Marquette, Mich., Nov. 1

Mr. Hemans announced "second invasion" of the upper peninsula has evidently been called off...

It is to be hoped that the New York World will now apologize to Mr. Hearst for the unwitting wrong it did him...

Horatio S. Earle is campaigning in the upper peninsula. Mr. Earle is a peppery speaker, just the kind needed to wake up the voters...

The betting fraternity about which much is usually heard election time can't see the Democrats in Michigan this year...

Commenting on Senator Root's New York speech, the New York Globe concludes an article thus: "If on November 8 this year there is a Republican overthrow comparable to the Democratic overthrow of November, 1894, it will probably have an effect on the Taft administration such as the former event had on the Cleveland administration..."

Horatio S. Earle, who is now campaigning in the upper peninsula for the Republican ticket, accuses Mr. Hemans of, wherever he can get away with them, making unfair and unwarranted statements to his audiences in an effort to gain support...

school districts of the state get from the railroads of the upper peninsula \$1,000,000 each year more than the state pays to the counties of the country above the straits...

"Congressman Nicholas Longworth, of Cincinnati, O., progressive Republican" is the way the Detroit Free Press refers to the principal speaker at the Light Guard armory rally for Representative Denby Saturday night...

There's a decided waking up in Republican circles in Marquette county. The city committees are bestirring themselves and are now planning effective work for the polling of the vote...

MICHIGAN CAME BACK. The Michigan football team looks much better in the light of Saturday's defeat of Syracuse than it has at any previous time this season...

It is a curious commentary upon our present imperfect form of party organization in America that a postmaster or rather Federal officeholder should regard himself frequently as amenable first of all not to the public interest, not even to the party interest, but to what he fancies is the wish or pleasure of the man who obtained for him his appointment...

PINCHOT HURT DENBY. Gifford Pinchot's visit to Detroit, where he addressed the Board of Commerce at a luncheon, proved a decidedly embarrassing event for the Republican campaign managers who are endeavoring to secure the re-election of Representative Denby...

Obviously, Mr. Pinchot's appearance in Detroit was a mistake. If the men who book the Board of Commerce luncheon and banquet attractions are friendly to Mr. Denby, they are singularly shortsighted, or they would not have taken a chance with Mr. Pinchot as a speaker in his district...

There is a home-made remedy that takes hold of a cough instantly and will usually cure the most stubborn case in 24 hours. This recipe makes a pint—enough for a whole family. You couldn't buy as much or as good ready-made cough syrup for \$2.50...

who are disloyal to party and public interest and the stealthy sapping and mining which they are seeking to accomplish are known in time, so that they will never be able to deceive the people of Oneida County with the view that the defections in the ranks, in their towns at least, were natural or normal...

WON'T PLAY UNLESS THEY CAN WIN

The scorn in which "regulars" have held irregulars whenever schism in local Republican political affairs has led to organized defection from "regular" tickets is a thing familiar to most communities. The irregulars have been dubbed "bolters," have been excommunicated from the party, blackballed, put beyond the pale, blacklisted, proscribed and visited with all sorts of other dire political penalties...

There's a decided waking up in Republican circles in Marquette county. The city committees are bestirring themselves and are now planning effective work for the polling of the vote. Differences are being put in the background, and there will be a united pull to get the voters to the polls...

There is one favorable thing about the Chicago revival which has been staged since the death of 400 characters. It has an abundance of raw material on which to work—Saginaw News.

Flint is clamoring for an ordinance that will prevent some of the newly arrived from burning up the pavements with bonfires. Every city has one but few take the trouble to enforce it—Bay City Times.

Collector Lock claims to have seen the footprints of a diplocephalus in Montana. We don't know what a diplocephalus is but Joe Cannon's been wandering around loose for sometime and he's got an awful lot of time—Jackson Citizen Press.

Col. "Albe" Gruber, at a luncheon at Saratoga, passed in an eloquent address to tell a story. "These two factions are as ineradicably opposed as Brown and Black."

Useless Speculation. "Metaphysics," said Mayor Crump, at a Democratic banquet in Memphis, "is a subject that always makes me think of an elderly couple in Chattanooga. One day to her husband, 'whether all those vows and protestations you made me during our courtship were really true?'"

Not So Easy Now. "Girls are not the sentimentalists they used to be," said Mrs. Carrie Chapman Catt at a dinner in New York. "Nowadays girls can look out for themselves."

A Clew at Last. Mr. Smith was a nervous man, and when, at 8 o'clock, Mrs. Smith had not come home, he telephoned to the police to inform them that she was missing. She returned safely enough a little later, having been detained by a slight street car accident, and her husband scrutinized her carefully. His reason for doing so may be inferred from the account which Puck prints of the telephone conversation between Mr. Smith and the police department.

There is a home-made remedy that takes hold of a cough instantly and will usually cure the most stubborn case in 24 hours. This recipe makes a pint—enough for a whole family. You couldn't buy as much or as good ready-made cough syrup for \$2.50...

THE STATE PRESS

A Detroit man who committed suicide yesterday left all he had to the city. That was a widow and five children—Flint Journal.

Professor Woodrow Wilson speaks a facility which indicates that politics is one of the easiest branches of study he has yet undertaken to master—Kalamazoo Press.

LOWER STATE NOTES. JACKSON—Dr. Seth M. Angle, one of the most prominent physicians in Jackson, is under arrest, charged with furnishing cocaine to minors, and the police claim to have evidence that Angle was doing a wholesale business in the drug. For several months the officers have been quietly investigating, it being a well-known fact that many Jackson young men were addicted to the drug...

TRAVERSE CITY—The Traverse City Daily Eagle, established in 1893, has been consolidated with the Evening Record, established in 1897, under the name "The Record-Eagle." The Grand Traverse Herald, established in 1858, and the Traverse Bay Eagle, established in 1872, semi-weeklies, were also combined.

LANSING—Oil has been discovered on the Lazelle farm in Delta township, Eaton county, and the indications are that the product is present in large quantities. At the present time the drillers are handicapped by a flow of salt water that has a pressure of 400 pounds to the square inch.

DETROIT—Betting on the result of the election in the state is now beginning to live up. While many small wagers have been made right along, the big bettors, who do not allow sentiment to sway them, have been holding off until the lines of battle should be finally drawn.

MUSKOGON—The weather man conspired against politics in Muskogon and an automobile carrying Richard D. Beach of Howell, Mich., City Assessor Robinson, Thomas McNiff to Moorland, where they were going to hold a Democratic rally, skidded on the slippery road about five miles out of Muskogon and turned turtle, plunging the politicians beneath it.

STOCKHOLDERS' MEETING. Notice of Meeting of the Stockholders of the Grummett Gold & Silver Mining Co. is hereby given that a special meeting of the stockholders of the Grummett Gold & Silver Mining Company will be held at the residence of James E. Grummett, 400 Cleveland avenue, Ishpeming, Michigan, on the seventeenth day of November, A. D. 1910, at two o'clock in the afternoon, for the purpose of selling the property of the company and winding up its affairs.

TO CURE A COLD IN ONE DAY. Take LAXATIVE BROMO Quinine Tablets. Druggists refund money if it fails to cure. E. W. GROVE'S signature is on each box.

As yet but little has been accomplished by the Wolverine in its search for values on the Osceola vein, which traverses the west side of the property. Shaft work has been started, but the necessary power plant is being provided, and until this is in readiness and the shaft properly hoisted in, conditions will not permit of rapid sinking.

had taken the dose he realized that he had grabbed the wrong bottle. Badly frightened, he rushed from the house and ran for the nearest doctor. The latter not being in, he was advised to go to a drug store. As he entered the store Dr. Crowley came in and soon had Longstreet out of danger.

KALAMAZOO—Because a conductor employed on the M. U. R. threatened to put her off a car and said, "To show you that I am a gentleman, I will pay your fare," Mrs. Mary Humphrey of Comstock brought suit in the circuit court, and was allowed \$500 by a jury. Mrs. Humphrey claimed that the conductor had collected her fare once, and asked her for it the second time, when the dispute took place which resulted in the suit for verbal insult.

JACKSON—As a result of charges made against Rev. G. E. Goodrich, pastor of the East Main street Baptist church, by a young married woman, a member of his congregation, the pastor has resigned and left the city. The woman charged that the minister called on her while she was taking a bath. She came out of the bathroom clad in a bath robe, she said, and alleges that the pastor tried to embrace her. Rev. Goodrich admitted making the call, but denied that he had tried to embrace the woman. His resignation was asked for by the church board after the testimony had been taken. As a sequel, several members of the flock who believed in the pastor's innocence, criticized the board, and its members immediately resigned. A new board has been named. Rev. Goodrich has a wife and two children.

TRAVERSE CITY—The Traverse City Daily Eagle, established in 1893, has been consolidated with the Evening Record, established in 1897, under the name "The Record-Eagle." The Grand Traverse Herald, established in 1858, and the Traverse Bay Eagle, established in 1872, semi-weeklies, were also combined. Thomas T. Bates was editor and manager of the Herald. J. W. Hansen will be the editor and the manager of the Record-Eagle.

LANSING—Oil has been discovered on the Lazelle farm in Delta township, Eaton county, and the indications are that the product is present in large quantities. At the present time the drillers are handicapped by a flow of salt water that has a pressure of 400 pounds to the square inch. It will be necessary to control this flow before further progress can be made. The drill is now down nearly 900 feet. The oil has "head" enough to force itself to the surface through the enormous pressure of salt water. No one had ever suspected the presence of oil in the vicinity of Delta until a year ago last summer when a daughter of the late "Zach" Lazelle, who owned the farm where the boring is being done, was visiting in the west. While there she met a spiritualistic medium, who imparted the information that oil existed on her father's farm, and described the place minutely, although it is claimed she had never been there. The medium further described the location on the farm where the well should be sunk. The apparent sincerity of the medium so impressed the family that last spring boring was begun. Leases that had been secured by Eastern parties on a large area in the vicinity and many other wells will be sunk.

DETROIT—Betting on the result of the election in the state is now beginning to live up. While many small wagers have been made right along, the big bettors, who do not allow sentiment to sway them, have been holding off until the lines of battle should be finally drawn. They are apparently satisfied now, and within the past two days there have been a number of wagers of large size. The prevailing odds on Osborn in the down-town betting centers are 5 to 3, with few takers. The great part of the betting has been on majority; several large bets having been made at even money that Osborn would carry the state by 50,000. There is also some betting at even money that he will carry Wayne county by 10,000. The odds are 5 to 2, with no takers, that he will carry the county, but asking 5 to 1 for their money. Betting is said to be quite brisk in Grand Rapids at even money that Osborn carries Kent by more than 4,000.

MUSKOGON—The weather man conspired against politics in Muskogon and an automobile carrying Richard D. Beach of Howell, Mich., City Assessor Robinson, Thomas McNiff to Moorland, where they were going to hold a Democratic rally, skidded on the slippery road about five miles out of Muskogon and turned turtle, plunging the politicians beneath it. One of them were injured, but the meeting had to be given up. A party of Republican candidates met with success somewhat later in their trip to Norton township. Ten of the Grand Old Party speakers braved the weather, but the rest were held at the hotel only one person was there to meet them, and although they stayed for an hour or another soul showed up.

VASSAR—Suffering severely with neuralgia, Heber Longstreet, a young unlearned man, swallowed a tablespoonful of laudanum by mistake. As soon as he

Upper Peninsula

Another Hunting Accident—Jalmor Soderberg, a youth of the Ludington location at Iron Mountain, met with a painful accident while hunting Saturday. A bullet from a twenty-two calibre gun penetrated one of his feet. The boy was in the woods with a number of companions. One of the youngsters was passing the gun to Soderberg when the trigger became caught and the weapon was discharged.

Small Boy Accidentally Shot—Dewey Freeman, eleven-year-old son of Edwin Freeman of Iron Mountain, was the victim of a shooting accident at the camp of his father three miles east of Merrymann late last week. Mr. Freeman, who had gone to the camp on a business visit, had taken his son with him. The boy was in the possession of a twenty-two-caliber revolver. One of the men picked up the weapon to look it over, and shortly after the little fellow had handed it to him it discharged. The bullet entered the youngster's side. The bullet was a serious one, but is not likely to have fatal consequences.

Diphtheria at Bessemer—Bessemer was placed under a strict quarantine last week, by order of the city health officer. All the schools were ordered closed, the churches forbidden to hold services and all public meetings of every kind were prohibited. An officer is stationed at the postoffice and no children are allowed to enter. In short, the quarantine has been made as strict, as far as regards public gatherings of every nature, as it is possible to make it. The reason for this strict quarantine of the Gogebic county seat is on account of the outbreak of diphtheria. There had been reported twenty-five cases of this disease, and though there had been but two deaths resulting therefrom, it was spreading so rapidly that the health officer deemed it necessary that extreme measures be taken for the benefit of the public health of the city. It is hoped and expected that this strict quarantine will prove effective in a short time in stamping out the disease.

Copper Country

TWO ARE BOUND OVER.

Houghton County Officers Continue on Trail of Wire Deserters.

In Justice Fisher's court in Calumet yesterday Angelo Yotti was bound over to the next term of circuit court on the charge of wire desertion.

Under Sheriff Sheridan took Albert Olson to Calumet yesterday to answer to a charge of wire desertion, also. Olson was located in Ontonagon county a few days ago. He waived examination and was bound over to the next term of court.

The officers of Houghton county are bent on keeping up the war started several days ago on wire deserters, and a number of other arrests are likely to take place shortly.

A WHIRLWIND FINISH.

Republican Chairman Bentley Announces This Week's Itinerary.

The Republican campaign in Houghton county will have a whirlwind finish, chairman Bentley. While the campaign opened last week with Congressman H. Young delivering two rousing speeches, still it did not take on the impetus which will be visible this week.

The appearance of Horatio Earle in Houghton last evening opened a period of political activity which is expected will result in every Houghton county district being visited this week by various good speakers.

Dr. E. T. Alvans of Dollar Bay, C. O. Olivier of Hancock and County Chairman Bentley will speak at Point Mills this afternoon and at Dollar Bay tomorrow evening.

This evening at Mason Hon. W. J. Galbraith of Calumet and Hon. W. E. Gray of Lake Linden will speak. Mr. Gray is the Republican legislative candidate from the Second district.

C. O. Olivier and others who will be named later will speak at Lake Linden Thursday evening. Dean Bell of Olivet college will deliver a political address next Friday evening at the Keweenaw theater. Mr. Galbraith also will speak at Hancock. The week's campaign will close with a big rally in Calumet Saturday evening at which the two last named speakers will talk.

M. Bentley stated yesterday that the meetings held to date were showing results and he is thoroughly convinced that Houghton county will turn out a bigger Republican vote this year than it ever has.

The interest and enthusiasm which are being injected into the campaign come at a time when they should do the most good.

COLBORN STANDISH MARRIES.

Former M. C. M. Man Wedded to Miss Marion Eddy in Detroit.

Colborn Standish, a former popular Michigan College of Mines student, was married last week in Detroit. The Free Press writes of the wedding:

The ceremony took place at the home of the bride, 32 Stinson Place, Miss Marion Eddy, daughter of Frank W. Eddy, and William Colborn Standish, son of Frederick D. Standish, were married. Rev. Percival Hugot of the First Congregational church officiated.

The ceremony took place in the drawing room, which was decorated with palms and large bunches of pink cosmos.

The bride wore a white satin gown trimmed with old rose point lace. Her long tulle veil was fastened with a spray of orange blossoms, and she carried a bouquet of long-stemmed white and white orchids. Miss Dorothy Eddy, who attended her sister as maid of honor and who made her debut at the time, wore a gown of pink chiffon over pink satin and trimmed with silver crystals.

Her court veil fell to the edge of her gown, and she carried white chrysanthemums.

Mrs. Fred S. Munger, and Mrs. W. O. Mundry, sisters of the bride, acted as matrons of honor. Mrs. Munger's gown was shell pink satin trimmed with rose point lace and Mrs. Mundry's pink chiffon over white satin, garnished with crystal trimmings. Both carried bouquets of white chrysanthemums. Little Miss Frances Eddy, who was flower girl, wore a frock of white batiste, and carried a wreath of pink rose buds and ferns. Mrs. Eddy was attired in black lace over white satin, trimmed with jet. Mrs. Standish wore a gown of white lace over white satin.

Sherwood Standish, brother of the groom, assisted as best man. The ushers were Dr. Harry McMahon, F. S. Munger. The out-of-town guests were Mrs. C. H. Dale and Miss Hutchinson, of New York; Mrs. Standish, Miss Virginia Bransford, of Oronoro, Wis.

After the ceremony, a reception was held for the relatives and intimate friends of the bride and groom. Mr. and Mrs. Standish left for a trip east and will be home to their friends after Dec. 1, at 203 Seyburn avenue.

FOR FOREST FIRE SUFFERERS.

Responding to the request of Rev. Mr. Eldred, the people of Quincy hill and vicinity have made donations for the assistance of former residents who are now located in northern Minnesota and who were victims of the recent forest fire.

files. Many of the sufferers have lost their homes and most of their belongings. Mr. Eldred has sent a large consignment of clothing and some money to the stricken district and further donations will be forwarded this week. Mr. Eldred is greatly pleased at the generous spirit displayed by Quincy hill people in offering assistance for those formerly their neighbors.

OFFICERS ARE CHOSEN.

Branch of British-American Organization Holds Election.

Calumet branch, No. 1, of the British-American Naturalization club, held a meeting Saturday evening, previous to the adjournment of the county organization, and named the following officers:

President—Charles Muford. First Vice President—Martin Prisk. Second Vice President—George Williams. Third Vice President—Fred Barnum. Secretary—Wesley Downing. Treasurer—W. H. Thomas.

The executive committee is composed of fifteen members. This club will be one of numerous branch organizations which are to be formed in the county.

MARRIED AT ST. IGNATIUS.

Leo P. Cook and Mrs. Anna C. Kettnerbell Are United.

Leo P. Cook and Mrs. Anna C. Kettnerbell, both of Houghton, were married yesterday morning at St. Ignatius church by Rev. A. L. Rezek. The ceremony was witnessed by Frank E. McKindles of South Range and Miss Theresa Brause of Lake Linden. Mr. and Mrs. Cook have gone for a wedding journey to Chicago and to the groom's old home at South St. Ignace.

The bride is a daughter of Mrs. George Duquette of Lake Linden and for some years has been making her home in Houghton with her sisters, Mrs. W. F. Miller and Mrs. E. J. Sullivan. Mr. Cook has been a copper country newspaperman for the past eight years and is one of the veterans of the profession in the upper peninsula.

Mr. and Mrs. Cook will reside at 204 Diamond street, East Houghton.

MANY LICENSES SOLD.

County Clerk Has Issued 75 Hunting Permits to Date.

The demand for deer licenses this fall is equally as brisk as it has been in years gone by. The county clerk's office yesterday announced that seventy-five hunting permits had been issued so far. The major portion of the applications were received from Calumet.

The opening of the deer season is a week off. The hardware dealers are selling a large quantity of munitions and the general merchandise stores are displaying large amounts of blankets, caps, rubbers and red coats. This latter garment has been recognized as the official jacket to be worn by either the hunter or the woodsman.

Houghton county people will not confine themselves to their own county in their travels this fall, but will hit to other districts where deer are plentiful. Ontonagon, Baraga and Keweenaw counties are close enough to make the trip a short but still a profitable one.

MAKING TELESCOPE MIRRORS.

Methods of Work on a Disk 100 Inches in Diameter. Now Being Prepared.

The factory which most successfully cuts the rough disks of glass for the mirrors of great telescopes is the ancient and famous one at St. Gobain, France, which was established in 1665. One of the large privileges of this old world town last year and of studying there the details of this difficult work. This firm has successfully made two nearly perfect disks sixty inches in diameter and eight inches thick, weighing two thousand pounds each, together with a large number of smaller disks. They are now engaged in making a disk one hundred inches in diameter and fourteen inches thick, weighing ten thousand pounds, for the mirror of the Hooker telescope. Disks of this size are made at St. Gobain, France, which was established in 1665. One of the large privileges of this old world town last year and of studying there the details of this difficult work.

This firm has successfully made two nearly perfect disks sixty inches in diameter and eight inches thick, weighing two thousand pounds each, together with a large number of smaller disks. They are now engaged in making a disk one hundred inches in diameter and fourteen inches thick, weighing ten thousand pounds, for the mirror of the Hooker telescope. Disks of this size are made at St. Gobain, France, which was established in 1665. One of the large privileges of this old world town last year and of studying there the details of this difficult work.

Another important item is the grinding and the polishing machine," says Mr. Ritchey. "The machines which I use at present are the result of twenty years' experience and gradual improvement. By their aid the glass disks are changed from rough castings with ragged edges and irregular surfaces to brilliantly polished optical mirrors, their surfaces correct in form to within much less than one one-hundredth-thousandth part of an inch. After this the final correcting and retouching of the surfaces are done mainly by hand, and the machine plays a less important part.

The optical work is divided into four marked stages as follows: Rough grinding, fine grinding, polishing, figuring and testing, and finally silvering.

The grinding is done by means of large plates of tools made of iron, which are first turned and ground to the proper curvature. The abrading material used between the tools and the glass may be either sand, emery or carborundum grains, mixed with an abundance of water. Carborundum grinds most rapidly because it is extremely hard and sharp.

The glass lies in a horizontal position on the slowly rotating turntable of the machine, while the grinding plates are moved about upon its surface in elliptical paths or strokes by the action of the machine. Rough grinding is comparatively simple, and consists merely in giving the glass its approximate form; this must be done very deliberately, however, to prevent heating and consequent cracking of the glass.

The principal glass of a reflecting telescope is flat on the back and concave on the face. The form of the back need be only approximately true, but the form of the concave face must be optically perfect. The lack of curvature is accomplished by heating and consequent cracking of the glass.

The principal glass of a reflecting telescope is flat on the back and concave on the face. The form of the back need be only approximately true, but the form of the concave face must be optically perfect. The lack of curvature is accomplished by heating and consequent cracking of the glass.

In Sudden Emergencies

like illness, it is often necessary quickly to raise the temperature of a room. For instance, in those hours between midnight and dawn, when the day temperature has been allowed to drop, if you are called upon to get up, the room is chilly and cold. It takes a long time to start up a furnace or fire and raise the temperature by ordinary means. You can instantly heat a room to any desired temperature with a

PERFECTION SMOKELESS OIL HEATER Absolutely smokeless and odorless. It quickly gives heat, and with one filling of the font burns steadily for nine hours, without smoke or smell. Has automatic-locking flame spreader which prevents the wick from being turned high enough to smoke, and is easy to remove and drop back, so the wick can be cleaned in an instant. It has a cool handle and a damper top.

An indicator always shows the amount of oil in the font. It has a filler-cap which does not need to be screwed down; it is put in like a cork in a bottle, and is attached to the font by a chain. The burner body or gallery cannot become wedged, because of a new device in construction, and consequently it can always be easily unscrewed in an instant for re-wicking.

The Perfection Oil Heater is finished in Japan or nickel. It is strong, durable and well made, built for service, yet light and ornamental.

spring of Bryan O'Mealy of Cecil county, one of the immigration agents of Lord Baltimore, called themselves "Male."

Numerous similar instances can be cited showing how on account of the changes which Irish names have suffered and their conversion into English forms, Ireland has been deprived of much of the credit that is hers, and the influence of her sons in the making of American history has been lessened proportionately.

MORGANATIC MARRIAGES.

Gossip Anent an Approaching Royal Wedding.

The most talked-of marriage in Europe, soon to be, is that of Prince Victor Napoleon, the head of the Bonaparte family and the representative of the Napoleonic succession, to the throne of Belgium, and the Princess Clementine, youngest daughter of the late King Leopold of Belgium. Prince Victor is the grandson of Jerome Bonaparte, king of Westphalia, the youngest brother of the great Napoleon. Victor Napoleon is 48 years old and is not altogether a haphazard as by a left-handed marriage he has five children. His oldest son is twenty-five and it is said that in the nuptial contrast with Clementine the mother of these half-caste Bonapartes will be provided with an annuity. Morganatic marriages are being defined as those of unequal rank, a privilege confined to royalty, which had its origin in Germany, but soon became popular through the reigning families of Europe. A royal personage can not contract a morganatic alliance while the legitimate wife is yet alive. Among the most recent of morganatic alliances was that of the prelate King Leopold, with the mother of the Princess Clementine, the Baroness Vaughan. London Opinion, in an article on morganatic marriages gives some interesting information. It says:

"A story is current in Rome that the Czar, when young man, contracted a marriage with a beautiful Jewish dancer, whom he put away when he married the Czarina. This story has never been denied officially, and certain it is that there are two young men undergoing their education in Paris who are generally believed to be the sons of those morganatic alliances who are covered in their world of toil and strife; for there is no more certain way of bringing to an end a promising career than indulging in the foregoing specimens of fungi.

What are the amanita phalloides. Like the amanita muscaria and the rest of those strange sounding things? Merely mushrooms whose room is far desirable than is their company, for they belong to the poisonous and unwholesome class.

These fine October mornings the inclination to sally forth in quest of mushrooms is strong, and here and there in this appetizing article of food, particularly if there has been one of those steady rains which bring the rooms popping through the sod in great numbers.

But be not to your danger blind. Like wise, even though well versed in the mysteries of mycology, here and there in this appetizing article of food, particularly if there has been one of those steady rains which bring the rooms popping through the sod in great numbers.

Judge C. R. Brown went to Escanaba on business last evening.

There will be a meeting of the fire department at headquarters at 8 o'clock this evening.

Street cars will run to Holy Cross cemetery this afternoon and tomorrow afternoon, from 1 to 5 o'clock.

The Girls' club had an enjoyable social meeting last evening at the home of Miss Alice Little, Pine street.

A chimney fire at the residence of Mrs. A. Higgins, 327 Washington street, called out the fire department last evening.

County Clerk Jenks has received the election supplies for this county, and they will be ready for distribution to the supervisors Saturday.

The entertainment which was to have been given at the Methodist church Wednesday night has been cancelled owing to the illness of the reader engaged, Mrs. Jeannette Jewell Kellogg.

The K. of P. lodge will give a card party and musical entertainment in their lodge rooms in Fraternity Hall tonight. Every one is cordially invited and is promised a good time. An admission fee of fifteen cents will be charged.

The South Shore special train took a party of sixty persons to Ishpeming last night. Most of the visitors to the Lemaire City went there to attend the Owls' dance. Bowlers made up the majority of the others.

Reich Bros. saw mill in North Marquette, which has been under construction for several months, is now finished and will be put into operation as soon as the bells arrive. About twenty-five men went through without a hitch. Musicians furnished by the Superior orchestra.

A meeting of the city Republican committee was held at the city hall last evening, at which plans for getting out the vote on election day were discussed. As far as the committee knows, the rally Wednesday evening will be the only campaign meeting of this campaign.

Boys and girls and young people played the usual amount of Halloween pranks last evening and the police were busy running down riot calls, sent in by persons who thought the merry-makers were carrying things too far. Soaping windows was the favorite pastime in the business district and the store fronts look like the night after this morning.

Ball Was a Success—The annual ball given by the Macebaes of the World at Fraternity Hall last evening was well attended, and all who participated had a delightful evening. The hall was tastefully decorated in a manner appropriate to Halloween and the entire program went through without a hitch. Music was furnished by the Superior orchestra.

Special Services at St. Peter's—Today is All Saints Day and a Holy day of obligation. Masses will be held at 5:30 a. m., 7 a. m., and Pontifical High Mass at 9 o'clock. Vespers of the Feast of 7:30 p. m., followed by vespers of the Dead. Wednesday will be observed as All Souls' day, with masses at 6:30, 7:30 and Pontifical Requiem High Mass at 8:30.

Travel is Light Now—As usual at this time of year, passenger traffic on the upper peninsula railroads is much lighter than during the summer months. More passengers travel during the summer than in winter in this part of the country, and from the time the tourist season ends until the holiday traffic begins, late in November, the volume of passenger business falls off perceptibly. Again, after the holidays business is usually low until spring opens.

Historical Pictures—A. E. Archambeau is showing a series of historical pictures in his show windows, which are of great interest. The sketches are the work of Edward Penfield and the subjects are suggested by romantic events of the colonial days, which happened near Boston. The pictures now in the window are "Putnam's Escape" and "John Alden and Priscilla." These will be replaced by other of the series within a few days.

Accepts Traveling Position—Chester Blaine has accepted a position as traveling salesman for M. Melachro & Co., of Chicago, distributors of Egyptian cigarettes, and has been assigned to upper peninsula territory. George W. Smith, district sales manager for the company, was in the city yesterday morning, and Mr. Blaine expects to take up the work soon, but will not push sales actively until after the holidays.

Seeking Refuge on Island—Keeper Robert Hume, of Presque Isle park, reports that four fine bucks made their first appearance of the season on the island a few days ago and that deer are coming in from the woods almost every day. Every fall near the time of the opening of hunting season, many deer find their way to Presque Isle where they remain until the danger from the hunter's gun has passed. Mr. Hume states that the deer seem to have an instinct that tells them when the hunting season is about to open, and come to Presque Isle for safety.

Appointments by Bishop Eis—The following appointments of parish priests have been made by the Rt. Rev. Bishop Eis, effective this week: Rev. James Corcoran, transferred from Spaulding, Menominee county, to St. Mary's church, Iron Mountain; Rev. Paul Fillion, transferred from Flat Rock, Delta county, to Spaulding; Rev. Joseph Deford, transferred from Flat Rock, Delta county, to Flat Rock; Rev. Father Kron, appointed to the pastorate at Rapid River. Father Kron has been acting as chaplain at St. Mary's hospital in this city for some time past.

H. B. Hall Wins the Vase—The \$15 vase donated by the Hunter Arms company and which has been contested for in four trap shoots at the Town and Country club the past month, has been won by H. B. Hall with a score of 87 out of a possible 100. Kukuk was second, with 82. There is considerable rivalry in the moving shoot, as there are twenty entries. Owing to the liberal handicaps everyone has a show for the prizes. There will be four regular shoots, and as each contestant will have to shoot a total

of 200 shots, anyone may enter next Saturday and shoot off their string in the three remaining tournaments. Captain A. H. Hardy will give a free exhibition of fancy shoot Saturday afternoon at the Town and Country grounds. Everyone is welcome. A number of out-of-town shooters are expected to be on hand, as there will be four fifteen-bird events, jack rabbit system, besides rifle competition. The day's sport will end with a stag supper at the clubhouse.

INSURE WITH PETER WHITE & CO.

300 CANAL PASSAGES.

List of Boats That Have Passed the Locks Bound for Superior Ports.

Sault Ste. Marie, Mich., Oct. 31.—The following boats have passed through the locks, bound for ports on Lake Superior: Huronic, 11 p. m.; Colonel Carnegie, midnight; Corona, 3 a. m.; Robert Wallace, 3:30; Ball Bros., 5:30; Genieron, Dickson, 6:30; Cornell, 8:30; Mueller, 9; Fryer, Rees, 10; Benvoyle, Wilpen, Langell, George, Arena, 11:30; Pennennis White, Kaminstiquia, 12:30; Cole, 1; Norton, 1:30; Conemaugh, Kalkaska, Fryer, 2; Ream, 3; Jay Morse, Bunsen, 3:30; Panay, Prince, Bartow, 4:30; Hopkins, King, 5; Joliet, 6; Dan Hanna, 7; Bessemer, 8.

Bowling Scores

The LaFayettes won all three games of the league bowling match at the downtown alleys last evening. The scores were as follows:

Summit House—	Huber	Lobb	Valen	Killelea (sub)	Chapin (sub)	Tot.
	141	131	161	433		
	154	152	184	490		
	129	145	107	380		
	142	127	169	438		
	142	147	138	427		
Totals	707	702	759	2168		

LaFayettes—

Bolduc	163	148	135	446
St. Julien	106	178	107	511
Carr (sub)	159	172	228	559
Richards (sub)	186	162	158	506
Richards (sub)	163	152	172	487
Totals	837	812	869	2519

Upper Peninsula

Shot Deer Out of Season—

John Andrews, Jr., and William Harrington, deputy game wardens, arrested Frank Paulsen, of Norway, Dickinson county, Saturday, on a charge of having shot a deer. Paulsen was taken before Justice Joseph Rowe. The court imposed a fine of \$10 and costs or thirty days in the county jail.

Grange Has Many Members—

The membership of the twenty granges in Delta county has increased nearly 300 in the present year, and the aggregate membership of the order is now nearly 1,500. This statement is made by State Deputy Ralph N. Seward. Mr. Seward has just completed a tour of the county having visited each of the granges. He says he expects that the membership will increase to at least 2,500 the next few months.

Partridges in City Streets—

Not in a number of years have partridges been so numerous at the Soo as this fall. The other morning a plump partridge flew into town and alighted in a tree on Division street. The ordinance preventing the shooting of firearms within the city limits prevented the slaughter of the bird. That same afternoon Mayor Sullivan picked up a partridge in a dying condition at the corner of Portage avenue and Ashmun street. Only recently a Soo man captured a partridge in a city street with his hands.

Will Remove to Florida—

H. D. Brainerd, who for several years has been in charge of the L. Stephenson company's lumber office at Escanaba, and who is one of the best known men in the city, has resigned his position and with Mrs. Brainerd will leave in a few days for Florida, where they will make their home. Mr. Brainerd spent several weeks in Florida last winter and he was so favorably impressed with conditions there that he has now decided to go there to remain permanently. He is one of the pioneers of Escanaba.

Menominee Girl Writes a Play—

Miss Katherine Stiles, who has been engaged in newspaper work at Menominee for several years, is the author of a play which has been sold to the Winger brothers, who last week played an engagement at the Menominee theater. The play is a comedy drama in three acts, the title of which has not been decided upon as yet. It is a newspaper story. Charles Winger is to take the leading role of a city editor in love with the niece of a politician, whom the newspaper man exposes as the result of an election fraud. The play will be put into rehearsal within a short time and will be played on the company's return

engagement at Menominee. This is Miss Stiles' first attempt as a playwright, although she has already sold several vaudeville sketches and has been doing considerable magazine work under the pen name of Margaret Dale. A holiday book has just been completed by the young woman. It is called "The Vale of Cashmere" and is similar to a book of verses which she compiled last year under the name of "Pansies and Rosemary."

Wife's Affections Worth \$500—

According to a verdict rendered by a jury in the Delta county circuit court at Escanaba, Charles Olson must pay Otto Christenson \$500 for alienating the affections of Christenson's wife. It was alleged that because of the attentions showered upon Mrs. Christenson by Olson that she left her husband and the couple have not lived together since. The defense claimed that the suit was brought as the result of a blackmailing scheme and that the defendant was in no way guilty of the offense charged. A letter that had been written by Olson to Mrs. Christenson, shortly after her separation from her husband was introduced in evidence by the plaintiff and proved damaging to the claims of the defense. Christenson sued to recover \$5,000.

Murder at Manistique—

A Macedonian named Louis Carfield, an employe at the tannery at Manistique, was murdered late last week by a stranger, a fellow countryman, who arrived in the city only the day before. The deed was committed on the road leading to the tannery from the main road. Carfield was no doubt instantly killed, for one ball entered his head through the eye and several bullets passed through his neck and body. The name of the man suspected of the crime is unknown at present. The victim came to this country only last month and is believed to have been followed by his assailant with a deliberate intention of murder. A feud is suspected.

Up for Office He Doesn't Want—

Attorney A. L. Sawyer of Menominee has been placed in a peculiar condition. He is on the Democratic ticket as a candidate for country drain commissioner without any desire on his part to run. He gave notice some time ago that his name should be withdrawn, but the chairman of the county committee failed to take his name from the ballot and now it is too late to have it removed. Mr. Sawyer was not enough moved. Mr. Sawyer was not enough moved. Mr. Sawyer was not enough moved. Mr. Sawyer was not enough moved.

Wife Asks a Divorce—

Divorce proceedings have been started at Menominee by Mrs. Ida Davis against her husband, now of Detroit. Papers have been filed with County Clerk Hansen, and it is the intention of the complainant's attorney to have the case tried at the November term of circuit. In her petition for a divorce the wife charges her husband with cruel and inhuman treatment. According to the papers, the couple were married in 1886, but have not been living together for eleven years. There were seven children born to the union, three of them still living. In her petition for a divorce Mrs. Davis is also asking for the custody of her children, Nina, aged sixteen, and Fred, age fourteen. The other living child is over twenty-one and is married. It is alleged that Davis moved to Detroit some years ago and since that time has failed to communicate with his family in any way. Mrs. Davis also accuses him of consorting with other women.

Little Boy Lost in Woods—

Somewhere in the forest wilderness surrounding Danforth settlement, in Delta county, a little boy but three and one-half years old, is supposed to be lying dead. This child is, or was, Rene Charlier, son of Fred Charlier, a farmer, and he has been missing since Monday. On that day the little fellow wandered away from home and has not been seen since, although his parents and their friends have been and are desperately searching for him. Men employed by the National Pole company at Newhall are also engaged in the search, in which experienced engineers in the employ of L. Stephenson company are likewise taking part. The work will be continued until he is found, living or dead. It has been learned that Matt Flynn of Escanaba, while in the woods near Newhall on Tuesday, heard a child's cries coming from a swamp which he thought away, but as he was assured by his companion that the cries came from a wildcat, he paid no further attention to the matter. It is now believed that the cries were made by the lost child.

Our showing of fall neckwear of "Doublewear" shape is but one more of these forcible demonstrations of this store's position as a "Style Centre" and of our steady progress towards the betterment of qualities.

As the name applies these neckscarfs can be worn twice as long because they can be tied on either end and are therefore of double value to the wearer.

Persian effects and rich combinations in overshot weaves and checks in pure silk thread are the predominating styles for this season and they become doubly interesting because of the moderate pricing.

75c and \$1.00 for either reversible or flowing end.

Mining News

NOTES OF COPPER NEWS.

According to Globe (Ariz.) advices, the two churn drills at work on the Live Oak property continue to find ore of good commercial value. The ore body is now estimated to contain fully 10,000,000 tons of ore assaying from 2 per cent to 2 1/2 per cent copper. No limit is set however, as the land unexplored by the churn drills extends 900 feet west and 2,000 feet south of the holes sunk furthest from the vertical shaft in those directions.

With 250,000 tons of ore in the stock pile, the underground haulage and extraction system nearly finished, and the construction of the concentrator and auxiliary buildings almost done, the Miami Copper company expects to begin treating 1,000 tons of ore daily beginning January 1. The total amount of work, including raising and shaft work accomplished so far is 75,000 feet, or over fourteen miles. About 624 men are being employed in mining and mill construction. Only about 265 feet of underground work is being done weekly in making a few connections between the extraction drifts and putting up several raises to the stockpile on and above the 420 level.

North Butte's production is now 80 per cent of normal, showing the same relative diminution that other copper producers generally, and the Butte camp especially, are now making. This gives it a monthly output of 2,150,000 pounds, and the production is actually varying between 2,100,000 and 2,200,000 pounds. In spite of considerably increased costs due to a more active development program and a very thorough underground preparation for the Tomlinson suit, it is asserted that there is no month this year when costs of refined copper, at New York, have reached ten cents a pound, and the average for the year will probably be under 9.5 cents. This is equal to a net return for the present year of about \$2.50 per share, based on the present copper market for the rest of the year.

LADIES! If you have not yet selected your Fur Pony Coat, do so today. The factory Fur display closes this evening. THE PARIS FASHION.

A Step Ahead in Quality
A Step Behind in Price

Is where we stand this season. As far as price alone is concerned, there are many stores where you can buy clothes at the same range of prices we ask—but they do not measure up to ours in style, material and workmanship qualities. Buying clothing from us eliminates all chance or speculation—the garment will "make good"—or we will.

Suits and Overcoats for Men and Young Men

Ranging in price from \$10.00 to \$25.00, which are the perfection of the tailoring art. Every garment is made from the best possible materials at the price—hand tailored all the way through and guaranteed to give perfect satisfaction. The proof of style and fit is ready for you in a "Try On."

Pay as you Get Paid

Don't buy cheap, ill fitting clothes because you are short of cash. Our system will enable you to buy new, good fashionable clothes of the finest materials.

JOHN N. OUTHWAITE IN BOAT ACCIDENT

Ishpeming Man Had Narrow Escape When Boiler in "City of Berlin" Blew Up.

John N. Outhwaite, son of J. P. Outhwaite, was one of the employees on the steamer "City of Berlin," the boiler of which exploded last Wednesday in Sturgeon Bay. Friday Mr. Outhwaite received a letter from his son, telling of the accident. Saturday Mr. Outhwaite received a copy of The Manitowoc Daily News, containing a story of the occurrence. Mr. Outhwaite was on the upper deck at the time of the explosion, and was not injured.

The Manitowoc News had the following reference to the explosion:

"As the big wooden steamer City of Berlin was towed into the harbor at noon today by two tugs and docked below the shears, it presented a terrible sight. The entire rear end in the vicinity of the boiler room was a mass of wreckage, caused when one of the boilers exploded in Sturgeon Bay yesterday. Joseph Yachtman, a coal passer and freeman in the hold at the time, was so badly scalded by escaping steam and water that he died in a hospital at Sturgeon Bay this morning.

"The injured man was lame to the core. After the boiler exploded he came on deck, walked forward and told of the accident. But his lungs were literally cooked from inhaling steam and gases, and he soon collapsed. All the bulkheads about the boiler room were smashed and the boiler that exploded forced itself about ten feet aft, breaking through into the cabin.

"There was so much water escaping that the fire that started was drowned out. The repairs here will take some little time. The City of Berlin is of 2,450 gross tons, 300 feet long and was built in 1881, being rated A1 1/2."

VERDICT RETURNED.

Coroner's Jury Fixes Blame for Death of William Russell Upon Trainmen.

The coroner's jury in the case of the death of the late William Russell, the Chicago & Northwestern Railway company's engineer who was killed last week in a head-on collision near Crystal Falls, and who was well known in this city, found that the cause of the wreck was the failure of the conductor and engineer on the train that ran into the one being pulled by Russell to properly read their orders. The jury also censured the Northwestern management for not employing a telegraphic operator in the Crystal Falls office. The verdict was as follows:

"Decided came to his death in a railroad accident on the Chicago & Northwestern railway about 1,000 feet west of Panola at about 5:30 a. m., Oct. 24, 1910, engines 487 and 1,341 meeting there in a head-on collision. The wreck was caused by failure of Conductor Felix Hughes and Engineer Patrick Tolin of engine 1,344 to obey orders and remain in Crystal Falls until Conductor Connelley and Engineer Russell of 487 arrived there. In testimony whereof the said coroner and the jurors of this inquest have heretofore set their hands the day and year aforesaid."

MEETINGS WELL ATTENDED.

The semi-annual meeting of the Green Bay district of the United Norwegian Lutheran church, held in the Lutheran church on Ridge street the latter part of last week, closed Sunday evening with an audience that overflowed the auditorium. Rev. G. Klundal of Neeah, Wis., delivered an impressive sermon on "Luther and the Lutheran Church."

The Wisconsin clergymen present were Rev. Horneland of Menomonie, Rev. Klundal of Neeah, Rev. Espeseth of Manitowoc. The visitors left the city with a favorable impression of Ishpeming and the people they met here.

DISPLAYS CLEVER TRICKS.

Brush, the wizard, who will appear at the Ishpeming theatre tomorrow evening, for the second entertainment of the course under the auspices of the Ladies' Reserve Fund society of the Presbyterian church, is said to give 300 clever magic tricks. His basket trick creates much comment. Another illusion is the apparent cremation of a rabbit, which he resurrects from the ashes. Mr. Brush carries a half ton of paraphernalia for his performance.

DEATH OF MRS. REARDON.

Mrs. Johannah Reardon, one of Ishpeming's oldest residents, who had lived on South Pine street for many years, died yesterday noon, after having been in poor health for some months. The deceased was ninety years of age. She lived with her daughter, Miss Ellen Reardon.

MARRIED YESTERDAY.

John Roberts of Calumet, a former well known resident of the National, and Miss Minnie McNeil were married yesterday afternoon at the home of the bride's mother, Mrs. Sarah McNeil, at the National mine. Rev. C. L. Finch, pastor of the Salisbury Methodist church, officiated. Mr. Roberts and his bride left on the afternoon train for Calumet, their future home.

ISHPEMING IN BRIEF.

Miss Mabel Watson of Marquette is visiting Miss Jeanette Tonneson.

A. C. Braastad left last night for Chicago where he will spend a week or ten days, on business.

Win Keller, a well known lumberman of Covington, looked after business in the city yesterday.

Mrs. George F. Farney and three children have gone to Duluth on a visit to Mrs. A. J. Lyons.

Miss Mary Maloney entertained a number of her young friends last evening with a Halloween party at the home

of her parents, Mr. and Mrs. J. M. Maloney, on Ridge street.

Mrs. George Jones arrived home yesterday from Milwaukee, where she visited for some time past.

Frank G. Jenks, county clerk, and J. H. Primeau, register of deeds, were up from Marquette yesterday.

The ladies of the Luncheon clubs will entertain their gentlemen friends this evening at the home of W. H. Johnston.

The Misses Edna Parsons and Marie Newett entertained at a Halloween party last evening at the home of the former.

Miss Rose Fitzpatrick left yesterday for the copper country, where she will take a position as kindergarten teacher at one of the schools outside of Calumet.

Births recorded in the city yesterday were a daughter to Mr. and Mrs. August Morell, 608 North Seventh street, and a son to Thomas Boase and wife, 405 East High street.

Lithographs of Chase S. Osborn and Charles E. Townsend, candidate for governor and senator, are displayed in many of the windows of the Ishpeming business houses.

The Republican city committee has decided to perfect a thorough organization in each ward to get out as large a vote as possible a week from today. The members of the several committees will urge voters to go to the polls.

The annual meeting of the members of the Ishpeming Snow Shoe club will be held this evening at 8 o'clock in the Marquette County Gas & Electric company's office. Officers will be elected and plans discussed for the coming winter.

Irving Tonkin of this city will be married today at Hibbing, Minn., to Miss Mabel Francis, daughter of James V. Francis, a former resident of Ishpeming. Mr. and Mrs. Tonkin will reside here and they will be at home to their friends after the first of the year.

The funeral of the late Mrs. Eta Haakenson of Michigan, held Saturday afternoon at the Norwegian Lutheran church there, was attended by many friends. The deceased, who was within three days of being eighty years of age, was hale and strong until a few months ago. She was well known and was highly esteemed at Michigan, where she lived for many years.

Fred Harris of the National and Miss Elizabeth Parsons were united in marriage Saturday evening at the home of the bride's father, William Parsons, 100 Excelsior street. The ceremony was performed by Rev. C. L. Finch, pastor of the Salisbury Methodist church, in the presence of a number of relatives and friends of the contracting parties.

Committees from Marquette, Negaunee and Ishpeming lodges of the Fraternal Order of Elks met in Ishpeming Sunday afternoon to formulate plans for the annual memorial exercises, to be held at the Ishpeming theatre on the first Sunday afternoon in December. The arrangement of the program has been left in the hands of the Ishpeming committee, who will meet this evening to work out the details.

Phil Secore, who played third base on the Ishpeming baseball team last summer, is now in Portland, Oregon, where he expects to spend the winter. He will probably remain there permanently. Secore was one of the best ball players in the Marquette-Iron county league last season.

Victor records for November on sale at Grinnell Bros. (11-1-21)

LUMBER CUT WILL BE SMALLER

General Inclination to Curtail in the Penobscot River District

Bangor, Me., Oct. 28.—Although men are still going into the Maine lumber woods in considerable numbers, the bulk of the log harvesters for 1910-11 have been at work for two weeks, and in most localities operations are well underway. There is a general inclination to curtail this season, and the Penobscot river cut will probably fall considerably below that of last winter. The Great Northern Paper company alone will curtail about 25 per cent, having a considerable stock of logs on hand, and a like reduction by other operators, which is now regarded as a fair estimate, would bring the total cut on the river below 200,000,000 feet. However, a very favorable season might encourage operators to put in more logs than at first intended.

On St. John and Aroostook waters, also, a reduction of fully 25 per cent in the cut is contemplated, partly because of the same conditions that affect the Penobscot cut, and partly because of the repeal of the so-called Pike law, which will take effect next August. Under this law lumber cut by Americans on Maine soil, driven to New Brunswick mills owned or operated by Americans, and there manufactured, has been admitted to American markets free of duty, and a very large part of the Aroostook county log cut has been disposed of in this way—with, it is suspected, a considerable quantity of New Brunswick logs as well. With the Pike law off, all lumber manufactured in the Canadian province must pay a duty of \$1.25 per thousand, and it is thought that this, with the long and expensive drive down the St. John, will discourage most of the lumbermen from continuing such a roundabout method of moving Aroostook's forest products.

PETER LORILLARD'S SONS.

Death of Louis Recalls Pierre's Famous "10000 Day" Remark.

New York, Oct. 27.—The death of Louis Lorillard in Paris recalls many incidents of the interesting family of Peter Lorillard, who made a fortune in the tobacco business.

Louis L. was the youngest of four brothers; the others were Pierre Lorillard, whose horses, including the Derby; Jacob Lorillard, Jr., and George Lorillard, who died in his youth.

To Pierre Lorillard was credited the remark, "No gentleman can live on less than \$1000 a day." All the brothers were equally lavish and hospitable, but quite devoid of the miserly habits of the most popular men in New York society. Like his brothers, he was a sportsman;

he was fond of yachting particularly. His first yacht was the Eva named after his sister. The boat was very fast and won often in the New York Yacht Club's races. Then he had built a larger yacht, the Wanderer, a fine type of the ocean-going schooner. On the Wanderer Mr. Lorillard made many long voyages, always with a party of congenial friends aboard.

Louis passed many seasons at Newport. In December, 1906, he and his brother-in-law Robert L. Beekman, were among the members of the Newport representative council elected by the villa owners.

Mr. Lorillard's aunt, Miss Catherine Lorillard Wolfe, who requested her collection of paintings to the Metropolitan Museum of Art, bequeathed to him two splendid villas at Newport. Mr. Lorillard sold Vinland for \$1,000,000 to the late H. McK. Twombly, who married Miss Florence Vanderbilt. The price was the highest ever paid for a summer residence at Newport, or probably anywhere else in this country. The next highest price was received when Cornelius Vanderbilt paid \$400,000 for the Brakers, which did not include, of course, the villa which Mr. Vanderbilt created on the estate.

ENGLAND PLANS TO GROW SUGAR BEETS AT HOME.

Foreign Labor Contracted When Danes Refuse to Aid Cultivation.

Copenhagen, Oct. 26.—The proposed erection of a beet sugar factory in England, with the necessary cultivation of beets, has been followed here with great interest. Although sugar is to a certain extent a protected article in Denmark, large quantities are, nevertheless, yearly imported. At the same time the home manufacture of sugar is one of the most flourishing among the Danish industries and the growers of roots find it an exceedingly profitable business. The unannounced Danish sugar factories have during the last three years paid dividends at 17 per cent, 25 per cent and 23 per cent. Of course this fine result has been achieved only after many years of experiment.

There is only one drawback connected with beet cultivation so far as this country is concerned—the Danish farm laborers refuse to engage in the taking up, sorting and delivery of the roots during the autumn months, which is very rough and dirty work. To meet this emergency, contracted foreign labor has to be employed, and thousands of laborers, male and female, from Galicia are yearly emigrating to Denmark, where they find ready employment. They leave again as soon as the beet harvest is over. A special act had to be passed by Parliament in order to deal with this question, as the root workers who are employed are not the most desirable citizens. Mr. Rider Haggard has returned to Copenhagen from a visit to the best plantations at Lolland and Falster, and has expressed his admiration of and satisfaction with all that he has seen.

ENJOY THE POSTAL CARDS.

"This post card mania that has been sweeping the country for several years certainly has helped many a poor mail carrier to while away otherwise profitless hours," said the stout man in the Woodward car, jerking his head in the direction of a gray-suited employe of Uncle Samuel, who was making his rounds with a sack bulging with letters.

"I don't see just how you figure that out," replied the man addressed. "It must have increased their labors greatly."

"True enough," was the rejoinder, "but it has its compensations that should more than offset the additional work. I was on a Fort street car coming to the city the other day and out beyond Clark avenue a ways a mail carrier had evidently been making collections from boxes in the vicinity got into his seat until he dove down into the bag and brought out a fistful of letters and post cards—mostly the latter. He hurriedly picked the letters out and put them back in the pouch, then began consideration of the cards.

"There wasn't anything secret about his operations. With the utmost amount he looked at the addresses, read the messages, and then turned the cards over to see what was on the reverse side. Every now and then he would strike a verse or a picture that caused him to smile, and he seemed to be getting all sorts of fun out of it.

"The climax came, however, when, after looking over all the post cards this fellow drew a paper from the pouch, carefully slipped it out of the wrapper, and read until we got pretty well up toward the postoffice, when he adroitly put it back into the wrapper and deposited it with the rest of the mail in the bag.

"Further back, somewhere around the Boulevard, as I recall it, another carrier climbed aboard. He played in hard luck, however, for at the next corner, just as he had started in on his supply of post cards, a woman acquaintance climbed aboard and sat down in the seat with him. Of course, he couldn't talk to her and read post cards too, and she insisted on talking. The carrier seemed quite peeved to be thus deprived of his rightful source of amusement, and I, for one, really felt sorry for him. You

NOVEL IRRIGATION PLANT IS SUCCESSFUL

Pumps Mounted on Barges on the Missouri Supply the Needed Water.

Williston, N. D., Oct. 31.—The floating barges which support the pumps that lift water for the great Williston irrigation project, the only one in North Dakota, are being taken from the Missouri river in the same manner that steamships are taken from the water, upon ways. This is to prevent damage to them by the spring freshets of ice. The removal of the pumps barges marks the close of the first full year of the operation of the plant, a year's experience which has convinced Engineer Sanford, who is in charge, that the project is a great success and will make possible very profitable cultivation of at least 25,000 acres of land heretofore considered waste. One man this year raised onions by this irrigation, harvesting 820 bushels to the acre. These found ready sale at \$2 a bushel and the farmer's profit, after allowing for all expenses of seed and cultivation, was \$1000 an acre. This gives some idea of the future of irrigated land heretofore considered waste. One man this year raised onions by this irrigation, harvesting 820 bushels to the acre. These found ready sale at \$2 a bushel and the farmer's profit, after allowing for all expenses of seed and cultivation, was \$1000 an acre. This gives some idea of the future of irrigated land heretofore considered waste.

The irrigation project here is unlike any other project on account of the behavior of the Missouri river. The stream is subject to sudden rises and falls and the channel frequently shifts. Because of these conditions the floating barges have been introduced, fitted with pumps and flexible pipes. Thus an engineer's ingenuity has mastered the idiosyncrasies of an erratic river which at first, and for a long time, had threatened to make practicable irrigation in this district impossible. Another natural element, however, helped the engineer—lignite. At a distance of a mile from the river an electric power plant was constructed which now develops 2000 horse-power. The fuel for this comes from a mine of lignite coal in the immediate vicinity. This mine covers 1000 acres. The coal passes to the power plant down an inclined shaft and is crushed at the end of the shaft, and then passes to the boilers. It is estimated that one acre of lignite coal develops 1000 tons to the foot of vein. With a nine-foot vein Engineer Sanford estimates that there is fuel enough to last 1000 years if the plant were run twenty-four hours a day every day in the year; so there is no possibility of an immediate shortage of the supply. The power developed at this plant lifts water a maximum of eight feet in water and practically insures successful cultivation. This year water was delivered to 1520 acres of land which was sowed, about 600 acres to wheat, 240 to oats, 290 to alfalfa and some to miscellaneous vegetables and some small grains. The best yields of wheat were thirty to thirty-two bushels to the acre. Alfalfa produced three to three and a half tons to the acre, and alfalfa is worth \$15 a ton here at Williston. The best paying crop this year was the alfalfa seed crop of Seneca Brownell, which will return to him more than \$600 an acre. Alfalfa seed is worth twenty to thirty cents a pound, or \$12 to \$18 a bushel, depending on the variety. Alfalfa raised for seed is usually cut only once in the season, which makes it possible to get a crop of both seed and hay, and a good part of the alfalfa land is sowed with wheat as a nurse crop. The cost of construction of this plant is charged against the land under the project and is to be paid in ten annual instalments, without interest. The cost of installation is \$38 an acre for the acreage under the ditch, and when it is paid the plant goes to the Water Users' association. The operation charge, which is for the supply of water, will be perhaps \$1.50 to \$2 an acre each year, which looks like a small sum to pay for absolute crop insurance and largely increased values. The principal difficulties in the way of the administration of the project, up to the present, have been the change from the old methods of dry farming, over a large tract of land, to the new methods of intense cultivation under the irrigation system. It has been difficult to convince farmers who have been accustomed to farming a quarter to a half section of land that better results and greater profits may be obtained by the closer farming of forty or eighty acres. Yet it is certain that this change will come about and that most of the farms here-

Negaunee Department

MANY NEW PLANTS TO BE INSTALLED

Cleveland Cliffs Iron Company Will Operate All Its Mines by Electric Power.

The Cleveland-Cliffs Iron company is gradually increasing the number of plants being operated by electricity at its mines on both the Marquette and Swanzy ranges, but it will be from two to three years before all of the properties will be equipped with electric hoisting and other machinery. The plants now operated by electricity receive their power from the new Maas mine station, as the one on the Swanzy range has not yet gone into commission. Each of the central plants will have a capacity of 1,500 kilowatts, but at the present time only about 500 kilowatts are generated.

When the machinery at all of the mines is operated by electricity, several of the boiler plants now in use will go out of commission, but they will be maintained for emergencies. At present the underground haulage systems at the Maas and Negaunee mines in this city, and the Lake mine in Ishpeming are operated by electricity. The hoisting plants at the company's two new North Lake shafts and air compressor at its new Barnes property, four miles west of the North Lake mine, also have electric power. The company's shops on West Division street in Ishpeming, also the Cliffs shafts shop, are now operated by electricity. It will be considerably before the several plants at the Cliffs shafts property will be changed from steam to electricity, but the new crusher plant and the surface tram being installed there will have the power from the start.

On the Swanzy range both the Princeton No. 1 and No. 2 mines, also the Austin mine, are operated by electricity, and the plant at the Smith mine will soon be ready for use. The company furnishes electric lights for most of its mines, as well as the town of Gwinn. The shops and pumps at the Princeton properties were recently connected with the plant. While the cost of installing the transmission stations and the various auxiliary plants will represent an enormous sum, there will eventually be a large saving in fuel and labor, as many boilers will go out of commission as the result of the change. A much greater quantity of electricity than is now distributed can be generated without increasing the operating expenses of the central plant, as 500 kilowatts is a light load for the big turbine.

MUCH COAL ARRIVING

Mining Corporations Putting in Supplies for Winter Months.

A number of cargoes of coal have been received at Marquette for the mines of Marquette county during the past week or two, and many more are expected before navigation closes. The Oliver Iron Mining company received a cargo yesterday. The coal is being dumped at the Regent group here and the Hard Ore and Section 16 mines in Ishpeming. A new coal trestle is being erected at the latter property. It will not be completed for several days, but part of it is ready to receive coal. The one now in use has shakedown runs such an extent during the past week or ten days that several of the switching crews on the range are not now working steadily.

POINTERS FOR HUNTERS.

Frank G. Jenks, the county clerk, has issued a circular containing much information concerning the game laws. The following relative the killing of game and fur bearing animals, is of particular interest at this time: Moose, Elk and Caribou—Unlawful to kill until 1913.

Deer—Open seasons from Nov. 10 to Nov. 30, inclusive. Unlawful to kill deer without having procured a license. Resident hunter's license, \$1.50; non-resident hunter's license, \$25.

Unlawful for any person to kill more than two. Unlawful to kill in red coat, or fawn or spotted coat. Unlawful to pursue, kill or capture any deer while it is in the water. Unlawful to use dogs in hunting. Unlawful to use artificial lights in hunting.

Unlawful to knowingly trap, injure or kill any deer of offspring thereof, which are kept in or have escaped from any private enclosure.

Squirrel—Open season for fox, black and gray, from Oct. 15 to Nov. 30, inclusive. Unlawful to kill in public or private parks, or in any incorporated city or village.

Beaver—Unlawful to kill until Jan. 1, 1913.

Dear, otter, fisher, martin, fox, mink, raccoon and skunk—Unlawful to take, trap or kill from April 1 to Nov. 1. Muskrat—Unlawful to take, trap or kill from April 15 to Nov. 1.

Muskat or beaver houses—Unlawful to destroy, disturb or molest in any way, or set any trap within six feet of a muskrat house.

Wolf, lynx and wildcat—Bounty for wolf over six months, \$27; for wolf under six months, \$10; for lynx, \$5; for wildcat, \$3.

LITTLE INTEREST IN POLITICS.

Fear that Many Voters Will Be in Woods Hunting Tuesday.

But little talk about politics is heard in Negaunee and if the city Republican committee does not take hold to arouse many voters will not go to the polls on election day. Many people have already planned to leave on deer hunting trips either Sunday or Tuesday, election day. The impression prevails that the deer season opens on election day, but this is not so, as it does not open until Thursday, the 10th.

The only Republican rally that will be held in Negaunee will take place Thursday evening at McDonald's opera house, when Professor Thomas W. Nadel, dean of Olivet college, will be the speaker. The music will be furnished by the Negaunee Italian band.

An effort will be made to get out a large attendance. One of the party leaders yesterday said that committees will be appointed in the several wards to work on election day.

MANY COMING FROM ENGLAND.

William Oates arrived in Negaunee Sunday from England and will remain here permanently. He is a brother of Harry Oates of this city, who plays with the Ishpeming band. Some fifty young Englishmen have located in Negaunee and Ishpeming during the past three months. The new arrivals report that many others are preparing to come here. One of the new comers yesterday said that many families in Cornwall are selling their homes and household goods and leaving for America.

CHURCH ENTERTAINMENT

The members of the Mitchell Methodist church choir will give an entertainment a week from next Saturday evening, the 12th, when a musical play, entitled "The New Minister," will be produced. The play tells a humorous story, which deals with the arrival of a minister in a new field of labor. Many funny things happen.

LOCAL LAOCONICS.

Dr. J. Verellino was called to Iron Mountain Saturday night, on professional business.

C. P. Hall, representative of the Spaulding & Merrick Tobacco company, of Chicago, is in the city for a few days.

Important business will be transacted at the regular meeting of St. Paul's court of the Catholic Order of Foresters next Thursday evening.

Mesdames Thomas Pellow and H. W. Sheldon will entertain with euchre Thursday afternoon at the Pellow residence.

Mrs. J. R. Williamson entertained with cards Sunday afternoon at her home on Lincoln street. Mrs. A. F. Willman won first prize.

Lithographs of Chase S. Osborn and Charles E. Townsend, Republican nominees for governor and state senator, respectively, have been distributed in Negaunee.

Fred Robear, who left here seven years ago for the Mesaba range, is here on a few days' visit to his folks. Mr. Robear was married after leaving Negaunee, and his family lives at Hibbing, where he has a good position.

Mrs. C. A. Monroe, formerly of this city, who spent the past several days here, left last night for her home in Duluth. The Catholic church congregation of Duluth is to hold a big fair this week and Mrs. Monroe is chairman of the refreshment committee.

A number of Negaunee young people attended the Halloween party given by the Owl society in Braastad's hall at Ishpeming last night. It is expected that a branch of the Owls will be organized here some time during the winter.

Automobiles which had been temporarily put out of business by the snow storm were to be seen on the streets again yesterday. There is now very little snow on the ground, and it is expected that all of it will disappear before there is another storm.

The Duluth, South Shore & Atlantic Railway company's concrete crew, employed at the new union passenger station, resumed work yesterday, after being idle for several days on account of the unfavorable weather. The work will be completed. The painters are now at work on the outside of the building and the interior finishing work will be started within a few days.

WHY EDUCATED MEN BECOME SOCIALISTS

"Red-Flag Army" as Ideal Attracts Many Men That It Repels in Reality. It would form an interesting and enlightening study if a psychologist of accepted eminence and repute were to apply his analytical powers to the consideration of the types of mind attracted to Socialism. Although the main body of the red flag army undoubtedly consists of persons of inferior education, and small groups of cranks led by men of limited mentality whose minds are governed by one idea, it is indisputable that Socialism has claimed the adherence of men whose culture and position in the world of letters are undoubted. Let us give the devil his due. Men like William Morris, H. G. Wells and Anatole France—men who are not only the opinion of such men as bankers and captains of industry carry far more weight than the views of those who regard affairs from a purely academic standpoint. Still, the fact remains that men of logical minds and far-seeing in-

lects have associated themselves with the advocacy of Socialism. Socialism as an ideal attracts the very men that as a reality it would repel. What is the explanation? I think that it is to be found in the fact that the artist regards politics from a peculiar position. He is frequently a man haunted by visions, cast down by the sight of a beggar's haggard form, sent into a trill of delight by a moonrise. The sympathies of his intellect are with the cultured; the sympathies of his heart are with the poor. Having, as he must, the highest of poverty and ignorance, he willingly embraces every opportunity that presents itself to his unmethodical nature to relieve it. Failing to perceive the inherent difference between private charity, into which the personal element of sympathy and encouragement enters, and state charity which panperizes and enervates, he frequently embraces the Socialist doctrine because of its supposed generosity to the poor.

It is here that aloofness from the practical world leads him astray by translating what must essentially be a personal feeling into an impersonal service. The essence of charity is its voluntariness. The state treasury is not an inexhaustible storehouse of wealth, but the exactions from the earnings and private wealth of taxpayers; and to extract money forcibly from one class to squander it upon what is to so often an imtemperate, unwhitely and idle section of the community is not charity, but sheer robbery. It is immoral in its incidence and degrading in its effect. Instead of helping the poor to earn an honest livelihood it deprives them of all incentive to strive toward a better life. It is a state support of children and a direct contravention of nature's primary law that a man should support his offspring, and it is a responsibility that nature affords and pride should dictate as a duty and hold dear as a joy. It is this deliberate trampling of nature's laws that forms the fallacies underlying the basic principles of Socialist theories. In reality they are fundamentally anti-social and inimical to the higher development of human destinies.—Lionel Valdar in the London Pall Mall Gazette.

ONCE RESIDED IN THIS CITY

Supreme Court Rules Against George H. Purchase and E. C. Glenn, in Suit Brought by Stockholders in Oil Lease Project Floated in Lower Michigan.

Former Marquette Men Said to Have Collected \$12,500 to Buy an Ontario Property, in Which They Already Owned a Two-Thirds Interest—High Finance.

George H. Purchase and E. C. Glenn, both at one time residents of Marquette, are the defendants in an interesting case that has recently been decided by the supreme court, after having been appealed from the circuit court of Washtenaw county.

Suit was brought against Purchase and Glenn by T. E. Mast and others, who had invested in an oil proposition floated by the two former Marquette men.

In March, 1908, a Washtenaw county jury decided that Purchase and Glenn represented to the plaintiffs that the amount to be paid Miller for the lease and a well already sunk on the property was \$12,500; that they represented that the lease covered valuable oil lands; that they (Purchase and Glenn) had an option on the lease; that Purchase and Glenn did not as a matter of fact pay \$12,500 to the owners of the lease; and that plaintiffs relied on whatever statements Purchase and Glenn made as to Miller being the owner of the lease.

The court decreed that the plaintiffs were entitled to an accounting for the difference between the amount received in subscriptions (less certain expenses) and the amount actually paid over to Miller by Purchase and Glenn, and the supreme court has affirmed the decision, fixing the amount to be accounted for at \$9,000, with interest from Sept. 1, 1906.

TO ORGANIZE GRANGE. Farmers of Marquette Township Will Hold Meeting This Evening.

A meeting of the farmers of Marquette township has been called at the town hall at 7:30 this evening, the object of which is the organization of a subordinate grange, under the jurisdiction of the Michigan state grange.

THAT FOOTBALL GAME. A Musing Correspondent Describes Contest With Marquette High.

The Munsing High school team played a game Saturday afternoon with the Marquette High school. The game was well played and was free from any rough work, or the continual wrangling that goes with many games.

The defensive work of the Marquette team was very good as the ball fell in Marquette territory. Tricks, forward passes and line bucks were tried by the Munsing team and several times only a few feet lay between the ball and the coveted goal, yet Munsing was unable to score.

A HOUSEHOLD MEDICINE. To be really valuable must show equal results from each member of the family using it.

WILL HAVE LIVELY TIME. Program for Men's Club Meeting at Guild Hall Tomorrow Night.

The regular weekly meeting of the newly organized Men's club of Guild Hall will be held tomorrow evening, and the program prepared assures that the evening will be one of great enjoyment.

An effort will be made to have a special program of some kind every Wednesday evening. The program arranged for tomorrow night will be of an athletic nature and basketball and other games are likely to be played as they never were before.

Leans—H. J. Waterbury, A. T. Roberts, W. H. Elliott, P. B. Spear, E. G. Temple, H. T. Carrier, A. L. Thayer.

Other events on the program are a wrestling match between Louis Gennett and H. W. Price, boxing bouts, swimming contests, organization of a bowling tournament, billiards, pool, ping pong, bridge and music.

INVOLVES A FINE TAXATION PROBLEM

Should Assessors Consider Undeveloped Water Power in Fixing Valuations?

An article written by a staff correspondent of the Detroit News, who was in the city last week, and which was published in that paper Friday, concerning the city electric light plant and the proposed purchase of ten additional vertical feet of water power from Ayer & Longyear, has been read with considerable interest locally.

Here's a little object lesson in the value of water powers. It also involves a discussion of taxation such as perhaps the next legislature will be asked to consider.

INTERESTED IN N. Y. DECISION. Right of Fraternal Societies to Readjust Rates Vitaly Concerns Maccabees.

Fraternal beneficiary associations all over the country are deeply interested in the recent decision of the appellate division, fourth department, of the supreme court, state of New York, in the case of Wright against the Knights of the Maccabees of the World, because it involves the right of such associations to readjust the rates of insurance contributions from time to time.

So Declares Secretary Tice of the Brotherhood. Paul Tice, of Houghton, secretary for the state legislative board of the Brotherhood of Railroad Trainmen in Michigan, is aiding in the campaign of Chase S. Osborn.
