

STUPENDOUS PROBE TO BE UNDERTAKEN

Interstate Commerce Commission to Look Into the Affairs of the Trans-Atlantic Hamburg-American Packet Company.

Competition Stifled on Land and Sea, It Is Charged, Through the Operations of an Ironclad Trust in Ocean Freight-Carrying to Which Certain Big Railroads Are Parties and Which Affects Commerce All Over the United States.

Washington, June 19.—The interstate commerce commission today decided to investigate the affairs of the Hamburg-American Packet company, which is charged with pooling and maintaining monopolies in coasting and trade.

The inquiry is expected to be one of the most stupendous ever undertaken, and of a character different from any that ever before has engaged the attention of the commission.

According to the complaint on which action has been taken by the commission, the Hamburg-American Packet company has built up a complete monopoly of eastbound traffic originating in Chicago, St. Louis, Omaha, Minneapolis and other manufacturing centers of the United States intended for interior ports on places on the continent of Europe.

International Question Raised. It is charged that the Hamburg-American Packet company in its almost absolute control of eastbound and westbound traffic between interior points of the United States and Hamburg is a monopoly in respect to trade, the complaint raises an international question.

It is also charged that the effect of the differentials which place American ports on an equality is nullified by the pools, arbitrary division of traffic, that the acts complained of are in violation of the laws of the United States; that efforts to rehabilitate the American merchant marine are hampered and rendered abortive by this monopoly; and finally that there is little use in legislation for the benefit of American shipping if at the same time we allow our present laws to be violated by an unscrupulous foreign corporation in its effort to suppress American competition on land and sea.

CHARGES CALLED ABSURD. Hamburg-American Packet Company Enters a General Denial.

New York, June 19.—The reply of the Hamburg-American Steam Packet company to the charges before the interstate commerce commission will, it is understood, be in the nature of a general denial that a combination in restraint of trade exists between the defendant and allied lines.

LET QUESTION MARK STAND. Taft's Reply to Story Ken Under the Heading, "Taft Not to Run."

Leavenworth, Kas., June 19.—When Secretary Taft arrived here this morning his attention was called by the Associated Press to a story printed in a Kansas City paper quoting the Washington Times to the effect that the secretary may retire from the presidential race, it being intimated that he is not physically equipped for a long presidential campaign, citing his illness at St. Paul as giving color to the rumor. The story bore the caption "Taft Not to Run?" Secretary Taft declined to discuss the matter and dismissed it by saying, lamely, "You just let that question mark stand." The secretary looks in perfect health.

JOHN A. JOHNSON IS SPEAKER. Governor of Minnesota Delivers the Commencement Address at Pennsylvania.

Philadelphia, June 19.—Commencement week at the University of Pennsylvania came to an end today, when the 151st annual graduation exercises were held. Governor John A. Johnson, of Minnesota, delivered the commencement oration. His subject was "The University Days' Opportunity."

THREATENS TO CALL MEN FROM THEIR KEYS. UNION OF COMMERCIAL TELEGRAPHERS PRESENTS ULTIMATUM TO THE COMPANIES.

New York, June 19.—The general executive board of the Commercial Telegraphers' union has approved the proposed strike against the Western Union and Postal companies. The first move is expected to take place within the next week or ten days.

New York, June 19.—Unless its demands upon the Western Union and Postal Telegraph companies receive consideration, a strike will be ordered within a week or ten days. This was announced tonight by the Commercial Telegraphers' union. No specific date for the expiration of the ultimatum is set, and the question of involving one of both companies was left open. It is thought that no general strike is at present contemplated, but that the men will be called out at some one of the large offices, to be followed by a series of local strikes elsewhere.

TUG'S OFFICERS EXONERATED. Cleared of Blame By Board Which Investigated the Launch Disaster. Washington, June 19.—The report of the naval board of investigation in connection with the loss of the launch of the battleship Minnesota states that the launch had fouled a steel hawser with which the tug Grifield was towing a barge. No criminality is attached to the officers of the Grifield, who were in ignorance of the disaster.

PERE MARQUETTE AFFAIRS SETTLED. FLOATING DEBT TO BE LIFTED AND THE RAILROAD OPERATED INDEPENDENTLY.

New York, June 19.—The details of the settlement of the affairs of the Pere Marquette railroad were announced tonight. A large number of the preferred shareholders have agreed to subscribe to \$5,000,000 five-year 6 per cent debenture notes to the extent of 50 per cent of their holdings. These notes are to provide for the payment of the company's floating debt to a similar amount, which is at present outstanding in the form of receiver's certificates. In return they are to receive a new issue of preferred stock, with a bonus of new stock amounting to 15 per cent of their holdings. It is stated that the Pere Marquette stockholders have further agreed to cancel the lease of the road by the Cincinnati, Hamilton & Dayton. When the stockholders at their next meeting vote in favor of this plan, the Pere Marquette will be taken from the hands of the receiver and it will be made a local Michigan company, to be run independently of the board.

NEW COAL PRODUCT. "Coalite," English Fuel, Gives More Heat, With No Smoke.

Newcastle, Eng., June 19.—A good deal of interest has been centered in "coalite," and numbers have called at the exhibition here to see this coalite burning in the grate and hear about its remarkable properties as a house fuel. It is a bright, hard substance, very similar in appearance to the best coke, and in burning it makes no smoke and gives off, it is claimed, something like twice the heat of coal, while a coalite fire lasts 40 per cent longer than an ordinary coal fire. This coalite is produced by a process similar to that employed by the gas companies for the production of coke. In the case of the gas companies, coal is treated at a high temper-

LIEUT. GOVERNOR BREAKS THE TIE. Despite Protest of the "Boxers," Presiding Officer of State Senate Concurs in Passage of Concurrent Resolution.

Lansing, Mich., June 19.—[Special.]—Unless the supreme court intervenes, the people are to be given a chance to say whether they want to nominate governor, lieutenant governor and United States senators without any 40 per cent restriction clause. The chance for the supreme court lies in the fact that Lieutenant Governor Kelley voted today on the concurrent resolution offered. If the "Boxer" antipathy to the primary election law is strong enough, the matter may be taken up and the court may hold that this action was illegal. Mr. Kelley had good legal advice that it was all right, but there is a chance for disagreement, with no telling what the court will say. The attorney general, for instance, holds that the action of the lieutenant governor was illegal.

Now Unless Courts Intervene, Declaring the Action Illegal, the People Are to Have a Chance of Settling the Fate of the 40 per Cent Proposition—Legislature Finishes Its Business, and Notice Is Given by the Executive of the Proposed Special Session.

Lansing, Mich., June 19.—[Special.]—Unless the supreme court intervenes, the people are to be given a chance to say whether they want to nominate governor, lieutenant governor and United States senators without any 40 per cent restriction clause. The chance for the supreme court lies in the fact that Lieutenant Governor Kelley voted today on the concurrent resolution offered. If the "Boxer" antipathy to the primary election law is strong enough, the matter may be taken up and the court may hold that this action was illegal. Mr. Kelley had good legal advice that it was all right, but there is a chance for disagreement, with no telling what the court will say. The attorney general, for instance, holds that the action of the lieutenant governor was illegal.

FORMER PRESIDENT CLOSE TO DEATH. CRITICALLY ILL, GROVER CLEVELAND IS SAID TO HAVE NOW PASSED THE CRISIS.

New York, Thursday, June 20.—Advices from Princeton today state that former President Cleveland has been seriously ill at his home for some days, and that for some time his family and his friends who knew of his condition were much alarmed. Mr. Cleveland, it is said, has passed the crisis.

BASEBALL. STANDINGS OF THE CLUBS.

Table with columns for National League, American League, and today's scheduled games. Includes teams like Chicago, New York, Philadelphia, Boston, Cincinnati, Brooklyn, St. Louis, Cleveland, Detroit, Philadelphia, St. Louis, Washington, Boston.

ONLY TECHNICALLY GUILTY. Fined \$750 for Smuggling, Captain of Army Transport Will Appeal.

Newport News, Va., June 19.—Captain Morrow, of the United States army transport Kilpatrick, has been fined \$750 by the treasury department for violating the law in bringing to this port a case of fine dress goods market "used house-hold goods." The box was shipped from Havana by Major Herbert Slocum, United States army. It is understood that Captain Morrow will ask the department to remit the fine, claiming that while he was technically guilty he did not know the contents of the case and did not knowingly violate the law.

EX-SENATOR BAKER IS DYING. Demise Is Near, the Result of a Bullet Wound Received in 1881.

Leavenworth, Kas., June 19.—Ex-United States Senator Lucian Baker is dying at his home here. He has been in enfeebled condition for some time, the result of a bullet wound received at Leavenworth, in 1881, in the famous Thurston-Anthony feud.

WEATHER FORECAST. Washington, June 19.—The following is the weather bureau's forecast for Upper Michigan: Warmer Thursday and Friday; light variable winds.

STILL \$300,000 SHORT. Trustees of the McKinley Memorial Association Make Report.

Canton, O., June 19.—At the meeting of the trustees of the McKinley National Memorial association today, the report showed that the association is still \$300,000 short of the amount desired for the endowment fund. At the dedication of the monument on Sept. 30, President Roosevelt, Vice President Fairbanks and other public men will be present. It is also planned to have an imposing military pageant.

BROKER DENNETT PLEADS GUILTY. New York, June 19.—Oliver M. Dennett, the broker arrested in connection with the theft of gold bars from a million dollars in bonds from the Trust Company of America, pleaded guilty today to the charge of criminally receiving stolen goods. He will be sentenced on Friday.

BOISE, IDAHO, JUNE 19.—The state today made a dramatic production and proof of the Godard bomb, and besides offering further contributions of the testimony of Harry Orchard against Haywood secured a ruling under which a number of denunciations articles published in the Miners Magazine, the official organ of the Western Federation of Miners, will be admitted in evidence.

TO JUSTICE GODDARD HIMSELF FELL THE TASK OF TELLING THE STORY OF FINDING AND PRESERVING FOR USE AS EVIDENCE THE BOMB WITH WHICH ORCHARD TRIED TO KILL HIM.

Boise, Idaho, June 19.—The state today made a dramatic production and proof of the Godard bomb, and besides offering further contributions of the testimony of Harry Orchard against Haywood secured a ruling under which a number of denunciations articles published in the Miners Magazine, the official organ of the Western Federation of Miners, will be admitted in evidence. To Justice Goddard himself fell the task of telling the story of finding and preserving for use as evidence the bomb with which Orchard tried to kill him. He testified that the first information he had received about the bomb came to him from Orchard's confession, which was shown to him at Denver, Feb. 3, 1906, by Detective McFarland. He at once returned home, and in his gate discovered a screw eye which Orchard said he had placed there. It was rusted and corroded by ten months of exposure.

DIABOLICAL SCHEME REVEALED. The witness said that he examined the ground outside the gate where Orchard had placed the bomb, and found a slight depression, with the soil packed very hard against it. The bomb was dug up the next day by General Bulkeley Wells, who used a pocket knife to cut the soil away and raise the pine box containing the bomb. There was a small phial on top of the box, and attached to the rubber cork of the phial was a piece of rusted wire.

The bomb and its attachment were then sealed in wrappers and envelopes that were signed by a half a dozen witnesses, including Justice Goddard, and were placed in a vault, to the door of which a number of seals, including that of a notary public, were attached. They remained there until the following May 22, when, believing that the Haywood case was to come to trial, they were removed in the presence of the same witnesses and all save three of the forty sticks of giant powder contained in the bomb were exploded.

GREAT TELESCOPE. Now Being Made for the University of Michigan.

Ann Arbor, June 19.—The University of Michigan observatory is to have one of the most powerful telescopes in the world. The instrument is now in course of construction in the workshops of the observatory under the direct supervision of W. J. Hussey, professor of astronomy, with the assistance of E. J. Madole of Detroit, E. B. Peag and H. J. Colman, also of Detroit, are doing delicate mechanical work on the giant heavens-searching machine.

ILLINOIS MAN KILLS WOMAN AND HIMSELF, THE RESULT OF A SUICIDE PACT.

Belleville, Ill., June 19.—Lying clasp in death embrace on the shore of Triangle lake, a mile-northeast of here, the bodies of James Bullock and Miss Cora Miller were found this afternoon. In the forehead of each was a bullet hole, and the position of a revolver between the bodies indicated that Bullock had killed the woman and then ended his own life. A note, signed by both, indicated that the tragedy was the outcome of a mutual agreement to suicide.

MARKSMAN LYON LEADS. North Carolina First in the Great American Handicap Preliminary.

Chicago, June 19.—George L. Lyon, of Durham, N. C., came up in the Great American handicap last year, when the preliminary handicap today with 96 out of a possible 100. Two brothers, Tom and J. E. Graham, of Long Lake, Ill., tied for second, with 95 each. Leo Barkley, of Chicago, made the high score for the professionals, with 94. Five states were represented in the team shot, nineteen teams of five men each facing the trap. The second Illinois team won the event, with 408. All shot from the 16-yards mark, at 100 targets each. Missouri was second with 432. Illinois had five teams at the event, and Missouri, Iowa, Wisconsin and Nebraska one each.

OBITUARY MENTION. Chippewa Falls, Wis., June 19.—Mrs. Flora Pearl Gentry, aged sixty-eight, widow of General George G. Gentry, and one of Wisconsin's most prominent women, died today. For six years she was treasurer of the Wisconsin States Press association, editor of the Chippewa Herald for two years and vice president of the board of lady managers of the World's Columbian exposition.

DRAMATIC MOVE IN HAYWOOD CASE. Bomb With Which Orchard Testifies He Tried to Kill Supreme Court Justice Goddard Is Produced as Evidence.

Boise, Idaho, June 19.—The state today made a dramatic production and proof of the Godard bomb, and besides offering further contributions of the testimony of Harry Orchard against Haywood secured a ruling under which a number of denunciations articles published in the Miners Magazine, the official organ of the Western Federation of Miners, will be admitted in evidence.

JURIST, HIMSELF, TAKES THE STAND AND TELLS OF THE DISCOVERY OF THE INFERNAL MACHINE, PLANTED AT HIS GATE AND ARRANGED TO EXPLODE IN EXACTLY THE SAME MANNER AS THAT WHICH ENDED THE LIFE OF IDAHO'S FORMER CHIEF EXECUTIVE.

Boise, Idaho, June 19.—The state today made a dramatic production and proof of the Godard bomb, and besides offering further contributions of the testimony of Harry Orchard against Haywood secured a ruling under which a number of denunciations articles published in the Miners Magazine, the official organ of the Western Federation of Miners, will be admitted in evidence. To Justice Goddard himself fell the task of telling the story of finding and preserving for use as evidence the bomb with which Orchard tried to kill him. He testified that the first information he had received about the bomb came to him from Orchard's confession, which was shown to him at Denver, Feb. 3, 1906, by Detective McFarland. He at once returned home, and in his gate discovered a screw eye which Orchard said he had placed there. It was rusted and corroded by ten months of exposure.

WALL STREET BROKER FAILS. New York, June 19.—The suspension of F. W. Duryea, a stock broker, was announced on the Stock exchange today.

SENSATION SPRUNG AT DENVER MEET. DELEGATES WITHOUT CREDENTIALS FOUND SEATED IN PUBLIC LANDS CONVENTION.

Denver, June 19.—A sensation was sprung in the public lands convention today by charges made by both the administration and the anti-administration forces that the convention was being "packed." The "antis" charged that a number of men who were not properly accredited delegates had been given seats. An order was made to issue new cards of admission and to see that only genuine delegates received them. When the committee on credentials reported it was found that 496 delegates were accredited to Colorado, 145 to Wyoming and the balance of states scarcely 100. Colorado's representation was later cut to 396, it being stated that the first figures were an error in addition. It developed that all of Colorado's accredited delegates, whether present or not, had been counted, while in the case of the other states only those present were to be allowed to vote. The report was sent back to the committee with instructions to bring its report according to the call of the convention. The committee's report will be heard the first thing tomorrow morning, and if it obeys its instructions it will give a vote for every person whose credentials have been sent to the convention whether they are present or not.

IRA B. SMITH ACCUSED. Head of Milwaukee Grocery House Arrested on Criminal Charge.

Milwaukee, June 19.—Ira B. Smith, a member of the wholesale grocery firm of Smith, Thompson & Brown, which recently went into involuntary bankruptcy, was arrested this afternoon, charged with obtaining money under false representation of the firm's finances.

FOUND CLASPED IN DEATH EMBRACE. ILLINOIS MAN KILLS WOMAN AND HIMSELF, THE RESULT OF A SUICIDE PACT.

Belleville, Ill., June 19.—Lying clasp in death embrace on the shore of Triangle lake, a mile-northeast of here, the bodies of James Bullock and Miss Cora Miller were found this afternoon. In the forehead of each was a bullet hole, and the position of a revolver between the bodies indicated that Bullock had killed the woman and then ended his own life. A note, signed by both, indicated that the tragedy was the outcome of a mutual agreement to suicide.

PREPARES FOR DEFENSE. Guatemala Building Fortifications at the Port of Ocosingo.

Mexico City, June 19.—Guatemala has 1,000 men employed building forts at the port of Ocosingo and is making that point the strongest fortified port in Central America, according to the statement of R. Sol, a coffee plantation owner of Salvador, recently arrived in Mexico City. Fortifications are being erected not alone on the coast, it is said, but deep trenches are being built and machine guns and cannon mounted along the frontier at Ocosingo.

SUDDEN RUSH OF WATERS BRINGS DEATH TO MANY PERSONS IN GREECE. Athens, June 19.—More than a hundred persons were drowned in a flood caused by the overflowing of the Ithion river, which inundated the town of Trikalka, in Thessaly, yesterday.

SURPRISE COMES AT THE HAGUE. Right to Present the Question of the Limitation of Armaments Is Formally Reserved on Behalf of the United States.

The Hague, June 19.—The surprise of the second session of the peace conference this afternoon was the formal reservation by General Horace Porter on behalf of the United States of the right to present the question of the limitation of armaments. Together with this, he also reserved the right to introduce the subject of the collection of contractual debts by force.

ACTION IS TAKEN TO INDICATE A FIRM RESOLVE TO PUSH THE ISSUE TO THE FORE IN THE EVENT IT BECOMES APPARENT THE SUBJECT IS GOING BY DEFAULT, AND THE NOTICE THUS GIVEN THE CONFERENCE OCCASIONS THE PACIFICISTS MUCH ELATION.

The Hague, June 19.—The surprise of the second session of the peace conference this afternoon was the formal reservation by General Horace Porter on behalf of the United States of the right to present the question of the limitation of armaments. Together with this, he also reserved the right to introduce the subject of the collection of contractual debts by force. While this reservation was made quite naturally, in accordance with the notice served on Russia during the preliminary negotiations last spring, and in order that silence now might not be construed as acquiescence in the restriction of the work of the conference to the limits of the Russian program, it is believed to indicate the firm resolve on the part of the Washington government, after seeing the trend of the situation here, to raise the question later if it becomes apparent that the subject is going by default.

PEACE PARTY ELATED. It can be stated positively, however, that no proposition has yet been formulated by the American delegates, but this action has renewed the hope that the United States would bring up the question of limitation and has given great satisfaction to the pacifists. Sir Edward Fry also served notice that Great Britain reserved the right to introduce subjects outside the program, but less significance is attached to his action.

Another interesting feature was Baron Von Bieberstein's notification that Germany intended to offer the proposition of an international prize court to which appeals could be made at a time of maritime war and the decisions of which should be final. General Porter seconded this proposition on behalf of the United States, and Sir Edward Fry advanced Great Britain proposed to declare a project on similar lines. Beyond these two matters, the session was perfunctory in character.

LEADERS OF REVOLT ARRESTED. French Government Acts With Vigor in Wine Growers' Brawl.

Paris, June 19.—M. Ferroul, the striking mayor of Narbonne, and next to Marcelin Albert the most prominent figure in the wine growers' revolt, was arrested this morning and hurried away to Montpellier. Later in the day Marcelin Albert, the leader of the wine growers' movement, was arrested and taken to Montpellier. Intense excitement prevails at Narbonne, but the people thus far have been overawed by the military display.

SERIOUS RIOT AT MONTPELLIER. Montpellier, France, June 19.—Serious rioting broke out tonight, lasting all evening. A mob attempted to rescue prisoners from the prison. The troops were received with volleys of stones and bottles, and in some cases soldiers were pulled off their horses and clubbed. The troops refrained from retaliating with bullets.

EXPLOSION SINKS TORPEDOBOAT. Crew Near Death in English Waters Saved by British Gunboat.

Tonquin, Eng., June 19.—A torpedo boat, name unknown, sunk off Bayhead this afternoon after an explosion had occurred on board. The British gunboat Dryad saved the crew.

FRENCH SUBMARINE A TOTAL LOSS. Tonkin, France, June 19.—The French submarine Gyronote was sunk in try-dock today, owing to the carelessness of workmen who opened sluices without notice. Examination showed that the submarine was so damaged by water as to be a total loss.

PREPARES FOR DEFENSE. Guatemala Building Fortifications at the Port of Ocosingo.

Mexico City, June 19.—Guatemala has 1,000 men employed building forts at the port of Ocosingo and is making that point the strongest fortified port in Central America, according to the statement of R. Sol, a coffee plantation owner of Salvador, recently arrived in Mexico City. Fortifications are being erected not alone on the coast, it is said, but deep trenches are being built and machine guns and cannon mounted along the frontier at Ocosingo.

SUDDEN RUSH OF WATERS BRINGS DEATH TO MANY PERSONS IN GREECE. Athens, June 19.—More than a hundred persons were drowned in a flood caused by the overflowing of the Ithion river, which inundated the town of Trikalka, in Thessaly, yesterday.

DAILY MINING JOURNAL

A MORNING PAPER PUBLISHED BY THE MINING JOURNAL CO. (LIMITED).

Entered as second class matter of the second class in the postoffice at Marquette, Mich.

Per month, by carrier, \$1.00; per year, by mail, \$10.00.

MARQUETTE, MICH., JUNE 20.

The compromise railroad commission bill appears to be about an even break between the administration men and the "antis."

The backward season doesn't bother the Northern-Copper Country baseball league so much as the poor attendance in the copper town.

Senator Stephenson of Wisconsin has just celebrated his seventy-eighth birthday. Therefore when Senator Stephenson completes his two year term he will be something over eighty.

Considering the consistent opposition of two of the upper peninsula senators toward the administration, which certainly has the power to break legislation at Lansing, if not to make it, the upper peninsula has fared very well at the hands of the present legislature.

All indications point to an unusually large assemblage of members of the French societies of the neighboring cities and counties in Marquette this year. The successful reunion of some years ago will be equalled, and probably surpassed. The members of the Marquette society have proved themselves good entertainers, and they are leaving nothing undone to insure their guests a cordial welcome and an eventful holiday.

Hancock is still considering the pros and cons of municipal ownership of a lighting plant. There is sentiment both for and against the experiment in the city. The Hancock council will discuss the question at some length tomorrow evening, and there appears to be a likelihood that ultimately the city will embark on public ownership.

The compromise on a railroad commission bill lessens the likelihood of Governor Warner's calling a special session. There will be, from all present appearances, but one piece of major legislation that will not, when the session closes, have been disposed of in a manner at least fairly acceptable to Governor Warner.

The senior class of the Northern Normal deserves much credit for the excellent production of "As You Like It" Tuesday evening. Mrs. Rushmore, the head of the department of elocution, is following the best lines in selecting classics of this nature for performance.

There are not lacking voters who believe that Governor Warner will be his own successor, and a mighty good successor he would be.

There are not lacking voters who believe that Governor Warner will be his own successor, and a mighty good successor he would be. Governor Warner is not afraid to get to the front of a popular movement.

SUPERIOR TRUST COMPANY

HANCOCK MICHIGAN

Capital - \$150,000

ling the mining companies to make unrestricted purchases of timber lands. Governor Warner has given every evidence this session of desiring to do just what is right by both the people and the corporations.

Governor Warner's act in signing the Moriarty bill permitting the mining companies to acquire lands in the upper peninsula in their discretion, instead of restricting themselves to 50,000 acres, was expected, as the interests seeking the legislation made out a good case.

The Spanish confidence men, with their carefully constructed stories of imprisonment in Spanish castles, beautiful daughters and portmanteaus temporarily hiding places of immense fortunes, are very active just now.

One of the complaints against the Japanese in this country is that they work too cheaply; that they are satisfied with a wage schedule upon which white labor would starve.

THE DES MOINES PLAN. Today the people of Des Moines will vote on the question of substituting a commission government for their present mayor and aldermen.

THE STATE LEGISLATURE HAS PASSED the bill introduced by Mr. Bennett of the Soo directing the state to deed over to Chippewa county all of the lands in the county delinquent for taxes, title for which has passed to the state.

THE STATE LEGISLATURE HAS PASSED the bill introduced by Mr. Bennett of the Soo directing the state to deed over to Chippewa county all of the lands in the county delinquent for taxes, title for which has passed to the state.

finance and contract must be open to public inspection for seven days before its final passage and ten days more must elapse before it can go into effect.

In case the commissioners find ways to circumvent these restrictions 25 per cent of the voters can demand an election to "recall" the obnoxious office holders.

Upper Peninsula

WON'T CELEBRATE THIS YEAR—Only four or five persons attended the meeting called at Ironwood to consider the advisability of getting up a Fourth of July celebration, and nothing was done.

IRONWOOD WOMAN IN TROUBLE—Helma Sippola, a scrubwoman at the Curry Hotel, at Ironwood, has been arrested on charge of concealing the death of an infant, to which, it is alleged, she gave birth a week previous.

FISHERMAN'S GRUSOME CATCH—Fishing in Trout lake, western Mesaba range, near which the Steel corporation is opening a group of big open-pit iron mines, a Bovey man hooked the corpse of John Hanson, formerly of Marquette county, while out fishing.

CARRYING RATES BOOSTED—Announcement is made of a boost in coal-carrying rates by the Gogebic range railroads. The charge per ton in carload lots has for years been fifty-five cents from Ashland, the receiving port.

RODE THROUGH FOREST FIRE—Dr. J. A. Melndoe and Miss Besse Edwards rode up from Norway last Saturday in the doctor's fine new runabout, reports the Iron River Reporter.

SEVERED HIS FINGERS—While operating a paper cutter in the office of the Gladstone Delta at Gladstone, Hubert Besaw, an employe, accidentally placed his left hand under the knife as it was descending and the ends of the four fingers were severed.

MINING FATALITIES—The body of Matt Tentamaki with the top of the head blown off by the ghastly find made by fellow workmen of the victim at the Great Western mine at Crystal Falls.

LANDS GIVEN TO CHIPPEWA—The state legislature has passed the bill introduced by Mr. Bennett of the Soo directing the state to deed over to Chippewa county all of the lands in the county delinquent for taxes, title for which has passed to the state.

THE VALUE OF PERSONAL KNOWLEDGE. Personal knowledge is the winning factor in the culminating contests of this competitive age and when of ample character it places its fortunate possessor in the front ranks of the well informed of the world.

Copper Country

CALUMET'S TYPHOID EPIDEMIC.

Believed That It Is Being Stamped Out—Water Is Pure.

There were no new cases of typhoid fever at Calumet yesterday, and it is believed that the epidemic which threatened early in the week to assume serious proportions is being stamped out. Dr. Victor C. Vaughan of the state health board is in Calumet investigating the cause of the disease, and it may be that they will be unmistakably located, with the result that the danger will be at once removed.

Two great causes of typhoid are drinking water and milk. If the drinking water is contaminated by sewage the result is certain to be an epidemic of the fever. But the Calumet drinking water is pumped through miles of pipe line from Lake Superior, the purest water in the world, and it reaches the consumer with as little danger of contamination as it is possible to attain. Health Officer Wetzel sent samples of the drinking water to Ann Arbor for analysis, and he has been advised that the water is pure.

It is possible that the milk from cows kept in unsanitary stables or pens that are not handled in a cleanly manner is responsible for the disease. Dr. Vaughan and the health officer are now investigating this. Other sanitary conditions in the town are being looked into, and the result will undoubtedly be a general cleaning up order, which will have a generally good effect, even though it may not affect the typhoid fever supply.

The copper country generally has been free of infectious diseases this spring, which was with an unusually wet one. The few cases of smallpox in Keweenaw county and the present condition in Calumet are the only exceptions.

WILL TAKE EXAMINATION.

Dr. H. S. Cole, president of the village of South Range will leave next week for Lansing, where before the state military board he will take an examination for a commission as captain in the Michigan National Guard. He is the prospective successor of Captain Hecker of the Houghton Light Infantry, who expects to resign in August. Dr. Cole is a Spanish war veteran and is enthusiastic in National Guard matters. He is looked upon as a worthy successor to Captain Hecker, who is undoubtedly one of the finest officers in the state service.

Michigan's Mining Institution, Houghton, Plans Important Improvement.

Professor O. P. Hood, head of the department of mechanical engineering at the Michigan College of Mines, has practically completed his plans and specifications for the central power plant which is to be erected this year at the college and for which the state legislature recently appropriated \$43,000. He gave The Mining Journal an opportunity to look over the plans Tuesday afternoon, and a description of the proposed addition to the college buildings and equipment should be interesting.

The plant will consist of a stone building, located on the sands north of the college grounds, on the shore of Portage lake, and a concrete tunnel which will reach every structure of the college group. The building will house the motive power of the shops, the boilers which will provide steam, and an electric light plant, and pumps for the college water system. The tunnel will contain the pipes for conveying the heat and power steam, the water pipes and the electric light and power wires.

The ground dimensions of the power house will be 90 by 70 feet. The building will be constructed of rough Portage Entry stone, and will be one story high. It is not the purpose of the college to erect a building which will attract the eye, but one which will be substantial and serviceable. The site is located convenient to the railroad and the dock which may later be put into use by the college. This dock is an old structure, but is in a good state of preservation and would require few repairs to put it in service as a coal receiving depot for the power plant. However, President McNaught finds that the coal companies that collect the coal for the plant are not permitted to dump it in the open air, but must receive it in cars or in a covered structure. The coal will therefore be received from cars over a specially constructed trestle and dumped directly into the bins of the boiler room.

The building is to be divided into two rooms, the one facing the college containing the power units. These will be two electric generators, each driven by a direct connected steam engine. One of these units is now in use in the shops of the mechanical engineering building, but it will be removed when the new structure is completed.

The second room of the building will be devoted to the boilers, three in number, which will furnish power for the engines and heat for the buildings. An economy is noted here, the purpose being to use the same steam from the boilers for heating purposes. The greatest amount of value is thus taken from the coal, the waste steam after it has been used for power being diverted to the other use. The boilers will be equipped with water heaters and feed water heaters and various other devices looking toward fuel economy.

The pumps of the water works system will be located in the basement. This brief description of the building gives a general idea of its plan and scope, and it is in a way a permanent work, the feature of the power plant system.

The feature on which President McNaught and Professor Hood dwell most is the tunnel. This starts from the power building near its eastern end and is carried back to the college buildings. The tunnel is to be built in a series of shafts, each shaft rising until it reaches the crest of the terrace on which the college buildings are erected. The college grounds are at an elevation of about ninety feet above the level of the lake, at which level the power building is to be built. The ground is terraced down toward the lake and the angle of the terrace is preserved with a stone retaining wall at about half the elevation. The tunnel goes under this wall and continues on upward to the crest of the slope. Here a large concrete pit, 200 feet deep, will be sunk, as a central point for the distribution of the piping and wires and the branching of the tunnel. From this pit the tunnel is continued east and west along the edge of the terrace until it has reached the college buildings. Branches of the tunnel will be run into these buildings, with the exception of Hubbell Hall, the main college building, which now is connected with the plant in the mechanical engineering building and these pipes will be retained, a connection with the tunnel being made in the latter building.

The tunnel is to be oval in section, six feet three inches in height and of about the same width. It will be constructed of solid concrete. The dimensions will be such that the tunnel will be 1,300 feet of its length so that an inspector may reach any part of it. The chief purpose of the tunnel is to make all the piping and wiring accessible at all times to inspection so that the cost of repairs may be thereby reduced. The piping will be carried on specially designed hanger on the right side of the tunnel. The pipes will be four in number—high pressure steam for power, low pressure steam for heat, water and waste. The electric wiring will all be carried on the left side of the tunnel.

The power steam to be carried through the tunnel will be in small quantity, as the greater portion of the power used in the college is electric. Professor Hood explained the causes for this general use of electric power, the unit which is now providing the building with light and power takes up about the same amount of room as did the horizontal steam engine which formerly provided power for the machine shop. That engine is now in disuse and is replaced by a motor which takes up no space at all. A second motor hung from the ceiling of the machine shop provides power for the pattern shop. These shops are a maze of belting and a maelstrom of machinery. They provide instruction for future mining engineers in machine work and pattern making, giving the students practical work in these lines. The students in the machine shop are working on rock drills of the wellknown Rand type, which are completely constructed at the college, all but the rough castings.

As soon as Professor Hood has completed his specifications for the tunnel he will ask for bids, that contract being let separately. The bids for the construction of the building will also be asked in a short time. The entire plant is to be completed within the present year. Its purpose, simply, is to centralize the light, heat and power of the college and insure economy of coal, space and noise. It is one of the most valuable additions granted the college in recent years.

HANCOCK SCHOOL BOARD.

Will Conduct the Election in July According to Statute.

The Hancock school board, at its regular meeting Tuesday night, made arrangements for the annual election of members of that body on July 8. It will be remembered that attention was called recently to the fact that the board has hitherto conducted its elections without the formality of a previous caucus. This irregularity was pointed out to the board, and arrangements were made to hold the regular caucuses in anticipation of this election.

The most important matter acted upon by the board was the selection of L. A. Colburn of Hancock as supervisor of music for the ensuing year. The Hancock schools have not previously had a musical instructor. Mr. Colburn has been located in Hancock as a private vocal teacher for the past two years, and is in every way qualified for the position.

UNFORTUNATE HOUGHTON COWS.

No Pasture for the Milkers but a Poundmaster Exists.

The Ishmaelite of copper country fauna, the pariah of the animal world, the hobo of domestic mammalia is the Houghton cow. Usually carefully nurtured, comfortably housed, grain fed and kindly kept, the cow is a joy to any family and for her keep gives up a rich store of nutriment for young and old. The Houghton bovine has not these conditions to solace her, and the wonder is that Houghton is not the biggest user of canned milk in the country.

The excuse for this ruminating on the cow's sad lot is based on the fact that the cow in Houghton is not permitted to graze. A Houghton woman who would sooner have her cow in a pen than her cow made The Mining Journal list to her point, and it appears to be based on good reason. Houghton is a village which is perched on the side of a hill that is composed entirely of rock. In some places the grass has been seen to grow where none grew before, but this grass is sequestered. Otherwise there are no grass plots within many miles of the village, except high up on the hills where there are additional patches of grass. The owners of cows must perform allow their milkers to wander there, and regularly the poundmaster gets them. No one has established a pasture to which cows may be sent, and the animals must be kept in pens, and the pens to street dogs, kids and the poundmaster. There is an opening in Houghton for a good pasture—a business opportunity which should not be overlooked.

In Laurium the residents are having a somewhat similar trouble. About fifty cow subdivisions but no residents. Owners of cows must perform allow their milkers to wander there, and regularly the poundmaster gets them. No one has established a pasture to which cows may be sent, and the animals must be kept in pens, and the pens to street dogs, kids and the poundmaster. There is an opening in Houghton for a good pasture—a business opportunity which should not be overlooked.

COPPERDOM BREVITIES.

The village of L'Anse has on foot a Miss Anna Haug of Houghton has returned from the University of Michigan. Miss Ollie Carrigan of Hancock has returned from the Marquette Normal school.

William Bettens of Butte, Mont., a former Calumet resident, is visiting relatives in this place. About fifty Harry Dillon of Houghton has taken a position as a mining engineer.

The Houghton county circuit court resumed operations yesterday afternoon, continuing the Maynard-Griff chancery case.

Dr. L. L. Hubbard, superintendent of the King Philip, Challenge and Winona mines, was in Marquette on business yesterday.

Michael Carrigan of Hancock, who has been a stenographer in the office of the gas company, and was promoted to the position of bookkeeper.

John W. McNair and Miss Harriet A. Mason of Hancock will be united in marriage tonight at the home of the bride's mother, Mrs. T. D. Mason.

L. F. Curtis, who recently resigned his position as manager of the Houghton County Gas company, has left Hancock for Des Moines, Ia., where he will permanently locate.

Sheriff Beck is expected home today from Iowa, bringing back with him a noble Ariz. who he has located in southern Michigan. Marshal Trudell of Red Jacket, who accompanied him, got back Tuesday night.

A large party of copper country people left for Tobin's harbor, Isle Royale, Tuesday night, to attend the opening of the summer resort which Messrs. Faucett, Martini and Guck of Calumet have established there. The party got back early today, having occupied the place with great ease.

Professor John E. Lautner of Marquette and Miss Veda Gallagher of Houghton were married Tuesday at the home of the bride's parents, Mr. and Mrs. Edward Gallagher, Sr. After a summer spent in Europe, they will reside in Marquette, where Mr. Lautner is a member of the Normal school faculty. The bride is a graduate of the institution.

HOW'S THIS?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

W. J. CHENEY & CO., Toledo, O. We have cured by the use of Dr. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions. We are financially able to carry out any obligations made by this firm.

WALDING, DRUGGIST, Toledo, O. Hall's Catarrh Cure is taken internally, cures all cases of blood and mucous surfaces of the system. Testimonials sent free. Price, 75 cents per bottle. Sold by The Stafford Drug Co.

SEWING-MACHINE NEEDLES

For all makes of machines at Five Cents per package, and everything else pertaining to sewing machines at greatly reduced prices. Look for the Red S. Singer Sewing Machine Co., Marquette, 108 N. Third St.; Ishpeming, 29 S. Main St.; Negaunee, Iron St.; Hancock, 503 Reservation St.; Calumet, 423 N. Fifth St.; Escanaba, 713 Washington St.; Iron Mountain, 205 E. Houghton St.; Sault Ste. Marie, 116 Ashmun St.

Mining News

SUPERIOR & PITTSBURG.

Company Earning More Than Enough to Pay Heavy Development Costs.

The Superior & Pittsburg directors have been asked by their creditors repeatedly to make some statement relative to the conditions which exist at this property, comment J. A. Minnear & Co. in their copier letter issued at Laurium. The decline from \$29, the high mark for the year 1905 to \$14, the low price scored by the issue, naturally caused many of the holders of the stock a considerable amount of worry. This could be expected for the average person who owns stock and sees it rise gradually and in the short space of a few weeks decline one hundred per cent is not going to sit back idly and watch profits melt away. This is true irrespective of whatever assurance may have been given him not to fear for the future of his property.

A matter now at hand the Superior & Pittsburg is a company actively engaged in developing its property in the Bisbee camp, Arizona. The directors are giving the work such attention as it requires and insist upon one thing and that is that the ore shall be carried on from a mining rather than a stock market standpoint. No one who has given the Superior & Pittsburg the slightest investigation will doubt the fact that the company is admirably managed, has mining men in close touch with its affairs who will insure the development of its every resource. From a mining standpoint Superior & Pittsburg is a great success; from a stock market view it is to say the least most discouraging.

In discussing the prospects and development of the Superior & Pittsburg, one of the directors, at a question, expressed the opinion that given another year the company would be in a position to demonstrate clearly that the confidence in the value of the property was not misplaced. Had it not been for the strike at Bisbee, early this year," stated the director in question, "the Superior & Pittsburg would have done a little better than pay expenses. Considering the great amount of development work being done this would have been a most excellent showing. Because of the strike our operations are hampered somewhat, although we are constantly adding to our pay roll and have more men at work now than at this time a year ago. Our openings are much more extended now and also our development work requires more men so that less attention can be paid to shipping ore than we might desire and which apparently some holders seem to think essential. Whatever we produce now is merely to keep our openings cleaned up. We could put a considerable force at work stopping the good ore bodies which we have opened up now, but such a policy is contrary to the development and opening up of a property of the magnitude that ours has attained. If we ship any considerable quantity of ore, it simply means that we must retard our operations, and considering the fact that we are now anxious to get the mine on a permanent producing basis such a policy would be almost suicidal. Not until we have a underground development work enough to insure a permanent production will the Superior & Pittsburg make any attempt to hold back development work in order to put more men at stopping and getting out ore for treatment.

The idea that the Calumet & Arizona is being favored by the production of copper is erroneous. It should be remembered that Calumet & Arizona is opened up ahead for at least three years and even if no development work is done at this property whatever it would be possible for that company to maintain its present rate of production without any difficulty. We hope to put the Superior & Pittsburg just in such a position where it will have ground opened up sufficient to tide it over any troublesome period such as has recently been passed through.

The director quoted refused to state when he thought it likely that the Superior & Pittsburg would be in a position to pay a dividend, but it was evident from his conversation that he believed it would be possible for the shareholders of that company to buy their Christmas gifts in 1908 with the proceeds of the disbursement made by the Superior & Pittsburg. This will of course depend upon a fair price being received for its copper and also a period passed through in which there will be no labor difficulties or other problems of a serious nature.

In the market Superior & Pittsburg has been well taken during the past week. Around \$15 there has been developed considerable buying, particularly among those who keep the stock for an investment. In two years Superior & Pittsburg will undoubtedly be earning and paying good dividends and producing quite easily about 50,000,000 pounds of copper. On twenty cent copper this will net a profit of approximately \$4 to \$5 per share.

BUTTE CENTRAL & BOSTON.

The Butte Central & Boston Copper corporation, owner of the Ophir mine, has not resumed the work of sinking its shaft below the 300-foot level, writes a Butte correspondent. The reason for the delay is given as inability to get guides on account of a strike in the lumber mills. It is understood, however, that there are other temporary reasons.

The company's work at present is confined to running a drift on the vein east from the 500-foot level, and a crosscut south from a point a short distance east of the shaft. This crosscut is headed for the south vein, the largest ore body in the mine, and will tap it under a rich ore body upon which tributers are mining on the 300-foot level.

There are at present eighteen sets of tributers working in different parts of the mine, and nearly all of them are being ore, while others are engaged in opening new ground. A good seam of high grade ore has been opened on the 300-foot level east, assays going as high as 16 per cent copper. A more general assay yielded seventy-eight ounces silver, \$2.20 in gold per ton, and 5 per cent copper. The tributers pay the company 35 per cent royalty. Superintendent Cameron says the mine looks better than it ever did, and his faith in it is greater. He believes the Ophir will develop into a big copper mine within 1,000 feet of depth.

Last week an old company known as the Ophir Mining company filed with the county recorder an annual statement in which it lists the Ophir mine as one of its assets, and values it at \$1,

THE CITIZENS' NATIONAL BANK

500,000. It also shows an indebtedness of \$21,295, and claims an asset all the machinery at the mine. A statement made is that the Butte Central & Boston company took possession of the property without right. The old company had the Ophir under a lease some years ago. The bond calls for continuation of the mine and that the company sink the shaft to a depth of 1,000 feet. The company was backed by some Chicago men, but they did not want to risk a lot of money has been spent in equipment and development work; and the men back of the new company fully satisfied themselves that the old Ophir company had forfeited all claims it might have had on the property. It is claimed that all the terms of the lease and bond were broken, and it was generally understood that the property had been abandoned, no claim for it having been made until the new company struck ore.

The Black Hawk shaft of the Arizona Commercial Copper company sometime ago opened an ore body 100 feet wide on the 300 and 400-foot level, the ore growing richer with depth. On the 500-foot level, however, was found what is known in Globe as "chicken quartz," carrying unprofitable values, the copper having been leached. The lode, however, always well defined, was followed on this level by drifts, and in the east drift an ore body was opened for 100 feet in length, fifteen to twenty-four feet wide, averaging 9 per cent copper. A heavy bed of water and inability of the management to promptly secure the necessary pumping machinery has delayed a progressive campaign at the Black Hawk, but work is progressing slowly through a single compartment shaft, and within a fortnight the 600-foot level should be reached. The lode is about seventy-five feet from the shaft. Sinking will continue to greater depths until the broken formation has been passed and the water level reached. It is planned to immediately start work upon a big three-compartment shaft upon the Black Hawk, so sure is the management of locating a big ore body at depth. This situation is very similar to that of the Old Dominion on the twelfth level. That mine was bottomed in this "chicken quartz" formation, and the former owners believed that this numbered the days of the property. Developments of the past year, however, have demonstrated that the richest part of the Old Dominion lies under this broken quartz formation.

The making of a big property of the Arizona Commercial Copper company probably depends on the Black Hawk developments at depth, although the Copper Hill developments are of great and growing importance. On the Copper Hill property a substantial body of sulphide ore to a depth of 800 feet has been opened, while on the surface of the Copper Hill claims are thousands of tons of siliceous carbonate ores which are in great demand by the smelters through out Arizona for converter linings. This ore is all mined from open cuts in, and there are twelve of these open cuts in ore. Two important bodies of siliceous ores have been opened within the last six weeks. A crosscut was run into the side of Copper Hill, cutting a body of ore which is already 100 feet on the strike with both faces still in ore, fifteen feet wide, averaging 6 per cent copper. Another recent important strike of siliceous ore is on the Goehle claim across the gulch from the Copper Hill, upon which no work had before been attempted. A crosscut into this hill within a month opened a 25-foot breast of ore averaging 6 per cent copper. This strike gives promise of opening an enormous body of siliceous ore.

NOTES OF COPPER NEWS.

When work was stopped in the Raven shaft that vein was evidently at the end of the silver ore and in a barren zone that was evidently at the apex of the copper zone. The company is working in this ground at the present time. The main need is to get into something from which money can be made, and to this end the money provided by the board of directors will be economically used.

The Wolverine is one of the last of the Lake mines to issue its annual report as its fiscal year ends on June 30. It is estimated that the mine will show a production of close to 10,000,000 pounds of copper and earnings well in excess of its dividend payments. Wolverine paid its first dividend in 1898 and since then has paid \$4,050,000 altogether or \$67.50 per share on which only \$13 was ever paid in.

North Butte's drift toward the Berlin claim is being rapidly pushed forward, although little progress has been made as yet in sinking the shaft at the property. Such work is being held back on account of the uncertainty as to the position of the lode in that property. The vein which was recently cut in the Berlin crosscut has been shown to be the same one that outcrops in the company's Crosscut claim, and which extends laterally into the Badger state claim of the Boston & Montana. This makes the Berlin vein that was penetrated in the Berlin crosscut; and all of them show good concentrating ore.

I will mail you some, to prove merit, samples of My Dr. Shoop's Restorative, and my book on either Dyspepsia, The Heart or The Kidneys. Troubles of the Stomach, Heart or Kidneys, are merely symptoms of a deeper ailment. Don't make the common error of treating symptoms only. Symptom treatment is treating the result of your ailment, and not the cause. Weak Stomach nerves—the inside nerves—mean Stomach weakness, always. And the Heart, and Kidneys as well, have their controlling or inside nerves. Weaken these nerves, and you inevitably have weak vital organs. Here is where Dr. Shoop's Restorative has made its fame. No other remedy even claims to treat the "inside nerves." Also for bloating, biliousness, bad breath or complexion, use Dr. Shoop's Restorative. Write me today for sample and free Book. Dr. Shoop Racine, Wis. The Restorative is sold by The Stafford Drug Co.

We are certainly excelling ourselves and everybody else in the present quality of Arbuckle's Ariosa Coffee.

No such quality of coffee can be sold out of a bag, bin or tin, or under any other name by anybody in this town, for anything near the same price.

That's a strong statement, but you can take our word for it, and we are the largest dealers in coffee in the world. Another thing—the egg coating on ARIOSA COFFEE does not improve its appearance but preserves the flavor and aroma.

Remember that ARIOSA is not sold to look at, but to drink.

Complies with all the requirements of the National Pure Food Law. Guarantee 2041. Filed at Washington.

City Brevities

Today's weather: Generally fair; stationary temperature.
 Yesterday's temperatures: Seven a. m., 50 degrees; noon, 51; 7 p. m., 50. Maximum, 55 degrees; minimum, 48.

D. M. Givens, of Crystal Falls, was in the city yesterday.

Mrs. Win Williams, of Milwaukee, is in the city for a few days.

C. M. Steeres, of Green Bay, Wis., is looking after business here.

Miss Jane Hall, of Monominee, is the guest of friends in this city.

Mrs. C. J. Young has gone to Hancock for a month's visit with friends and relatives.

The Marquette division of the Ancient Order of Hibernians will hold a meeting this evening.

Miss Catherine McNulty, of Marinette, Wis., has returned home, after a week's visit with Marquette friends.

Becker, the shoe maker, has moved his shop from Spring street to 127 Rock street, near the Hotel Marquette.

A lively runaway on Washington street caused no little excitement at 7:40 o'clock last evening. No damage was done.

Mrs. Catherine Mosher has returned from the Ypsilanti conservatory of music, where she has been spending in voice culture under Marshal Pease.

Will Crowley and family are in the city from Minneapolis. Mr. Crowley will return Sunday night, but his family will spend the summer here.

Because of the graduating exercises at the opera house, there will be no prayer meeting at the Presbyterian church this evening. The topic announced for this week will be used next week.

F. H. Vandenberg has invented an attachment to the perfection Aerator and cooler by which milk can be cooled to a temperature of 36 degrees. At this point if milk is kept reasonably cool it will keep cool indefinitely.

The fire department was called out at 9:20 o'clock yesterday morning to extinguish a chimney fire in the building No. 232 West Elm street owned by James Young. The damage was insignificant. Members of the department say that the frequency of these fires is due to people neglecting to have their chimneys cleaned.

Soldiers to Testify—Sergeant B. T. Cox and Corporal A. T. Fournier, of the Seventh Infantry, stationed at Fort Brady at the Soo, are in the city as witnesses before the grand jury. The soldiers will be examined relative to the purchase of government equipment by a saloon keeper at the Soo. The case is quite a common one in these government courts, as the equipments furnished the soldier boys by Uncle Sam are of the best and can easily be disposed of.

Will Direct Kermis—The Mining Journal has received a copy of an attractive poster, designed by Miss Palmer, advertising the Kermis which Miss Palmer and Mrs. Petter will direct at the Amphitheatre Hall, Houghton, June 25, 26 and 27, for the benefit of the Trinity church of that city. The Kermis has been in preparation for the past several weeks, and promises to be a brilliant affair. A large number of fancy dances will be given and there will be other unique entertainment features.

Verdict For Plaintiff—In the case of the Diamond Match company vs. the Township of Ontonagon, taken up in United States district court Tuesday, Judge Knappen, yesterday instructed the jury to return a verdict for \$795.24. The plaintiff sued to recover various amounts alleged to have been illegally collected by the township during a period of several years for highway and labor taxes. The amount awarded was for the year of 1901, the court holding that there was no cause for action in the other counts. The case of Anell J. Rich vs. the Victoria Copper Mining company is now on trial. The plaintiff claims an interest in the title of the company's land, and sues either to recover title or receive an accounting on a cash basis.

Siegel Takes Charge—Alderman H. L. Siegel was placed temporarily in charge of the city clerk's office yesterday morning by Mayor Robertson, pending the appointment of a successor to Daniel E. Donovan, of whom it was stated that Mr. Donovan's successor will be appointed, said Mayor Robertson yesterday afternoon, "though I have no doubt it will be in the course of a few days. I am going to have Mr. Donovan summoned to appear before the council and show cause why he should not be removed before I proceed to appoint his successor. I do not know whether this step is necessary, but I do not wish to be placed in the position of seeming to treat him unfairly. I never imagined that there were so many men in this city who wanted the recorder's job. At least fifty have approached me on the subject today."

Must Wait Until Fourth—Anyone who attempts to celebrate the Fourth of July ahead of time by shooting off cannons or fire crackers is liable to arrest for disorderly conduct and the police are preparing to be unusually strict this season, as there have in the past years been a number of complaints from people whose rest was disturbed through the enthusiasm of men and boys who could not wait until the Fourth to celebrate.

"The Fourth of July doesn't commence a week in advance of that date," said Chief Manning yesterday. "The police force will not interfere with a little harmless fun, but there must be no unseemly racket. There are a great many people to whom the noise is a very disagreeable feature of the Fourth. They have to stand it one day in the year, but there is no reason why they should be annoyed for a week."

Age Limit is Raised—Hereafter the maximum bounty of \$25 a scalp will only be paid on wolves over six months

of age, instead of four months, as formerly. The bill bringing about the change was introduced by Assemblyman Michael Harris of Menominee, and was recently signed by the governor. It is hoped that this change in the statute will put a check to importation both of wolf scalps and live wolves from Wisconsin into Michigan. The bounty on a wolf pup under six months of age is only \$4 in Wisconsin. All that it was formerly necessary for the badger trapper to do was to bring the animal into Michigan after it had attained the age of four months and collect six times as large a bounty as he could secure in Wisconsin. Of course there was always the risk of being caught, but the fact that there has probably been a great deal of this business done without any arrests resulting would indicate that the risk hasn't been a big one.

AT MISS ENDELLINE'S.

The "Gossard" and "Irresistible" corsets are being demonstrated at Miss M. L. Endelline's parlors, opera house block, this week by Miss Harpole of Chicago. We cordially invite all ladies interested in a perfect fitting corset to come and see these new creations. Miss Harpole is an expert corseteer of Gossard's of several years' experience and it is to your advantage to meet her.
 (6-20-07)

UPPER PENINSULA HAS FARED WELL

RAILROAD COMMISSION BILL SAID TO BE SATISFACTORY TO U. P. COMPANIES—ATTORNEY COMMENTS ON SESSION.

A well-known Marquette county attorney who has spent considerable time at Lansing this session, and who is cognizant with the matter of which he speaks, says that the upper peninsula railroads have no particular fault to find with the railroad commission bill in its present form. The exception of the railroads in this region from the operation of the reciprocal demurrage provision of the bill reconciles them to it. The upper peninsula roads have opposed reciprocal demurrage throughout the fight over the bill. They have claimed that it would work a hardship on them, and have asserted that the shippers in this territory have been well satisfied with the manner in which they have been taken care of, a fact which letters from many shippers, brought forth in committee hearings, have testified.

Senator Moriarty, of this district, is said to have been the man responsible for the exception of the upper peninsula railroads from the operations of the reciprocal demurrage feature of the bill. On account of the lineup of boxers in the state senate it was a tight squeeze for any kind of a railroad commission bill, and when Senator Moriarty took the stand that he would not vote for any bill providing for reciprocal demurrage for upper peninsula roads the members who wanted to see some sort of a bill enacted into law had to give way.

"Now if we get our game laws passed, and the bill providing for a consolidation of the offices of game warden and fire warden, with its extensive scheme for state deputies, we will have obtained about everything we have gone after," said the attorney referred to above yesterday. "The passage of the Moriarty bill lifting the restriction on the acreage of timber lands mining companies are permitted to hold is a measure which immensely simplifies things for the mining companies of this region. That the companies went after this bill was really an outgrowth of the Osceola-Calamet & Hecla fight. When that contest was on it was pointed out that the mining companies were discriminated against in this matter of holding lands. For instance the Lake Superior Iron & Chemical company, recently organized, which manufactures iron and steel, while not a mining company, is an iron company, can acquire and hold all the land it wants to buy, simply because it is incorporated as a manufacturing concern. All corporations except mining companies have had this same right, and it has been denied to mining companies, particularly as ample timber supplies is a vital point with them.

"The upper peninsula, its interests and institutions have been well treated by the legislature and Governor Warner, I should say. Personally I don't see where there is any fault to find."

BELIEVES IN ADVERTISING.

Leo. M. Geismar of Chatham Discusses Farming Prospects.

"The Upper Peninsula Agricultural association is an unpretentious society," said Superintendent Leo M. Geismar, of the state experiment farm at Chatham. "Its membership has never exceeded the one hundred mark and is more often much less, those who have stood by it being mainly the cranks, who maintain that Michigan is the finest agricultural state in the country and that the upper peninsula is just a little better than the rest of the state.

"As long as fifteen years some of its members have been advocating measures which from time to time came up before the legislature and were intended to promote agricultural development. Their persistent agitation made possible the establishment of the upper peninsula experiment station seven years ago, and the results have been so gratifying that the association at its annual meeting last March took up the question of establishing a state immigration commission.

"We believe in advertising," said Mr. Geismar, "for we have ample evidence that it will build up a community, a country or a state, just as it has built up commercial enterprises or manufacturing establishments. The individual advertising of the upper peninsula which started nearly six years ago was largely inspired by the work of the experiment station, and it will be interesting to study its practical results in the Michigan census of 1904, recently published.

"It has been claimed, and justly so to some extent, that people leave the farms and go to the cities during prosperous times, and return to the farms when times are dull. This claim is substantiated by the census figures which show

 111 FRONT STREET.

OFFICER'S COSTLY MISTAKE.

Likely to Be \$540 Out for Firing Best Projectiles in Practice.

Washington, June 19.—There is an officer in the artillery corps who took three shots at a target down at Fort Baranec, Florida, and he has been in hot water ever since. He was commanding the fort at the time, and his men were engaged in target practice with full calibre ammunition. Three twelve-inch guns were fired and then it was discovered that something was wrong and the firing ceased, but already three 1000-pound armor-piercing projectiles had rent the canvas target and sunk into the waters of the ocean. Now, the orders governing target practice provide that castiron projectiles be used, and even these are expensive enough. They weigh one thousand pounds apiece and cost two cents a pound, or 829 per projectile while he had made an error and quality, larvized steel, armor-piercing projectiles were discharged at the hapless target, and these cost twenty cents a pound, or \$200 each. Investigation showed that while the fort painter had been directed to paint the castiron projectiles blue and the armor-piercing projectiles while he had made an error and reversed the colors. The commandant promptly reported the facts to Washington. In due time the commandant received a bill charging him with \$600 for "three projectiles fired into the sea by mistake" and crediting him with "three castiron projectiles, not fired into the sea by mistake, \$60," leaving a balance due of \$540. For three years the officer has contested the justness of the charge, and for three years his account has stood \$540 short. When the end will come one in the war department cares to predict, but it is asserted with considerable vehemence that ultimately that officer will have to dig down into his roll and reimburse the department to the amount of \$540, or else authorize the paymaster general to deduct it from his pay.

"Another reason why we believe in advertising the agricultural resources of the state is because it increases the values by creating a greater demand, because it helps to demonstrate that millions of acres of our lands are just as productive, hence just as valuable, as the 8100 to 8200 an acre lands in the other agricultural regions, and are low priced today merely on account of the large supply, and because this valuation is but an incidental benefit to the state; the permanent and greater benefit being that which is secured by attracting a more desirable class of producers and home builders. It is quite certain that the increase of 403 farms in the upper peninsula will probably be less than three years would have been greater had more ample means been provided for, but even as it is, and assuming that each farm represents a productive capacity of not more than \$500 a year the increased circulation in the channels of trade already represents an annual sum of over \$200,000.

"That a limited amount of judicious advertising will increase land valuations more than they would otherwise be increased is also shown by the census figures of 1904, for in the whole state the total increase of farm valuations from 1900 to 1904 is \$33,302,294, or 6.07 per cent. This for the lower peninsula represents an increase of 5.83 per cent, while in the upper peninsula this increase amounts to 21.50 per cent and in exact figures \$1,917,995.

"Upper peninsula development, even if only the choicest lands are turned into farms, means 200 times 400 additional farms and at the foregoing rate it will mean a further increase in valuation of over \$380,000,000 and an added income of over \$40,000,000 each year, and even that means that several millions of acres will still be uncultivated."

MARKETS

NEW YORK STOCKS.

New York, June 19.—Speculation in stocks was practically at a standstill today, and the price movement was almost insignificant. The \$2,000,000 gold engagement for Paris, added to the \$1,000,000 which went out by today's steamer, was about equal to the estimates. Paris also took \$1,000,000 from the Bank of England today. The gold outflow has reached \$15,000,000 since the movement began. The rate for call loans was higher again today, in spite of the most stagnant condition of the stock market, and the rates for time loans rose. The profound apathy with which the stock market is being treated is explained by the money outlook.

The threatening prospect of labor trouble in the telegraphic field was not a help to the market, while not directly hurtful. The advances in the express company stocks reflected the expectation that the example of the Adams company would be generally followed in anticipation of the operation of the Hepburn law, calling for a more detailed accounting by express companies. The price of copper receded in London again today and was also marked down on the metal exchange of this city. These movements of the price of the metal unsettled and give instability to rumors of unstable conditions in the market for the metal as a whole. Some attention was paid to reports of an intended strengthening of the naval forces in the Pacific with a view of possible eventualities with Japan.

Professional operators gave as a reason for the practical abandonment of operations after the first hour a desire to await the action on the Reading dividend. The adjournment of the directors without action on the dividend resulted in a rise in Reading, but there was no revival in the rest of the market, the closing remaining irregular and uncertain.

Paine, Webber & Co. report closing prices as follows: U.S. Steel... 32 1/2; G. F. & C... 29 1/2; Rep. St... 11 1/2; Sugar... 12 1/2; St. Paul... 12 1/2; A. & C... 11 1/2; N. Y. C... 11 1/2; U. S. W... 12 1/2; U. S. W... 12 1/2; U. S. W... 12 1/2.

Logan & Bryan wired from New York yesterday as follows: "The character of today's trading was wholly professional. The engagement of about two millions of gold for export had no effect, as the trade had been expecting it for some time, and still further shipments are looked for. Call money will not doubt continue considerably more before July 1st disbursements. At times today it looked as though the buying power in the market was of the right sort. On signs of weakness Reading, Union Pacific, Amalgamated and other leaders were taken by presumably strong hands, but later on much of this early accumulated stock was dumped. There was not enough trade during the entire session, however, to make a favorable showing for one ordinary hour's operations when the market is good. The Reading directors adjourned without acting on the dividend, but the stock was well bought even after this announcement. We don't look for much change in the market in either direction, but would sell stocks on all bulges."

Boston Stock Quotations. Paine, Webber & Co. wired regarding yesterday's Boston market: "I think stocks are grounding on the bottom and should be picked up now. I advised the purchase of Utah at 49 1/2 and I still advise its purchase. I have strong information that the reports on Utah are false and that the mine is looking as well as ever. All the stocks

pearing in large numbers in many parts of Illinois and Indiana resulted in a strong market. Speculative interests were purchasers. The September closed 1 1/2% higher. September opened at 36 1/2% 3/4; highest, 38; lowest, 36 1/2%; closing, 37 1/2% 3/8.

Receipts and shipments were as follows: Flour, barrels... 32,000; Wheat, bushels... 41,000; Corn, bushels... 720,000; Oats, bushels... 230,000.

Logan & Bryan's Wheat Summary. Logan & Bryan wired concerning yesterday's wheat market:

"The wheat traders began the day in the usual manner, making a little drive at prices because the Liverpool rate was 1/2% lower and the Liverpool 1/2% off. The early trade, however, was about 1/2% from the closing prices of yesterday. That was the end of the bear operations for the day. The new crop in all quarters was uniformly bullish. The trade was in a mood to respond to the natural influences. On the bulges there was considerable selling in the way of profit-taking, but each little setback was followed by a stronger upward movement. It showed an advance of 1 cent or better over the close of yesterday. The last prices of the day were within 1/2% of the top. The most important news of the day came from South Dakota, where the green bug is reported in great numbers in the fields. The damage to the spring crop from this insect is yet to be reported, but the experiences in the southwest cause the trade to feel very bullish in anticipation of damage from that quarter.

Missouri reports from the north and Kansas City has reports from four important counties in Kansas where the yield is 40 per cent of last year. King of Toledo gives the Ohio crop as one-third short. A Duluth authority says that on account of moisture conditions in western North Dakota and Manitoba are becoming very serious. Cooler weather is reported over southern Russia. We believe the situation is bullish enough to justify buying on breaks like those which are recorded nearly every day after the opening."

John T. Morgan. A MAN OF VAST KNOWLEDGE AND HIGH IDEALS. By Many He Was Considered the Best Informed Senator on Literature, Economics, Government and General Practical Questions—He Had a Profound Respect for His Office—Had No Ambition for Power or Wealth—Never Accepted Money for His Writings on Public Questions.

Washington, June 18.—With the adjournment of the senate committee on military affairs the Brownsville investigation was practically brought to a close. The committee reconvenes on Nov. 18, to report on the investigation. The preparation of its report to be submitted to congress at the opening of the session. Whether the committee shall visit the scene of the outrage will then be determined. A majority are inclined to regard such a trip as unnecessary. It is not unlikely, however, that Senator Foraker will go to Brownsville in the meantime.

Three months of exhaustive inquiry, during which about forty of the discharging soldiers, many of whom were citizens of Brownsville, the officers of the regiment under accusation and of the Twenty-sixth infantry, which preceded it at Fort Brown; the various officers who conducted the investigation for the war department, upon whose reports the chief of ordnance of the army and the best experts in his department have been heard, have convinced not only the majority of the committee but a majority of the Republican members that: (1) the Twenty-fifth infantry, (2) the States Infantry (colored), number and identity unknown, shot up the town of Brownsville on the night of Aug. 13 last, firing into hotels and houses, in three of which were women and children; delib-erately killed one man, shot at another man and his wife and little boy in the window; shot down the lieutenant of police, killing his horse and wounding him so that his arm had to be amputated; attempted to kill two other policemen, killed one man, shot at another man and his wife and little boy in the window; shot down the lieutenant of police, killing his horse and wounding him so that his arm had to be amputated; attempted to kill two other policemen, killed one man, shot at another man and his wife and little boy in the window; shot down the lieutenant of police, killing his horse and wounding him so that his arm had to be amputated.

Best-Informed Senator. His general knowledge was more frequently commended by his colleagues than any of his other attributes. More than one senator has declared that Morgan was the best-informed man in the senate on literature, economics, government and general practical questions. For instance, he amazed his associates by his intimate acquaintance with the meeting during the long study by the senate on the Isthmian canal problem, on which subject Morgan's superior knowledge was conceded by all. He displayed the same preeminence in discussions of the tariff, finance and other intricate questions.

With it all Morgan's schooling ended at the age of nine. His boyhood was as remarkable as his manhood was. He began to go to school at Athens, Tenn., where he was born, when six years old, walking two miles every morning to the "Old-Field" school he attended, and two miles back again every night; he never went to school after he was nine. Singularly enough, the schoolmaster was an accomplished classical scholar and under his tuition the boy read more Latin than some college men of today read in all their lives. In the "common branches" his instruction was not so thorough, "vulgar fractions" being as far as he "went" in arithmetic.

Before young Morgan was ten years old his father, owing to reverses, moved to Alabama, and the boy had to go to work. His mother wanted him to be a clergyman; the boy himself wanted to be a fointhsmith, and when the time came decided to be a lawyer. He was well read, twenty-five when the Civil war broke out, and had a big practice, but he enlisted in the Confederate army as a private, and before the close of hostilities had served in every grade up to a brigadier general, which was his rank at the end.

Great Respect for His Office. Morgan entered the senate in 1877, at the age of fifty-five. In 1892, when Morgan was acting as member of the Senate arbitration commission, a British member, struck with his cultivation, asked what college he was graduated from, and was still more forcibly impressed by the fact that he was not a college man at all. The first time he was ever on a college campus in his life, the senator told the nobleman, was in the Civil war, when, with his command, he took refuge from the Yankee bullets behind the brick wall of the College of William and Mary in Virginia.

Morgan never once asked for an appointment of a constituent to a government position. He would write letters of recommendation testifying to the good character of office-seekers, but would go no further. Senator Morgan carried the same high ideals into other branches of his work.

he never accepted a penny for any of his magazine writings on public questions; yet he was a big contributor to various publications. He thought it was belittling for him to earn money out of the public service and was constantly returning checks to editors.

No Ambition to Be Rich. In fact, Senator Morgan cared absolutely nothing about wealth. He had no ambition to become rich. His personal financial operations were simple. From time to time he was supplied with a stack of quarters with which he purchased street car tickets to ride to and from the capital to his home. The rest of his income went to his daughter, who in recent years conducted his household.

Coined the Term "Cuckoo." Senator Morgan coined the term "cuckoo" as applied to United States senators. It was during Cleveland's administration when so much bitterness was stirred up between the president and the senate that the word "cuckoo" was used to describe the senators. Morgan was the first to use the word in this sense. He used it in a speech at the White House when he was struck by the "cuckoos" in the senate stuck out their heads. The term stuck and has had much significance today.

NOT A POINT FOR FORAKER. SENATOR FAILS TO SCORE IN BROWNVILLE INQUIRY. Tried to Protect Negroes by Various Propositions—Not a New Fact of Importance Produced—Majority Report Will Be Signed by Eight of Committee.

Washington, June 18.—With the adjournment of the senate committee on military affairs the Brownsville investigation was practically brought to a close. The committee reconvenes on Nov. 18, to report on the investigation. The preparation of its report to be submitted to congress at the opening of the session. Whether the committee shall visit the scene of the outrage will then be determined. A majority are inclined to regard such a trip as unnecessary. It is not unlikely, however, that Senator Foraker will go to Brownsville in the meantime.

PAID IN THOUSAND DOLLAR BILLS. Holmes the Recipient of \$49,000 on One Occasion, It Is Said in Court.

Washington, June 19.—L. C. Van Riper, the New York speculator, today concluded his third day on the witness stand in the trial of Edwin S. Holmes, Jr., charged with prematurely divulging the crop reports of the agricultural department. The only new development was a statement to the effect that Holmes had told him that Haas, the alleged go-between, had on one occasion given him \$49,000 in one thousand dollar bills.

WAR ON IRISH GRAZERS. ROYAL POLICE PUT TO ROUT BY THE RAIDERS. People Would Make Homesteads of Ranches—Trouble Spreading Throughout the Land—Magistrates Favor the Movement in Many Cases.

Dublin, June 19.—The grazing war is spreading rapidly and becoming popular. The most serious affair which has yet occurred was near Athery, Galway. A large posse of police opposed a crowd of persons who were driving cattle off a farm. The people stoned the officers, several of the latter were badly hurt and the sergeant in command ordered the posse to fire. The latter fired repeated volleys at the crowd and the raiders returned the fire, finally compelling the officers to retreat, when the grazers finished their raid. Two or three farms have been fired into at night recently. The general sympathy of the masses is with the people, even in the case of many public officials, which ties the government's hands.

For several years past the anti-grazing movement has been afoot. The landlords and graziers were bombarded with United Irish league resolutions and hints from the country people, and the resolutions and hints had no effect. This season the agitators determined upon a new course of procedure. If the graziers did not take their sheep and horned stock off the lands the people would do it for them. The reason why Irishmen should make an endeavor to destroy the grazing industry, which is the backbone of Irish agricultural life is due to land hunger and to a determination on the part of the peasants to seize the finest part that has fallen to the victors in the land war. The object of the farmers is to make grass lands derelict, so that the owners will be compelled to sell out and then the people will make a rush for parcels of it, just as prospectors rush into a newly discovered gold field to peg out claims.

ing was stopped, men were discharged, and the reserve at the depot was narrowed down almost to vanishing point. As a result, men have to be drafted from other counties to cope with the present movement; but, as the agitation has spread and will become general throughout the West and South, there will not be sufficient men to go around, and it is probable that the days of the first boycott struggle will be recalled by the calling out of the military to help the police.

Nationalist magistrates on the bench display their sympathy with the movement, and refuse informations against the defendants brought before them. When the prisoners leave the dock as free men they leave the court house to join the cheering crowd, and demonstrate through the town. The disturbed towns are like armed camps. Police swarms about the streets, other patrol the roads, and others still here and there are under canvas guarding the cattle that are grazing. In the towns the men are billeted on the people and this is not liked, for the royal Irish constabulary man, when on political duty, is the most rigorously boycotted man in Ireland. He is a leper in uniform. He must provide his own transport, for nobody dare lend him a vehicle with a hope of escaping the wrath of his neighbors.

At Roscrea some time since a body of constabulary were on the march to a ranch, and had to take their tents and other belongings with them on a twelve-mile tramp. A local carrier was engaged to convey a quantity of timber, but when he found that the material was flooring boards for constabulary tents and that other things belonged to the hated police, he emptied the lot on to the road and refused to have anything further to do with them.

One change in the methods of the people is noteworthy. Under the late regime prosecutions followed when resolutions condemning obnoxious persons named were published, and those having anything to do with such resolutions found themselves in trouble. But now all that is changed, and the active local politician no longer works underground like the mole. On the whole, there is good reason for predicting that the new struggle will be a bitter one, and as the people in the present circumstances hold the whip hand it is likely enough that they will be successful. What has passed within the past few weeks may be regarded as the preliminary skirmish. The main attack has yet to be made. To the end recruits flock to the ranks of the United Irish league, which not long ago was supposed to be moribund. If the grazing ranches are to continue to be occupied by the cattle industry, on which the stock farmers follow the lead of those who have surrendered to the league the cattle industry, on which agricultural Ireland so largely depends, will be ruined, and the people themselves will be the sufferers.

PRETTY OPERETTA.
Children of Parochial School Will Be Heard Tomorrow Afternoon.

The operetta "Laila," to be produced tomorrow afternoon at 2:30 o'clock, at Ishpeeming theater by pupils of St. John's parochial school, is a pretty one, with attractive stage settings and bright costumes, and the music is very catchy. The operetta was written specially for children, and there will be nearly 100 boys and girls taking part. A number of unique drills will be given. The operetta is in three acts; the synopsis being as follows:

Act First—A band of mountain children are collected to spend the summer day in singing, gathering flowers, and feasting around their table spread beneath the shadowy branches of the trees; they are interrupted by the approach of a beggar woman and her children. A part of the children at first repulse her, offended at having their joyous festival thus interrupted; but one of them, Laila, steps forth, and with a mild rebuke to her playmates for their unkindness, she welcomes the beggar children, and bids them make known their wants. The other children soon join with Laila in speaking kindly to the wanderers, and after the latter have told them their tale of sorrow, they are invited to the feast which the children have prepared, and all together go out with a merry song to where the table is spread.

Act Second—Laila, who is the favorite of all, while straying a little from the others to gather wild flowers, becomes bewildered in the wood, and hurrying on to regain her companions only loses herself deeper and deeper in its "dark recesses, until at the opening of act second she is discovered sitting, worn out with fatigue and despair, on a mossy log in the gloomy shadow of the forest.

Starting up soon, she cries, "I am lost! I am lost!" etc., hurrying at intervals this way and that, and peering into the dark glades, if perchance she may see in some direction an opening, or listening for the voices of her playmates.

At last the thought occurs to her that an angel might easily deliver her from her unhappy dilemma, and as she kneels to ask that deliverance, a little band of fairies, led by their queen with noiseless step, and robes glittering with beauty, glide into her presence.

Rising from her knees she beholds them before her, and starts back in astonishment and new fright. Reassured, however, by their loveliness of appearance, and supposing them to be the angels to whom she has been praying, she begs them to restore her to her companions. They tell her they are fairies, and seek to tempt her by rehearsing the charms of their grove, which is hard by, to forget her friends and playmates, and go with them to fairy-land. Failing in this, they at last yield to her entreaties, and with a merry chorus lead her away.

Act Third—The mountain children soon miss Laila, and all the afternoon they spend in fruitless search for her; and as night approaches they collect in the grove where they first assembled, and are expressing their grief and sorrow at the loss of Laila, when she is led in by the fairies, the queen of whom steps forth and announces to the children that they are the same ones who dismissed as wretched beggars came in the morning to prove the generosity of their hearts, and tells them never, in future, to hesitate to give to the needy, for virtue is sure to be rewarded. All unite in a joyous song, and Laila is crowned their queen.

The admission will be thirty-five cents.

BRIGHT-ADAMS NUPTIALS.
Young People, Well Known Here, Married at Iron Mountain.

Miss Catherine M. Bright and Herbert J. Adams were united in marriage last Wednesday morning at the home of the bride's uncle, W. F. Morrissey, 510 Grand Boulevard, Iron Mountain, Rev. Father Neenan, pastor of the Catholic church, officiating.

The bride was for several years past one of Ishpeeming's most popular school teachers. The groom was employed in the main office of the Cleveland-Cliffs Iron company a number of years, and is now holding a very responsible position with the Globe Consolidated company at Globe, Arizona.

Mr. and Mrs. Adams left Iron Mountain Wednesday for Detroit, where they will visit a short time at the groom's home, then going to Butte, Mont., to visit the bride's sister, Mrs. F. F. Small. From Butte they will go to Globe, by way of San Francisco and Salt Lake City.

ANOTHER PARTY TO FINLAND.
Twelve Ishpeeming People Left Yesterday Morning for Old Home.

Another large party of Ishpeeming people going to Finland, left yesterday morning. Peter Koski, who handles the steamship business, said yesterday that he did not expect another party of more than ten people to leave this city until fall, when he thinks that many will go home to spend the holidays. Among those who left yesterday was Miss Tilda Lamm, sister of Rev. J. K. Lamm, pastor of the Finnish Lutheran church.

According to Mr. Koski about 150 Finnish people have left Ishpeeming for Finland since Jan. 1. Most of these made their transportation arrangements with him. A few of the men who went home early in the year have returned within the past two or three weeks. General conditions in Finland have improved during the past year.

MRS. LESLIE-CARTER.
America's Greatest Actress Will Be Seen Here July 5 in "Du Barry."

Mrs. Leslie-Carter, the greatest English speaking actress in the world, will play an engagement at the Ishpeeming theater on Friday evening, July 1, appearing in the masterful drama, "Du Barry," in which she achieved her most brilliant success. Mrs. Leslie-Carter is easily first among the stars on the American stage today. There are few actresses, it is safe to say, who would attract the powerful emotional roles in which she has so signally triumphed. The roles of Du Barry and Zaza are those with which her brilliant reputation is chiefly associated. When the Belasco play, "Du Barry," was first seen in New York, where it was played for nearly two years, it was at once evident that the temperament of Mrs. Leslie-Carter, varying from the lightest emotion to the most fiery passion, had found great opportunities in the character and personality of the beautiful, well intentioned, but erratic favorite of Louis XV of France. Mrs. Carter, admirable artist that she had proved herself to be, far surpassed anything she had ever done when she gave life anew to the historical charms and frailties of Du Barry.

Briefly the play is one in which the central figure is the famous favorite of Louis XV, "the well beloved," while the myriad of fairer beauties that revolve around Jeanette Vaubernier serve to intensify her brilliancy. It is a play of a period which admits of magnificent and variegated costumes, and most sumptuous stage settings. Jeanette Vaubernier, afterwards Madame Du Barry, is first shown as the milliner's apprentice, gay and without a care, then as the favorite of the king surrounded with all the luxuries of an extravagant court and then, amid the stirring scenes of the French revolution, on her way to the guillotine.

"Du Barry" will be presented here upon the same scale that characterized its production during the two years' run in New York.

FROM HOPKINS' CURB LETTER.
The feast of bargains now presented in the copper share list fails to attract a great deal of enthusiasm with investors or speculators. Gill-edged copper stocks that will not fall from 10 to 15 per cent, and have demonstrated their ability to pay the dividends continue to sag off and no attempt to support is given. The market appears to be mostly professional and we believe a large short interest exists. About the only feature to today's trade was the sharp upturn in Trinity, which opened around 19 and rapidly advanced to 23 1/2, apparently on short covering. London metal cables were unchanged with trade active.

The day's prevailing prices were:

IMPROVEMENTS AT COLERAINE.
Town Will Soon Be Provided With Water Works and Other Conveniences.

An Ishpeeming man who recently returned from the western Mesaba range yesterday said that Coleraine, headquarters of the Oliver Iron Mining company's officials operating in that district, will within a few years be one of the most attractive towns in the mining districts of Minnesota.

The town is soon to be provided with a complete sewerage system, also a water works plant, and the streets are being paved. All of the buildings are of a substantial nature and the company is aiding the townspeople in every way possible with the public improvements.

The J. C. Greenway high school, recently completed, is one of the finest in Minnesota, costing \$80,000. The town is being built up rapidly. There is to be a much steam shovel work in the district during the next few years.

Mr. Greenway is gathering about him some of the best iron mining men to be found anywhere in the Lake Superior district, and a number of his assistants are from this range. All of his showmen, whose work compares favorably with that of the best operators in other sections, are from Marquette county. It is said that Mr. Greenway has his eye on a few more of Ishpeeming's men, and that they will be leaving here soon.

WEDDED AT CHAMPION.
Popular Young Lady the Bride of a Crystal Falls Young Man.

Charles Carter, of Crystal Falls, and Miss Eda Rasmussen, of Champion, were united in marriage at 2 o'clock yesterday afternoon at the home of the bride's parents, at Champion, the Rev. W. G. Prout of the M. E. church officiating. It was a pretty wedding. The bride was beautifully gowned in cream silk, trimmed with white lace. She carried a bouquet of white roses. The bride was attended by Miss Hannah Rasmussen, a sister, and Miss Edythe Carter, sister of the groom. The groom's attendants were Nels Petersen of Negaunee and H. P. Rasmussen, brother of the bride.

The honeymoon will be spent in the East. The groom holds a responsible position with the Corrigan-McKinney mining interests at Crystal Falls, where a nicely furnished home awaits their return.

NEW WARSHIP FUEL.
More Efficient Than Coal. Say Experts—Practically Smokeless in Addition.

Washington, June 18.—Tests of a superior fuel which it is thought will enable any United States war vessel to overtake or outcook an enemy, as may be desired, will be begun on a number of fighting vessels at Hampton Roads as soon as the United States geological survey's plant at Norfolk, erected for the purpose, is completed. Government experts hope not only to demonstrate that this new fuel is more efficient than coal, but also expect that it will be practically smokeless, which is declared to be a big factor as its efficiency.

Rear Admiral Robley D. Evans recently complained of the use of soft coal on war vessels, declaring that the smoke which it emits gives a sign of the approaching of a ship before the hull is in sight. He further said that if furnaces in which soft coal is used are forced to get up top speed flames belch forth from the stacks, thus betraying at night the movements of a single vessel or a fleet. This happened to Admiral Dewey at Manila Bay and came near spoiling his plans for a successful attack on Montojo's fleet. Admiral Evans submitted as a remedy that the government obtain exclusive control of the anthracite deposits of the country and use only hard coal on its war vessels. This plan is not considered practicable.

Tests carried on by the government indicate that a fuel made from slack coal pressed into briquettes not only burns almost without smoke, but also generates more steam and produces more power under the boilers than does the same amount of coal. Briquettes are made by mixing waste or slack coal with tar, so that the coal will hold together, the whole being pressed into cakes or blocks by machinery. Geological survey officials will begin a series of tests with the new fuel in a short time, and if they prove successful, experts say, every cruiser and battleship in the navy will at no distant day carry briquettes, at least as an emergency fuel in time of war, the experts believe. These briquettes will be used entirely as fuel.

MARQUETTE & SOUTHEASTERN RY.
Sunday, June 9th, the summer schedule of the M. & S. E. Ry. goes into effect. Sunday trains will leave Marquette for Princeton and Munising at 8:45 a. m. and 6:20 p. m. For Negaunee and Ishpeeming, 10:15 a. m., 3:55 p. m. and 8:20 p. m. For Birch and Big Bay, 8:50 a. m.

Sunday trains will arrive from Princeton and Munising 10:10 a. m. and 8:10 p. m. From Negaunee and Ishpeeming, 8:35 a. m., 2:30 p. m., 6:10 p. m. From Birch and Big Bay, 7:20 p. m.

Week day trains, No. 10 leaves Marquette for Munising and Princeton 6:45 a. m.; No. 31 for Birch and Big Bay 8:50 a. m.; No. 1 for Negaunee and Ishpeeming 9:00 a. m.; No. 4 for Munising and Princeton 5:35 p. m. Week day trains arrive at Marquette, No. 1 from Princeton and Munising 8:45 a. m.; No. 32 from Big Bay and Birch, 4:50 p. m.; No. 11 from Munising and Princeton 7:30 p. m.

Negaunee Department

SOCIALIST TURNED DOWN. BOARD HAD A LOVE FEAST.

Council Forbade Chicago Man Talking in Public Square Tuesday. Assessed Valuation of Mining Properties Satisfactory to the Officials.

A. W. Mance, a Chicago Socialist, who is billed to speak in several upper peninsula towns, including Ishpeming, Calumet, Hancock and Mass City, spent Tuesday and yesterday in Negaunee. Mr. Mance had advertised to give a talk in Negaunee. Mayor Winter would not grant him permission to use the band stand. Mance dropped into the city building while the board of review was in session. The matter was discussed and finally the mayor put it up to the council. It was decided that if Mr. Mance wanted to talk he would have to hire a hall.

There was some discussion between the mayor, Mance and members of the council. The mayor objected to his talking in the public square on the ground that his principal mission here was to try and convince the working men that they were not being squarely treated. Mance admitted that that was his object. The mayor asked him a number of questions as to what he would probably say on certain issues, and Mance's answer were just about what he expected to receive. He said that he would take issue with President Roosevelt on the race suicide question on the ground that there are already too many suffering children in the country. On the Moyer-Haywood case he said he would talk in defense of the men now being tried, declaring that in his opinion there is a well organized plot to disrupt the Western Federation of Miners.

Mayor Winter advised Mance that there is no dissatisfaction among the working people of this city; that they have never been better satisfied with general conditions and that they are now earning better wages, with greater opportunities for advancement, than ever before in the history of this district. The mayor could not see that the working men or anyone else would be benefited by any talk that Mance could give them, and the members of the council agreed with him on that point.

On the bills advertising Mance's coming the announcement was made that there are more men than jobs in the country and that the speaker would offer a remedy for this condition. This was certainly an inappropriate announcement for the occasion, and all kinds of is in great demand, and where there has been a shortage of men for months past.

Negaunee has a Socialist organization, Mance said yesterday. It is composed of about sixty members. Mance talked to the members of the club at the Finnish hall Tuesday evening. He is billed to speak in Ishpeming this evening, when he expects to talk from the public square. He will also talk at a Socialist picnic at Calumet Midsummer Day, remaining in the town for five days, commencing the 21st. His dates at Hancock are from the 26th to the 28th, inclusive, and he will be at Mass City the 29th.

MONTH'S JOB AHEAD. Henry Swartzler, who is superintending the repairing of the foundation at the city building, does not expect to complete the task inside of thirty days, as he has discovered since starting to remove the piles that the ground is very wet below the stone work and it is necessary to bail out the openings before the stone is set. Piles will be put in at various points around the foundation before all the piles are removed. Mr. Swartzler does not anticipate that the building will settle while the walls are being rebuilt as he will put in a sufficient number of pillars to carry the weight. From five to ten more men than are now employed could be worked to advantage on the job.

PIKERS BOWL STRONG MATCH. In the two-men league contest Tuesday evening at Orr & Tompkins' alleys the Pikers took the Cripples into camp, the scores being:

Defrain	166	190	156	Tot.	512
Johnson	171	146	178	Tot.	495
Totals	337	336	334	Tot.	1007
Cripples	219	191	181	Tot.	591
Mitchell	153	167	141	Tot.	461
Sporely	151	128	182	Tot.	461
Totals	304	295	323	Tot.	922

WILL CURE CONSUMPTION. A. A. Herren, Finch, Ark., writes: "Foley's Honey and Tar is the best preparation for coughs, colds and lung trouble. I know that it has cured consumption in the first stages. You never heard of any one using Foley's Honey and Tar and not being satisfied. The Stafford Drug Co.

W. W. Ward, of Dyersburg, Tenn., writes: "This is to certify that I have used Orino Laxative Fruit Syrup for chronic constipation, and it has proven without a doubt, to be a thorough, practical remedy for this trouble, and it with pleasure I offer my conscientious reference." The Stafford Drug Co.

LOCAL LACONICS.

F. B. Spear of Marquette was in the city yesterday. Fred Merton and family are now occupying quarters over the Iron Herald's office.

William Nadeau and wife have begun housekeeping in Jake Salo's dwelling on Case street.

John Gouge left yesterday for Bisbee, Arizona, after spending a month or more with his family here.

Lawrence Bellstrom, who has been in this city the past two years, left yesterday for his home at Wilton, N. D.

John Shen's closing out sale, started Saturday, is most successful. At times during each day since the sale opened the store has been crowded with customers and all of the regular force, together with a dozen or more extra clerks, have been kept busy.

A. P. Johnson, H. F. Pearce, Verne Saucy and a few others left yesterday for Sault Ste. Marie, taking advantage of the South Shore's excursion rates given on account of the Shriners meeting there. Some of the members of the party belong to the lodge.

Albert Collins, conductor on the street car line, expects to resume work in a few days. He was compelled to lay off on account of an injury to one of his knees. In trying to put a cow off the track Mr. Collins fell, sustaining the injury.

A. P. Wilson is making excellent headway with the improvement work at the First National Bank building. The concrete walls have been completed at the rear half of the building and considerable other work is also under way. There is a great deal to be done before the building will be ready for occupancy.

It is expected that a baseball league, composed of teams made up of the business men, city employees and officials, saloon men and Cleveland Cliffs Iron company's office employees, will be organized within a few days, and that the first game will be played some day next week. A number of the baseball enthusiasts are manifesting much interest in the proposed league.

Charles Johnson, of Ishpeming, is working on three of the houses on the high school site and he also expects to move a fourth. His working force has been increased and it will not be many days before all of the buildings will be at their new locations. Louis Corbett has purchased both of the Reidy dwellings and it is expected that he will also buy John Rock's residence.

COAL FOR PACIFIC FLEET.

Three British Colliers Are Chartered by the Government. Washington June 19.—Danger of a coal famine on the Pacific coast caused the president shortly before leaving Washington for Oyster Bay to authorize the navy department to charter foreign ships to transport coal to the Pacific coast sufficient to meet the current needs of the squadron in those waters. The coal supply on the Pacific has reached the low-water mark of 2,000 tons. The law requires the shipment of coal in American bottoms unless the charges for the same are prohibitive or the ships are not available. In that event the president is given the power to authorize the chartering of foreign steamers. For some time the navy department has been chartering American ships to transport coal around the Horn, but recently it has been unable to obtain the services of any American bottoms; there appear to be none available. When this situation was called to the attention of the president he issued an executive order authorizing the use of foreign bottoms until American vessels are available. It was found that on account of the scarcity of coal on the Pacific English coal costs as much as it would cost to buy coal on the Atlantic and deliver it on the Pacific. It was decided that it would be better to buy American coal in the Atlantic and ship it to the Pacific in foreign bottoms than to purchase English coal on the Pacific. Three British ships have already been chartered and will soon start from Newport News and Jambert's Point. Others will be sent out as soon as they can be obtained. At least 15,000 tons will be needed on the Pacific by Oct. 1, in order to meet the current needs of the ships in commission. This will not make possible the storing of any surplus supply. There are only about 30,000 tons of coal at Manila today, but another 20,000 is on the way. The supply at Manila ought not to be less than 200,000 tons, but it has not reached that amount in a long time.

EXPECT SEVEN SOCIETIES.

The members of the Negaunee Seaside society expect large delegations from outside places at their Midsummer Day picnic at Cleveland park Monday. Societies at Escanaba, Iron Mountain, Norway, Marquette, Republic and Ishpeming, will be represented. A. Thoren, chairman of the arrangement committee, said yesterday that this year's picnic will attract a larger attendance than any previously given by the Negaunee society.

SPEED OF AUTOS.

Mayor Winter has had occasion during the past week to call the attention of some of the auto owners to the fact that they were violating the speed law, and he has asked them to run their machines at the legal speed when passing through the business streets of the town and the principal residence streets. The speed limit on the business streets is eight miles an hour, in the residence district fifteen miles an hour, and on the country roads twenty-five miles.

CURED HEMORRHAGES OF THE LUNGS.

"Several years since my lungs were badly affected that I had many hemorrhages," writes A. M. Ake, of Wood, Ind. "I took treatment with several physicians without any benefit. I then started to take Foley's Honey and Tar, and my lungs are now as sound as a bell. I recommend it in advanced stages of lung trouble." Foley's Honey and Tar stops the cough and heals the lungs, and prevents serious results from a cold. Refuse substitutes. The Stafford Drug Co.

Piles get quick and certain relief from Dr. Shoop's Magic Ointment. Please note it is made alone for Piles, and its action is positive and certain. Itching, painful, protruding or blind piles disappear like magic by its use. Large nickel-copper glass jars 50 cents. Sold by The Stafford Drug Co.

MAINE READY FOR VISITORS.

A Big Summer Resort Business is the Expectation. Old Orchard, Me., June 19.—Although the unseasonable weather has prevented the usual early arrivals at the summer resort hotels along the Maine coast, the proprietors claim that the outlook for a successful season is as bright as in many of the best years, and they look forward to a hot summer after the first of July. The influx of visitors about the first of July will be much larger than usual this year, many prospective bookings have been refused by the hotel proprietors and the visitors generally going to the boarding houses for their stay. Preparations for the advance guard are making all along the Maine coast, and everything is expected to be ready for the opening with the first of the month. The scarcity of help which caused much trouble to the landlords last season has been encountered again this year, and from present appearances the proprietors will be forced to open their hostilities without the full quota of servants.

Women Who Wear Well.

It is astonishing how great a change a few years of married life often make in the appearance and disposition of many women. The freshness, the charm, the brilliance vanish like the bloom from a peach which is rudely handled. The matron is only a dim shadow, a faint echo of the charming maiden. There are two reasons for this change, ignorance and neglect. Few young women appreciate the shock to the system through the change which comes with marriage and motherhood. Many neglect to deal with the unpleasant pelvic drains and weaknesses which too often come with marriage and motherhood, not understanding that this secret drain is robbing the check of its freshness and the form of its fairness.

As surely as the general health suffers when there is derangement of the health of the delicate womanly organs, so surely when these organs are established in health the face and general appearance witness to the fact in a most convincing manner. Nearly a million women have found health and happiness in the use of Dr. Pierce's Favorite Prescription. It makes weak women strong and sick women well. Ingredients on label—contains no alcohol or harmful habit-forming drugs. Made wholly of those native, American, medicinal roots most highly recommended by leading medical authorities of all the several schools of practice for the cure of woman's peculiar ailments.

For nursing mothers, or for those broken-down in health by too frequent bearing of children, also for the expectant mothers, to prepare the system for the coming of baby and making its advent easy and almost painless, there is no medicine quite so good as "Favorite Prescription." It can do no harm in any condition of the system. It is a most potent invigorating tonic and strengthening nerve tonic adapted to woman's delicate system by a physician of large experience in the treatment of woman's peculiar ailments.

Dr. Pierce may be consulted by letter free of charge. Address Dr. R. V. Pierce, Invalids' Hotel and Surgical Institute, Buffalo, N. Y.

JOHN SHEA

SAY FAREWELL TO ALMA MATER

FORTY-ONE YOUNG WOMEN AWARDED DIPLOMAS OF NORTHERN STATE NORMAL SCHOOL.

MANY ATTEND EXERCISES

Address by Dr. Albion W. Small, Head of Sociological Department, Chicago University, an Effective One.

The commencement exercises of the Northern State Normal were held in the opera house yesterday morning, when the forty-one young women composing the graduating class received their diplomas. The program was an excellent one and well deserved the hearty applause accorded it by the large audience. The Misses Irene Connell and Virginia Mathews had a piano duet, "William Tell Overture" by Rossini. The piece was executed in a manner demonstrating the possession of good technique and powers of interpretation by the young ladies. Following the invocation by the Rev. J. M. Rogers, Miss Sophia Linton gave an artistic rendering of a vocal solo, "Robin Goodfellow," by Morgan. Professor Kaye then introduced Dr. Albion W. Small, head of the sociological department of Chicago University. Professor Kaye said that it gave him great pleasure to introduce Dr. Small as one of the thinkers of the age and a man who had placed the department over which he presided in Chicago University in the front rank of sociological research.

Make Able Address.

Dr. Small's address well maintained the speaker's high reputation as one of the advanced educators of his day. It evidenced deep thought and a thorough mastery of his subject, "The Genuine Life." In opening he said that like most speakers on occasions of this kind he had opened to him two temptations. One of them was to speak in such a manner as to meet the approval of the audience which he faced by making his address as interesting as possible, regardless of its value from an educational standpoint. The second temptation was to estimate too highly the value of the opportunity and so adopt as serious a tone as to run the risk of being voted an intolerable bore. He said, however, that he had decided to give the young people his message, and that therefore he would speak in a serious vein.

Draws Lesson from Christ.

His address, he said, would be based upon an experience in the life of Jesus. Its value was not in any way derived from Christ's divinity. He would have used it as readily had it been attributed to George Washington, Abraham Lincoln or Garibaldi. Christ, he said, at the outset of his ministry spent forty days in the wilderness in order to find himself and God. It was at the conclusion of the fast, when the Saviour was weak with fasting and torn with the desires of his appetites, that the devil came to him and said, "If this be the son of God, command that these stones be made bread." Christ answered and said, "It is written that man shall not live by bread alone but through the words that proceed out of the mouth of God." Thus, the speaker said, did Christ repulse the temptation of materialism. It lay within his power to abandon his high ideals by pandering to his material desires.

Then the devil took him up into a high mountain and showed him the cities of the earth and the people there of and said, "All these will I give unto thee and the glory of them if thou wilt bow down and worship me." Again Christ remained true to himself and the mission that he believed devolved upon him, and thereby escaped the temptation of imperialism, which the speaker defined as attaining moral ends through the employment of coercive, as opposed to persuasive means. Again the devil took him to the top of a mountain and asked him to cast himself down, saying that, as the son of God, he would not be injured and that the fact would be taken as a sign by the people of his divinity and that his ministry would thereby be rendered easy. This was the worst temptation of all, but Christ remained firm, realizing that he had no right to ask God to suspend any of his natural laws to further his ministry.

All Open to Temptation.

Dr. Small stated that the temptations of materialism, imperialism and mysticism fell to the lot of every ordinary life, and just as it was to Christ, it is harder for people to resist the last than the other two. People were only too prone to lose sight of truth if advancement could be made easier through error. As an illustration Dr. Small rehearsed the tale of "The Tailorman," a story known well to most students of classical literature. It is the story of a king who was visited by a young man who claimed that he could, through the possession of a tailorman, weave a cloth of wondrous beauty and texture invisible to all save the intelligent and good. The king furnished him a workshop and from time to time sent couriers to him to report on his progress. The young man kept the looms in motion but wove nothing. As none of the couriers cared to stand convicted of being neither intelligent nor good, all pretended that they could see the cloth and raved over its beauty. The king ordered a dress made of it for his festival day. As a result he rode through the streets in his underclothing. All the people joined with the couriers and king in pretending to see the cloth, but the hoax was exposed when the poor daughter of a basket maker called out in truth and sincerity, that the king had nothing on. The young man then explained to the king that he was the son of his former general who had been convicted on the testimony of these same flatterers and sycophants. In conclusion, Dr. Small said that the genuine life should be lived honestly; that the only merited success was that achieved according to the honorable articles of war.

Miss Mabel Chase, who has excellent control over a voice whose lower notes are exceptionally beautiful, sang "The Haunt of the Whitechapel" by Cussard, in a charming manner. Professor Kaye then awarded the diplomas to the graduates.

the Misses Ross, Linton and Chase and Mrs. Palmer sang "Summer Day." Their voices blended beautifully and the selection was much enjoyed. The exercises closed with the benediction by Rev. Rogers.

The Graduates.

The following are the members of the Class of '07:
Bessie A. Altman, Mary S. Murphy, Helen Corbett, Jessie E. McDonnell, Lucy A. Durham, Marjorie C. Neis, Lillian E. Goodreau, Nellie J. Reed, Maud E. Hallstrom, Ethel E. Unsworth, Edith M. Johnson, E. Martha Voelker, Litta M. Norton, Elsie White, Jeanne Pariseau, Mary A. Barrett, Clara C. Siegel, Mina Eccles, Mary Tierney, Julia Graefe, Clara F. Vogler, Bertha Humphreys, Irene Westcott, Mildred I. Lundahl, Gladys F. Brown, Carrie A. Mailhot, A. Irene Connell, Flora I. Peterson, Sagel Ericson, Maud E. Rasmussen, Carrie C. Gormsen, Hazel M. Shipman, Hazel S. Harris, Golda Van Salchert, Mary A. Leahy, Ethel C. Ward, Bernadette M. Lemire, Marian V. Mathews, Margaret A. Schroeder, Kathryn E. Coulman, Frances E. McCarthy, President of Class, Irene Westcott, First honors in scholarship, Carrie C. Gormsen.

RICH IN MUSICAL TALENT.

Class of '07, Northern Normal, Has Many Good Singers.
The class of '07, Northern Normal, has been unusually rich in musical talent, as it has evidenced at different times during the year and at the class play Tuesday evening. There was considerable music incidental to the play, "As You Like It," sung by the young ladies. The words of Shakespeare's songs were given a fine musical setting, and the bits of chorus were well rendered and much enjoyed. The class has two or three young ladies who do excellent solo work and the choral singing has invariably reflected much credit on the musical instructors of the school.

In the account of the class play in yesterday's issue of The Mining Journal there was an inadvertent omission of reference to one of the principals whose graceful playing of one of the prettiest parts did much to secure the success of the performance. Miss Gladys Brown was cast as Celis, cousin of Rosalind, who with the heroine undertakes the adventurous journey into the forest of Arden, and who shares with Rosalind many of the important scenes. Miss Sagel Ericson and Miss Brown made these scenes delightful, the latter striking just the proper note of archness, giving her lines full value and playing the character with pretty grace and daintiness.

The production, as a whole, has been highly praised since Tuesday night, it being the general opinion of those who saw it that its excellence, all things considered, was remarkable.

ANNUAL ALUMNI DINNER.

Was Held at Presbyterian Church at 1 O'Clock Yesterday.

The annual dinner of graduates and alumni of the Northern Normal was held yesterday afternoon at 1 o'clock at the parlors of the Presbyterian church, being served by the ladies of the congregation, who had prepared a fine repast. It was attended by members of the class of 1907, many alumni, the Normal faculty and numerous invited guests, considerably over 100 people being served. On the conclusion of the dinner there was a short program of toasts, Principal Kaye presiding. Toasts were responded to by Miss Westcott, president of the class of 1907, John Erickson, Dr. McCracken, Rev. J. M. Rogers and Dr. Small, who delivered the commencement address. Dr. Small referred to the fact that he was present at the dedication of the original Normal building and said that he thus had a particular interest in the welfare of the institution.

"AN INDUSTRIAL ACHIEVEMENT."

A Wonderful Story of the Development of a Great Automobile Business.

If you have not already read "An Industrial Achievement" it behooves you to secure a copy and peruse the absorbingly interesting story of how a small manufacturing business, which started out with the manufacture of air pistons, has, through the application of foresight, pluck and commercial sagacity, been developed into an automobile and bicycle business which now supports immense plants at Hartford, Conn., Toledo, O., Indianapolis, Ind., Elyria, O., Hagerstown, Md., and Westfield, Mass. The Buffalo News says of this publication: "This is the great Pope concern, of which Colonel Albert A. Pope is the head, and whose products in the known wherever in the world mechanical power has been put forward as a substitute for animal power in transportation. The story as told in this beautifully printed, handsomely illustrated and artistically bound volume from the Bartles-Orr Press, New York, reads almost like a romance and makes the reader marvel that so limitless an industry could have been developed from a little business started in Boston just after the Civil war with money saved from a soldier's pay. Read the story—it will do you good."

Cosmetics will ruin the complexion. There's no beauty practice equal to the effects of Hollister's Rocky Mountain Tea. It keeps the entire body in perfect health. Tea Tablets, 35 cents. The Staffed Drug Co.

Dainty and stylish effects in our new summer neckwear. Just received, 50c, 75c and \$1.00. Ormsbee & Atkins. (6-20-1f)

"Forming a Pool"

I am forming a pool for the purpose of investment. One can put in any amount up to \$300, the smallest amount is \$25. I am to use my own judgment to invest, and as I never lose any investor's money, I guarantee not to lose the money you pay me. But any time after November you are at liberty to draw out your money, also profits. Dividends will be paid in the meantime.

I will probably make about five hundred per cent for you. Last year I organized two pools and some of the members made as high as six hundred per cent. Remember I give you a written guarantee that you shall NOT LOSE your money, but to pay it back with all profits. This is nothing new for me to guarantee a party's money; I have been doing it for ten years when I am sure of the investment and no party has ever lost by me. All I want is the commission and your good will.

Women can come to my office at 3 o'clock p. m. or at my residence at 8 o'clock evenings. Outside parties can send express or postoffice money orders. I am 60 years old. Have been a business man in Marquette forty years, a broker for fifteen years. Any business man will tell you Spear is all right, and you always get your money as he agrees. What he don't know about investing nobody knows. All correspondence private if marked private.

J. W. SPEAR

INVESTMENT BROKER.
