LAKE SUPERIOR COPPER.

Horace J. Stevens' Seventh Annual Review of Houghton County's Great Industry.

length, and depth so great that the internal heat of the earth will check the miners long before they have reached the end of the paying ground. The development of such metalliferous deposits requires princely fortunes for each new mine, and it will be nearly two years before the influence of the outputs of the new mines is plainly apparent in the figures of production of the district as a whole.

The Oneco has suspended work for the winter. A single shaft was sunk some depth on an amygdaloid thought by the management to be the Kearsarge, but probably an unidentified bed outcropping east of the Kearsarge.

The present status of the mines of the district, beginning at the east and ending with the Victoria, west of the Ontonagon river, is as follows: A few miners are doing exploratory work on the Washington property, east of Mosquito Lake, Keweenaw county.

The Ashbed, Humboldt and Meadow prospects opened on the shaded lode, west of the Arnold, are all idle at present, though some work was done on them last spring and summer.

The Phoenix Consolidated company is reopening the old St. Clair mine and also devoting a little attention to the Robbins and the Phoenix. The Phoenix has been a badly managed mine during much of its past history, this being palpably shown by the fact that a previous management actually lost money on cutting up and hoisting a mass of native copper weighing 320 tons—the largest mass of pure native copper ever found anywhere.

The production of refined copper by Lake Superior mines has been as follows for the past four years: Year. No. Employees. Accidents. 1897..... 6,489..... 21

The Centennial has permanently dropped work on the conglomerate, which has cost about \$1,500,000 in the past, without securing a profitable mine, and it is at present opening two shafts on the Kearsarge lode. The showing is good, and an assessment of a half million dollars was recently levied, to provide funds for the operation of the shafts.

The Quincey has recently completed a new mill of three stamps one head of which was started early this month, with a second to go into commission immediately. A vast amount of underground opening work and surface construction and equipment has been done at the Quincey in the past twelve months, and the mine will make a much larger production in 1901 than ever before in its history.

The Isle Royale Consolidated will have its new mill running next summer. This property has produced about 18,000 tons of copper in the past, made at a loss, owing to lack of capital and poor mining and milling facilities, but gives promise of becoming a fine mine, under modern methods and management.

The Atlantic has added new and powerful machinery during the year, and is again permanently in the ranks of the dividend-paying mines. It is now employing upwards of 700 men, and is equipped much better than ever before in its history.

The Elm River has been exploring its ground very thoroughly, with rather indifferent results until very lately, when a new amygdaloid, which appears to be richer, wider and more regular than those first opened, has been cut. The Elm River property apparently hinges on the development of this amygdaloid during the next few months.

The Wyandot, next south, has also been exploring a great deal of ground with poor results, but has opened a new lode recently, from which better things are hoped. There's no health in the Wyandot, next south and east, has proven disappointing. Originally opened with one shaft, a third of a century since, it was thought by all mining men to be a property of exceptional promise, but was not developed until recently because of lack of a railroad.

The Mass Consolidated, next southeast of the Adventure, comprises the Mass, Rines, Hezard, Ogma and Merrimac mines, work at present being confined to the Ridge. This property was a dividend-payer many years ago, and is favorably regarded. A new two-stamp mill is building at Ogma, on Keweenaw Bay, and should be running by the middle of 1901.

The Michigan mine is opened on the Calico lode, paralleling the contact between the Kearsarge and Oneco. It is believed that the old Michigan mine contains millions of dollars' worth of copper, which can be obtained at a handsome profit. The Victoria mine, the westernmost active property of the district, is working very economically, and has recent-

ENGINE HITS HIS CUTTER. CHASSEL MAN PROBABLY FATALLY HURT NEAR HOUGHTON.

Ludger Beauchaine, a Chassel man, was the victim of a very serious, and probably fatal, accident on the South Shore road at 4:45 o'clock Thursday afternoon. He was driving in the direction of Chassel with horse and cutter and had occasion to pass over the crossing of the D. S. S. & A. near the Isle Royale boarding house just about the time a passenger train was approaching. Mr. Beauchaine did not have time to clear the track and the engine struck the rear end of the rig, the occupant being thrown violently out and to a considerable distance from the scene of the collision. The horse escaped without a scratch.

The train came to a standstill and the injured man, more dead than alive, was taken to the nearest place—the Isle Royale boarding house. Dr. Nelson of Chassel was summoned, as also was Dr. R. M. Burdon of Houghton. The physicians worked over the unconscious man, but were unable to revive him. Mr. Beauchaine was still unconscious at an early hour yesterday morning. He is considerably bruised, also probably severely injured internally, and hopes of recovery are slight. The passenger train that struck Mr. Beauchaine was the one put on last Monday to run from Houghton to Ontonagon. It is due at Chassel at 4:35 p. m. and at Houghton at 4:55, and the accident occurred about midway of the distance between the two stations. Mr. Beauchaine was until recently employed as a setter in the mills of the Sturgeon River Lumber company at Chassel. He has a wife and four children. Shortly before the unfortunate happening Mr. Beauchaine had two of his little children in the cutter with him, but on account of the cold he left them to come home on the train. It was well that this was done, or the accident might have been more severe than it was.

TRAINMEN WILL DANCE. ELABORATE BALL AT CALUMET WILL USHER IN THE NEW CENTURY—UNIQUE INVITATIONS.

The annual ball of the Brotherhood of Railroad Trainmen will be held at the Light Guard Armory, Calumet, on Monday night. The members of the order who live in Houghton county will have charge of the social affair, and as extensive and careful arrangements have been made during the past two or three weeks it promises to be a good success both in a financial and social way. The yearly function is generally looked forward to with pleasurable anticipation by the friends of the trainmen and by members of the organization as well, the time being made the occasion for a general gathering of the representative railroad boys of the county.

The invitations sent out are very unique in the form of a message from a train dispatcher and the regulation rules regarding such epistles are strictly adhered to. Following is a copy of the "bid": Red Jacket Lodge, No. 367, B. of R. T. Telegraphic Train Order No. 19, Arrangement Committee's Office, Red Jacket, Mich., Dec. 15, 1900.

Our Lodge, Engineman. The Boys, Conductor. (3) George Vardon, Chief Train Dispatcher. Order complete at 9 p. m. by James Doyle, Train Dispatcher. Angus McLean, Operator. Keep a copy of this order.

The arrangements committee consists of Daniel Ross, James Doyle, Oscar Ongie, William Gardner and W. J. Anderson, and floor committee, John McElvey, Alex McLean, William Downing, Louis Stokely, William Tarbox, D. Brunau, T. Gorman and S. Tevartna. The members of the reception committee will comprise all of the trainmen who are present at the party.

The committee on decorations have been busy for several days past, fixing up the armory for the event. An electric display of nearly 1,000 lights interwoven with bunting will produce a most brilliant and beautiful effect. The incandescent lamps will be arranged to represent the emblems of the order.

A CARD. We, the undersigned, do hereby agree to refund the money on a 25-cent bottle of Green's Warranted Syrup of Tar if it fails to cure your cough or cold. We also guarantee a 25-cent bottle to prove satisfactory or money refunded. The Stafford Drug Co., Desjardins Pharmacy, D. ("The People's Drug Store," (10-15-6m-0)

CONSIDER THE CHAMPION A BONANZA PARTY OF MINING MEN BRING FLATTERING REPORTS FROM THAT SOUTH RANGE PROPERTY

Captain Whittle, of the Quincy mine; Captain Demers, of the Rhode Island and formerly of the Franklin property; Captain Wilcox, of the Arcadian; J. H. Seager, and James R. Dee made a most thorough investigation of the Champion mine of the Copper Range company yesterday afternoon, and returned immensely pleased with the showing. They verified all the reports of the richness of the property, look on it as one of the biggest amygdaloid propositions opened in this region and do not hesitate to state that they prove one of the largest mines in the district. The rock, they say, will average fully 2 per cent.

Four shafts are under way—B, C, D and E. B is down about 300 feet, C the same, E about 500 and D 400, which besides considerable drift has been done, and the rock is very rich wherever exposed. At the bottom of D shaft a drift has been driven about seventy feet and the rock is very difficult to mine through on account of the heavy copper encountered. This drift is 1,700 feet from the Trimumountain line. C shaft is in the same class of rock, and here there are two masses of three tons each—too large to take up by present methods. The bottom of the shaft is very rich. Nine shafts, besides the Champion, will be done, and the rock is very rich wherever exposed. It is expected to produce copper by next August.

Mr. Dee, one of the visitors at the mine, expressed his views as follows: "To secure what the Copper Range property is worth, apart from the railroad end of it, the stretch of mineral ground available—some 15,000 feet in length, with a lode, say, thirty-five feet wide—must be considered. And besides the Champion, which is a feeder right from surface, compared to some of our mines that are selling between \$100 and \$200 and whose shafts are down nearly a mile before copper is reached. The railroad itself is a source of advantage. The contracts secured from several mines on the range besides the commercial business along the line. I think people here are beginning to realize the value of this property and wonder they have not done so before. This is a range belt which will be a great deal for this section of the country."

BUTTE DISTRICT EXPANDING. COPPER LODES FOUND TO EXTEND MUCH FARTHER THAN SUPPOSED—PRACTICALLY INEXHAUSTIBLE DEPOSITS IN SIGHT.

The copper district of Butte is gradually extending, and developments during the past month have conclusively shown that the area of rich copper deposits, which was generally, until recently, believed to be confined to the territory owned by the big mining companies, and but a few miles in extent, now covers many miles. Three miles east of the city rich deposits have been uncovered and now beyond the report of a strike in the miner's gulch, twelve miles west of the city, where the mines of the Homestake company are turning from gold and silver into copper. During the past week a big company has been organized, believed to be in the interest of the Amalgamated company, to develop a lode in the southwestern part of the city on the Emma claim on which a bond for \$100,000 has been obtained from some Minneapolis parties. It is generally believed that the Emma lode of the district. There is an old shaft on the property which is down 200 feet in a low grade vein which is 300 feet wide. It is confidently believed by experienced mining men that at a depth of 800 or 1,000 feet a rich lode will be reached, and that it will prove the western extension of the great copper belt. During the past year the area of known copper has been more than doubled.

During the year now closing all of the large companies of Butte have made considerable surface improvements. All of the Anaconda's properties have been equipped with steel gallews frames, and all of the mines are now in shape for deep mining. The greatest depth attained in the Butte district so far is 2,200 feet, which is the depth of the Parrot Ore, Diamond and Green Mountain of the Anaconda company. At this depth the copper veins continue strong and rich, with every indication that the depth at which copper ore will be found is unlimited. During the year the shafts of the district have been developed a total of 6,700 feet. The High Ore was sunk 500 feet this year; Diamond 400; Never Sweat 200; Anaconda and St. Lawrence 100 each. The Pennsylvania has added 300 feet to its shaft and now down 1,400 feet. The Parrot is down 1,800 feet, 400 having been added this year. The total depth of all the shafts of the Butte district is 47,800 feet.

Deputy Mining Inspector Harry Hunter, in his annual report, says: "The total number of men employed by the Montana Ore Purchasing company in the Rarus mine is 408. The Minnie Healey, operated by a receiver, employs 88 men, and the Nipper, also worked by a receiver, has 213 on its pay roll. Other mines employ men as follows: Anaconda, 3,322; Boston & Montana, 1,394; Washoe, 163; Butte & Montana, 562; Parrot, 331; Colorado, 316; Colusa-Parrot (Clark's), 533; Speculator, 120." The total number of men employed in the mines of the district, according to Mr. Hunter's report, not including the small mines and those operated by leasers, is 3,081.

COPPER ABROAD. Morrison, Kekewich & Co., metal brokers in London, in the latest copy of their circular say: "Standard copper attracts little attention and the market is narrow, but relatively it is far the cheapest copper; a considerable 'bear' account exists and the Americans have complete control of the situation. Reserves are in short supply at remunerative prices. European consumers have practically nothing bought beyond this year. When they come into the market we think they will be surprised at the scarcity of available supplies. Rumors have been circulated that the supply of copper in the continent, but this is nonsense. The war office has invited tenders for 250 tons of special brands; immediate delivery is required."

COPPER GOSSIP. A dividend on Atlantic stock is due in February. The annual meeting of the Santa Fe Copper company will be held at Jersey City on Jan. 22.

Trimumountain and Copper Range are higher on local transactions, according to Boston advices. Those stocks, like Mohawk, are very closely held. A new pool is said to have been formed to boom Amalgamated. The old pool which had been in existence since the company was first organized has just been dissolved with small profits for those interested.

The lode—the "Merchants' vein"—recently encountered at the Adventure incrosscut from shafts 1 and 2 shafts has been found even richer than expected. It will be developed extensively. All the rock from No. 2 shaft is being saved for stamping, and considerable mass copper is being secured. Good copper ground is also being opened in No. 3 shaft. "Winona looks good for a 2 or 4 points advance," wired Palme, Webber & Co. from Boston yesterday. The property, it may be stated, is looking decidedly better than at any time since the first few months after opened two years ago. The formation is becoming rich. Shaft No. 7, however, is hoisting a large percentage of excellent stamp rock. Miners at property are again said to be buying Winona stock.

The Houghton office of Palme, Webber & Co. was again well filled yesterday and there was scarcely standing room for many who were anxious to get a peep at the book. Several "coppers" were quite active, principally Copper Range, Trimumountain and Tamarack, while Mohawk is gradually rising a few points. Local dealers are much interested and a goodly portion of them are feeling rather good natured just at present.

FIRE RUINS COMING DOWN. The work of tearing down the walls of the Young building and the ruins at the corner of Sheldon and Huron streets, as was announced in yesterday's issue, would be done—was started yesterday. Contractor Hale of Houghton is at the work with a small force of men. The job is being commenced in good time, as the east wall is already giving way because of no support. It was found necessary to prop it up in places by scaffolding that is joined to the Habba building. Work of tearing down the brick walls was started at the east side of the building, as this is the most dangerous place. Nothing in the way of future plans has been decided upon by the owner of the building, Mrs. Young. She has virtually placed the matter in the hands of her son-in-law, F. Wieber of Houghton, and he is in charge of the property. The rumor to the effect that a company has been organized to buy the corner for the purpose of erecting a new and modern theater building cannot be verified. It may be a "pipe dream," but at any rate the location would be a very good one for an opera house.

STOLE A MARCH ON HIS FRIENDS. Al Bohrer, the popular young pharmacist employed at Arthur T. Ellsworth's drug store, Hancock, was married at Ishpeming at 7 o'clock Thursday evening. He arrived home with his bride last night. Mrs. Bohrer was formerly Miss Libbie Hough and is the daughter of Captain Hough of Ishpeming. She was one of that city's most popular and estimable young ladies. The marriage ceremony was performed at the home of the bride's parents in the presence of a number of the friends of the young people. The pastor of the Ishpeming M. E. church, Rev. Mr. Polkinghorn, officiated. It was a pretty wedding; the house was very nicely decorated in an artistic manner, and after the ceremony a supper was served to the young couple and the invited guests. The news of "Al's" marriage comes as a surprise to his many Portage Lake friends.

WAR DECLARED!

We propose to supplant the labor of fifty to seventy-five alien Chinese in Houghton county by the same number of American men and women, to whom we offer desirable employment at living wages in large, well-lighted, airy rooms and under perfect sanitary conditions. Aside from the fact that with the aid of the most modern labor and fabric saving machinery, we are turning out the best work in Michigan. The vast difference between our large and perfectly ventilated work rooms, compared with the unspeakable squalor of a Chinese laundry, should, apart from all other conditions, give us the preference "by a large majority." To this end we ask your co-operation and patronage. Our perfect system of delivery guarantees satisfactory service.

The arrival here yesterday morning from Chicago of Edward R. Hall disclosed the fact that the men who hold a majority of the stock in the Ishpeming National bank are about ready to talk business to the directors of the Miners' National.

Mr. Hall was not here long before he went into consultation with a committee representing the new institution. Several hours were spent in talking the matter over and an adjournment was taken until today without an agreement being reached.

FOR ST. JOHN'S CHURCH. BENEFIT CONCERT HELD THURSDAY NIGHT WAS ATTENDED BY AN APPRECIATIVE AUDIENCE.

Persons who attended the concert given Thursday evening for the benefit of St. John's church were treated to a most entertaining program.

The singing, dancing, readings, recitations and instrumental music were all acceptable. Miss Millie Page, who had the management of the entertainment, deserves great credit for the way in which it was conducted.

The first number was a quartet selection, the singers being Miss May Martin, Mrs. Delbridge, Mr. Rule and Mr. Delbridge. The church choir then appeared. C. F. Donahoe's readings were highly entertaining and his auditors showed their appreciation by repeated encores.

HAS NAMED THE MAN.
SCHOOL BOARD APPOINTS B. O. GREENING TO SUCCEED THE LATE SUPERINTENDENT KROGMAN.

For the past few days it has been known in official circles that B. O. Greening, principal of the Negaunee high school, will succeed the late Herman Krogmán as superintendent of schools. Yesterday the appointment was formally announced by School Director Sawbridge.

The appointment of Mr. Greening was not a surprise, as it was a foregone conclusion that he would be chosen to fill the vacancy so sadly created. Mr. Greening has served as principal of the high school since last September, coming here directly from the state university. His work for the past four months has been very satisfactory to the board. He and the late superintendent were close friends. They worked in harmonious co-operation. Their ideas and theories of school management were much alike; and for this reason the appointment of Mr. Greening is considered a strong one, for he will be able to carry on the work laid out by his predecessor. The appointment of Mr. Greening is for the remainder of the school year but it is understood that he is to be permanent superintendent should his work prove satisfactory.

A Mining Journal reporter called on several teachers yesterday to ascertain their views in regard to the board's selection. Every one seen expressed great satisfaction with the action of the board. The general opinion is that a better selection could not have been made. Not one complaining voice was heard and only the kindest words were spoken of the new superintendent.

Mr. Greening is a young man of twenty-five years of age. He was born at St. Joseph, and attended the public schools of that city until his graduation from the high school, when he entered the state university at Ann Arbor. Here he took a scientific course. While at college Mr. Greening always stood at the head of his class and his former professors considered him one of the strongest of the students graduated from that institution in years. He has the reputation of being quite an orator and debator and while at college took part in several inter-state contests.

Who Mr. Greening's successor as principal of the high school will be is not known. The new superintendent is at present in Chicago looking for a teacher, and as soon as he finds a person qualified for the position the appointment will be announced.

FREE OF CHARGE.
Any adult suffering from a cold settled on the breast, bronchitis, throat or lung troubles of any nature, who will call at The Stafford Drug Co. will be presented with a sample bottle of Boschee's German Syrup, free of charge. Only one bottle given to one person, and none to children without order from parents.

DANCE NEW YEARS EVE.
The final preparations for the degree team's dance, which is to take place New Year's eve in Cyr's hall, are being made. That the hop will be a success is certain, for a large number of tickets have been sold. Every member of the team has worked hard to make this their first party a social success. For the patrons of the dance who will come from Ishpeming a special car has been secured from the Street Railway company to take them home. The time this car will leave Negaunee will be announced later.

A NIGHT OF TERROR.
"Awful anxiety was felt for the widow of the brave General Burnham of Machungus Me., when the report said she could not live till morning," writes Mrs. S. H. Lincoln, who attended her that fearful night. "All thought she must soon die from pneumonia, but she begged for Dr. King's New Discovery, saying it had more than once saved her life, and had cured her of Consumption. After three small doses she slept easily all night, and its further use completely cured her." This marvelous medicine is guaranteed to cure all Throat, Chest and Lung Diseases. Only 50c and \$1.00. Trial bottles free at the Stafford Drug Co.

BROKE HIS LEG.
On his way home from calling on a friend Monday night, Gus Sundberg fell on a sidewalk and broke his left leg above the ankle. No one was on the street when the accident happened and the injured man was obliged to lie on the walk for almost half an hour waiting for help to take him home. A couple of men who were driving along the street discovered his plight, and took him to his home. A doctor was promptly called in and the fractured limb was attended to. He is getting along quite nicely.

The board of supervisors held a short session yesterday, approved the bonds of the various county officials and allowed a few bills from the different townships for small-pox cases. The bills were very moderate and all properly certified to.

Quarantine was raised from the two small-pox cases in the village yesterday and now the village is clear of the disease. There are but a few cases left at Baraga, and these will be released next week. There are still two cases at Avon, which came from the lumber camps.

The Hathaway Graphite Manufacturing company's mine is being rapidly put in readiness for active operations. The company expects to commence grinding and refining the graphite about the 20th of next month. The plant consists of a crusher, two pulverizers and a finishing mill. The power is furnished by Fall river. There is on hand at the mill about seventy-five tons of graphite, and the company's mine, located on Section 9, Town 33 N., Range 23, is now reached by roads opened to enable it to get the raw material to the mill here as needed. The success of the enterprise seems assured.

The opening of the recently completed Mineral Range extension by the D., S. S. & A. railway on Monday next from Keweenaw Bay will be a great benefit for the towns of Marquette county, as it will bring them in close touch with the growing and progressive towns of Mass City, Rockland and Ontonagon.

The train leaving Marquette at 7:00 a. m., Negaunee 7:45 a. m. and Ishpeming 7:55 a. m. will make close connection at Keweenaw Bay (daily except Sunday) with the day express from Calumet arriving Mass City 11:57 a. m., Rockland 12:15 p. m. and Ontonagon 12:45 p. m. Returning, the train will leave Ontonagon 1:25 p. m., Rockland 2:05 p. m. and Mass City 2:25 p. m., arriving Keweenaw Bay 4:00 p. m., there connecting with the train from Calumet due at Ishpeming 6:50 p. m., Negaunee 7:00 p. m. and Marquette 7:35 p. m. (12-20-10)

DOND'S EXTRACT

There is only ONE POND'S EXTRACT, and everybody knows its purity, strength and great medicinal value. Don't take the weak, wavery Witch Hazel preparations represented to be "the same as" POND'S EXTRACT. They generally contain "wood alcohol," which irritates the skin, and, taken internally, is a deadly poison. Get genuine POND'S EXTRACT, sold ONLY in SEALED bottles, in BUFF wrappers.
