VILAS MAY BE THE MAN.

Nomination Gossip at Indianapolis Largely Confined to the Wisconsin Senator.

CONCEDED CLEVELAND CAN HAVE IT IF HE WANTS IT.

Convention Opens Wednesday-Delegations Expected from Forty-Two States and Territories-Big Claims by Bynum.

INDIANAPOLIS, Aug. 30.-Wednesday camping and picnic the gold standard Democrats assemble here to launch a new party on the troubled sea of politics. A few, man- as possible. agers, are on the ground but the delegates have not begun to appear. The managers express themselves more than satisfied, however, and expect that federation may follow in the near Colonel Fred Grant. delegations from forty-two states and future. territories. It is accepted as a foregone conclusion that a standard bearer will be named and a third ticket placed in

The coming convention probably has no parallel in the political history of the United States. The managers therefor purpose to lay the foundation here for a reorganization of the party in the future. They have practically decided the emblem on the ballot shall be the head of Jefferson, and expect to frame a platform which, besides repudiating the Chicago platform and nominees, shall clearly enunciate and reiterate Democratic doctrines of former platforms.

As to candidates, it is possible quite a contest will be developed. Gossip so far seems largely confined to Vilas and Watterson. Senator Vilas is somehow regarded the administration's candidate and, it is said General Bragg is willing to step out of the way. It is conceded on all sides that if Mr. Cleveland would accept the nomination it would be tendered him unanimously. Chairman Bryan says he unquestionably would be the strongest man; that his popularity even among silver Democrats is very great, but the president had given no word.

Should Senator Vilas, or almost anyone except Watterson, be nominated for the presidency it is thought that Buckner of Kentucky will be nominated vice president on the theory the nomination would greatly strengthen the gold Democrats of Kentucky.

"How many states will the ticket nominated here carry ?" was asked of Mr. Bynum.

"Four-Florida, Alabama, Texas and Kentucky."

"What about Louisiana?" "Louisiana will go for McKinley," he

From the lists of delegates being re-

ceived it is evident many prominent leaders of the party will attend. Ex-Governor Rosewell P. Flower of New York has telegraped his acceptance for the temporary chairmanship, and it is practically decided that Senator Caffrey of Louisiana is to be permanent chairman.

MR. CLEVELAND AGAIN?

His Friends Are Predicting His Nomination and Acceptance.

WASHINGTON, Aug. 30 .- Belief most intimate friends that he will accept a nomination from the Indianapolis convention if it comes to him unanimously. His close advisers here also that the convention will result in the nomination of the president. Mr. party as Jefferson. Should Mr. Cleveland fail at the polls, which some of his friends doubt, he will lose none of his prestige, for he will have been nominated for president four times and served twice. Sound money Democrats here say his name at the head of the ticket would bring out the full sound money vote and he is by far the strongest man who can be named. It is agreed that if Mr. Cleveland is nominated by his friends at Indianapolis he could not well decline.

Commenting on the defeat of Stephenson for a fifth nomination for congress, the Range-Tribune of Iron Mountain remarks that he "will be greatly missed at Washington." Still, it is to be hoped that McKinley will not be so discouraged by the knowledge that he cannot have Sam's assistance in running the government that he will decline to take the responsibility and will insist on withdrawing as a candidate for the presidency. It might have been worse. Sam might shuffle off the stage entirely, for instance, and then he would be everlastingly missed at Menominee as well as Washington.

The trun was made under difficulties. The attempt to run a long distance had to be abandoned and only 12 miles was covered. The time elapsing from the bright politicians of Marquette county who beat Smith out of his own county in Stephenson's interest made bungling work of it at Ironwood, for their dilatoriness in getting into line for Sam defeated him.

SHOT FOR A COMPANION'S LIFE.

ore movement is expected to get steadily followed by a return to the old rate of Cut the Rope by Which He Hung with a Rifle Bullet.

Cutliffe Hyne tells the story of a couple of young Englishmen in Peru the other given a rifle to cut the rope by shooting at it.

"They handed me the rifle loaded and cocked. It was a single-shot Winchester, and I found afterward, though I did not know it then, that either alone. You must remember that I had

no stationary mark to aim at. My poor comrade was writhing and swaying at the end of his tether, and the well rope swung hither and thither like some contorted pendulum. Once l and still the rope remained uncut, and the bullets rattled harmlessly against the white walls of the chapel beyond. With the 11th shot came the tingle of broken glass, and the bell, after a couple of hurried, nervous clangs, ceased tolling altogether. With the 13th shot a shout went up from the watching crowd. I had stranded the rope, and the body which dangled below the magnolia tree began slowly to gyrate.

Then came a halt in the firing. I handed the Winchester back to the fellow who was reloading. But some-how or other the exploded cartridge had jammed in the breech. I danced and raged before him in my passion of hurry, and the cruel brutes found yelled in estasies of merriment. Only Garcia did not laugh. He rerolled a fresh cigarette with his thin, yellow fingers, and leisurely rocked himself in the split-cane chair. The man could not have been more unmoved had he been overlooking a performance of Shakespeare. At last I tore the Winchester from the hands of the fellow who was fumbling with it and clawed at the jammed cartridge myself, breaking my nails and smearing the breechlock with nails and smearing the breed into one blood. If it had been welded into one blood. If it had been welded into one solid piece it could hardly have been firmer. But the thrill of the moment gave my hands the strength of pincers. The brass case moved from side to side; it began to crumble, and I drew it forth and hurled it away from me, a mere ball of shapeless, twisted metal. Then one of the laughing brutes gave me anothol cartridge, and once more I shouldered the loaded weapon. The mark was easier now. The struggles of my poor friend had almost ceased, and, though the well rope still swayed, its movethe well rope still swayed, its mo ments were comparatively and could be counted upon. down the sights, put the my shoulder and cuddle with my cheek. Stomach, sometimes called waterbrash, and burning pain, distress, nausea, dyspepsia, are cured by Hood's Sarsaparilla. This it accomplishes because with its wonderful power as a blood purifier, Hood's Sarsaparilla gently tones and strengthens the stomach and digestive organs, invigorates the liver, creates an appetite, gives refreshing sleep, and raises the health tone. In cases of dyspepsia and indigestion it seems to have "a magic touch."
"For over 12 years I suffered from sour

with severe pains across my shoulders, and great distress. I had violent nausea which would leave me very weak and faint, difficult to get my breath. These spells came oftener and more severe. I did not receive any lasting benefit from physicians, but found such happy effects from a trial of Hood's Sarsaparilla, that I took several bottles and mean to always keep it in the house. I am now able to do all my own work, which for six years I have been unable to do. My husband and son have also been greatly benefited by Hood's Sarsaparilla - for pains in the back, and after the grip. I gladly recommend this grand blood medicine." MRS. The people turned out in large numbers, and on the arrival of the train Saturday noon whistles were blown, bells rung, bands played and everybody shouted for the convention's nominee. The procession, headed by the Houghton band, and then firemen in uniform, Mr. Shelden and delegates in carriages, and citizens on foot, proceeded to Mr. Shelden's residence. Here Mr. Shelden made a brief speech, thanking the citizens for their kindly greeting and display in his behalf and assuring them that his best efforts, if elected, will be for the best interests of the district. One of the incidents of the trip was the immense horseshoe found by Jim Dee in his grip shortly after leaving Houghton. Why Is It,

if catarrh is a blood disease, as some claim, that physicians frequently advise change of air and climate to those suffering? Catarrh is a climatic affection, and nothing but a local remedy or a change of climate will cure it. Ely's Cream Balm is so effi-cient as to do away with the necessity of leaving home and friends, causing instant relief and is a real cure of catarrh.

FOR HOUSEKEEPERS.

Some Items of Valuable Information in Culmary Work.

Not the care lines that tell of work and worry. These are not the "wrinkles" that one woman wishes to receive from another. But there are, to use another expressive bit of contemporary slang, "tips"-fragments of practical knowledge accumulated by every woman who looks well to the yays of her household-which are of distinct value to all housekeepers. BOARD GIVEN BY DAY, WEEK Sometimes they have been discovered almost by accident, at other times they have come as the working out of pet theories. Still again they may have been hardly acquired after many failures have taught the experimenter how not to do it.

Some of the wrinkles thus gathered may be old and familiar to many house- HOUGHTON, keepers. To others they may be entirely fresh and hopeful.

THE CHILDREN'S BATH. A Simple Means of Keeping the Skin in

a Healthy Condition. Where children are too far from the surf to btain the tonic effects of sea bathing a simple bath of luke-warm water at night, with half a cup of salt added to every six or eight gallons of water, will take its place. Rub the skin briskly with a friction towel, and when the flesh seems in a glow let the bather go to bed. The cooling effects of a bath of this kind, even on hot nights, are usually such as to induce the most restful sleep. A daily bath of cold water may be undertaken with advantage by a great many people. Such a habit of daily bathing should be begun in the summer, and only by young people in rigorous health. The best physicians recommend this bath as most wholesome and valuable for those who can endure the shock. It should be taken on rising, and should be followed by brisk rubbing. It is simply a means of keeprubbing. It is simply a means of keeping the pores open and the skin in healthy condition. Where the bath is taken to remove dust and the effects of excessive perspiration, luke-warm water, with some good soap, is necessary. Such a bath ought to be taken once a week before going to bed at night or before a nap in the afternoon. It is considered unwise to take vigorous exercise after a warm bath, while a cold cise after a warm bath, while a cold bath calls for exercise to follow it.-N. Y. Tribune.

The royalists claim that they have received information to the effect that Kaiulani will be restored, while supporters of the republic are under the impression that President Cleveland has empowered Willis to negotiate for an annexation treaty, or failing in that, to offer the present government the protection of the United States. Either annexation or a protectorate is acceptable to the white people here and, judging from appearances, any attempt to restore the monarchy will be met with resistance.

POWER OF ORATORY.

Good Voice and a Fine Presence Count for Much.

It is a fine thing that words have power to burn, and that in the flame of eloquence a deal of trumpery and stuffy notions are readily consumed. It has been said that genuine oratory is gone, but now and then the spirit of the mightiest power that moves masses of men shows its everlasting vitality in a notable way. With sincere personal conviction to support him a man with a good voice and that gift of adding phrase unto phrase which is indefinable may enchain a great convention, hold thousands of men pliant to his thought and feelings, or he may charm and cheer his hundreds in a banqueting hall.

The secret of genuine oratory, of the sort that moves and stirs all hearers to responsive emotion, is always to be found at the center of a storm of honest feeling on the part of the orator. It is concealed in the hidden places of the interior life, and is the more effective when its restraint is shown even in the whirl of impassioned words or noble marshaling of phrase. Private views and narrow contentions, personal wishes, never have a chance for exposition in oratory that moves men and women. It must express large principles largely, or its influence never remains, nor has the fame of any orator endured except of those who spoke for the largest conviction and desire of the mind of man.

The earliest movement which freed Boston from England, although Lord North used to assure his countrymen that "no other province will in the least countenance the rebellious Bostonians," was kept alive by the orators of Boston. The orations on the massacre, delivered in the Old Brick church, on the site of Cornhill square, or at the Old South church, were attended by immense crowds of people. It has been well said that these patriotic orations are a protective shield to our constitution. "There are few men of consequence among us who did not commence their careers by an oration on the 5th of March," wrote John Quincy Adams. And in these days, when, by aid of descendants of the "rebellious "Oh, I'm just going out for a few Bostonians," the stars and stripes have waved in peace at Aldershot, oratory is lending its time-honored aid in the promotion of arbitration between the English-speaking nations-

Thread from the Earth to a Star. Prof. Ball, the astronomer royal of Ireland, and one of the most popular astronomical writers in Great Britain, has just finished a curious calculation to the distance to the nearest of the "fixed stars." The calculation was inspired by a visit to one of the great Lancashire thread factories. The superintendent of one of the factories inspected by the astronomer informed the star gazer that the combined output of the various Lancashipe thread factories was 155,000,000 miles of thread per day! Those figures were certainly enough to astonish anyone, unless it should be an astronomer. Prof. Ball has long since passed the point where he expresses surprise at a string of figures which represent even billions of miles. Instead of falling billions of miles. Instead of fallistunned at the thread man's feet, paralyzed the manufacturer of cott filaments by telling him that if all tfactories in Lancashire should wo day and night producing 155,000,0 miles of thread every twelve hours, would take them 200 years to split thread long enough to reach from tearth to the nearest of the fixed states. GIANT LOCOMOTIVES.

Heaviest Railway Engine in the World in Old Mexico.

The heaviest locomotive in the work was made at Providence, R. I., and is in daily operation on the most difficult and mountainous section of the Mexican Central railroad. It weighs 260,000 pounds, or 130 tons, and is especially designed for mountain climbing.

The railroad men call it a Siamese because it is, in fact, two locomotives permanently united. It is used for the purpose of freight trains, and is unique in the mechanical world.

The locomotive was designed by F. W. Johnston, and his professional rivals said that it was impracticable. The same was said of the first railroad locomotive and of the pioneer steamboat. The locomotive is double in all its parts, in fact, two locomotives end to end, with a single cab in the center. One single stiff frame carries the two boilers and driving mechanisms, each manner and driving mechanisms, each manner and driving mechanisms. ers and driving mechanisms, each ma-chine resting on three rollers which are placed close together. "Here was a Clevelander with whom I was slightly acquainted, only knowing him well enough to exchange greetings when we met. The day after a certain firecracker holiday I met the man and noded in a friendly way.

I suppose, I said, in a manner that was intended to be jocular, that you are glad the fourth has gone?"
What's that? he said, sharply.

"I was chump enough to repeat my remark and he looked as black as a thundercloud and stalked away.

BREEDS WORMS FOR SALE.

Maine Farmer Raises and Sells Them for

Baiting Purposes. Josiah Crewdye, a farmer, living three miles from Lewiston, enjoys the Business Directory. reputation of being the only angleworm raiser in Maine. He occupies an old farm and uses a sort of primitive hothouse for his worm colony. The box in which he kept them covered the flooring of the old forcing house, and was built four feet deep and filled with soil to within 18 inches of the top.

During last spring and summer Crewdye and his boys gathered the festive "night walkers" in large quantities, and whenever any plowing was done the boys walked behind with pails, and gathered up the worms, which were forthwith transferred to the incubator; Crewdye estimates that he put three barrels of "walkers" into this incubator during the summer. From December 1 to January 1, 1896, Crewdye sold 38 quarts of worms at one dollar a quart. Fishermen left orders at Charles Blank's grocery in the village for Crewdye, and he brought in the worms to fill all demands. When the cold snap came on in February and the thermometer ran down to 28 degrees below zero the worms were all right and

kept on multiplying and thriving. The day after Christmas Crewdye's son Karl was in the incubator watching HANCK & DECKELMANN Tobacco, Cihis father remove the manure from the box, intending to replace it with fresh. This work was called "feeding the crawlers." Karl played on his harmonica, making quite a noise, and was surprised, as was his father, to observe the worms working up out of the A. ground, their heads sticking out about two inches, while they swayed their heads to and fro, as if tickled to death to hear the music, When the boy ceased playing the worms slipped back into their warm beds. TOMMY DREW THE BIKE.

Ishpeming's Well Known Newsboy Has a Piece of Luck.

Tommy Bond, the newsboy, held the lucky number which drew the Monarch bicycle given away Saturday evening at the opera house by the Eunice Goodrich company. Manager Pottle gave the winner the option of taking the bike or its cost price in cash. He gives away a wheel every week and the bike is as good to him as the money. Tommy very sensibly took the money, as the bicycle season here will will be at an end in two months or so. The company end in two months or so. The company will spend this week at Marquette. After finishing its engagement there it will go to Ashland.

Hyers' Comedy Company.

The Hyers' Colored Comedy company, supporting May C. Hyers (one of the famous Hyers sisters), who is said to be the only woman in the world who floats her tones from C. to C. in two octaves, will be at the Ishpeming Opera House next Wednesday and Thursday evenings. The company is said to be a very clever one. The play the first night will be "Colored Aristocracy," and Thursday evening "Plantation Frolics" will be the bill. The prices of admission will be twenty-five, thirty-five and fifty cents. Reserved seat tickets will be placed on sale today.

Received Sad News.

David Johnston, who is employed as clerk in L. W. Atkins & Co.'s clothing store, received a letter Saturday from his native place in England advising him of the death of his oldest sister. He did not know that she was ill, so the news of her death was a great surprise to him. The deceased was thirty eight years of age and her death leaves eight children motherless. Dave saw her about eight years ago when he re-turned home on a visit to his people.

Just as the excursionists were starting out for a trip on the lake the storm began, so they had to abandon the trip until later in the day. Hail as large as ordinary marbles came down. Despite the disagreeable weather all had a fairly good time.

Accordingly, despite the fact that it has been but recently erected, and at a cost of several hundred dollars, it has been decided to practically tear it down and build one without the features which they believe have provoked Joss'

Sam Moy and several of his country-men visited John Anderson, the monument dealer at the entrance of Rosehill, the other day and submitted plans for a reconstruction of the monument. Its commanding height, 12 feet, they thought a leading reason for Joss' evident displeasure, so they decided to cut it down to four feet.

But they regarded as a more potent cause of their trouble the presence of three drainage holes in the bottom of the basin directly in front of the struc-ture, and insisted they be closed and a hole opened on the side of the basin.

WANT CHINAMEN EXCLUDED.

The petition recites that Chinese labor is driving out the white workingman; that the United States, realizing this, has excluded the Mongolian cookies, and that Canada should adopt dray-tic measures to keep them out. It then urges that a tax of \$500 be levied upon each Chinaman entering the dominion as a means of lessening the number.

Your Boy Won't Live a Month. So Mr. Gilman Brown, of 34 Mill St., South Gardner, Mass., was told by the doctors. His son had Lung trouble, following Typhoid Malaria, and he spent three hundred and seventy-five dollars with doctors who finally gave him up, saying: "Your boy won't live a month." He tried Dr. King's New Discovery and a few bottles restored him to health and enabled him to go to work a perfectly well man. He says go to work a perfectly well man. Russian Coronation Ceremonies Closely

Resemble Those of the Old Empire. Only those who have studied Byzantine history can have any idea of how closely the ceremonial of the Moscow coronation resembles, even in its minutest details, that which used to be observed at the coronation of the Byzantine emperors. Although the Russian church did not separate from that of Rome until the Twelfth centurythat is, nearly 400 years later than the schism of Photica, which rent the western and eastern churches asunder-nevertheless it retained its oriental rites.

In 1184 a Russian commission arrived In Byzantine to study the etiquette and ceremonial, ecclesiastical and profane, of the court and church of that capital. On their return to their native country a great change took place in the national costume, architecture and ceremonial. When Moscow became the sacred city par excellence of the empire the kremlin was rebuilt on the same lines as the Blachernae palace on the land walls of Constantinople. Like its Greek model, it consisted of a series

Enormous School of Porpoises. The steamer Ulunda, which recently arrived in Halifax from Liverpool, encountered an enormous school of porpoises pursued by about two dozen large whales just before it came to port. It was estimated that there were over 1,500 porpoises in the school. They were seen about 15 miles east of Halifax, and jumped about the vessel's sides in evident terror of their pursuers. The sea was black with them, and they rushed through the waters like mad, with the great, puffing whales close in the rear. Old salts say they never saw anything like it on the American coast.—N. Y.

One of San Francisco's capitalists is Joseph Boardman. It is said that he is a millionaire, but to look at him you would not think it. You could hardly say that he dresses shabbily, but he comes very close to it, and appears to a stranger to be some kindly old gentleman whom fortune has never cared to smile upon. Mr. Boardman's house is over in Oakland, but his office is in San Duluth, South Shore & Atlantic Francisco, and each morning he makes

the trip over on the ferry.

The other morning he started for the boat, and in his haste he forgot to transfer his pocketbook to his clothes. course, he did not discover this until he had reached the wharf. There was no one in the crowd that he knew or that knew him. He searched every pocket in vain. A young man standing near by witnessed the confusion of the old gentleman, and, walking up to him, thrust a coin into his hand and moved back into the crowd.

back into the crowd.

The young man doubtless supposed that he had done an act of kindness to a needy one, and he hastened away in order to make it less embarrassing for his beneficiary. He had no opportunity to get far, however, before Ala Boardman caught him and made him divulge his name and address. The next day the young man was the religiont of a saug check drawn by the millionaire, and making him richer by \$100 than he was the day before.

SOUND ASLEEP A WEEK. An Indian Fakir Rests Seven Days in

Hypnotic Slumber.

To the student of hypnotism and auto-suggestion there is no more interesting study than the sleeping fakirs of India. These men go into a sleep which lasts for many days. For years their ability to do it was doubted by all Europe, where the fact of the strange accomplishment was first made known in a general way.

Even when a number of them visited England and demonstrated their power the British scoffed at them, though some of the best physicians of England vouched for the genuineness of the tests. Since that time, however, the singular ability of the fakirs has been recognized, and they are no longer regarded as impostors.

During the recent Hungarian millennial exposition at Buda-Pesth a fine opportunity was presented to learn as much about the fakirs and their remarkable industry as they will permit anyone not of their own caste to know. The management of the exposition engaged three of them.

The fakirs were in London at the time of their engagement, and arrangeto enter the cataleptic sleep before leaving London, and to be transported

The preparations for the long sleep were simple. As the murmuring continued it was noticed that the chest of the sleeping fakir began to heave. Then he was found to be breathing, though the respiration was so irregular as to be spasmodic. At the same time the arms and legs were still rigid.

WANTED—Boarders, with or without rocm, accommodations first class. Mrs J. Mc Neil, 200 Main street, Negaunee. (8-28-1w)

The pupils of the eyes could not be seen at that time, they having contracted to a remarkable degree. The murweek, groaned aloud. Then his lower jaw began to move and by degrees he regained consciousness, and after awhile was given a glass of milk. He complained of pains in the back

and asked to be lifted from the glass ground for a space of two miles and then and it made him groan so that he could flow out from the mouth of a conyonita as be heard all over the building. It was fully half an hour later before he was able to lift himself. He told the audience that while asleep he had been in the other world, where he had heard excellent music and felt extremely well. The name of the fakir who underwent the experiment is Bhim-jen-Prat-ley. He is 23 years old and is a native of Lahore, Punjab, India. He says that his ability to perform the feat is due entirely to his great effort of will and to auto-suggestion.—N. Y. World.

Lots of Rooters.

Marquette fans are nothing if not boat and ashore. loyal to the ball team. The number that went up yesterday surpassed even the most sanguine expectations of the management. The special left for Ishpeming at 1 o'clock in the afternoon, and had seven cars, all well filled.

The rooters were an enthusiastic lot, and although they came home defeated they were not crestfallen. They had seen a good close game and were satisfied that they had had the worth of their money. As might be supposed fiel that they had had the worth of their money. As might be supposed there were a good many who knew why Marquette lost the game, and who should be not of or not on the street.

Eunice Goodrich Company.

Marquette people should be pleased to welcome the coming of the Eunice Goodrich company to the city tonight to fill an engagement of six nights with a special matinee for ladies and children on Saturday at 2 o'clock. Miss Goodrich is the best known of successful eastern repertoire stars who visit this section of the country and is visit this section of the country and is supported by a company of ladies and gentlemen, the finest artists to be obtained, and whose work has been unstintedly praised by the press where ever the company has played. Equally sharing the honors with Miss Goodrich is a little tot of five years, Pottle's Baby, who has won the hearts of her audiences on her every appearance by her sing-

ing and dancing. This infant wonder not only sings and dances in a manner to win econiums of praise, but also acts. actually playing a star part in a fiveact sensational comedy, re-written for her, entitled "Little Miss Worth" which will be produced during the engagement here. Among other plays they will produce "Only a Country Girl", "Wanted a Husband", "That Girl" and "Little Duchess."

Club Tennis Tourney.

Having made such a success of the Upper Peninsula tournament the tennis club has decided to have a second tourney this season. There is hardly time to get up so elaborate a one as the last, so the coming event will be limited to club members.

The tournament will be held on the club grounds and last two days, next Saturday and the following Monday, which is Labor Day. There will be contests in both singles and doubles,

Christopher Columbus Again.

The whaleback Christopher Columbus will come in here again this season. A week from Saturday is the date set. Last time the boat was here she merely made a run out in the lake and took the excursionists for a ride without any objective point to the journey. The next time she comes in she will run an excursion to Pictured Rocks, staying two hours in the vicinity of this wonderful natural curiosity, and Capt. Smith promises that if the day is fine he will lower the small boats and take passengers in close so they may contain a better view. The Columbus will leave here on the arrival of the 1:15 train, make the trip to the rocks and get back by nine in the evening. On the return trip there will be dancing, the music for which will be furnished by the Ideal orchestra.

Travels by Express.

Something in the nature of a curiosity arrived at the office of the Western Express company yesterday afternoon. It is a strap which is making a tour of the express stations of the country. Attached to the strap are already some forty tags marked by agents at different points on its travels. It is impossible to figure out where it started from, but most of the tags it bears came from eastern points. It is probable also that it started on its tour since the political conventions, as most has been mostly in the "enemy's country" the majority of the tags are marked with McKinley and Hobart sentiments. For the benefit of those who have examinations to take Miss Chandler Bryan and Sewall a chance.
