proposes to shake things up and make Marquette howl and affright the slumbering fishes in the frozen deeps of Superior with its stentorian yell.

Templar Drill Corps Organized.

The members of Lake Superior commandery, Knights Templar, have organized a drill corps and will endeavor to bring the military branch of the order to a high state of efficiency. The custom of organizing drill corps within the various commanderies of Knights Templar has become quite general. It generally happens that quite a number of members of a commandery are prevented by business duties from attending drill with sufficient frequency to become familiar with more than the ordinary evolutions. Hence the practice has obtained of the more intricate those members whose time and inclinations permit their regular attendance at drills a corps which shall make a specialty of tactics and manual. By this means the commandery is better prepared both for asylum and street evolutions and the presence in the ranks of a large percentage of well trained knights gives a better appearance and greater steadiness to the commandery when it turns out as a body. The Knights Templar is the largest military secret order in the world and a part of its tactics is ritualistic and therefore obligatory on every member. But the requirement of the more intricate evolutions and that constant discipline which makes a column of men move as one and with the precision and steadiness of a machine, is largely voluntary. It is to do this work and attain this discipline that these drill corps are organized.

The drill corps of Lake Superior commandery starts off with over thirty members. Its officers are: President, D. W. Powell; secretary, W. A. Rudd; treasurer, F. H. Gooding; captain, M. R. Manhard; first lieutenant, H. C. Russell; second lieutenant, Charles E. Deane; adjutant, Francis M. Moore. Sir Knight Manhard being both captain of the drill corps and executive officer, captain general of the commandery, considerable improvement in the street appearance of this secret order may be looked for when it shall next appear in public.

The Carelessness of Mankind.

No better illustration of the general and common carelessness of mankind in the transaction of even important business can be found than in the records of that most curious of all the governmental machinery, the Dead Letter office. This is one vast museum wherein are countless monuments to haste, imprudence and carelessness. Into it come over twenty thousand pieces of mail matter every day in the year. Owing to the negligence or willful ignorance of the senders this vast number of communications, many of them of the greatest importance, cannot be sent to the persons for whom they are intended. This is an aggregate of over six million letters and parcels per year. This is a very large number and few realize how large it is. A few illustrations may give some idea.

Suppose a clerk in the Dead Letter office were to have the whole number of letters and parcels sent there each year laid before him and be ordered to count them one by one. If he counted one piece every second and kept right on twenty-four hours in the day and 365 days in the year, without stopping to eat or sleep, it would take him over two years to finish his task. If he worked at the same rate for but eight hours a day it would take him over six years to do it. If he started on January 1, 1890, with orders to count at that rate for eight hours per day the pieces received thenceforth, he would never finish his task even if granted eternal life, for the letters and parcels would come in six times faster than he could count them.

Or suppose these letters and parcels average one-eighth of an inch in thickness and were set on edge side by side. The line thus formed would reach from Marquette to Negaunee, a distance of twelve miles by the traveled route. These illustrations are given simply because the human mind is incapable of comprehending the abstract quantity, six millions.

Superintendent D. P. Leibhardt of the Dead Letter office has recently issued a circular which well illustrates this matter of human carelessness as shown in the mails and from it some interesting statistics are abstracted. Of the unclaimed and undelivered mail matter received at the Dead Letter office during the past fiscal year, four hundred and fifty-one thousand were

letters misdirected, or only partially addressed, while twenty-four thousand were entirely blank, bearing no address whatever. Among the latter were frequently found the correspondence of business men, of which a large portion contained inclosures of money, drafts, checks, etc.

Twenty-eight thousand contained money amounting in all to \$48,642. Four thousand had inclosures of postal notes in small sums under \$5, aggregating \$5,300. Twenty-seven thousand were found to contain drafts, checks, notes, commercial paper, etc., etc., in the sum of \$1,471,881, while forty-eight thousand contained paid and canceled obligations, receipts evidencing payments of money, deeds, mortgages, general miscellaneous papers, etc., etc.

Over five million pieces contained no articles of value though their contents was in many instances of great interest and importance to both addressed and addressee. Of this immense number of letters over three million bore within either no definite or sufficient address of the writer—in most cases no address whatever—or there was no signature whereby the writer might be identified or determined, without which the Dead Letter Office could not make return.

The postal service employs every means which human ingenuity can devise or experience suggest, and without regard to expense to find the persons to whom mail matter is addressed, yet people continually growl at the post-office department when the chances are a million to one that only their own negligence or willful ignorance of the law is to blame.

Monroe-O'Meara Wedding.

Miss Helen May Monroe, daughter of Mr. and Mrs. F. N. Monroe, of Brother ton and sister of Mr. C. F. Monroe of this city, was united in marriage last evening with Mr. John H. O'Meara, Rev. Dr. Wyllys Hall officiating. The ceremony took place at the house of the groom, 518 High street, at 8 o'clock, only relatives and intimate friends of the contracting parties being present. After the ceremony an elegant wedding supper was served and all joined in wishing long life and happiness to the newly wedded pair.

Mr. O'Meara is agent of the South Shore road at this city and is a young man whose fine social and business qualities have won him many friends. The bride has been resident here for some months and has a large circle of friends. Mr. and Mrs. O'Meara wisely discarded the time-worn "wedding trip" and will spend their honeymoon right here in their own home. They will be "at home" to their numerous friends after October 8th.

Who Are Life Members?

All persons holding certificates of life membership in the Marquette County Agricultural society are requested to notify Secretary Manhard of the fact at once. The board of managers desires to straighten up the records of the society. The books of the society were burned in the First National bank fire in 1885 and no accurate record of life memberships taken prior to that date exists save in the certificates issued to members of that class. By reporting the fact promptly members holding life certificates will confer a favor on the board of managers and the secretary.

Some Questions Solved.

"What shall we wear and wherewith shall we be clothed against the rigors of Lake Superior winter?" is a question which is uppermost in the minds of ladies these chill autumnal days. Especially does the feminine mind run upon the question of cloaks and desire to know where to find the garment that is right in quality, right in style and right in price. To this perplexing conundrum there is an answer. Louis Grabower has it in his cloak department. Here are \$7,000 worth of cloaks, newmarkets and jackets. They are all right, in quality, in style, in price. Some of them have been sold but more of them must be. They come from the most celebrated makers of eastern cities and quality and wear are guaranteed. If one of these garments should prove not to be all right and as guaranteed it will be exchanged or money refunded. When Grabower says "this garment is guaranteed to be of best silk plush, real seal-skin loops, and hot wear on the edges" that guarantee goes and is good. Thoughts of ladies are now singing a song of cloaks. Let them inspect Grabower's and their quavers of doubt will be changed to hymns of joy.

Oculists Agree.

During a talk with J. H. Ostrander, the expert optician, at Conklin's jewelry store. Oculists all agree that there is nothing which tests their dexterity so much as accurately fitting a patient with glasses. Sometimes it takes an expert hours to complete the examination. Each eye must be tested separately, as one is frequently more sensitive, or better than its mate. He can hardly be too careful, since the slightest error will mean just so much continued strain and consequent injury. It is rare to find anyone behind the counter of the ordinary optician or jeweler who is qualified to fit glasses, unless the eyes are symmetrical in shape and both alike. No glasses are correct unless they give absolute ease and comfort to the wearer. The eye is such a delicate organ that even a slight mistake in giving glasses will produce disturbances which, while they may be hardly noticeable at first, by persistent wearing will result in injury that which will render it difficult, if not impossible, to restore the sight to its former vigor.

All money deposited in the Marquette County Savings Bank as to and including Saturday evening Oct. 4th, will draw interest from October first.

Don't forget Gordon's D. F. cigars when you want a good smoke.

\$350.00, \$5.00 cash and \$10 per month will buy a lot in Chicago. Enquire of E. P. Wilbur, room 7, 306 Front street, Marquette.

DRY SLAB WOOD.
Price \$2.50 per cord. Leave orders at stores of S. Westlake and Steele & Lobdell, or at my office.

GEO. L. BERTIS
Notice to Contractors.
Bids for furnishing three hundred cords of hard wood, wood four feet long, delivered on cars on the M. & W. track opposite county poor house, will be received up to October 15, 1890. Right reserved to reject any and all bids. For further particulars call at my office, Benning block.
C. D. BLANCHARD,
Superintendent.

A MONSTER SEA SERPENT.

Five Men Describe a Gigantic Monster-ity of Fish Trap Lake.

A party of five persons, all gentlemen, arrived home from a four days' visit to Fish Trap lake, about three miles below Galena, Ill., a place not only famous among anglers thereabouts, but as being the same body of water in which was discovered the huge serpent fish which created so much excitement among people generally and discussion among naturalists especially about ten years ago.

The intense interest which was then excited has been greatly magnified by the fact that this particular monster, judging from reliable and detailed accounts that have been received, has again made its appearance, and was seen by every one of the five gentlemen comprising the party above referred to on the afternoon of the day previous to their departure for home.

"We were out in the middle of the lake trolling for salmon and pike," said one of the number on being questioned, "and were drifting along almost imperceptibly on its perfectly smooth surface toward the western extremity, propelled by the light breeze prevailing from the east, when suddenly the water about us became fearfully agitated, the boat commenced to heave and rock, and we were wondering with blanched faces what could be the cause of the phenomenon when, before a single word could be uttered, a sight presented itself which not one of us will ever forget to our dying day, though we live to be as old as Methuselah.

"Can I describe it in detail?" said the narrator in response to an inquiry. "Yes, for it so vividly impressed itself upon my mind that were I an artist I could draw the scene with lifelike perfection and accuracy. I was looking down into the lake from the stern of the boat, and as we watched it, if possible, some cause for the singular movement of the water which threatened to submerge us, when like a flash there emerged from its seething breast, and not more than ten rods away, a half fish, half serpent monster, fully thirty feet in length, the exposure from extremity to extremity being complete, as it lay upon the water after reaching the surface.

"Its appearance was heralded by a shout from the huge creature, exactly like that of a fretful horse, which threw a column of water into the air like the spouting of a whale, the mist from which completely saturated our clothing. The head and body of the serpent, without fins of any kind, was shaped like that of a sturgeon, with a long, narrow top fin and a forward fin on either side, just back of the gills. The eyes were black and beadlike, and two holes for spouting or throwing water were plainly discernible on top of the head. The body from the center to the after extremity was that of a serpent, without fins of any kind, the tail tapering to a point like that of a pilot or bull snake.

"The hideous monstrosity lay prone upon the water for a half dozen seconds or more, when it started for the mouth of the lake, swimming with great velocity, its body partly out of the water. Stricken with amazement and terror, we watched it in silence until it passed out into the Mississippi, when it dove downward on reaching the channel and was seen no more. Fortunately Adam Bell, a trustworthy gentleman of Galena, was with us, and was also one of the party who discovered the huge marine monstrosity of ten years ago, and described it as being identically the same in size and general appearance as that which we witnessed this afternoon before we struck camp for Galena, and expresses the opinion that its home is in one of the partially submerged caverns which abound along the bayous in the vicinity of New Orleans. It may be said, a remarkable thing, it may be said, about Fish Trap lake is its extreme depth, the bottom in some places never having been reached with any of the lines used in sounding. It sets directly back from the Mississippi river, and is a mile and a quarter in length and a half mile in breadth, its banks being bordered with heavy timber and thick shrubbery. Its junction with the Mississippi is formed by a mouth thirty or forty rods wide. It was formerly a veritable haven for anglers, but since the discovery of the half fish and half serpent monstrosity of ten years ago it has been deserted, except by the more intrepid sportsmen of this section.—Cor. St. Louis Globe-Democrat.

Rural Lovers on the East Side.

It was a warm and sunshiny afternoon on the east side and everybody was out of doors. A couple came sauntering up Eldridge street toward Houston, hand in hand, and talking in the smiling sort of confidence that betokens lovers. Both were young, and he was dark and stalwart and she had the blue eyes, golden hair and plump form bequeathed by Teutonic ancestry. They stood at the corner clasping hands in farewell, when suddenly a shrill voice smote the sunny atmosphere that enveloped them and cried: "Say, Mister, you've forgot something." He turned and looked at the question which he did not speak. "You've forgotten to put a kiss on her head," was shouted derisively. Two pair of hands parted suddenly; a young man strode briskly toward the East river as if he had just recollected an appointment in Brooklyn; a young woman sped swiftly down Eldridge street with her chin in the air, and a tattooed urchin stood upon his hands on the pavement and clapped his heels together in glee.—New York Letter.

A Sagacious Magpie.

Out on Fillmore street there is a big magpie that is never in its cage, but meanders all over the neighborhood. It stands on the curb, with bedraggled tail and drooping wings, and whistles "Any Old Knives to Grind?" If any man comes up and whistles to make it repeat it lets out a wailing shriek expressive of the supreme disgust. A favorite trick of this bird is to whistle for dogs, when every cur within three blocks runs to it. When the dogs congregate the magpie flies up on a butcher's hook and jeers at them. Of late the poundkeeper's deputies have caught onto the bird and its habit of attracting dogs, and the arrest has been bountiful.—San Francisco Examiner.

Level of the Earth.

The average level of the solid earth has been calculated by Dr. John Murray to be 1,400 fathoms below sea level; but more recent explorations show greater ocean depths, according to Dr. H. R. Mill, and a mean sphere level at a depth of 1,700 fathoms. That is, all the land above the level of 1,700 fathoms beneath the sea would have to be filled into the greater depths in order to give equal height to all parts of the solid earth.—New York Telegram.

There are about 105 sardine factories in France, and the produce of each factory is 6,000 cases, each containing 100 boxes. The total produce for the year 1890, which is not far from the average, was 672,396 cases, and there is a net profit on each case of about 20 cents.

TWO DAYS ONLY

Grabower's APRON SALE.

We will sell on Friday and Saturday, October 3 and 4
25 Dozen Ladies' Aprons, Worth from 50 cents to \$1 00
For Only 25 Cents Each.
