

DAILY MINING JOURNAL

A MORNING PAPER PUBLISHED BY THE MINING JOURNAL CO. (LIMITED.)

Issued daily except on Sundays. Contains Associated Press dispatches and is especially devoted to the Upper Peninsula interests.

SUBSCRIPTION RATES: Per month, by carrier, \$1.00; Per year, by mail, \$10.00.

MARQUETTE, MICH., APRIL 25.

Entered as mail matter of the second class in the postoffice at Marquette, Mich.

Swish-swish-swish. The Big Stick.

Once more we see the president in his role of standing pat.

The man who wants to please the president must 'rah for Taft.

At last accounts the Stephenson of Marinette was more than holding his own.

Governor Warner stands fairly in favor of the nomination of senators by direct vote.

Senator Spooner of Wisconsin is now enjoying to the full the luxury of not being a candidate.

And what does Mr. Harvey, of the various Harper's publications, think of the Taft-Roosevelt program?

The insistent friends of Haywood and Moyer should remember that Mr. Harriman feels as badly about it as they do.

According to press reports Kansas proposes to put a lid on the liquor traffic and on Standard Oil, at one and the same time.

Governor Warner, being now the simon pure governor of the people, by the grace of their votes in direct primaries, favors simon pure government of the people.

The county road commissioner has lots of money and proposes to get an early start. Under the circumstances the season ought to see something tangible accomplished in the way of good roads.

Voting machine sentiment has been given a great boost in Marquette by the post-election disputes this spring. It is now generally accepted that there will be no more city elections with the old blanket ballot, and that the council will buy machines, as soon as it decides which one it wants.

Representative Byrns says it's a "leech" for him to say the positive word about his reported candidacy for lieutenant-governor. If he should become a candidate at the primaries, however, there is no doubt that he would make a strong run for the office and with a little help below the straits from the administration he would probably get enough votes to land the nomination.

Among the Wisconsin legislators are advocates of a binder twine plant for the Waupun prison. The committee that had the matter under consideration reported adversely on it, but it will be put up to the legislature for discussion and action by a minority statement in favor of the project. The appropriation asked for is about \$125,000, but it is not believed, in view of the attitude of the majority of the committee, that the measure has any chance of passing.

From the decisiveness with which he goes after Mr. Harriman and his pals on the one hand and the ill-advised friends of Moyer and Haywood on the other, it might be expected that President Roosevelt would be crushed between the upper and lower millstones of capital and labor. But he will not meet this fate. The great body of average citizens admire his sincerity, appreciate his motives and, what is more important than all, are prepared to stand by him.

There is little prospect that State Highway Commissioner Earle's bill providing an appropriation of \$200,000 for a new prison in Keweenaw county will receive serious consideration, says the Copper Country Evening News. There are too many requests for increased appropriations for state institutions which take precedence over Earle's prison measure. In view of the circumstances there is little hope for his scheme. Many copper country people would like to see a prison established in Keweenaw county, but the amount of interest in the project is not of enthusiastic proportions. At least The Evening News hasn't noticed that anybody has gotten real excited over it. Were there a better pros-

pect for the success of the movement, perhaps sentiment would be a little stronger for it. The park, cemetery and street commission is still busy with the preliminary necessary to completing an effective organization. The members plan to put their work on a business basis, adopting a complete system of bookkeeping and accounting that will enable them to know just where they stand and just what a given improvement costs. They want no haphazard methods of either doing work or keeping their accounts. They are feeling their way slowly and carefully and when they announce the details of the system they have devised they believe it will be one of which the taxpayers will wholly approve.

The new board of supervisors, which, by the way, is largely the old board, is off, having organized for the ensuing year yesterday. Captain Treblecock was honored with a fourth consecutive election as chairman, an expression of the esteem in which he is held by the board that will be pleasing to his friends. Captain Treblecock is a good presiding officer, and under his direction business moves in an orderly and expeditious manner. He will appoint good committees for the year, and Supervisor Fay of Marquette will have his usual position as chairman of the purchasing committee. The board as a whole yesterday ap-

proved Judge Stone's appointment of Frank G. Jenks to succeed County Clerk Elliott, as was expected it would do, and Mr. Jenks will enter on the discharge of his new duties the first of the month. Captain Cleary, of the Marquette life saving crew, is a man who has been uniquely honored in the service. As noted the other day in The Mining Journal's news columns, Captain Cleary has gone to Jamestown, to take charge of the life saving crew that will be a feature of the exposition and that will be ready for practical service there, in case of need. The Jamestown exposition is the fifth fair of national scope, including the great expositions at Chicago and St. Louis, where Captain Cleary has had a similar command. It speaks well for his standing in the service and for the esteem in which he is held by his superiors that he should be thus singled out for duty at exposition stations where it is desired that the service shall be seen at its best. Captain Cleary has reason to be gratified at the honor that has been paid him.

Many people have hazy ideas of what newspapers are willing to print in the way of communications. Within certain limits they will print communications anonymously, if they are informed as to the name and responsibility of the writer. They generally print signed communications with more avidity, yet there

are certain signed communications that they deem it wise to refuse. Letters of the latter sort discussing principles and issues, in political campaigns or in connection with any matter of government, they are always willing to give space to. What they are usually unwilling to do is to lend their columns to personalities, or to personal acrimonious discussion of any nature, except such as they choose to enter on in their own account. By a general rule closing their columns against personalities the newspapers help keep peace in the communities in which they circulate, and they believe their course is a wise one.

Judged by upper peninsula standards Lansing is a funny old town. It will be recalled that in January O. C. Downey, proprietor of the Downey house, Lansing's principal tavern, was arrested for a violation of the liquor laws, he having kept his bar open for the accommodation of the statesmen gathered at Lansing to dispose of the senatorial plum, during hours when the law says it should be closed. Statewide interest was created when Downey was given a jail sentence, instead of the usual small fine. Now he is in more trouble, as a result of his violation of the law. The Lansing council, which, we judge, is a stiff-necked body, held up his license to continue his bar, because of his violation of the law in January. The committee reported unfavorably on his application, and its re-

port was sustained by a majority of one vote. Two aldermen were reported sick and one out of the city, so it is possible that with a full council Mr. Downey will get his license, as the matter is on the table and can be taken up again. To the average community in the state it will appear that Mr. Downey is being hardly used. The jail sentence was a big jar, and now this proposal to refuse to license his bar for another year is adding insult to injury. To be sure, Mr. Downey put a big crimp in a state law, but it is a law that is a farce in the greater part of the commonwealth. Perhaps the lesson in Mr. Downey's case is the great importance of attuning one's conduct to the local opinion on the law. Apparently Mr. Downey has tried to run opposite to the current of public opinion in Lansing.

"PNEUMONIA'S DEADLY WORK" had so seriously affected my right lung," writes Mrs. Fannies Connor, of Rural Route 1, Georgetown, Tenn., "that I coughed continuously night and day and the neighbor's prediction—consumption—seemed inevitable, until my husband brought home a bottle of Dr. King's New Discovery, which in my case proved to be the only real cough cure and restorer of weak, sore lungs." When all other remedies utterly fail, you may still win in the battle against lung and throat troubles with New Discovery, the real remedy. Guaranteed by The Stafford Drug Co. 30c and \$1. Trial bottle free.

DETECTIVES TO GUARD GUNS. No Unauthorized Persons Will Be Allowed to Inspect Fort Monroe.

Washington, April 24.—The war department, following out a recommendation of General Frederick D. Grant, commanding the division of the Atlantic, has authorized Colonel George E. F. Harrison of the Artillery corps, the commanding officer of Fort Monroe, Va., to employ, during the existence of the Jamestown exposition, ten private detectives, whose duty it shall be to see that no unauthorized persons get within the new fortifications guarding the entrance to Hampton roads. Fort Monroe is not far from Jamestown and the site of the exposition. These detectives will be put on guard because of the great number of foreigners who will visit Norfolk and vicinity in the six months the exposition will be open. This is the first time in the history of the country, it is said, that private detectives have been authorized for this work.

The regulation, which is a recent one, under which the war department acted is as follows: "Commanding officers of posts at which are located lake or coast defenses are charged with the responsibility of preventing, as far as practicable, visitors from obtaining information relative to such defenses which would be communicated to a foreign power, and to this end may prescribe and enforce appropriate regulations governing visitors to these posts. American citizens whose loyalty to their government is unquestioned may be permitted to visit such portions of the defenses as the commanding officer deems proper." The new Fort Monroe is one of the most modern in equipment on the Atlan-

tic seaboard. Its armament is the most modern, the main batteries consisting of new guns of the highest calibre, fitted with every device for controlling their fire. There are eight full companies of coast artillery stationed in the fortifications, these companies being the Sixth, Thirtieth, Thirty-fifth, Forty-first, Fifty-eighth, Sixty-ninth, Seventy-third and One Hundred and eighteenth companies of Coast artillery.

THE HIGHEST TOWER IN U. S.

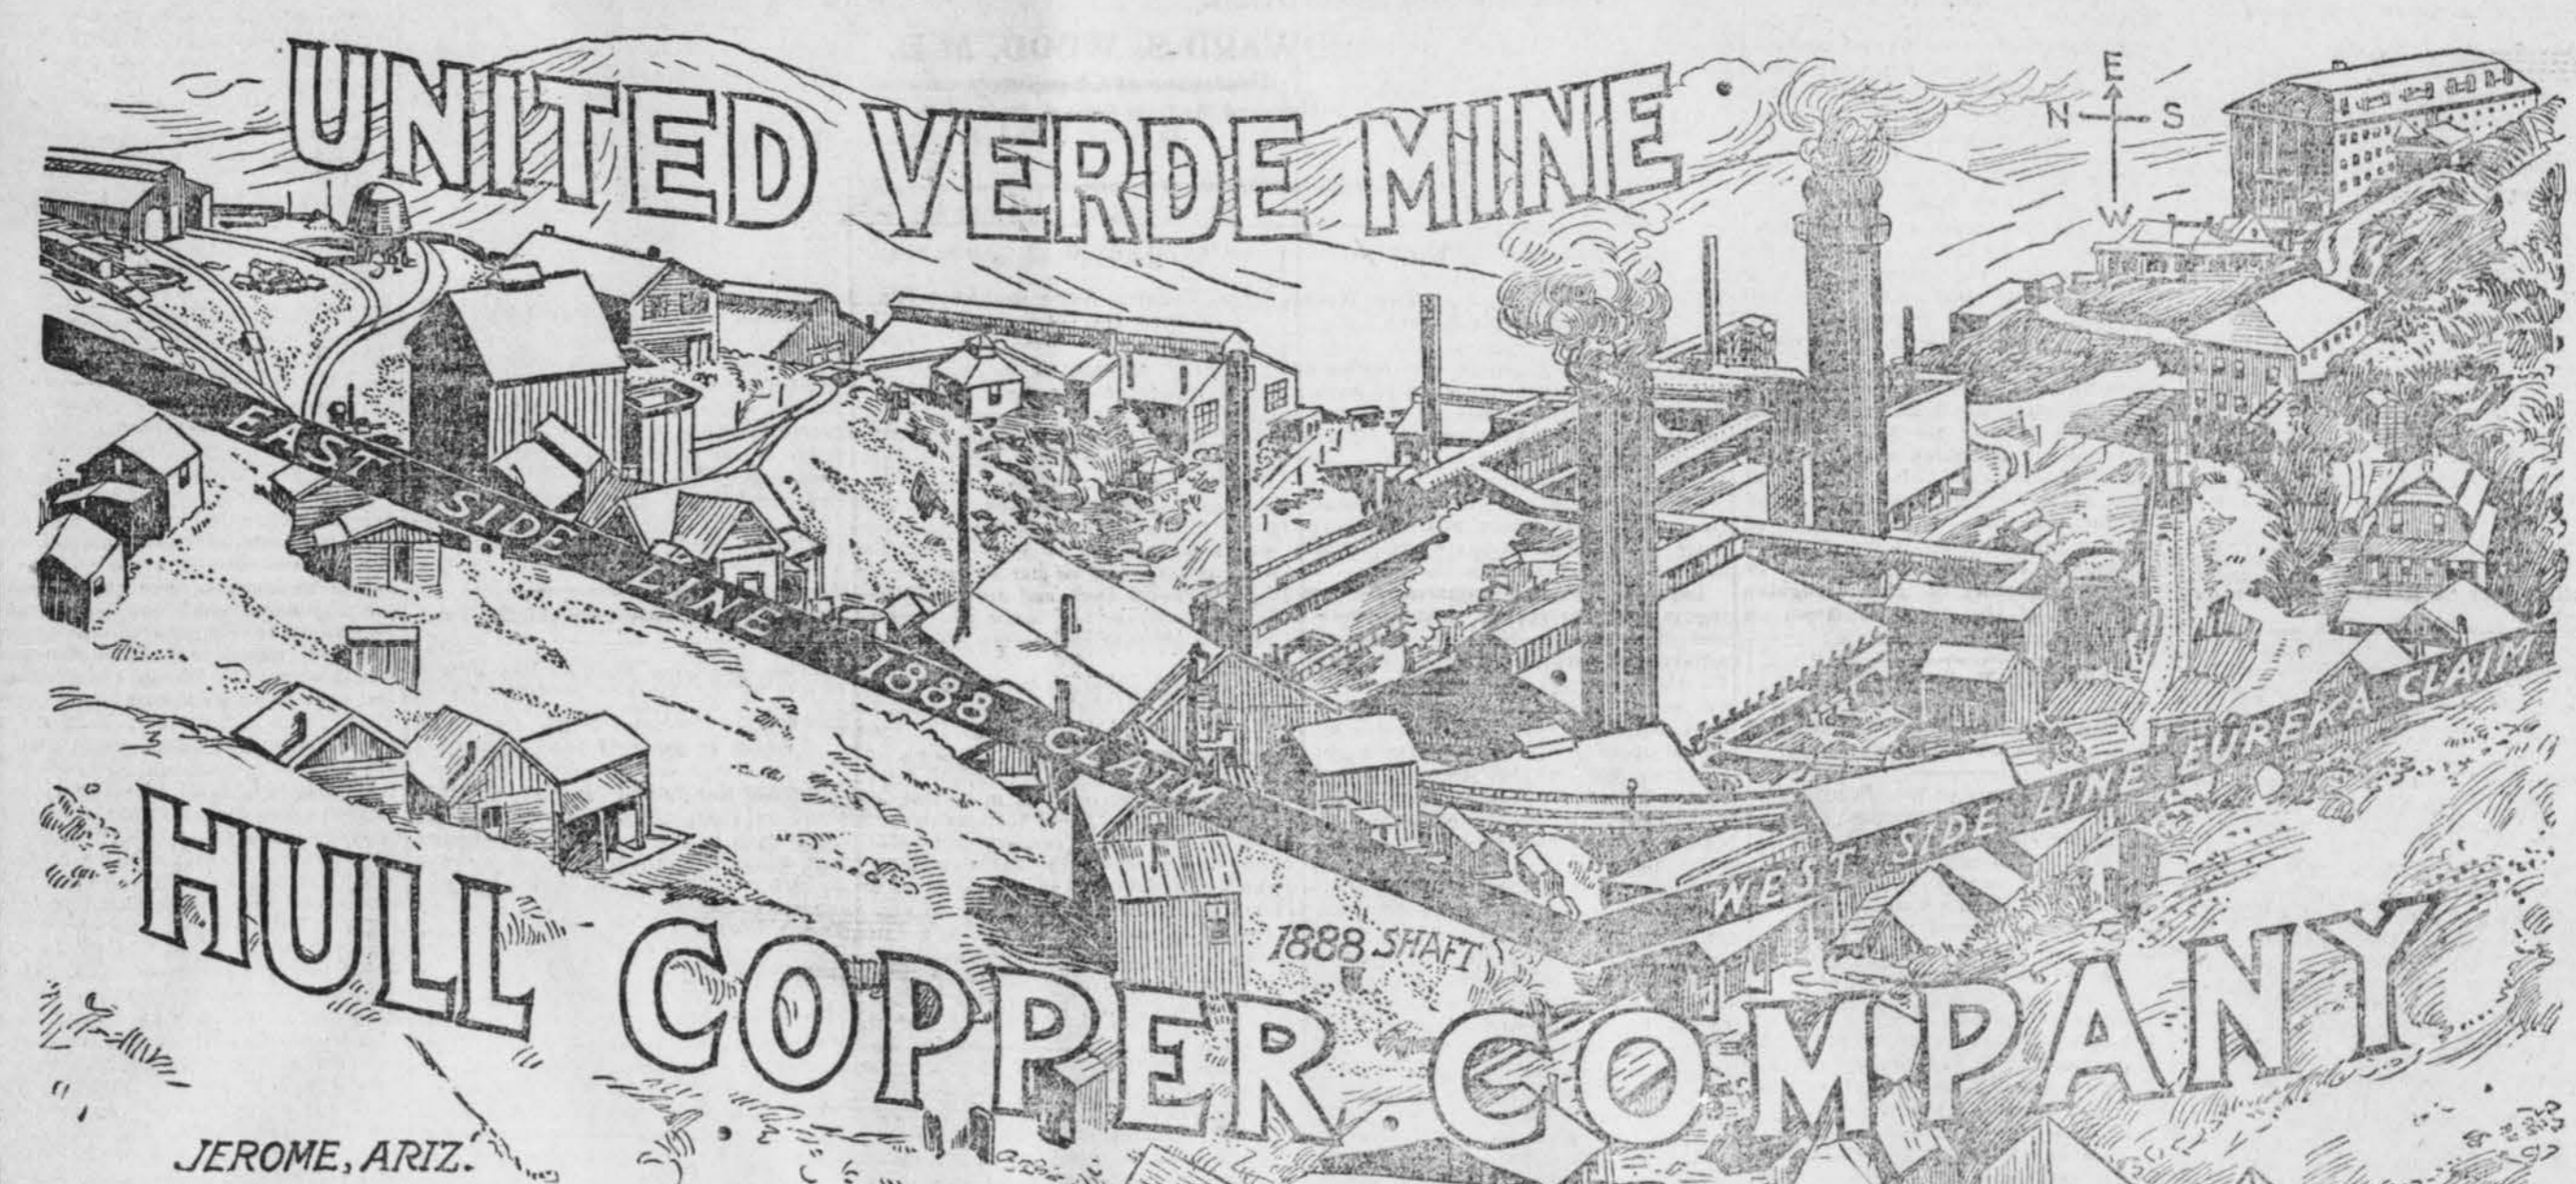

The Metropolitan tower now being built in New York City will be the biggest structure in this country and only exceeded by one other in the entire world, the Eiffel Tower in Paris. In building this new tower 8,500 tons of steel will be used, this amount being necessary for proper wind bracing. When the system is run down and in a weakened condition you require a medicine that is capable of building up and renewing the entire system. In Hostler's Stomach Bitters you will positively find such a medicine, and when you remember that it is backed by a 53 years' record of cures you ought not hesitate another minute in trying a bottle. It cures poor appetite, belching, costiveness, heartburn, indigestion, dyspepsia, kidney troubles, female ills or malaria, fever and ague. It is strictly pure.

AN INSIDIOUS DANGER.

One of the worst features of kidney trouble is that it is an insidious disease and before the victim realizes his danger he may have a fatal malady. Take Foley's Kidney Cure at the first sign of trouble as it corrects irregularities and prevents Bright's disease and diabetes. The Stafford Drug Co.

MILLIONS IN COPPER

Senator Clark's United Verde That Is Paying Him Millions in Dividends Adjoins the Famous Hull Copper Mines for a Distance of OVER THREE MILES.

View Drawn from Actual Photograph, and map Compiled by the United States Mineral Surveyor in His Report on Our Property, Showing Conclusively That Hull Property is DIRECTLY AGAINST the GREAT PRODUCING claims of the United Verde, Whose Rich Deposits Run Right into Our Claims. Hull Copper's Rich Mines Surround Senator Clark's \$100,000,000 Mines on Three Sides.

A DEVELOPED MINE---NOT A PROSPECT

**Developments and Railroad Facilities**  
We have 6,300 feet of tunnels, shafts and levels. The shaft of the "1888" claim, 475 feet deep, shown in the above photograph, is within 150 feet of the United Verde smelter. Over this shaft we have just built a new hoisting plant for bringing the ore from two drifts that have been driven into bodies of rich ore at the bottom of this shaft. This ore yields in copper over 340 to the ton, besides some gold and silver. Our Dillon Tunnel, 2,400 feet long, is cut through three rich ore bodies, showing a very large percentage of copper, with some gold and silver. We are now working in the shaft, driving the tunnel into the rich contact vein which extends from the United Verde into Hull Copper. We are directly on the line of the Pacific Railroad Company, one of the principal branches of the Santa Fe Railroad. Any one interested in mining knows what this means to the Hull Copper Company. A famous railroad man writes: "This is the first company I ever saw in my life that had a railroad to its door. All the various mining companies which are floated here to build a railroad from one to one hundred miles in order to market their product." The development is being rushed ahead just as fast as good management can do it. We will be able to supply from our ore deposits a smaller of the size of the United Verde—one of the largest in the world—with 1,000 tons of ore daily, which will pay to our stockholders a net profit of \$10,000,000 a year.

**Sound and Practical Management at the Mines RESPONSIBLE OFFICERS AND DIRECTORS.**  
The officers and directors of the Hull Copper Company are all of the

Table with 2 columns: 'Stock Now 25c a Share' and 'How Stock is Sold'. It lists various share purchase options with their respective costs and par values.

SEND MONEY BY DRAFT, REGISTERED LETTER, P. O. OR EXPRESS MONEY ORDER TO  
**O. B. STANTON & SON, 1520** Real Estate Trust Building, PHILADELPHIA

highest standing and responsibility, and are well known throughout the West in prominent and financial circles. None of them receive a salary. Hon. George W. Hull, President and General Manager, at present at the mines in charge of the force of men now at work there, has been in all the great Western copper camps, and is thoroughly acquainted with copper mining in all of its branches. He is a member of the Arizona Legislature and has the esteem of every citizen of Jerome. He is a man of rugged honesty and sterling integrity. Mr. O. B. Stanton, a practical miner for 27 years, is Vice-President. Mr. Stanton and his son have charge of the Eastern offices of the company at Philadelphia. Mr. M. B. Hazeltine, Treasurer, of Prescott, Arizona, is on the Board of Directors of one of the largest banks in the Territory. Mr. H. E. Wilcox, Secretary, is a well-known capitalist, and lives at Jerome, Arizona. Mr. J. W. Hubbard, Superintendent of the Mine, has been in the employ of some of the biggest copper interests in this country. Our heaviest investors live at Jerome, where the mines are located. Miners in the employ of the United Verde—the greatest mining engineers of the West—citizens of Jerome—bankers, ministers, merchants and farmers—are all heavy stockholders of Hull Copper. These are the MEN WHO KNOW. This is what one of the miners at Jerome writes: "In regard to your mine, I will tell you that I worked in the United Verde mine on the 700-foot level in ore, and was stopped from going farther by being told by the shift boss 'We are at Hull's line.'" "All you have to do is to drift from your shaft behind the United Verde workings to strike the ore! It is there." "I have been working here about six years. I wish I could speak to you. I am sure you have got good claims. If I can do anything for you let me know."—Chas. Tyler, Jerome, Arizona.

**United States Government Title**

Every one of our claims is held under United States Patents, and the Hull Copper Company is sole owner of these claims. Remember, we have 20 claims, covering over 250 acres of the very richest copper there is in Arizona, where work is actually going on daily. This is the most wonderful opportunity that has been offered the public since the day when United Verde sold at 16 cents a share. You can't buy any of its stock now. The last sale was at the rate of \$300 a share. A small fortune from a dime. TODAY Hull Copper offers investors who come first, this opportunity. This is that wonderful, absolute, unequalled opportunity that comes to every man once in a lifetime. To those who grasp this opportunity it means fortune. Today this opportunity is thrown open to all. Every man and woman who can save as small a sum as a few dollars a month has it. This is a real, genuine opportunity. But mark this—it is for today.

If you delay or hesitate, some other quicker to act, grasps the opportunity that would have been yours. A very limited amount of stock at present price. Any day, any hour, the telegraph may bear to us from the mines important news that will cause the stock to double or treble in price without notice. Negotiations of magnitude are running through. We say to you in all earnestness, in all the sincerity of practical miners of twenty-seven years of experience in the mines, don't delay. Write at once. Here is the opportunity of your lifetime.

**\$100 Increased to \$80,000**

Supposing Senator Clark had come to you a few years ago and had said to you: "I want you to invest \$100.00 with me in the United Verde Mine." Supposing you had invested that \$100 with Senator Clark in his mine, which is BANG UP AGAINST our mine. You would today be worth \$80,000.00, and you would be getting every year from that investment of \$100.00—\$2,000.00. WORD FOR WORD—FACT FOR FACT—FIGURE FOR FIGURE—THIS IS EXACTLY THE SAME OPPORTUNITY THAT WE ARE OFFERING TO YOU TODAY. WE ARE NEXT-DOOR NEIGHBORS TO THE RICHEST COPPER MINE IN THE WORLD. Hull Copper's claims are the ONLY ONES directly against the real Mines of the United Verde. These are the Mines from which the United Verde is making its millions and whose ore bodies enter into ours.

**OUR GUARANTEE**

We absolutely guarantee to refund your money to you at any time within thirty days after purchase, if upon investigation you find we have made any misrepresentation as to our Company. We further guarantee to sell your stock for you at any time within a year, if for any reason you desire to part with it.

## SPANISH WAR REUNION.

Calumet Veterans Will Enjoy Banquet at the Armory Tonight.

The annual reunion of the Spanish War Veterans and the Society of the Army of Santiago will be held tonight in the Calumet armory under the auspices of the local branches of the organizations named. It will comprise also a rally of the Civil War veterans. There will be a banquet and a program of songs, music and speeches.

The Calumet veterans are the only ones in Northern Michigan who have consistently observed the anniversary of the departure of the upper peninsula troops for the front in 1898. The copper country companies left April 23 and served until Sept. 1, arriving home on Labor Day. Both organizations suffered by sickness, and a large number of graves in local cemeteries attest the fact that men of this district have laid down their lives for their country. The sacrifice of these heroes is remembered on Memorial Day in fitting manner. The living meet in Calumet every year to celebrate the anniversary of the departure for the war.

The Houghton company has not observed this anniversary for several years because of the fact that the members of the company have so scattered. Calumet has been more fortunate in this respect. The annual gathering brings and a large number of veterans. Colonel Peterman, who commanded the regiment in which both companies served, is an annual participant in these festivities. So is Colonel W. H. Thielman, commander of the Calumet company, now assistant inspector general of the Michigan National Guard. Dr. Peter D. MacNaughton, a brigade surgeon during the war, is always a prime mover in arranging for the banquet. Captain Miller of Houghton, the only remaining officer of that company, is presently present. Captain Trevorrow of the present Calumet company of engineers also is a war veteran.

Dr. MacNaughton, chairman of the committee of arrangements, said yesterday that there would be no set program.

for the reunion. The program will be very informal, members of the veteran organizations presenting short talks, songs or music extemporaneously.

## TELEPHONE SERVICE RESTORED.

Michigan State Telephone Company Recovers From Storm.

Manager Forbes of the Houghton district of the Michigan State Telephone company stated last night that the repairs on telephone lines between Houghton and Calumet, resulting from the storm of March 26, were entirely completed. The general public was not aware of the fact that the repairs were so long in progress, as communication was interrupted only a short time, but the service has nevertheless been temporary since the storm.

The storm was one of the sleet and wind disturbances which often visit the copper country in the spring. It consisted of poles and wires so with ice that they could not bear the weight, and the wind, assisting, miles of the line went down. Manager Forbes secured repair crews from various points in the peninsula, and the work of rehabilitation was pushed. In all 125 poles were set up, 6,000 feet of aerial cable was hung and 270 miles of wire was strung. Add to these two private wires for Gay & Sturgis, the brokers, and a private line for the Calumet, and the amount of work performed will be seen to be of large extent. The repairs would have been completed sooner had the weather been favorable, but it will be remembered that the copper country has just watched two weeks of blizzards go into history.

The company has now been operating between Houghton and Calumet fourteen trunk lines, seven each way, which means that seven lines may be in use at one time. This has not been the case recently, pending repairs, but as has been said, the service has been excellent and the public did not know there was any difficulty.

## COPPER COUNTRY BASEBALL.

Manager Taylor Goes to Chicago Saturday to Meet His Team.

Manager Owen M. Taylor of the Houghton baseball team goes to Chicago Saturday to gather together his players for the season. The men come from all over the country, and the first transportation provided them will reach to Chicago. There Taylor will meet them and will fit them out with uniforms and other impediments before taking them to Wisconsin for the practice games. Taylor has chosen a ball for "Pitcher Miller of Grand Rapids, last season with the team representing that team in the Central league. He claims that Miller has everything.

The baseball season will open in the copper country, April 29, with a game at Calumet between the Aristocrats and the Giants. Houghton plays its first game at home with Calumet April 30, Memorial Day. Two games are scheduled for time, one in the morning at Houghton and the other in the afternoon at Calumet, but these games may be transposed in order to give Houghton the benefit of the afternoon crowd on the holiday.

## ANNUAL M. C. M. PARTY.

Michigan College of Mines Students Decide on Houghton.

The student body of the Michigan College of Mines held a meeting Tuesday evening for the purpose of deciding the question of holding the annual formal party. It was decided unanimously that the event should take place in Houghton this year. No decision regarding the date was arrived at. The dance will be held in the college gymnasium. The Michigan College of Mines party has come to be considered the annual big social function of the year in the copper country; in fact, it has had that standing for many years. Owing to the fact that Houghton has not had for some years a suitable hall in which to hold the dance, the function has been given in the Calumet Light Guard armory. The gymnasium building now solves the problem for the students. The party will probably be given early in June.

## T. F. COLE IN COPPERMID.

Says Bisbee Situation Will Solve Itself—Production Normal.

T. F. Cole arrived in Calumet from Duluth on the 6:50 o'clock train yesterday morning. He left in the afternoon for Hancock, remaining there until the departure of the 10 o'clock train for Duluth. His special business in the copper country was not stated, but there is no doubt Mr. Cole was much interested in learning of the excellent showing being made in the Modora shaft of the Keweenaw property.

In reply to an inquiry, Mr. Cole said: "I have nothing to say; the situation seems to have all the news just now." Concerning the Bisbee troubles, Mr. Cole is of the opinion that the matter will settle itself. The product of the mines for April will be just as large as usual.

## CALUMET WOMAN'S CLUB.

Weekly Meeting Tomorrow Will Discuss Timely Matters.

The Calumet Woman's club, varying from the general program of study for the year—Greek art, history and literature—will tomorrow afternoon present a program on current events and civics, the general topic, however, relating to "The Awakening of Alaska." Features will be: The important part missions have had in the development of Alaska—Mrs. M. M. Anderson. Natural resources of Alaska—Mrs. Margaret Reeder. Discussion—Alaska, Pauline M. Wetz. Katherine M. Kerr, Laura Train and Jennie Larson. Music—Mrs. Jessie S. Hosking.

## IS GOING TO EUROPE.

Miss Martha Nelson of Calumet was entertained Tuesday evening by the Misses Olson at their home on Fifth street. It was in the nature of a farewell. Miss Nelson leaves shortly for Europe for a year's visit, the greater portion of which will be spent in Norway and Sweden.

# Respect YOUR Stomach

GIVE it food that will not irritate or retard the performance of its natural functions, and it will reciprocate in a way agreeable and comforting.

No single ingredient contributes so largely toward wholesome, nourishing, agreeable food as Royal Baking Powder.

Royal Baking Powder's active ingredient, Grape Cream of Tartar, is the most healthful of the fruit products.

This is why Royal Baking Powder makes the food finer, lighter, more appetizing and anti-dyspeptic, a friend to the stomach and good health.

## Imitation Baking Powders Contain Alum

"The use of alum and salts of alumina in food should be PROHIBITED. The constant use of alum compounds exerts a deleterious effect upon the digestive organs and an irritation of the internal organs after absorption."

"EDWARD S. WOOD, M. D. "Professor of Chemistry "Harvard Medical School, Boston."

ROYAL BAKING POWDER CO., NEW YORK

## ODD FELLOWS' GATHERING.

Assemblage at Calumet in Two Weeks Will Be a Big Event.

Copper country people are beginning to realize that they are going to have a big event on their hands the first week in May, when the Michigan Odd Fellows' convention will be held in Calumet. The gathering will include the meeting of the grand canton of Patriarchs Militant, the grand encampment and the grand lodge, the central bodies of the three divisions of the order in the state.

## OBJECT LESSON IN GARDENING.

Copper Country Home Beautifiers Should Visit the Court House.

Turnkey Johnson of the county jail, who is Sheriff Beck's right hand man in the management of affairs at the county building, has begun his annual campaign for beauty in the court house grounds. Johnson was practically raised in a Marquette powder mill, and spend some years in the United States life saving service, and where he learned gardening is a mystery, but he has the knowledge. He and Sheriff Beck and Janitor Thomas have combined to make the county building grounds the beauty spot of the county.

## CALUMET HONOR STUDENTS.

Principal Hall of the Calumet High School Announced Tuesday Afternoon the Award of Honors to the Members of the Board of Trade.

Principal Hall of the Calumet High school announced Tuesday afternoon the award of honors to the members of the board of trade of 1907. Miss Minnie Ala is first, Edward Carlson second and Miss Margaret Nantel third. As it is expected that the graduates this year will number forty, winning these distinctions must be gratifying to the three young people.

## COPPERMID BREVITIES.

The swimming pool of the Hancock Y. M. C. A. has been re-opened for the season.

John T. Dunn of Calumet, upper peninsula district deputy for the Eagles, is in Gladstone on business for the order.

Dan T. Pearce, the wellknown Hancock saloon keeper and restaurateur, has leased the Clifford building on Quincy street and will move his "Cosy" there after May 1.

The I. E. Swift and Portage Lake Hardware companies of Houghton announce that they will close their stores at 6 o'clock every night except Saturday until June 1.

Joseph Schroeder of Oak street, Calumet, has been in a critical condition since last Friday, the result of an attack of appendicitis. He was operated on for a former attack eight years ago.

Rev. Father Sejar of Chicago will arrive in Calumet tomorrow to assist the pastor of St. Joseph's church in administering communion to several hundred members of the Austrian colony who will be received at that church Sunday morning.

## Cures Woman's Weaknesses.

We refer to that boon to weak, nervous, suffering women known as Dr. Pierce's Favorite Prescription.

Dr. John E. Fyfe one of the Editorial Staff of THE ELECTRICIAN REVIEW says "I have used Dr. Pierce's Favorite Prescription for many years and it is one of the chief ingredients of the 'Favorite Prescription'."

"A remedy which invariably acts as a uterine invigorator and makes for normal activity of the entire reproductive system. It continues 'in Helonia we have a medicinal plant which makes the above purposes than any other drug with which I am acquainted. In the treatment of diseases peculiar to women it is seldom that a case is seen which does not present some indication for this remedial agent.' Dr. Fyfe further says: 'The following are among the leading indications for Helonia (Unicorn root, Pain or itching in the back with leucorrhoea; atonic (weak) condition of the reproductive organs of women; mental depression and irritability; associated with chronic diseases of the reproductive organs of women; constant generation of heat in the region of the kidneys; nervous prostration; flooding; due to a weak condition of the reproductive system; menorrhagia; or abnormal monthly periods; or from accompanying an abnormal condition of the digestive organs; or from a habit of taking drastic purgatives in the extreme lower part of the abdomen.'"

"If more or less of the above symptoms are present, no invalid woman can afford to neglect this remedy. It is a valuable preparation, one of the leading ingredients of which is Unicorn root, or Helonia, and the medicinal properties of which it most faithfully represents."

Of Golden Seal root, another prominent ingredient of "Favorite Prescription," Prof. Finley Leach, M. D., of Bennett Medical College, Chicago, says: "It is an important remedy in disorders of the womb. In all catarrhal conditions, and general enervation, it is useful."

Prof. John M. Scudder, M. D., late of Cincinnati, says of Golden Seal root: "In relation to its general effects on the system, there is no medicine in use about which there is such general agreement. It is universally regarded as the tonic useful in all debilitated states."

Prof. H. Bartholow, M. D., of Jefferson Medical College, says of Golden Seal: "Valuable in uterine hemorrhage, menorrhagia, flooding and consecutive dysmenorrhea (painful menstruation)."

Dr. Pierce's Favorite Prescription faithfully represents all the above named ingredients and cures the diseases for which they are recommended.

## ODD FELLOWS' GATHERING.

Assemblage at Calumet in Two Weeks Will Be a Big Event.

Copper country people are beginning to realize that they are going to have a big event on their hands the first week in May, when the Michigan Odd Fellows' convention will be held in Calumet. Dr. John E. Fyfe one of the Editorial Staff of THE ELECTRICIAN REVIEW says "I have used Dr. Pierce's Favorite Prescription for many years and it is one of the chief ingredients of the 'Favorite Prescription'."

"A remedy which invariably acts as a uterine invigorator and makes for normal activity of the entire reproductive system. It continues 'in Helonia we have a medicinal plant which makes the above purposes than any other drug with which I am acquainted. In the treatment of diseases peculiar to women it is seldom that a case is seen which does not present some indication for this remedial agent.' Dr. Fyfe further says: 'The following are among the leading indications for Helonia (Unicorn root, Pain or itching in the back with leucorrhoea; atonic (weak) condition of the reproductive organs of women; mental depression and irritability; associated with chronic diseases of the reproductive organs of women; constant generation of heat in the region of the kidneys; nervous prostration; flooding; due to a weak condition of the reproductive system; menorrhagia; or abnormal monthly periods; or from accompanying an abnormal condition of the digestive organs; or from a habit of taking drastic purgatives in the extreme lower part of the abdomen.'"

"If more or less of the above symptoms are present, no invalid woman can afford to neglect this remedy. It is a valuable preparation, one of the leading ingredients of which is Unicorn root, or Helonia, and the medicinal properties of which it most faithfully represents."

Of Golden Seal root, another prominent ingredient of "Favorite Prescription," Prof. Finley Leach, M. D., of Bennett Medical College, Chicago, says: "It is an important remedy in disorders of the womb. In all catarrhal conditions, and general enervation, it is useful."

Prof. John M. Scudder, M. D., late of Cincinnati, says of Golden Seal root: "In relation to its general effects on the system, there is no medicine in use about which there is such general agreement. It is universally regarded as the tonic useful in all debilitated states."

Prof. H. Bartholow, M. D., of Jefferson Medical College, says of Golden Seal: "Valuable in uterine hemorrhage, menorrhagia, flooding and consecutive dysmenorrhea (painful menstruation)."

Dr. Pierce's Favorite Prescription faithfully represents all the above named ingredients and cures the diseases for which they are recommended.

## ODD FELLOWS' GATHERINGS.

Celebrations of Founding of the Order Held Tonight.

The eighty-eighth anniversary of the founding of the Independent Order of Odd Fellows occurs today, and the copper country lodges will observe the event in various ways. At least two considerable gatherings will be held. The installation of a new lodge of the order at South Range is one. This work will be done by the officers of the Houghton lodge, assisted by members of various other lodges. An excursion will be run to South Range over the Copper Range this evening to accommodate the visitors.

At Lake Linden tonight the Lake Linden lodge will celebrate. This event will be held in the lodge hall and will include a musical program, introducing the best talent in town. Following the program there will be a luncheon and dancing.

The prospect of the grand gathering of Odd Fellows of Michigan at Calumet May 6 to 9 has awakened interest in the order in the copper country and it is expected that the numerical strength of the organization in this district will be greatly increased this year. The new lodge at South Range is an instance.

## NO GAS FLOWS AS YET.

The Calumet Gas company had not delivered the goods up to yesterday afternoon. It was the intention of the company to institute its service Monday morning, but unforeseen difficulties presented themselves and it was not believed yesterday that the gas would be turned on until some time today. Calumet people are hopeful and patient and know they will get the gas when the company is actually in a position to give it to them.

## FRED LEONARD ILL.

Fred Smith Leonard, for a number of years municipal director and organizer of the Board of Trade palm garden in Houghton, is seriously ill. Mr. Leonard is one of the best known musicians in the copper country and his condition is a cause of sincere regret to many. It was thought yesterday an operation would be necessary to save his life and he may be taken to St. Joseph's hospital, Hancock, today for that purpose.

## MAY DISCARD THE TOOTH.

The Calumet lodge of Elks last night discussed the question of discarding the elk's tooth as a badge of the order. Elks generally are coming to recognize that the practice of wearing the tooth is fostering the extermination of the noble animal whose name the order bears, and it is more than likely that the use of an emblem will be prohibited by the next grand lodge meeting.

## CALUMET HONOR STUDENTS.

Principal Hall of the Calumet High School Announced Tuesday Afternoon the Award of Honors to the Members of the Board of Trade.

Principal Hall of the Calumet High school announced Tuesday afternoon the award of honors to the members of the board of trade of 1907. Miss Minnie Ala is first, Edward Carlson second and Miss Margaret Nantel third. As it is expected that the graduates this year will number forty, winning these distinctions must be gratifying to the three young people.

## COPPERMID BREVITIES.

The swimming pool of the Hancock Y. M. C. A. has been re-opened for the season.

John T. Dunn of Calumet, upper peninsula district deputy for the Eagles, is in Gladstone on business for the order.

Dan T. Pearce, the wellknown Hancock saloon keeper and restaurateur, has leased the Clifford building on Quincy street and will move his "Cosy" there after May 1.

The I. E. Swift and Portage Lake Hardware companies of Houghton announce that they will close their stores at 6 o'clock every night except Saturday until June 1.

Joseph Schroeder of Oak street, Calumet, has been in a critical condition since last Friday, the result of an attack of appendicitis. He was operated on for a former attack eight years ago.

Rev. Father Sejar of Chicago will arrive in Calumet tomorrow to assist the pastor of St. Joseph's church in administering communion to several hundred members of the Austrian colony who will be received at that church Sunday morning.

## Cures Woman's Weaknesses.

We refer to that boon to weak, nervous, suffering women known as Dr. Pierce's Favorite Prescription.

Dr. John E. Fyfe one of the Editorial Staff of THE ELECTRICIAN REVIEW says "I have used Dr. Pierce's Favorite Prescription for many years and it is one of the chief ingredients of the 'Favorite Prescription'."

"A remedy which invariably acts as a uterine invigorator and makes for normal activity of the entire reproductive system. It continues 'in Helonia we have a medicinal plant which makes the above purposes than any other drug with which I am acquainted. In the treatment of diseases peculiar to women it is seldom that a case is seen which does not present some indication for this remedial agent.' Dr. Fyfe further says: 'The following are among the leading indications for Helonia (Unicorn root, Pain or itching in the back with leucorrhoea; atonic (weak) condition of the reproductive organs of women; mental depression and irritability; associated with chronic diseases of the reproductive organs of women; constant generation of heat in the region of the kidneys; nervous prostration; flooding; due to a weak condition of the reproductive system; menorrhagia; or abnormal monthly periods; or from accompanying an abnormal condition of the digestive organs; or from a habit of taking drastic purgatives in the extreme lower part of the abdomen.'"

"If more or less of the above symptoms are present, no invalid woman can afford to neglect this remedy. It is a valuable preparation, one of the leading ingredients of which is Unicorn root, or Helonia, and the medicinal properties of which it most faithfully represents."

Of Golden Seal root, another prominent ingredient of "Favorite Prescription," Prof. Finley Leach, M. D., of Bennett Medical College, Chicago, says: "It is an important remedy in disorders of the womb. In all catarrhal conditions, and general enervation, it is useful."

Prof. John M. Scudder, M. D., late of Cincinnati, says of Golden Seal root: "In relation to its general effects on the system, there is no medicine in use about which there is such general agreement. It is universally regarded as the tonic useful in all debilitated states."

Prof. H. Bartholow, M. D., of Jefferson Medical College, says of Golden Seal: "Valuable in uterine hemorrhage, menorrhagia, flooding and consecutive dysmenorrhea (painful menstruation)."

Dr. Pierce's Favorite Prescription faithfully represents all the above named ingredients and cures the diseases for which they are recommended.

## Mining News

FRANKLIN.

Superintendent Edwards Reports the Property in Excellent Condition.

Superintendent R. M. Edwards of the Franklin Mining company says that affairs at the property are in very good shape. "The most absorbing work in progress at the Franklin is the opening of shaft No. 1 on the Powable lode. This opening is now repaired down to the 700-foot level, or half way down to the water level. It will be remembered that the Powable openings are connected with the Alouze conglomerate by a present to the fourteenth level of the shaft. Hence, there is no water above that level in them. We have learned that the previous management cut its levels in the hanging wall of the lode, whereas the best values that have been discovered during the recent explorations have been in the footwall side. Hence, we are not inclined to believe that the previous work is conservative as to the values there. We shall certainly take a look at the rock from the 1800-foot level downward."

"Shaft 1 in the Powable, which is the one we are making active, is in fairly good condition, and we have not had to do as much work as we expected to in order to get it into operating order. With better weather everything in the line of new work would make much better progress than has been possible to date. We have the drift from the conglomerate over 200 feet toward the Powable at the twenty-third level and still have over 100 feet to go. We expect to complete this crosscut by the middle of May, and we shall then drift to the formation. At the twenty-first level the showing in the Powable lode constantly better, and I have great hopes of what the lode will show at the twenty-third level. It has all the appearance of permanence to judge by the limited amount of work done to date."

"The Alouze conglomerate in shaft No. 1 shows no change. We expect to get working on the ground below the 2200-foot level in the very near future, and the property should then show some betterment. The conglomerate is now down to the twenty-first level in shaft 1. In shaft 2 the showing at the sixteenth level, where the shaft is bottomed, is decidedly the best, on the entire conglomerate lode. We have two skips running there now, and just as soon as the ground can be opened up we shall make an increase over the present rate of shipments, which are larger than ever before. The company is now giving all its mill capacity to Franklin rock, as the Calumet & Hecla is now stamping what comes from Tecumseh."

## NOTES OF COPPER NEWS.

Sinking a new shaft on the promising copper-bearing lode, revealed by diamond drill explorations on the property of the Lake Copper company, will be started as soon as the snow has melted. This formation is believed to be the same as that which was discovered in the vicinity of the Champion, Trimonian and Baltic mines have been opened with great success a number of miles to the northward. The lode traverses a large portion of the Lake Copper company's lands, and as the overburden at some points is only four feet, it would seem as if it could be started with little trouble.

There is no change in Parrot's condition. The management is making slow progress in getting through the gray iron, and meantime the supply of ore that is being sent to the surface is getting leaner and leaner. It is always easy to criticize, which would mean as if something could be done to rehabilitate the Parrot. Insiders have information that is encouraging, it is said, but it is generally believed that there will be no increase in dividend, and that the sinking of the shaft, which would mean the salvation of the property, will not be resumed until such time as the management sees certain interests eliminated from the property. This is the view that is generally held in Butte. Those that stay with the property long enough will certainly be rewarded, but it is a very wide question as to how long "long enough" means.

## HOME! IS WHERE THE ARBUCKLES' COFFEE

Most healthy, vigorous men and women in the United States are raised on good, old-fashioned Arbuckles' ARIOSA Coffee. Never mind what the others drink, you want to be well. Say things to the man who tries to switch you from Arbuckles' to coffee that pays him big profits at the expense of your stomach.

## THE ATLANTIC MINING COMPANY.

Among the companies of the Verde district of Arizona making the most important developments is the Hull Copper company. This company is the only one in the district whose claims surround on three sides the four great producing claims of the famous United Verde. It enjoys other exceptional advantages in that it is directly upon the line of the railroad. Any one who has never been in a mining country can form no idea of what this means to Hull Copper. It is one of the few companies that has a railroad at its door. The ordinary mining companies which are floated by public subscription have to build roads from one to one hundred miles in order to market their product.

The Dillon tunnel of the Hull Copper company is being pushed rapidly. The miners are making about 100 to 120 feet progress a month. They have crossed another lode making three lodges as the Eureka Extension claim. The last lode contains some fine ore and the water is so heavily impregnated with copper insulation that it burns the skin of the miners. The Dillon tunnel is now in something like 2,500 feet and the formation is rapidly changing to schist, which is a formation which carries ore deposits.

The ore bodies of the United Verde have been encountered in a number of places on the Hull property and at the rate the work is now progressing this tunnel will very shortly break into the rich contact vein which extends from the United Verde into Hull Copper. Already three lodges have been cut in driving the

## Happiness in a Grain of Wheat

It Contains Every Food Element Necessary for Man's Sustenance.

All authorities agree that fourteen elements are needed in the human body to sustain perfect health and that these must be supplied in the food taken into the system. Nature has provided us with one single article of food containing all of these fourteen elements in the human body. This food, so wonderful in its composition, is wheat, and intelligent men and women are coming to realize more and more that in the whole of the wheat is found the secret of health and happiness. Rich in the nitrates, or muscle-making elements, the carbohydrates, or heat-producing elements, and the phosphates, or brain and nerve-making elements, the whole grain of wheat supplies every necessity for man's body and mind.

This is how Malta-Vita came to be known as "The Perfect Food." For Malta-Vita is simply the whole of the wheat and a little salt, thoroughly steamed and cooked, absolutely clean-lined, then mixed with pure barley malt extract, which converts the starch of the wheat into maltose, or malt sugar, an active digestive agent and very nutritious as well.

All grocers sell Malta-Vita. Large package, now 10 cents.

## Respect YOUR Stomach

GIVE it food that will not irritate or retard the performance of its natural functions, and it will reciprocate in a way agreeable and comforting.

No single ingredient contributes so largely toward wholesome, nourishing, agreeable food as Royal Baking Powder.

Royal Baking Powder's active ingredient, Grape Cream of Tartar, is the most healthful of the fruit products.

This is why Royal Baking Powder makes the food finer, lighter, more appetizing and anti-dyspeptic, a friend to the stomach and good health.

Imitation Baking Powders Contain Alum

"The use of alum and salts of alumina in food should be PROHIBITED. The constant use of alum compounds exerts a deleterious effect upon the digestive organs and an irritation of the internal organs after absorption."

"EDWARD S. WOOD, M. D. "Professor of Chemistry "Harvard Medical School, Boston."

Today's weather: Rain or snow; stationary temperature.  
Yesterday's temperatures: Seven a. m., 35 degrees; noon, 44; 7 p. m., 36. Maximum, 46 degrees; minimum, 35.

Miss Annette Egan, of Ishpeming, is a Marquette visitor.  
N. J. Fezy has returned from a business trip to Newberry.  
Henry A. Egan, of Ishpeming, spent yesterday in Marquette.  
W. F. Cole, of Ishpeming, was a Marquette visitor yesterday.  
Mrs. F. A. Weeks, of Newberry, is the guest of Marquette friends.  
Mr. and Mrs. Otto Eger, of Ishpeming, were visitors in the city yesterday.  
Miss Jessie Dunlap, who has been the guest of Miss Rosa Ryan, has returned to her home at Escanaba.  
Miss Emma Dafter has returned to her home at Appleton, Wis., after a visit with Marquette friends.  
St. Agnes court of Foresters will give a dance at Keough's Hall, Thursday afternoon at 4 o'clock. Officers will be elected for the ensuing term, and reports covering the past year's work will be received from the various clubs affiliated with the central organization.  
Upwards of 150 members of the Busy Queen hive and Queen City tent of the Maccabees enjoyed a jolly social entertainment at Keough's Hall last evening. The occasion was a reception tendered by the men to the ladies. There was dancing, and refreshments were served. Fred Bennett of Ishpeming rendered a number of vocal selections, and Professor Kluge added to the enjoyment by the rendition of a concert number. The music by Kluge's orchestra was excellent.

Hard on the Firm—Royal Tracy, who played Stub Talmage last season in "The College Widow," tells a story which he claims had its inception in a Marquette hotel. A drummer in conversation with a comrade pointed to Tracy and said: "See that guy? That must be George Ade." "Not on your life!" replied his friend. "You wouldn't find George Ade in Marquette."  
Nothing Definite Decided On—A meeting of the recently created park, cemetery and street commission was held Tuesday night, but while there was considerable discussion of the duties of the commission and the work confronting it, little business of a definite character was transacted. Another meeting at which several matters of importance will be disposed of will be held next Tuesday.  
"Uncle Tom's Cabin"—Stetson's big "Uncle Tom's Cabin" company will be at the opera house today, giving afternoon and evening performances. There will be the usual street parade at noon. The Stetson production is, as usual, on a large scale, being mounted with many pretentious scenes and employing a large number of people. Popular prices will be charged, and will doubtless be the means of packing the house.

Will Go to Spokane—Mr. Abel Olson, for twelve years a prescription clerk for the Stafford Drug company, has accepted a position with a leading drug firm at Spokane, Washington, and will leave for the western city today. Mr. Olson is an expert pharmacist and his work in this city was eminently satisfactory to his employers. He leaves with the best wishes of the firm for his continued success, and for no reason than to find better opportunities for himself.  
The Influence of Women—This will be the subject of the address by Mr. Killgore at the union meeting at the Baptist church tonight at 7:30. The service last night was very largely attended and was full of interest. It was in every way a live meeting. Many people are doing them, and the interest seems to be widening and deepening. Some friends at Calumet who came out for Christ in his meetings there were in attendance at the service last night.

Wants Marquette Women to Join—Mrs. Mary E. Hayden, who recently established the "Amities" club in Marquette, in southern Texas, has written to a number of Marquette women requesting them to join her. She holds out flattering inducements, saying that land can be secured at a low figure and that large returns are certain. Practically she can be placed at any season of the year without the slightest danger of the failure of a crop. Mrs. Hayden, who formerly lived in Negaunee, has relatives in Marquette and also a wide circle of friends. She visited here a little over a year ago. Those who know her character here as a woman of marked executive ability and unbounded energy, and prophesy success for her unique venture in Texas.

Threatened With Potato Famine—Bad roads are threatening Marquette with a potato famine. There are many thousands of bushels of potatoes stored throughout the county that the farmers are unable to market owing to the condition of the highways. A grocer, in speaking of the matter yesterday, said that just prior to the recent storm he had contracted for three hundred bushels of potatoes not one of which had been delivered and that for several days past, as a consequence, he had been compelled to limit his sales to a peck on each order. No matter what the cost of the other necessities of life, potatoes have always been reasonable in this locality, as Marquette county is one of the great potato raising counties in the state. The price of the tuber, however, promises to go up like a rocket in a few days unless means are found to transport some of those now held by farmers to the city. The recent storm piled great drifts on many of the highways in the country districts and these have been little reduced by the mild weather of the past few days.

Would Raise Bounty on Wolves—C. E. Hayward, of Lathrop, a woodsman, hunter and guide of many years' experience, writes The Mining Journal under date of April 21, that the article by Mr. Noble on the wolf appearing in a recent issue of the paper handles the subject in an able manner than any he has ever read. Mr. Hayward agrees with Mr. Noble that the bounty on wolves should be raised. He believes that such a step would result in many more hunters taking to the trail and that with the passing of the wolves the deer would increase greatly. Mr. Hayward says, that owing to the deep snow, the wolves, bobcats and lynx have slaughtered the deer in the hundreds. On one forty-acre tract he found the carcasses of seven that had been killed and only partially devoured, showing that their destruction has been wanton. Mr. Hayward believes that more deer have been killed during the past winter than since 1886 when he first came to upper Michigan. As six or eight wolves is a pretty good record for any hunter in a winter, Mr. Hayward advocates the raising of the bounty to \$100 a carcass.

Thought Sturgeon a Freak—There are freaks among fishes just the same as in the human race," said an old fisherman yesterday. "A common deformity is a lumpback. I have seen fishes that had growths on their back just like a camel. This probably resulted from some injury to their spines when they were small. About four years ago one of the boys landed what was for a time considered the greatest freak of nature ever caught in this vicinity. Two-thirds of its body was shaped like the ordinary sturgeon while the balance was a bill like that of a shovel-nosed crane. Most of the old fishermen had never seen anything like it and were discussing the advisability of having it stuffed and selling it as a freak of nature, when a man who had fished in the Ohio and lower Mississippi happened along and recognized it as a spoonbill sturgeon. The spoonbill sturgeon is a freaky-looking fish, but it is common enough in some waters though, not often caught as far north as this. It is just as good eating as any sturgeon, which is unusual, as I do not know of any other fish with a bill that is fit for the table.

**Clothes for all Weathers**

Some clothes seem to be only fair weather clothes, and cockle and droop in the mist and rain. Woolen clothes don't, and ours are woolen—

**Stein-Bloch Made and Tested**

They fit you before your eyes, and they keep on fitting till you are through with them.

Try and see.

**BYRNS SAYS THAT IT IS TOO EARLY**

IS AS YET UNDECIDED WHETHER OR NOT TO BECOME A CANDIDATE FOR NOMINATION FOR LIEUTENANT GOVERNOR.

C. J. Byrns, representative from the Second district of Marquette county, has as yet decided to become a candidate for the Republican nomination for lieutenant governor at the next state convention, though his friends have already launched a good sized boom for him. Mr. Byrns clearly defines his position in a letter to a friend in the city under date of April 2. He says in part: "I certainly feel gratified to realize that the people of Marquette and Negaunee take so kindly to my reported candidacy for the Republican nomination for lieutenant governor. This boom started in the house of representatives and apparently meets with the generous approval of my colleagues. It is a little early for me to assert my intentions but I will doubtless arrive at some conclusion before the legislature adjourns. As soon as I can reconcile myself to become a candidate I shall let my friends know. The upper peninsula is entitled to recognition and we can have it, if we will but make the demand. Should I be the favorite I will give the very best account of myself and believe that my record will prove that no mistake was made in my selection. There is a strong sentiment in my favor, but I fear that it is a little too early to talk about state politics. Things are moving nicely in administrative circles, though I question whether we will get through much before June 10. We are having an exceptionally long siege this year."

**SEPARATE COURSES.**

Are Recommended for East and West Bound Boats.

It has been recommended by the committee of captains of the Lake Carriers' association that east and west courses be established on the Great Lakes, and the committee has so communicated with President Livingstone. According to the plan recommended by the committee, upbound vessels would follow the present course, while downbound vessels would follow a new one.

Up to the present time these courses have been defined only so far as Lake Superior and Lake Huron are concerned. It is recommended that downbound vessels on Lake Superior steer a course that will carry them to a point eight miles north of Duluth, and fourteen miles north of Copper Harbor. Downbound vessels on Lake Huron would steer a course that take them twelve miles off Harbor Beach.

These courses would increase the length of the run on Lake Superior by eight miles and on Lake Huron by eight miles. It is recommended by the committee that these courses be steered at all times, for the reason that, if vessels use the usual paths taken in the past, they are liable to overtake them when a portion of the distance might be covered, which would possibly be the means of causing more or less trouble.

The recommendations of the captains are now being given earnest consideration by owners, and they are looked upon generally with favor. Another recommendation is to the effect that during foggy weather, when two steamers meet, the steamer which is to be leeward shall keep out of the way of the other, for the reason that the steamer to leeward has no difficulty in receiving signals, while the steamer to windward may be unable to hear the signals of the steamer to leeward.

Mandy-Hives and other blotches are supposed to be caused by an acid stomach. A simple remedy and one that is very effective is Hollister's Rocky Mountain Tea. 35 cents, Tea or Tablets. The Stafford Drug Co.

### TEMPERANCE ADVOCATES EGGED.

Two Ishpeming Men Showed With Hen Fruit at Negaunee Tuesday Night.

C. H. Rutledge, the Anti-Saloon League organizer, and Jacob Kaminen, secretary of the National Finnish Brothers Temperance association, two of the most persistent temperance advocates in the upper peninsula, were given an unlooked-for and decidedly unpleasant reception in Negaunee Tuesday night. A crowd of men that met them on Iron street shortly after 11 o'clock, and followed them to the South Shore station, remaining there for nearly two hours while the visitors waited for a belated train, finally showered them with eggs. The first egg struck Mr. Kaminen in the back of the neck, and a second one caught him on the shoulder. Mr. Rutledge was hit two or three times. Mr. Kaminen relates the experience as follows:

"We left Ishpeming on the 10:30 o'clock car, intending to visit some of the Negaunee saloons after 11 o'clock. We had heard that a number of the liquor dealers of the town were not observing the law as closely as they should. There was a young man on the car who recognized us, and he doubtless suspected our Negaunee mission. I rather think that this chap must have called at a number of the saloons and advised the proprietors or barkeepers that we were in the city.

"Mr. Rutledge and I got off the car at Jackson street, on Cyr, and walked toward the Cleveland-Cliffs Iron company's office. We had planned to walk along Iron street about 11:15, and while we were standing a short distance from the Breitung House we saw a crowd of men leave a saloon and come toward us, and we started down the street. We had not gone far before another large crowd came from a saloon, joining those who were following us. The throng then had grown to considerable proportions. The men were so thick on the sidewalk that we had to elbow our way through them. We said nothing to the men, nor did any of them speak to us, except one fellow, who addressed Mr. Rutledge, asking him if his name was Rutledge. The latter replied that it was, and asked the fellow, 'What about it?' 'Oh, nothing; but I wanted to know,' said the Negaunee man.

"When down near the railroad we crossed over to the opposite side of the street and started for the depot. The crowd was still with us, some ahead and some behind us. We did not speak, nor did our pursuers have any words to say. At the station we learned that the train was nearly two hours late. We took seats near the north door of the waiting room. Part of the crowd came inside and stood gazing at us as though we were real celebrities. While others craned their necks through the door. I recognized only one man in the crowd. He was a Finn, and a former member of our temperance society, but he was pretty full. He had nothing to say, nor did any of the others address their conversation to us.

"One man flourished a big knife, which he seemed to have pulled from an inside pocket of his vest or coat, but he did not come near Mr. Rutledge or myself with it. We heard a shot or two outside the building. I presume these were fired just to scare us. The man with the knife doubtless had the same object in view.

"While sitting near the door I was struck in the back of the neck with an egg, its contents running down my coat. This made me angry. I approached the clerk in the ticket office, and asked him to telephone for a police officer. The fellow replied that he did not know where to reach a policeman at that time of the night. While I was standing at the ticket counter another egg came through the door, striking me on the shoulder.

"Mr. Rutledge escaped the eggs until the train pulled in. We started for the door, the crowd still remaining in the room and on the platform. I think two or three eggs, perhaps more, were thrown but none of them hit me. I cannot say whether two or three hit Mr. Rutledge. One of them struck his hat. As Mr. Rutledge was getting on the train he turned and grabbed one man, whom he thought had thrown one of the eggs, but he let him go shortly and got on the train.

"I don't think the saloon men of Negaunee had a hand in the affair. I did not see any one, save the Finn I referred to, whom I recognized. The crowd did not seem to be at all wicked, but I guess they thought they were having some fun with us. A number in the mob seemed to have liquor in them, and several were more or less intoxicated. The most deplorable thing about the whole affair was the fact that there were several boys, whose ages could not have been more than sixteen or seventeen years. Some of these had been drinking and their faces showed that they had indulged rather freely.

"This work on the part of the Negaunee crowd will not frighten us away from the town, nor do I think it will help the saloon men's cause. It can be assured that we will continue our work in Negaunee, as well as at other points in this vicinity."

### COMPETENT JUDGES.

Beauty Doctors Endorse Herpicide.

Women who make a business of beautifying other women come pretty near knowing what will bring about the best results. Here are letters from two, concerning Herpicide:

"I can recommend Newbro's 'Herpicide,' as it stopped my hair from falling out, and, as a dressing it has no superior."  
(Signed,) Bertha A. Trullinger, "Complexion Specialist," 29 1/2 Morrison St., Portland, Ore.

"After using one bottle of 'Herpicide' my hair has stopped falling out, and my scalp is entirely free from dandruff."  
(Signed,) Grace Dodge, "Beauty Doctor," 105 Sixth St., Portland, Ore.

Sold by leading druggists. Send 10c in stamps for sample to The Herpicide Co., Detroit, Mich. The Stafford Drug Co., special agent.

### FOR TEN-CENT THEATER.

Milwaukee Man Secures Lease of the Store Room in Kennedy Block.

Jacob H. Lawton of Milwaukee, who is conducting vaudeville theaters in several places in Wisconsin, also at Calumet, has secured a lease on the Kennedy block on Main street, at present occupied by T. F. Gill, the furniture dealer, and will conduct moving pictures and illustrated song entertainments there. He expects to get possession of the building May 1, and he stated yesterday that he intends putting in a new front and completely remodeling the store room, making it suitable for his business. The house will be conducted along lines similar to those followed at Calumet. Two good singers will be engaged and there will be three changes of pictures and songs each week.

In addition to aiding in the management of moving picture-illustrated song houses Mr. Lawton is financially interested in a hat concern of Milwaukee. His partner in this business is Mr. Kahn, son of a former Ishpeming dry goods merchant, who several years ago conducted a store in the Wilbur building, now the Simons block, on South Main street. Mr. Lawton stated that all of the picture theaters in which he is interested have been financial successes from the start, and he anticipates that the one here will be no exception. He intends to give as many entertainments both afternoon and evening as the public demands. While he has not yet definitely decided, the admission will probably be ten cents.

### RIVAL PIANO BUSINESS.

Three Concerns Have Agents Here and All Are Doing Well.

If the business being done here by the piano manufacturing concerns who have representatives in this city is maintained for a year or so, there will be no want of pianos in this city. The musical instruments in their homes. The "war" has been lively for some months past, and if the reports of the rival agents are half true from one to three dozen pianos are being sold in Ishpeming monthly, while almost a correspondingly large number of sales are being made in other towns of the county, particularly at Negaunee. The rival claims are urged so vigorously that some prospective purchasers are having difficulty to decide which piano to buy, inasmuch as each salesman claims he has the best to offer. There has been some slashing of prices, and it is said that a number of those who purchased pianos, during the past few weeks have obtained good bargains.

S. E. Clark, general manager of Grinnell Bros., of Detroit, was in the city Tuesday, visiting his local representative, F. A. Ellsworth. The latter has been here for a year past, and his business has been so satisfactory that Mr. Clark announced that his company will open a store and will put in a large stock of instruments as soon as a desirable stand can be obtained. He instructed Mr. Ellsworth to get nothing but a big store room as he thought the business here warranted opening on a large scale. He stated that the competition between four stores in the upper peninsula—at Hancock, Sault Ste. Marie, Manistique and Escanaba.

While the representatives of the wholesale concerns are hustling for patronage, the local merchants handling pianos as a side line are also doing business. The interest aroused by the active agents has not been a bad thing for the Ishpeming dealers, though some of the latter contend that they would do a better business if the competition between the other "chaps" was not so strong. The "war" is an interesting one, and it promises to continue for some time, as the representatives of the competing concerns announce that they are here to stay.

### MADE HIT IN COPPER COUNTRY.

The Houghton Mining Gazette of yesterday gave the "Gingerbread Man" the honor of being the best theatrical production of the upper peninsula. The "Gingerbread Man" was presented at the Lake Linden Opera House last night, and to a very appreciative audience too. The piece is clean and wholesome; the music especially timely and the attraction is presented by a well-balanced and clever cast of performers. "The Gingerbread Man" in a laugh producer from start to finish. Fred Nice as the leading character had the audience with him from the start and he not only made a hit in good humor but also made a big hit.

"Willard Louis was all that could be desired as Machavillus Fudge and the Wonderful Wise of Joseph Kearney added much to the fun of the evening. Harry Bond as the Fairy Queen creates considerable comedy and Late Vroldman as King Bunn comes in for a share of praise. A very pleasing feature of the production was the work of Mildred Elaine in the role of Jack Horner. Miss Elaine has a fine stage presence and well qualified for the part. Madge Lawrence as Princess Sugar Plum was very acceptable and Nellie Nice made a lively village tomboy.

"The members are evenly distributed among the various characters, catchy trios and sextets being numerous and one good selection following another rapidly. The mounting of the attraction is elaborate and the costuming also notable. Many novelties are introduced. "The Gingerbread Man" leaves a decidedly pleasing impression."

### DOING BUSINESS AGAIN.

"When my friends thought I was about to take leave of this world, on account of indigestion, nervousness and general debility," writes A. A. Chisholm, Treadwell, N. Y., "and when it looked as if there was no hope left, I was persuaded to try Electric Bitters, and I rejoice to say that they are curing me. I am now doing business again as of old, and am still gaining daily."

Best of all tonic medicines. Guaranteed by The Stafford Drug Co. 50c.

For Catarrh, let me send you free, just to prove merit, a trial size box of Dr. Shoop's Catarrh Remedy. It is a snow white, creamy, healing antiseptic balm that gives instant relief to Catarrh of the nose and throat. Make the free test and see. Address Dr. Shoop, Racine, Wis. Large jars 50 cents. Sold by The Stafford Drug Co.

### INSPECTING POWER PLANT.

A. J. Black, an expert engineer in steam heating work, and who is in the employ of A. L. Drum & Co., consulting and construction engineers of Chicago, is in the city inspecting the steam equipment of the Marquette County Gas & Electric company. His stated in a recent issue of The Mining Journal the company plans to put in new boilers and to make a number of important changes in its engine department. Mr. Black will test the engines and the boilers and recommend to the company the improvements he deems necessary for a more economical operation of the plant.

### ISHPEMING IN BRIEF.

Michael Collins left Tuesday evening for Chicago to receive treatment from a specialist.

The Star baseball team will conduct a hop at the Woodmen's hall on Saturday evening May 4. The charge will be fifty cents per couple.

F. Braastad had some men and teams at work yesterday removing the snow from the front of his business block on Cleveland avenue.

The Ishpeming branch of the Clerks' union has changed its meeting night from the first Tuesday to the last Monday in each month.

Mrs. M. F. Lynch left last night for Detroit in response to a telegram announcing the critical illness of her father, Michael O'Brien.

George A. Newett and George F. Ruoz left last evening for Cuba City, Wis., to look over the Pine Tree and other lead and zinc properties.

The members of St. John's court, Catholic Order of Foresters, will receive Holy Communion in a holy at St. John's church Sunday morning, May 12.

The Ladies' Auxiliary of the Ancient Order of Hibernians will give an Ambulant "hardtime" party at the Woodmen's hall the evening of Tuesday, May 14.

M. M. Duncan and family, who have been at Hot Springs, Va., the past few weeks, will leave there for home tomorrow, and will arrive here Monday or Tuesday.

Matt Aho of Negaunee, who has been a dealer in horses for some time, has seven fine animals at Ed Unnoth's livery barn on Pearl street. The lot consists of three well matched teams and one single horse.

H. B. Morgan, a veteran theatrical man, was in the city yesterday in advance of his coming to Ishpeming theater the evening of May 13 in the romantic drama, "A Woman of Mystery." Mr. Morgan brought shows to the upper peninsula thirty years ago.

### FROM HOPKINS' CURB LETTER.

The undertone of today's market was strong at all times and the prices showed a disposition to advance on light trading. Amalgamated was well taken throughout the session. Bisbee sent in buying orders for Superior & Pittsburg at slightly higher prices. Green Canyon has been well taken. Nevada-Utah is stronger. Arizona Commercial remains steady. The Butte stocks are all strong and prospects for this summer are very promising. A number of the properties now producing on a modest scale will start heavier shipments at once. Davis-Daly will become a factor in Butte production this year. At the lake, Hancock Consolidated and Keweenaw lead promising.

The News—No pure drug Cough Cure laws would be needed, if all Cough Cures were like Dr. Shoop's Cough Cure—and has been for twenty years. The National Law now requires that if any poisons enter into a cough mixture, it must be printed on the label, or package. For this reason mothers, and others, should insist on having Dr. Shoop's Cough Cure. No poison-marks on Dr. Shoop's labels—and none in the medicine, else it must by law be on the label. And it's not only safe, but it is said to be by those that know it best a truly remarkable cough remedy. Take no chance, particularly with your children. Insist on having Dr. Shoop's Cough Cure. Compare carefully the Dr. Shoop package with others and see. No poison marks here! You can always be on the safe side by demanding Dr. Shoop's Cough Cure. Simply refuse to accept any other. Sold by The Stafford Drug Co.

### A CARD.

This is to certify that all druggists are authorized to refund your money if Foley's Honey and Tar fails to cure your cough or cold. It stops the cough, heals the lungs and prevents serious results from a cold. Cures the grippe coughs, and prevents pneumonia and consumption. Contains no opiates. The genuine is in a yellow package. Refuse substitutes. The Stafford Drug Co.

### DARANTELLA

At Druggists, 25 cents, or mailed, Humphreys' Medicines Co., Cor. William and Job streets, New York.

## Upper Peninsula

### Prank Costs Partial Blindness.

In consequence of a prank played by fellow-employees at the North Shore Lumber company's mill at Thompson, Schoolcraft county, William Harwood has suffered the loss of the sight of one eye. He was struck in the optic by a piece of wood thrown with playful intent.

### Globe-Trotter to Earn His Way.

Gerald Clifford, an Escanaba young man, has started on a trip around the world. He intends to earn his way without funds, stopping to earn money from time to time as he needs it. He will go first to New York and then to England and Scotland, afterward to the continent and from there to Asiatic countries.

### Arm Frightfully Mangled.

As the result of a shocking accident sustained by him while at work in a shingle mill at Whitetake, Schoolcraft county, Basil Reid, a seventeen-year-old boy, has suffered the loss of his left arm. In the act of moving a shingle block into position, the saw caught his hand, severing it at the wrist, and then passed nearly through the arm above the elbow, mangle the flesh in terrible manner. Amputation was necessary at the shoulder.

### Schooner Brings a Dollar.

The schooner Red Cloud, a St. Ignace craft, has been sold for taxes again. Harvey Clark bought her at the sale this year for \$1. Last year the boat brought \$3. Many years ago the little vessel was a money-making hooker. She was hauled out upon the beach three seasons ago, and is so tender now that she cannot be launched. It has been said that one might pitch a hard boiled egg through her hull and hit the vessel. But she continues on the tax roll and there is always a lot of fun when the city treasurer levies and makes sale.

### City Plans New Loan.

An effort will be made to secure by special act of the legislature the power to borrow \$20,000 for use in public improvements at Gladstone. Some \$5,000 is needed for artesian well purposes and \$15,000 for paving Delta avenue. The city is already bonded up to its ears. Nineteen years ago, \$12,000 was borrowed of a Minneapolis capitalist for paving purposes, and with the work done the city endeavored to dodge payment. After prolonged legal battles, instead of the original amount, the city owed \$4,000 more. It has been paying up at the rate of \$1,000 a year.

### Salary \$3 Per Annum.

The meager salary of \$3 per year is the amount which Fred S. Eaton and Steven Paul will receive some time during the summer. However, this is just for signing their names once—they have no active duties to perform. It is necessary for the secretary of the school board in each of the two districts of the township to prepare a detailed statement of the work done and money expended during the past term. The school inspectors then attach their autographs to the figures compiled and this is filed with the proper authorities. This is the extent of their duties.

### New Law's Queer Working.

Under the new railway fare law enacted by the state legislature Iron Mountain people are confronted by a funny condition of affairs. The law permits upper peninsula railroads to charge four cents a mile for any distance under ten miles. To illustrate how the thing works, the Northwestern has a legal right to charge thirty-two cents for a ticket from Iron Mountain to Norway, a distance of eight miles, and by the same token the management could be haled into court if it charged a passenger more than thirty cents for a ticket to Vuleau, a distance of ten miles.

### Will Breed Horses.

The Wyoming Cattle company is making arrangements to begin the breeding of heavy draft horses at its ranch in Matchwood township, Ontonagon county. This will be a new industry for the upper peninsula. D. A. Kooker, manager of the company, is in Iowa looking after the shipment to the ranch of a carload of Percheron brood mares and a registered Percheron stallion. The company has been operating the Matchwood ranch for the past few years. It has demonstrated that cattle can be successfully raised in this north land and it is expected that the breeding of horses will be found still more remunerative.

### HOW'S THIS.

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Toledo, O.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by him. We therefore recommend him as a safe and reliable agent for the sale of his medicine.

WALDING, KINNAN & MARVIN,  
Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price, 75 cents per bottle. Sold by The Stafford Drug Co.

### PUBLIC WARNING.

## Negaunee Department

### TO LEAVE GOLDFIELD.

Negaunee Man in Nevada Town the Past Two Months Will Return Home

Florence Curran, who left here over two months ago for Goldfield, Nev., will return to Negaunee within a few weeks. When he left he did not have any serious intention of locating permanently in Goldfield, but made the trip in the hope that the change would be beneficial to his health, which had been poor. He likes the country and was satisfied before he was in Goldfield for very long that there are good opportunities to make money there, particularly in speculation, but the cost of living is great. He has written friends here that Goldfield is not a bad place for miners, but for persons seeking employment in other lines there are very few openings. In the most lines except mining the field is heavily overrun, and persons who are not assured positions before going there had better stay away. Mr. Curran could do well in music, but he would much prefer to do that work here. Negaunee people will be pleased to hear of Mr. Curran's intention of returning, as he has for some years past been considered the finest pianist in this district. He has done a great deal toward the advancement of the Tromby orchestra, which is now one of the best orchestras for its size to be found anywhere in the country.

Another party in Goldfield the past few weeks writes of the conditions there during the strike. In part, as follows: "I find things here most interesting. The situation is really desperate and stock sales are at a standstill. Stores are all closed and at night a citizens' guard patrols the streets with shot guns to prevent burning of the town, although there is no fighting—in fact it is very healthy to be polite. Everybody carries a young arsenal. The Business Men's club looks like a sporting emporium. The stocks of the best mines are going down daily, but as soon as this trouble is over they will go up again."

"Diamond Field Jack has just passed with a forty-four in each pocket and a sawedoff shot gun in his hand. He is a wealthy mine owner and has been ordered out of town, with the alternative of being shot. He has a peculiar inquiring look for everyone who passes him, occasionally looks back as he goes up the street. There are a number of such people here, but everything is quiet, with the exception of an occasional murder of undesirable people. This is a real thing, yet everything is quiet, much unlike it would be under the circumstances in any of our cities, notwithstanding the absence of police regulations or law. The restaurants are closed and if things keep up we may have to move to the next town for a meal."

### WILL REMODEL HOME.

Thomas Pellow Plans Extensive Improvements at Residence Property.

Thomas Pellow, who recently resigned the position of general superintendent of the Inter-State Iron company's properties on the Mesaba range, and returned to Negaunee to reside, has given L. E. Chaussee a contract for remodeling his dwelling on East Main street. Mr. Pellow plans to completely change the interior, which is at present planned for two families. Practically all of the rooms will be changed and new partitions, floors and finishings will be put in. There are at present two heating plants in the house. They will be removed and one large water plant installed. Mr. Chaussee said yesterday that Mr. Pellow will have one of the most convenient dwellings in the city. It will contain a number of large rooms on both floors and the interior finishings will be modern. It is estimated that the improvements will cost between \$2,500 and \$3,000. The contractor will begin work within a few days.

### AWNINGS.

### REACHING AGREEMENTS.

May Not Be Necessary to Condemn to Get Site for School.

The board of education has reached an agreement with three of the property owners whose lots are included in the site for the new high school building and it is possible that the only man still holding out for a larger sum than the board has offered will fall in line before next Tuesday, when the condemnation proceedings are to occur. John Rock, who owns the lot at the northwest corner of the site, feels that the price offered him is not large enough and up to this time has positively refused to accept it. He has three houses on the lot, two of which are rented and the third is occupied by his family. The board has offered Mr. Rock \$5,500 for the lot, with the understanding that he may move away the houses. The board feels that the offer is a most liberal one and one of its members yesterday expressed doubt whether the jury selected to set a price on the property will do as well by the owner. Mr. Rock was seen yesterday by The Mining Journal representative. He said that his lowest figure is \$7,000. He asserted that if he does not receive this sum he will appeal to the courts.

In case it is necessary to go ahead with the proceedings next Tuesday the hearing will doubtless be an interesting one. The school board will be represented by an attorney. Mr. Rock said that he will also have a lawyer present, to conduct his side of the case. His principal contention will be that by the loss of his lot he will be deprived of the revenue he has received for rentals, besides the expense he will be put to in moving the buildings. He said that one of the houses now rented will have to be torn down completely, while the other might have to be repaired before it is moved. He does not know where he can find another lot to put the buildings on.

A member of the school board says that as soon as the jury named to set the price on the Rock property reaches its decision steps will be taken to procure plans for the building. It will perhaps be late in June or early in July before it will be possible to break ground, as it will perhaps take from three to five weeks to procure plans and specifications, and it may take two weeks or perhaps longer to secure bids. It is expected that the other property owners who have reached an agreement with the school board as to the price they are to receive for their lots, will soon begin moving their houses to new locations.

### INDIANS DEFEAT WHITE SOX.

In the two men league bowling contest Tuesday evening at Orr & Tompkins alleys the Indians defeated the White Sox, the scores being as follows:

Indians—				
Mitchell	170	138	178	483
Wasnuth	137	147	148	422
Willman	126	169	144	439
Totals	433	445	470	1348
White Sox—				
Berglund	158	126	143	427
Wentala	135	139	153	427
Heckla	151	192	169	512
Totals	444	457	465	1366

### TEMPERANCE ADVOCATES HERE.

Negaunee had an unexpected midnight visit from C. H. Rutledge and Jacob Kamminen Tuesday. They came over from Ishpeming on the 11 o'clock street car and it was reported in the city yesterday that they immediately got busy in an effort to ascertain if the saloons had closed promptly at 11 o'clock. They left on the South Shore train shortly before 12 o'clock.

### NEW CITY SCALE.

L. E. Chaussee will within the next few days install a new Fairbanks scale at the city square. It was the intention to put the scale in position before winter sets in, but it arrived later than expected and the work was deferred. The new scale is one of the latest improved and it is expected that it will give much better satisfaction than the old one.

### BITTEN BY SPIDER.

Through blood poisoning caused by a spider bite, John Washington of Bosqueville, Tex., would have lost his leg, which became a mass of running sores, had he not been persuaded to try Buckley's Arnica Salve. He writes: "The first application relieved, and four boxes healed all the sores." 25c. Guaranteed by The Stafford Drug Co.

## SPECIAL!

Carnations, per dozen, 40c and 50c

Roses, doz. \$1 and 1.25

Callas, doz. 2.50 and \$3

**RAMLEH**  
TURKISH CIGARETTES

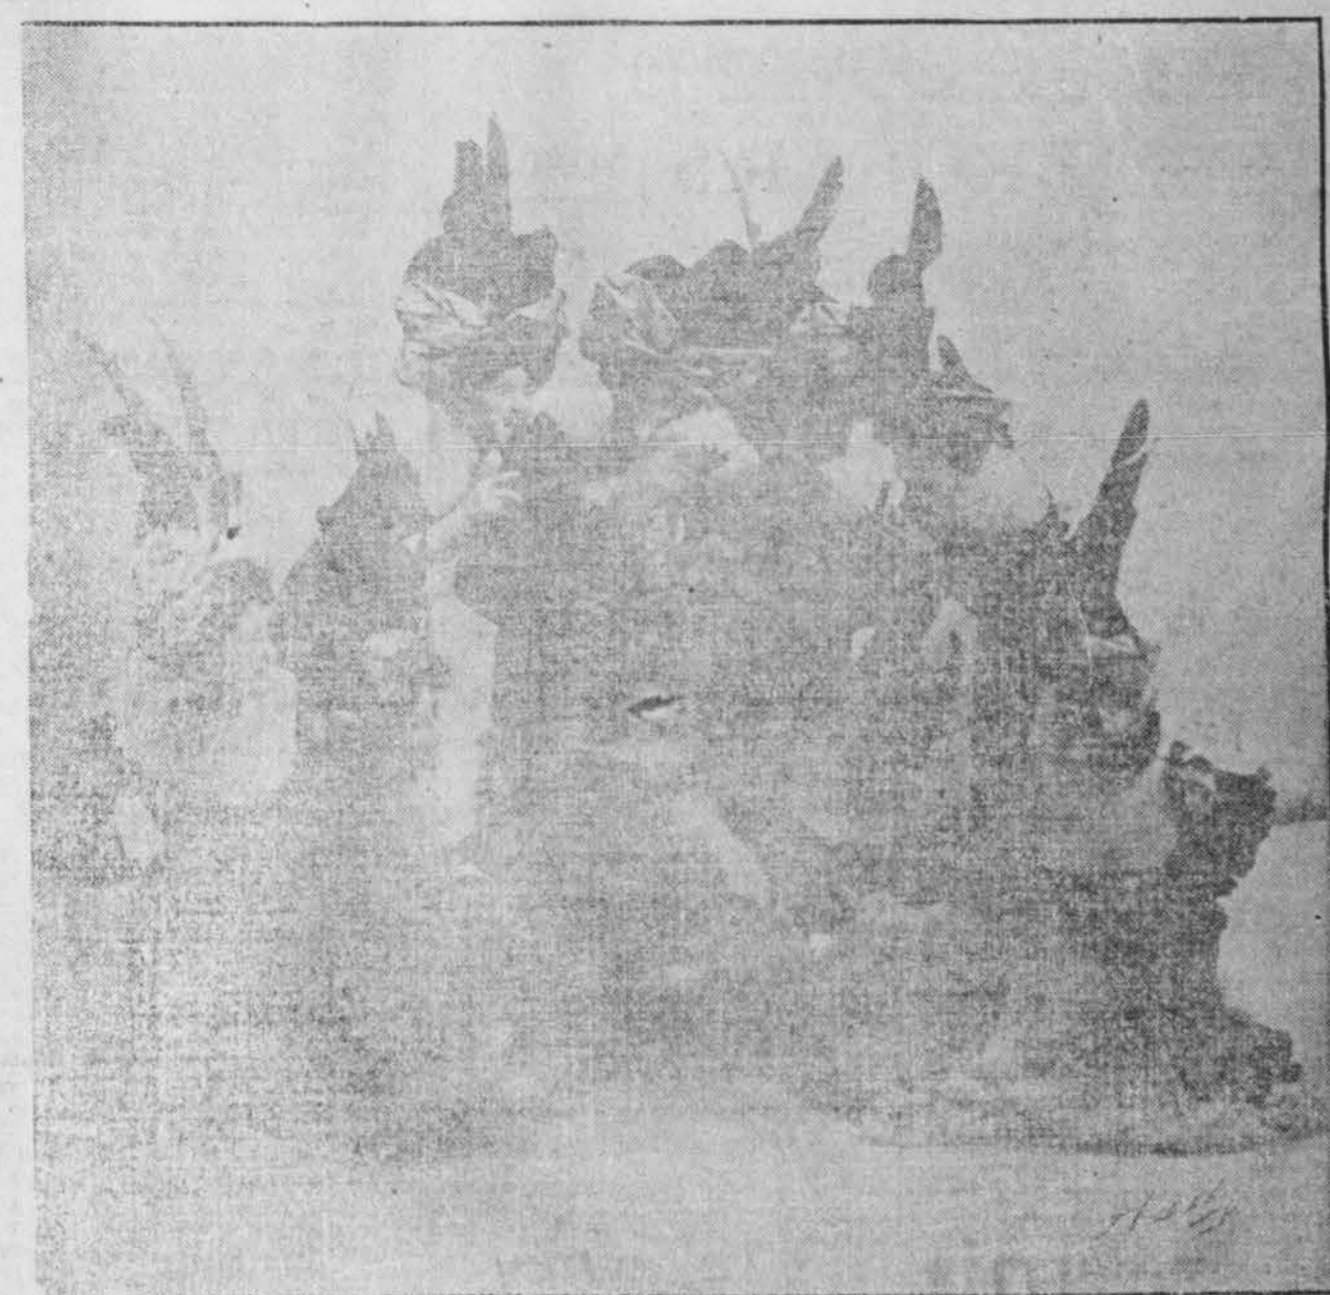

Haven't you often wished for a cigarette that was tasty without being heavy—one that was smooth and mellow without being insipidly mild? Then try the RAMLEH—you'll find it is exactly what you want.

The RAMLEH has "taste" without being too heavy—and a smooth, mellow fragrance that never tires—the very quality you so often look for, but so seldom find.

Try a box to-day.
