LOCAL PITCHER LOST SLUGFEST . TO LEAGUE LEADERS AT NEGAUNEE.

(Special to the Morning Press.) Negaunee, Mich., Aug. 5.-In a game resplendent with errors by both teams and in which a strong suspicion was offered that Love, of the Escanaba team, did not play up to his ability, the league leaders slaughtered Escanaba, total 13 to 9. Love was in the box for two innings and was batted to all corners of the lot, a total of five hits being taken off his delivery, two of which were two baggers and which counted for five runs. Taken from the box and placed in right field he dropped one fly and misjudged another, causing Capt. Aronson to pull him from the game before the close of the fourth and sending Scanlon into that field.

Aronson went into the box when Love was hoisted and with fair support it is believed would have won his game. With Love working up to form it is believed that Escanaba would have carried away today's game easily as all of the supporting players were clouting the ball unmercifully, getting a total of ten hits off Rosevear.

The Jinks for the Escanaba team developed early this morning when it was found that Lindquist was ill with tonsilitis and unable to leave his bed. Physicians were summoned at once but the mighty sticker was not able to get into the game. Thompson accompanied the team on the trip, luckily, and he was sent in at first. The Chicagoan showed poor form in the two games here, played in prime form today and in addition hit the ball unmercifully, getting a triple, a two bagger and a single in five times up.

Because of the hoisting of Love, several changes were necessary in the

Like Escanaba, Negaunee played a ragged game today, Cullis at short being the chief offender, making four errors in the session, while Rains at third had two.

For tomorrow's game Scanlon will go into the box for Escanaba and it is hoped that Linquist will be able to get back in the game to cover the right lot. Following is the score by innings:

F. D. Roth who has represented the Deere & Webber company of Minneapolis in the upper peninsula for the past year has gone to Minneapolis where he has accepted a position in the office of the company for the remainder of the season. He expects to return to this city about November 1 to take orders through the territory.

Mr. Roth and his family will make their home at Minneapolis, having already shipped their household effects to that place.

GLADSTONE BUSINESS MEN AR-BANGE FOR BIG WRESTLING. TOURNAMENT.

Members of the committee in charge of Gladstone's big two days' celebration on Sept. 4 and 5, last night closed negotiations for a big Cornish wrestling tournament as one of the features of the program.

A purse of \$250 is to be hung up and prizes will be offered as follows: First, \$100; second, \$75; third \$45, and fourth, \$25. James K. Billings of Ishpeming has been engaged by the Gladstone business men to take complete charge of the tournament.

The labor conditions in the vicinity of Escanaba are good in spite of the general impression existing throughout the country, is shown by the fact that large numbers of outside laborers are being imported here.

IS KILLED

BRIDGE FOREMAN FOR ST. PAUL ROAD, KNOWN HERE, CRUSH-TO DEATH AT GREEN BAY.

Chris Hansen, bridge foreman for the St. Paul road with headquarters in Green Bay, and known to a large number of Escanaba people, was crushed between two cars at Green Bay yesterday and instantly killed. Mr. Hansen served as assistant superintendent during the construction of St. Paul dock No. 2 here two years ago and last fall was in charge of a crew engaged in making repairs at the St. Paul docks. During his visits here he formed a large number of acquaintances to all of whom the anouncement of his sudden death will come as a severe shock.

While cars with bridge timber were being switched in the Green Bay yards yesterday Mr. Hansen fell between two of the cars and was crushto death. Definite arrangements for the funeral were not made last night.

MORNING PRESS.

ALBABY, FAMINE

Pasadena, Cal., Aug. 5 .- This city, said to be the home of more wealthy people than any of its size in the world, is facing a baby famine.

Statistics for July, completed yesterday, show that forty-eight babies were born during the month. Local health authorities say that 200 babies per month would be a minimum normal estimate for the city, which has 40,000 Inhabitants.

Because August marks the beginning bases on balls and hit three batters. of what is popularly known as "dog days" and the appearance here of two cases where a supposedly mad dog has bitten children of the city, the following will be of interest from the State Health Bulletin issued by the State Board of Health:

MEN AT CAPITOL

Washington, Aug. 5 .- A considerable number of the members of the house are in danger of falling under the displeasure of their colleagues be-Among this number are eight mem-

Ever since the house concluded its long wait for the senate to get thru with the Canadian reciprocity bill .it has been the policy of the house, and especially the republican end thereof, to push through the public business so that congress may adjourn To this end the republican floor leader has demanded repeated calls of the house in order that there might be a quorum present.

Sometimes men have risen in the house, as did two yesterday, to ask for a leave of absence on important business, but to this the republican floor leader has replied that a member of congress can have no more important business than to be in the house when the house is in session and in this position he had the opensupport of the democratic leader, Mr. Underwood. The requests, therefore, were denied.

Last Friday the roll was called three times to get a quorum. Saturday it was called twice and yesterday once.

Each of these calls found in the list of absentees the following members from Michigan: Messrs Fordney, Hamilton, Loud, McLaughlin, Mc Morran, Samuel W. Smith, Wedemeyer and Young.

Members of congress are paid \$23.93 a day and their traveling expenses, office rent, clerk hire, postage, and stationery are paid for by the government.

Some of the Michigan absentees have explanations to offer for their delinquency. Mr. Young, for in? stance, is a member of the steel investigating committee. Mr. Wedemeyer is said to be laid up with a sprained ankle. S. W. Smith re-appeared in the house thisafternoon. Deputy Sheriff F. W. Aronson is on This leaves five absentees unaccount-

87 YEARS AGO BY TREMEN-DOUS SCORE OF 71 TO 24.

Extracts from the thon Home, the first newspaper published in Isapeming, appearing in yesterday's issue of the Iron Ore, gives an account of a remarkable base ball game played in Escanaba some 37 years ago when the Escanaba Stars trimmed Fayette by a score of 71 to 24. That the score was a remarkable one but not phenomenal is show by the same issue of the Iron Home which gives an account of a game played between Ishpeming and Negaunee when Negaunee won 37 to 15 .

Following is the account of the game played here 37 years ago as given by the Iron Ore:

A game of baseball was played at Escanaba on the 15th inst, between the Stars of Escanaba and the Fayettes, of Fayette. The former were Marquette, Mich., Aug. 5.—Officials successful by the score of 71 to 24. enjoyed by the large crowd that wit-It was also agreed that all teams nessed it. Mr. F. A. Spooner, of the in the league playing tie games this Mutuals of this city, very ably, and to season shall play off on dates to be the satisfaction of all, performed the duties of umpire. The clubs are high-Action was also taken, fixing Aug. ly spoken of as gentlemanly and 24 as the date after which no club in whole-souled fellows, who know how the league may sign new players with- to play ball, and only need a little out consent of the other teams and practice to cope successfully with any which consent will be given only in of the clubs in this section of the country. The dance in the evening given by the Stars in honor of their visitors was largely attended and enjoyed by all. Below we give the score by innings:

Delicate Hint Availed Nothing.

Among the exceptional privileges granted to the new housemald by the young married woman were three free telephone calls a week, provided she was informed beforehand what the girl wished to talk about, says the New York Sun. At the close of a turbulent day, in which the wills of mistress and maid had clashed violently, Mary sought permission to telephone. "To whom do you wish to speak?" asked her mistress. "To the pastor of my church," said Mary. Taking that plous ambition as a sign of contrition, the mistress readily gave consent. Mary went to the telephone. "Father Grim," she said, "won't you please pray for the woman I am motors: A 100-h.-p. motor, four 50-h. his valuations are lower the mining working for and se if that won't take some of the selfishness out of her heart and make her see that it is wrong for her to ask me to finish all that ironing today when I could just as well let it go till tomorrow morning?" If the pastor prayed his petition was not answered.

> Always Use Right Hand. With his left hand he took pipe and tobacco from his pocket and with his

right hand he felt for a match. He had none. His fellow idler at the other end of the park bench gave him a match and then let his own cigar go out in his astonishment at seeing his left-handed neighbor light his pipe with his right hand.

"That's funny," said he. "You are just about the most confirmed leftbander I ever met, yet for that little trick you use your right hand as if born to it."

"All left-handed people do," was the reply. "Just think over the list of your smoking acquaintances and see if you ever knew one who lit his pipe with his left hand. I'll bet you didn't. I never did, and I have numbered among my pipe-loving friends several men whose right hand seemed nearly helpless for everything

Why are the manners of Londoners so deteriorating? A dosen years ago a stranger in London was always sure of a civil answer if he asked his way about, er any other similar question. But today all the politeness of Lon-don seems to be confined to the police. whose courtesy nothing can impair. Modern education does not apparently include the study of politeness in its curriculum. I am quite sure that at present the London young man is the most unminnerly creature to be found on whose in England.—M. A. P., Lee-

As to London Manners.

GIVES HOUSE TOTAL

Washington, Aug. 5.—Bearing an initiative and referendum feature to safeguard against gerrymandering in number of states, the congressional reapportionment bill passed the senate today. It fixes the future house membership at 433, with two more when Arizona and New Mexico attain

statehood, instead of the present 391. There was not even the formality Dealer in Fine Wines, Liquors & Cigars of a roll call on the final vote. Two amendments, both offered by Senator Burton of Ohio, were attached to the house measure and on these a conferrence with the house will be held, all that stands in the way of President Taft's approval of the bill, which is to take effect March 4, 1913.

The increase of the membership of the house will mean an added expense to the country of approximately \$400. 000 a year. There is to be no reduction in the membership from any state, under this decennial reapportionment. The average congressional district will contain 17,000 greater population than at present, the average district comprising 211,877 under the new plan.

The initiative and referendum provision was tacked on to the bill just before its passage today. It was one of the Burton amendments. It provides that in case of an increase in the representation of any state, the re-districting, instead of being done by the state legislature, as provided by the house bill, shall be "in the manner provided by the laws" of the state, thus leaving the re-districting subject to the initiative and ref-erendum laws wherever they have been placed on the statute books.

UP-TO-DATE METHODS OF HAND-LING THE CORN CROP.

HERE is no branch of agricultural activity in the United States where the past few years has witnessed greater improvement in methods of cultivation and harvesting than in the sphere of corn growing. This is as it should be for corn is easily one of our most important crops. Indeed. although the fact is not generally recognized, it is a greater wealth producer considered in the broad ense-than is the wheat crop.

The advance which has been made concerns not only the methods employed in nurturing and handling the corn crop but also the means employed, that is the machinery which is doing so much to aid human brawn in caring for the golden kernels.

Whereas progressive farmers have in many instances worked out their own salvation as regards the improved methods of corn cultivation, it is perhaps only fair to give the major portion of the credit to the United States department of agriculture, which has worked in co-operation with the State Agricultural colleges and experiment stations to bring about a better understanding of the requirements of the corn crop. Many an old-fashioned farmer has been wont to assume that every tiller of the soil knew from his boyhood apprenticeship on the farm all that there is to know about growing corn and yet the experts of the agriulture department found that in reality there

A FAMILIAR SCENE IN THE "CORN BELT"

was more widespread misconception regarding he needs of corn than about any other leading

For the purpose of putting our farmers on the right track in their corn growing Uncle Sam during the past few years had field agents or demonstrators traveling about the country all the while to give advice and assistance to the corn' growers who do not appear to be doing the thing the best way. At first there was a disposition to regard with distrust if not with suspicion the advice of these "book farmers," but gradually as they proved that they could double and triple corn yields with scarcely a cent of extra expense, they won over to their side a considerable portion of the farming community and this "missionary work" is now being extended until in time it will embrace the "corn belt" where strange as it may seem the farmers are not getting nearly all that they should out of the land-that is if you let these government sharps tell it.

The first boost that was given to the American corn crop came through improvement by seed selection. The experts have induced the farmers to select their seed corn with great care in the field instead of merely making use of what happens to remain in the crib at planting time and the improvement from this cause alone has approximated at least twenty per cent. Most of the progressive corn growers have also awakened to the wisdom of properly preserving seed corn by keeping it dry during the winter in a special seed house instead of merely entrusting it to the corn crib in the old hapharard way. It has now come to the pass where the best quality of corn is worth \$25 per bushel more for seed purposes than unselected

A second effective method of improving our corn crop has as its purpose the improvement of the condition of the soil in accordance with the studied requirements of corn cultivation, Modern science is teaching the farmer that it simply will not pay to attempt corn growing on poor land until it is brought into a fertile dition by the growing and plowing under of

MODERN CORN SHOCKER TO

leguminous crops, the application of manure, etc. In not a few instances corn farms have been rendered more profitable by rearranging the fields in order to make them more uniform as regards moisture and soil fertility. Soil washing, that is, the washing away of the surface soll-one of the bugbears of corn growing-is being prevented by systematic means such as were almost unheard of a few years ago.

The big problem of fertilisers is one which touches the very heart of the corn-growing industry and the experts in and out of the. government service have prepared very explicit directions for enabling the corn grower to add to his soil nitrogen or whatever other ingredients are most needed to produce the longed-for prize ears of corn. It has been found upon investigation that many farmers have had very different ideas as to how corn should be planted and cultivated but at the same time it has been discovered that no hard and fast rules can be laid down as applicable to the whole country. The corn grower who is cultivating a deep soil in a section where there is prolonged dry weather will obviously have to proceed on a different theory from the man whose land is low and wet. The point that is being driven home is that each farmer must study his own particular

handling the corn crop was the discovery by Uncle Sam's investigators that corn growers as a class are very conservative, altogether too conservative, indeed, for their own good. The implements and methods employed in Iowa are entirely different from those of Connecticut and the latter, in turn, are dissimilar to those in use in Georgia. No section has a monopoly of all the good things in methods and machinery and in many instances a practice in vogue in one locality could be profitably used in another district which had remained in ignorance of it. All this bids fair to be changed, however, under the present awakening. Wide-awake corn growers are paying visits to other corn-producing states than their own and the result is likely to be a general discarding of poor and adopting of improved

A MODERN CORN HARVESTER CO

. The depth of planting, the distances between rows and hills and the depth and frequency of cultivation are all corn problems that are being solved along dependable scientific lines after a century or more of discussion and dispute. Meanwhile the improvement of corn cultivating and harvesting machinery has worked wonders in oringing about the new era in the corn fields. Mechanical corn harvesters have developed more slowly than the machines for wheat and other cereals, attempts to solve the problem of mechanically handling the corn crop dating from 1820, whereas it was not until 1831 that Cyrus Mo-Cormick made the first reaping machine.

Despite the fact that there was almost continuous experiment in the sphere of corn harvesting machinery from the date above mentioned it was not until 1892 that success crowned the efforts of the inventors. The principle in corn harvesters and binders which was destined to prevail appeared in the year mentioned, the invention of an Illinois man. In its elementary form it consisted of a corn harvester with the two dividers passing, one on each side of a row of corn, which was cut and carried back

An odd circumstance in connection with this. in a vertical position to the binder attachent by means of chains and gathering arms. Latterly various improvements and modifications of the design have been made and new inventions along the same line have been introduced. In some of the machines the binder is in almost horizontal position instead of

Naturally, badly tangled fields make the progress of a corn harvester somewhat slow, but it is remarkable with what precision the machine will right the stalks. Owing to the great variation in the height of the corn, even in the same field, the binding attachments are given great range of operation and in some machines they are placed as high as 32 inches. The machines weigh from 1,400 to 1,800 pounds each and cost, on an average. \$125. The average number of acres cut per day by such a corn binder is upward of eight and the total cost per acre of harvesting the corn by this method (allowing for cost of machine, wages of driver, outlay for twine, etc.) averages about \$1.50. Corn shockers cost about as much as corn binders and weigh approximately the same. These are the ideal machines for owners of small farms who do most of their own work. A man with three horses and a corn shocker can cut about five acres of corn per day at a total expense of \$1.06 per acre as against \$1.50 per acre with the machine previously described. The fundamental features of the corn

shocker are the circular rotating cutters which cut the corn as the machine advances and the circular rotating table upon which the corn is collected vertically to form a shock. A loading device for handling the shocks adds greatly to the efficiency of the modern ap- fce or tea is poured the drippings fall proved type of machines. Corn pickers, machines which remove the ears from the stalks (which latter are left in the field) cost \$250 each and are operated at an expense of \$1.81 per acre. Combined huskers and shredders are the latest additions to corn handling machinery and on up-to-date farms these are in many instances operated by gasoline engines. half cups flour, one and one-half tea-

CARE OF LEATHER FURNITURE

Mixture of Vinegar, Whites of Eggs and Turpentine Makes Good Cleaning Compound.

The cleaning of leather upholstered furniture is a question that concerns almost every housewife, for those. who do not possess one or more pieces of the padded leather kind have at least the leather seated diners, that require refurbishing three or four times a year.

In preparing to clean such a piece it is best to have the necessary materials at hand, so that the work can be finished at once and without risk of infuring the furniture, as there would be a liability if the different operations of the work were not done in rapid sequence.

Procure three large size cheesecloths, a basinful of tepid or nearly warm water, to which has been added a little vinegar, say a tablespoonful, and a mixture of the whites of two eggs and a half pint of turpentine. The mixture is best made by first beating the eggs to a froth and placing it in a bottle before the turpentine, and then before each application it is well shaken in the bottle. Large pieces of leather furniture

are gone over in sections, first with the cheesecloth, which has been dipped in the warm water to which has been added the vinegar, and then after being carefully wiped with a dry cheesecloth, it is polished with a cheesecloth or chamois lightly saturated with the egg white and turpentine mixture, after this the article is carefully wiped dry with other cloths. Seats of the dining chairs can be done one at a time with ease.

Any leather covered article, such as seat pads and even go-carts, not leaving out the dull calf or gunmetal shoe, can be renovated after a tashion by the same process, and sainy leather thus treated will admit of a gingham, madras, challis, etc. polish more readily than before at is applied.

USE OF RICE AS VEGETABLE

Flavor May Be Constantly Varied by Cooking Cereal in Essence of Vegetables.

Wash the rice thoroughly, rubbing the grains between the hands and using many waters, until all stauchiness disappears. Then let the rice soak in cold water for at least 15 minutes-longer if possible. Cut three or four large carrots in long, thin strips, as for soup, and boil them in one quart of water until it is reduced to a pint. Then throw away the carrots and use the water, which will contain their essence, to cook the rice. Melt one tablespoonful butter in a double cooker, placing it, for the time being, directly over the fire, and let the rice fry in it for a few minutes until it shows a tendency to brown, stirring constantly. Then add the water in which the carrots were cooked, one teaspoonful of curry powder, and salt and cayenne pepper to suit the taste. Place the rice cooker in its proper vessel and let it cook until all the liquid is absorbed and the rice is well done. Test the rice by pressing a grain of it between the thumb and finger. If it crushes readily, it is sufficiently cooked.

The essence of any vegetable, secured in the same way as that of the carrots described in this recipe, may be used for cooking rice as a vegetable, and thus the flavor may be constantly varied.

ANTI-DRIP STRAINER

A tea or coffee strainer that will not drip has been invented by a Wisconsin man. The device consists of a small metal cup with a spout that, normally, is some-

Mechanics.

what higher than that of the coffee or tea pot.

The cup is attached to the pot by a strong wire clamp. Inside of the cup and shaped to fit it is the strainer proper of fine wire mesh. The device is attached to the pot by means of a strong wire clamp and when the cofinto the cup of the strainer .- Popular

Cocoa Cake.

Cream one-half cup butter and one cup sugar, add beaten yelks of two eggs and beat well; mix one and onespoons baking powder and two teaspoons of cocoa thoroughly. Beat whites of eggs stiff, measure one-half cup milk and then add a little milk and flour mixture alternately to the egg mixture. Lastly add whites of eggs and one teaspoon vanilla. Bake in shallow pan about 20 minutes and

Plain Cocoa Frosting.-Mix one-half teaspoon cocca with one cup powdered sugar, add one tablespoon lemon juice and one tablespoon boiling water, or enough to mix the sugar into a paste. That settles to a level the moment you stop stirring. Spread at once on hot cake.

The Use of the Broom.

Few people handle a broom properly, although accustomed to its use every day of their lives. Always draw your broom by leaning it forward, because this allows the dirt to be moved along more gently and will not raise much dust. Most sweepers thrust the broom ahead of them in a sort of digging way, with the handle toward the sweeper. This breaks the broom, wears out the carpet, filts up dust and makes the sweeping much more

Practical Fash

A DRESSY SHIRT WAIST

Adding a touch of fancy to a plain shirt waist we have a very pretty model, shown in the accompanying illustration. The waist is built on the well liked Gibson lines, with the deep tuck extending out over the shoulder, short in front and full length in the back. The closing of the waist is in the back. In front there is a small pointed yoke at the neck, edged on each side by small revers. Below this there is a panel, formed by two outward turning tucks. The sleeves have small cap at the top and a deep cuit at the wrist with a puffed section between them. This waist may be developed in any soft silk, such as messaline or pongee and equally well in

The pattern (4678) is cut in sizes 32 to 42 inches bust measure. Medium size requires 3% yards of 37 inch material.

Nervousness--A Lack of Control

How often we meet women who shaped the original thoughtless sen complain of being nervous. What they tence into an ugly sting. really mean is that they have not con-trol of their nerves, but let them run who are continually tormented with away. A woman may be of a nervous the demon of jealousy. If one of them temperament and yet have such good should suddenly meet her husband on control of her nerves that she never the street walking with another wo-

it is only a tendency to cry at trivial who considers herself much abused. things or an inclination to despondency—to have "the blues," or to worry that her husband met the other wower real or fancied slights. Many romen waste so much time thinking things that are past and gone. A visit with a friend loses its joy in the afterthought, for this victim of the nerves lives over again every moment of the visit. She recalls everything that has been said and wonders if a different meaning was meant. Things nerves lives over again every moment of the visit. She recalls everything that has been said and wonders if a different meaning was meant. Things that were said as a joke and originally taken that way are now brought up for criticism and pondered over until the woman convinces herself of the presence of a hidden meaning. The is not satisfied until abe has bent and this was the case. To be jealous in Original was the case. To be jealous in Original that was the case.

omplains of being nervous.

This lack of nerve control maniceives that evening: or if not that, he ests itself in various ways. Sometimes finds his wife wearing the air of one The real facts of the case may be that her husband met the other wo-man quite accidently and, as they were going in the same direction, he could not avoid walking with her with-out being positively ruds. In this age men must of necessity have business transactions with women. It is a

to acknowledge the superior charms of the other woman. "If I cannot hold you against all women, then I do not want, you," is the right thought. If you think some other woman is attracting your husband, wake up and beat her at her own game. Do not sit idly in the corner and complain.

A woman who is nervous does not usually realize what is the cause of her condition. When excitable and irritable and suffering from a nervous headache, she takes various remedies to deaden the symptoms instead of looking the matter squarely in the face and going after the cause. Many women need a hobby to take up their spare time. If their minds were occupled and their bodies kept in a good condition by proper care, they would soon gain control of their nerves. (Copyright, 1910, by W. G. Chapman.)

To Raize Old Paris Fortress

Fortifications Now Useless-Undesirable Persons Rent Space From Government and Attack Pedestrians.

There is talk, as there has been

talk for years, of leveling the fortifications of Paris, which are perfectly useless now in the improved conditions of modern warfare, and of building houses on the large tract of ground which would be set free right round Paris. At present the fortifications are not only useless as a protection to the city in time of war, but they are absolutely dangerous to the citizens in time of peace. According to the law a large space around the fortifications is kept free of all stone buildings. This military zone, as it is called, has no houses upon it, but little one-story buts are allowed to be built there and are rented at tiny entals by the military authorities. Their cheapness and discomfort at-tract undesirable tenants, and the Paris apache has for years made a ounting ground of the fortifications.
Only a few days ago a rich Rus-

near the fortifications, and while it was being put right M. Ivanoff went frost with the following: for a stroll. He was not more than a couple of hundred yards away from his cab when two men and two women attacked him, stabbed him in seven places, robbed him of all his money and his watch and chain and a valuable scarfpin, and left him for dead. The two women have been arrested, but their companions are still at large. The incident is being used as another argument for the leveling of the fortifications. Another argument still is, of course, the great value of the land for building purposes.

STYLES IN STAMPS CHANGES IN FALL

Washington, Aug. 5.-Philatelists are waiting eagerly for the new United States stamps, both postage and Temperatures at even hours yes- registered. Postmaster-General Hitch rating his term at the head of the postoffice with a distinctive issue of letter stamps, postcards and so forth.

beautiful stamp ever issued by the furthermore lots of people have criticised it because it is so much like some of the recent "new-art" stamps issued by the French government.

However that may be Postmaster-General Hitchcock is soon going to have a whole new set of stamps on the market so that the stamp collector may add a whole row of new ones in his album, and add a further stamp that heretofore has not been included in the list put out in this country-a registry stamp. 'In the whole issue the postmaster-general has taken a keen interest, and he hopes to win the public approval for his designs.

The new registry stamp will be about the size of the ordinary postage stamp, the frame being a rectangle at one end with an inner circle enclosing an eagle with outstretched wings perched upon a rock. Above the circle are the words "United States Registry," and below it the denomination of the stamp in double numerals. So far the color has not been decided on, although it thought it will be a bright red; the characteristic color of the registry service. The new stamp will be ready for sale in the fall, and it is to be at tached to letters and parcels presented for registry. For those who may wonder what is now done for regisa regular registry stamp, it may be said that an ordinary postage stamp quires for registry, in allition to the regular postage, and when affixed and the letter or packet handed in at

the registry window. Besides the whole new set of stamps for ordinary postal use there is coming a new pocket card for foreign correspondence. This is going to be one of the most artistic cards ever issued by this lountry, and will carry a portrait of General Grant in the "Universal Postal Union, United States of America," in English and French in the upper left-hand corner.

Would you have better health, more strength, clearer skin, stronger nerves, more elastic step? Use Hol-lister's Rock Mountain Tea, the great vegetable regulator and tonic. One the package makes 105 cups of tea. For sale by John J. Sourwine.

YANTIC WAS READY FOR A 7

Of the cruise of the Yantic this year the Calumet News of Friday said:

Lieutenant N. E. Nichols of Bay City the United States naval officer who will accompany the training ship Yantic on its annual cruise, arrived in Hancock yesterday with his wife, and is registered at the Hotel Scott. The boat is being gotten in readiness for its big annual cruise, the complete initerary of which has not yet been received by Captain Goodell. The plan is to sail first on Saturday night for Ashland, where about thirty men and officers of the Ashland division of the Wisconsin Naval Brigade will be taken aboard, whereupon a return will be made to Houghton. The recently organized Traverse City division, which has never yet taken a cruise. will arrive in Hancock tomorrow and will be initiated into the mysteries of seamanship on the trip to Ashland.

The reserves will take part in the parade at the celebration of the twenty-fifth anniversary of the mining college August 8, and that same evening will start dolwn the lake on its long cruise, which will last ten days. The destination of the ship will probably be Chicago, this being the present understanding, although it is not official ly stated that this will be the case. The officers and men of the local division have put in several busy days looking after the provisioning of the ship and painting her up preparatory to starting on the trip.

There will be no maneuvers of the Qreat Lakes squadron of the naval miikia this year. The ships will take individual trips. The Gopher of Duluth will leave Saturday ofr Chicago returning Aug. 20.

The orders recently revelved by the officers of the local militia from the war department at Washington merely state that "owing to unavoidable Dr. B. Henry Wilson, 2811 Cottage lets and relics to prove that in the circumstances, the department finds it Grove, Chicago. impracticable for the vessels of the Great Lakes squadron to hold comlned exercises."

This leaves it to the local officer. ays the Duluth Herald, as to the time of the sailing an dthe destination of the boat. The orders state that each ship is expected to take an individual

As the date had been set for Aug. 5 and the men had prepared to go at this time, the date was not changed. The cruise now takes the nature of an outing for the men with the usual work on ship, which consists of the with any naval training ship cruise.

Ensign Arthur S. Carpenter, a regu lar United States army officer from the Marietta, has been detailed to the Gopher as an inspection officer. He is already in the city and will make the quette normal.

trip with the local boys. It is probable that few of the boats have changed their plans. They were to have assembled in Chicago Monday to take part in the exercises which will formally open the new naval station at that place. It is probable that they will all be there, but that the annual maneuvers which were scheduled to take place at Chicago will not be held.

Although the orders did not explain the reason for the giving up of the exercises this year, it is presumed that it is because the Canadian government objects to them. There is a feeling across the line, It is said, that on the lakes naval maneuvers should not be held by either country, as they are a rigistion of the treaty. It is very prob able that the war department at Washington after considering the matter decided not to have them this year or until the Canadian government would withdraw its objections.

The maneuvers have always been the big event of the year with the naval militia and the dropping of them ami the competitive drills, races and signal readings is much regretted smong the Duluth men.

When the Gopher sails out of the ceal harbor flaturday shortly after the noon hour, she will have about 185 men aboard.

Growing

in

Grace

HAT a happy thing it is to

become a Christian, to know that Jesus is our Saviour, that our sins are

forgiven, and we have be-

gun a new life in Christl

But, having obtained this new life, it

is important that it should be nour-

ished, that we should "grow in grace

and in the knowledge of our Lord and

natural life, but they are weak and ill.

For some reason, the life that is in

them is not vigorous and healthy as

it should be. Of course, ill health may

arise through no fault of our own, in

which case we must try to bear it pa-

tiently and bravely. But very often

health could be preserved and

strengthened if we would attend to

three things—the food we ate, the at-

mosphere we breathed, and the exer-

cise we took. Care in these matters

means many an illness prevented and

This is similarly true of the spirit-

nal life, which is intended at all times

souls. The principal food that God has provided for us all is to be found

in the Bible. If we neglect the study

of his word, our spiritual life is

bound to suffer. Many can trace their

failure in the Christian life to this

neglect. We need to feed daily upon.

some portion of the Bible, remember-

ing that "man doth not live by bread

alone, but by every word that pro-

ceedeth out of the mouth of God."

There are many other books that will

help us, but they must never be al-

lowed to take the place of the Bible

Feeding the Soul.

it is not sufficient to read, but we

must also digest what we read. Undi-

gested food is the cause of much ill-

ness to the body. The soul, too, needs

careful feeding if it is to become

strong and healthy. It is better to

read a few verses daily, to understand

them, and to put them into practice,

these days are realizing more and

more that this is most desirable

Prayer is the fresh air of the soul.

ust life from disease, or death. Our

Lord asked for his disciples, not that

they should be taken out of the world,

but that they should be kept from the

evil. He sends us forth as lights in

the world, and as long as our spiritual

life is strong and pure, we shall pass

by its temptations unharmed and vic-

call nothing of its teaching.

We need, however, to remember that

many a life lengthened.

We see many around us who have

Saviour Jesus Christ."

BUILDING OF GOOD ROADS PROB-LEM FOR FEDERAL GOV-ERNMENT.

HARDLY FEEL TAX

General Welfare Clause of Constitution Gives Congress Power to Build Roads-Federal Aid Would Give Mighty Impetus to Road Building.

BY HOWARD H. GROSS.

About once a year the post office department sends out word to the various postmasters throughout the country where the roads are bad, threatening to suspend fural mail delivery unless the roads are put in acceptable condition. This is right and proper. It is an outrage to expect the mail carrier to wade through a sea of mud to carry the mail to the farm home, It ought not to be necessary for him to do so. At times the roads get so bad that the mail wagon must be abandoned, and the trip is then made on horseback, carrying only the letters. Sometimes the delivery has to be abandoned for days at a time on account of road conditions.

Why the roads should be so bad the country over, when nearly everybody wants good roads is a strange anomaly, and this unfortunate situation will probably continue until the people approach the good roads problem from the right angle.

It is a tremendous undertaking to gravel and macadamize the principal highways of the country—it means the building of 400,000 or 500,000 miles of roads, and would cost between a billion and a half to two billion dollars, or from \$15 to \$20 for every man, woman and child in the land. This seems like a colossal outlay and it is, but the money could not all be spent at once. It would take probably twenty years to do it, so it would be at the rate of perhaps one dollar per year per capita. The department of agriculture estimates that the actual saving to the people by good roads would be at lease \$3.50 per person per year. If this estimate is anywhere nearly correct, and it probably is approximately so, then the saving to the people alone by good roads would pay for them in five years' time.

There is no fact better demonstrated in economics than that the building of good roads adds to property values many times the cost and brings social, educational and ecoof roads the best paying investment that any community or state can

The question is, how ought this matter to be handled? In the writer's opinion the first duty is to the federal government. It is high time for at to get busy on this problem. The money Uncle Sam raises is by indirect taxation and this tax the people scarcely feel and there is very little complaint about it. It hurts us more to pay one dollar as a tax through the tax collector's office than it does to pay five times the amount by indirect taxation. Under the general welfare clause of the constitution, congress has the power to build roads. It also has specific authority to do so for those roads used for rural delivery, and these comprise nearly all the main highways of the country.

Suppose, then, we estimate an expenditure of \$1,500,000,000 to be made upon highways, jointly by the nation, the state and the township or county, letting the federal government contribute one-third the amount, and prorating the money between the states. on a joint basis of population and road mileage. This would give a state like Illinois between \$26,000,000 and \$27,000,000. The funds to be provided for from time to time by longtime, low interest bonds. The tax per capita to carry these bonds at three per cent., when all are issued. would be about 15 cents per yearthree car fares! Then let the state pay one-third from a general tax levy, or, better still, by a bond issue, and one-third paid locally by the township. It is common practice for the state to contribute to road building under what is popularly known as the state aid plan-the townships have been doing the little that has been done and doing it without help for many years. The new feature of the proposition is the federal contribution, for which there is ample authority and for which there is a precedent and a paramount need.

Within the last few years there has been a great hue and cry throughout the nation on that day men, women the land for waterway improvement; conventions have been held and the demand made that the federal goverament contribute \$500,000,000 to that end, at the rate of \$50,000,000 a berculosis. Money in large quantities year for ten years. The point the was collected, the smallest and poor writer desires to make is that where it is possible for one ton of freight It is not to be wondered at, because or produce to be carried by water, there would be thousands of tons moved by wagon over the public highways, and that if the amount of a fruitful ground for the develop money demanded for waterway imcial, and the benefits would reach all of the people.

The government is using about 900, 200 miles of public roads for rural mail delivery and these are post-roads within the meaning of the Constitution. Congress has express power to build and maintain post roads, and if it can build and maintain them it certainly could help to distinct the street of the street

The question may be asked whether a bond issue of \$500,000,000 for aid in road building would be at all hazardous. By referring to the statement of the treasury department, one will find that the present bond issue

amounts to about \$11 per capita, and the annual interest charge is 29 cents. The issue of \$500,000,000 of bonds would carry the bond issue up to approximately \$16 per capita and the interest charge to 44 cents. At that rate it would be the smallest bonded indebtedness per capita of any of the leading countries of the world. As against the \$16, Great Britain has a debt of \$88 per capita, German \$49, Italy \$92, and France \$144. It is perfectly safe to say that if the government would issue and expend \$500,-000,000 of bonds in aiding the construction of permanent highways, the people would never know that an additional tax had been imposed and would never feel the payment. This step would give a mighty impetus to road building, and in ten or fifteen years probably 400,000 miles of good roads could be built, and this would revolutionize transportation and would add immeasurably to the pleasure of country life, and would add several times the amount to the property value of the nation, and give us better schools, higher social life and

There is a widespread demand for a parcels post, and as congress usu-ally responds to popular demand, and always does if the clamor is loud and long enough. So it is quite probable the parcel post will be tried out.

higher standard of civilization.

Let the government help build good roads-the highways over which the children must go to school, the doctor to reach the suffering and over which must pass every bushel of grain and every bale of cotton raised -the road which reaches every field, every farm home and every market town. The people everywhere demand good roads. Roads are universal; waterways are sectional. Good roads mean a saving in transportation far greater than can be accomplished in any other way. Good roads mean better schools, more social life and a higher standard of living; they mean progress and civilization.

GRADES AND GOOD ROADS

Highways Traveled by Heavily Loaded Vehicles Should Be Kept Down to Three Per Cent.

A one per cent. grade on a road means a rise of one foot for each hundred feet of distance traveled up the hill. A ten per cent, grade means ten feet rise in each hundred feet so traveled. A one per cent. grade, then, means that in traveling up hill one mile an ascent is made of 52.8 feet, sides; they are the avenues of trade; while a ten per cent grade means a rise in altitude of 528 feet in a mile. Accurate tests have shown that a horse which can pull 1,000 pounds on a level road can pull only 810 pounds on a rise of one foot in fifty, and on a rise of one foot in ten he can pull only 250 pounds. These facts show that the greatest load than can be hauled over a road is the load which can be taken up the steepest hill on that road, or through the deepest mud hole. It is therefore advised that all highways traveled by heavily loaded vehicles should be kept within a three or four per cent. grade if practicable. To do this may require change of location to get arou hills, always keeping in mind that the lower the grade the larger the load may be hauled and the cost of haulage kept at the lowest point.

Birds a Help to the Farmer.

The demand for the protection of wild birds was once based solely on humane and esthetic grounds; now the demand is coming to be based in addition on economic grounds, which will commend it to a larger number of men and insure it a more careful hearing in the court of public opinion. Bird slaughter not long ago was decried be cause the native songsters were being killed at the behest of millinery fashion.

Now another note is sounded. The increase of insect pests and couse quent reduction of the harvests has corresponded with the decrease of the birds. In addition to filling their craws with insects numerous wild birds feed on weed seeds, and weeds are a handicap in agriculture.

In several states increasing safe guards are being thrown around birds because of their worth as aids to agri-

Russia's Fight on Tuberculosis. The first "white flower day," which was observed in Russia on May 3 was a "success beyond the hopes the most sanguine," says the Russische Correspondenz. Throughout and children offered for sale tiny white flowers. The proceeds of the sales were handed over to the League for the Prevention and Cure of Tuest hamlets contributing their share. Russia is really the land of the dread malady. The trying climate and unspeakable sanitary conditions make it ment of the disease, and statistiment were applied to highways, show that in late years there has ould be hundreds of times more been a steady increase in its ravages. been a steady increase in its ravages. The manner in which the people re-

GOOD ROADS BETTER COUNTRY

Highways Tell Tale of Profit or Loss and Spell Ruln for County That Neglects Them.

The plain people of the land are familiar with the truths of history. They know the past. They realize that often difference between good roads and bad roads is the difference between profit and loss. Good roads have a money value far beyond our ordinary conception. Bad roads constitute our greatest drawback to internal development and material progress. Good roads mean prosperous farmers; bad roads mean abandoned farms, sparsely settled country districts, and congested populated cities, where the poor are destined to become poorer. Good roads mean more cultivated farms and cheaper food products for the tollers in the towns; bad roads mean poor transportation, lack of communication, high prices for the necessaries of life, the loss of untold millions of wealth, and idle workmen seeking employment. Good roads will help those who cultivate the soil and feed the multitude, and whatever alds the producers of our country will increase our wealth and our greatness and benefit all the people. We cannot destroy our farms without final decay. They are today the heart of our national life and the chief source of our material greatness. Tear down every edifice in our cities and labor will rebuild them, but abandon the farms and our cities will disappear forever, I take an abiding interest in this all-absorbing question for better highways by some plan it can be done

honestly, economically and constitu-

tionally. I am not committed to any

pet scheme. I have no vanity in the

matter. I care not who gets the glory so long as the people get the results. I am for the cause and in the fight to stay. Good roads mean progress and prosperity, a benefit to the people who live in the cities, an advantage to the people who live in the country, and it will help every section of our vast domain. Good roads, like good streets, make habitation along them most desirable; they enhance the value of farm lands, facilitate transportation, and add untold wealth to the producers and consumers of the country; they are the milestones marking the advance of civilization; they economize time, give labor a lift, and make millions in money; they save wear and tear and worry and waste; they beautify the country, bring it in touch with the city; they aid the social and the religious and the educational and the industrial progress of the people; they make the highways of commerce, and mail routes of information, and the agencles of speedy communication; they mean the economical transportation of marketable products—the maximum burden at the minimum cost; they are the ligaments that bind the country together in thrift and industry and intelligence and patriotism: they promote social intercourse, prevent intellectual stagnation and increase the happiness and the prosperity of our producing masses; they contribute to the glory of the country, give employment to our idle workmen, distribute the necessaries of life-the products of the fields and the forests and the factories-encourage energy and husbandry, inculmake mankind better and greater and

grander and broader. Good roads are the arteries of industrial life of a great and powerful people. Good roads make a good country. In a government such as ours all sorts of men and women are more best and speedlest means of communication and transportation. If you say that good roads will only help the farmer, I deny it. The farmer who ing." produce the necessaries of life are ess dependent than the millions and ilions of people who live in our cities. The very lives of the latter depend on the farmers—the producers of the pecessaries of life. The most superficial investigation of this subject will clearly prove that good roads are more important to the consumers than they are to the producers of

the country. The fathers of the republic wisely recognized the importance of this question. Washington and Jefferson advocated good roads and projected the construction of a great highway from the capital to the Mississippi valley. The far-seeing statesmen of the early days of our national existence championed and passed measures to better the means of transportation. They knew that of all human agencies the one which has done most for civilization has been the bu of good roads—the chridgment of distances, the shortening of time-in the facility of communication. They realized the necessity of good roads, how important they were to the country, to its growth and its development; and to mankind, morally, physically, intellectually and industrially.

SOLVES BIRD SECRET FUN BY BARONET AND WIFE

Prof. Michelson Discovers Cause of Metallic Colors.

Brilliance of Plumage, as Well as In sects' Luster, is Due to Light Absorption-Prof. Cutier on Arid Problem.

Chicago.-Peacocks and pigeons, butterflies and beetles— the gayest of the bird and insect tribes—have yielded the secret of their brilliant attire to Prof. Albert A. Michelson, head of the department of physics of the Univercity of Chicago, who has discovered in his laboratory the real cause of the metallic colors observed in his feathered and "buggy" specimens.

Prof. Michelson, who won the Nobel prize in 1909 for his achievements in optics, announced his latest find in a paper read at the annual conference of the Illinois State Academy of Science, in the botany building of the University of Chicago. The professor's experiments prove that the colors studbetter homes and happier hearth led are the result of light absorption are not caused by the pigment cells or any means that the amateur naturalist might imagine.

The discovery, according to the scientists at the meeting, furnishes scholars with a new theory for important color phenomena. It overturns the position held by many distinguished investigators that the irridescent glitter of beetles and the tints of the humming birds are the result of ordinary "interference" and "diffraction."

"The total number of specimens which have been examined," said the investigator, "is perhaps not so large as it should be to draw general conclusions, and it is clearly desirable that it should be extended, but so far cate love for our scenie wonders and as the evidence for surface films as the effecting source of the metallic col-ors in birds and insects is entirely conclusive."

Prof. John M. Coulter, head of the University of Chicago botany department said:

"Practical plant breeding is now on or less absolutely dependent upon the a practical basis and botany has at last attacked the fundamental problems and may be of some practical service, for it includes plant breed-

Of the possibilities of converting arid land into wheat and corn lands Prof. Coulter said:

"Attempts are being made to secure combination of hardiness to drought which we desire and quality of grain which we possess. I see no reason why the vision should not be realized but you need not invest in arid land for immediate use as wheat fields. In the case of corn, as of wheat, we are not breeding it for drought resistance alone, and it will take many plant generations of the highest type of scientific plant breeding to determine whether we can combine this drought resistant structure with the high-grade quality and yield we have already obtained in our cultures."

FIGHT WITH BIG COPPERHEAD

Pennsylvania Sign Painter Frightened fat First, Returns and Dis-patches Reptiles.

CAUSE OF DELUSIONS

New Disease Mixes Sounds, Colors. Odors and Tastes.

Physicians Now Recognize Condition Which Probably Accounts for Hallucinations of Insane-it is Called Synesthesia.

New York.-Physicians now recogize a condition which probably accounts for the hallucinations and delusions of the insane. It is called synesthesia, and those afflicted with it are known as synesthesics. It is that peculiar condition in which sounds create the idea of colors, and vice versa, or in which colors, tastes, sounds and odors are confused.

"Synesthesis is not a matter much practical importance," says American Medicine, "but it is highly interesting to say the least. It is that urious phenomenon of the overflow of ensations so that air waves, for instance, give a sensation of color as well as sound. It seems that through cal centers (of the brain) are not insulated from each other completely, so that a stimulus received from the retina say, is not confined to the visual enters, but affects adjoining ganglis "The commonest form is colored hearing, and most of the cases of synesthesis investigated up to a few were alike, that is, the same sou would cause different colors or shadings in the different cases; a locomoive whistle would be vellow to one.

or white to another, and so on.
"Moreover, in some cases only a few it. Then there are cases in which col-

well as figuratively, and, of course there must be an infinite variety or mixtures of the other sensations.

The most distressing cases are those in which there is no actual confusion of sensations, so that odors and tastes and sounds are not differentiated. No doubt these abnormalities are at the basis of many delusions and hallucinstions of the insane.

"The nervous instability of synesthe sics is the practical side of this sub ject. Without an exception, the cases present evidences indicating considerable nervous involvement in the may of abnormal development. Some if not most of them are highly intelligent, though incapable of that hard work necessary for success, and all are very sensitive to irritations which he average man ignores.

"Perhaps the condition is far fro on than we imagine, and it would se well to keep it in mind in the tr that they are great sufferers from jarring sensations, not in the way usually ght of but in these overflows to other centers. A normal woman may or made actually Ill by garish colors or coarsely arranged music, and we all know the bad effects of certain tastes and colors; how much more suf-fering these must be in synesthesics there the irritant affects more than one center.

"Of course the cases are so few in umber that the general pracrarely if ever sees them, but he is able to have milder berderland in which a little attention to aest may make all the difference between ess and failure in treatm

The following account of a game played at Ishpeming between the team of that city and Negaunee 37 years ago when Ishpeming won 37 to 15 is taken from the curent issue of the Iron Ore:

-A game was played on Wednesday

afternoon, tetween the Negaunee club and the Mutuals, of which owing to the change of our day of issue we are enabled to give the result. This game has been long talked of, and it was with no little trepidation that our boys entered it, as it was well known that the Negaunee boys were splendid players and confident of an easy victory. The game was called at 2:45 p. m., with the Mutuals at the bat, who punished the sphere for three runs and permitted their opponents to score a like number. In the second inning our boys scored six runs and retired their opponents with two. This gave them the lead, which they gradually increased to the end. The playing on the part of our boys was careful and marked with but few errors, which shows conclusively that they have improved a great deal with the little practice which they have had together, and are now able to cope successfully with any club that may desire to come this way. The Negaunee boys play well, and are certainly entitled to great credit for the manner in which they conducted themselves throughout the game. They were gentlemenly and courteous, and while they are not up to our boys in playing, as the score shows, their game is a hard one to beat. It is not improbable that another game will be played soon, as they are not quite satisfied that our boys are the better play It is also stated that they are anxious to have a purse of \$200, (\$100 a side), to play for. We don't think that they need have any fears on this score, for we are sure that the ones who feel an interets in our club will not hestitate to "cover" whatever light yet apparently sustaining drink. they may choose to put up.

Dead Mouse Routs Women.

Six women with chairs and camp stools yesterday kept a gang of telephone men from planting poles in Etna street, between Richmond street and Euclid avenue, in the East New York district of Brooklyn.

When the gang first appeared Mrs. Joseph Rosserty went out of her home at No. 191 Etna street and planted her chair squarely over the hole that had been dug for a pole. Then out marched Mrs. John Schnelder, Mrs. William Parker, Mrs. H. A. Miller, Mrs. Ida Benson and Mrs. Catherine V. Riker, all of Etna street,

and guarded the other excavations. They were deaf to persuasion, but at last one of the men got a dead mouse, tied it to a string and climbed a tree. Then he let down the mouse on a woman's neck. She shricked and all the women fled.

After which the gang planted a pole -but only one, for in a few minutes the matrons got back their nerve and returned.-New York World.

Ancient Rain Guage. The credit of inventing the rain guage has always been given to Castelli, a contemporary of Galileo, who made one in 1639, but the director of the Corean Meteorological Observatory, Dr. V. Wada, has shown that it is due to a Corean fing. The latter, King Sejo, in the year 1442 caused an instrument of bronze to be constructed to measure the rain, and it is set out in the historical records of Corea that this was a vase fifteen inches deep and seven inches in diameter. placed upon a pillar. An example of this was placed in the observatory, and each time the rain fell the officials were instructed to measure the height and to make it known to the king. Other instruments were distributed to the provinces and cantons and the results of the observations made were sent to court.

An ordinary case of diarrhoea can, as a rule, be cured by a single dose of Chamberlain's Colic, Cholera and Diarrhoea Remedy. This remedy has no superior for bowel complaints. For

PRINT YOU SEE PIRST IN THE

BURIES AD UNTIL DAY OF BATTLE

After Ad Wolgast had made his own match with Packey McFarland and had overlooked most of the minor details, letting them slide by and thus giving the McFarland people what Manager Tom Jones said was too strong a shade, the manager proceeded to bury his fighter. In other words, now that Jones is back in the saddle and riding at a furious gait, the fighter will not be seen or heard from excepting indirectly until the day of the match.

Jones is sore. He was mad when he left Los Angeles for San Francisco and hotter still when he landed there and heard something that had been done in Chicago.

He fretted and fumed all the way to Chicago and when he got there and read the articles of agreement, he chased away at once to tell Wolgast that he didn't need a manager so much as he did a conservator.

In other words, Jones thought about time to have his fighter's head examined. Al made the match all right, but he didn't give heed to a single detail of the negotiations. It is over the details that Jones is now fussing with Frank Mulkern, the Milwaukee promoter.

Jones' temper was not held any the morning he landed in Chicago after a long, hot, dusty ride from FOR SALE-One of the best houses in the coast, to have Emil Thirty, Mc-Farland's manager, gently rub it in for private residence, Doctors resiwith these exasperating words:

handling of the lightweight champ- Wells Avenue. ion's business. Tom has an eye that is not only keep, but is broad and of marvelous focus, Hence, to have it said that he was scored upon, that somebody had "hung one on him," was the iron in his soul.

He started to investigate. He found lots of things had been overlooked. Not a word had been said about the about the rake-off from special trains excepting to hand it over bodily to a member of the McFarland camp. FOR SALE-One 18 room house and There were some other things that struck in Tom's craw, and he was mad through and through.

Hence these burning words between Jones and Mulkern, hence these flery meetings. Mulkern, it appears, has not seen fit to post a forfelt, although the fighters have theirs up. Another point that Jones rebelled at. And so you will know should you happen to fice. see a large blonde man, with a keen blue eye bulging out of his face, going along the street muttering something that sounds like this: "They think they put something over on me, do they?" You need not call the foolish wagon. You will know that it is Tom Jones letting off some steam as

he hurries along. All this will explain why Jones told Wolgast gently but firmly when he met him in Grand Rapids the other afternoon that he had better sneak away from the farm and go out into the woods and begin training for the scrap when- he was ready. Imme diately followed the announcement from Wolgast, which was to the effect that henceforth Jones would have charge of every detail of the McFarland match, and would have all to say from his end of the negotiations. No wonder, no wonder!

Billy Piper, the Gary promoter, says we have been misinformed about that affair the other night between Cleve Hawkins and Ralph Callaway; that the police didn't interfere, etc., etc. Piper's story is vastly different from that told by Hawkins and his friends after they returned to Chicago.

Piper adds further that he offered some of Hawkins' colored friends a bet of \$500 to \$300 on a twenty round contest at 150 pounds at the ringside, a figure that Hawkins couldn't do if he sawel og a leg and Piper knows it. And according to some of the witnesses of the fight, Callaway couldn't make such a figure if he sawed off one leg and an arm; so there you are. You can take your

SHERWOOD MAGEE TO MAKE APPEAL TO PRES. LYNCH.

Cncinnati, Ohio., Aug. 5,-Sherwood Magee the Phillies' suspended slugger, left for his home in Philadelphia last night. He will make a special plea to President Lynch to have his suspension for the year cut down. He is not hopeful of getting a pardon, but many of his teammates believe he will be back in the game when the club

READ THE **ESCANABA** MORNING **PRESS**

The paper that prints the news when it is news.

The only paper in Escanaba that guards its columns against matter unfit for the home.

If Its True and Clean You See it FIRST in the Escanaba Morning Press

In two years the Morning Press has achieved the largest circulation of any newspaper in Delta county. This record has been made not with contest or premium schemes, but

Because---The Morning Press is newsy

Because--- The Morning Press refuses publication to matter unfit to be read by women and children

Because--- The publishers of The Morning Press give full value for the money of their patrons

Because--- The publishers of the Morning Press do not take away what should go into the value of the paper by offering illusive voting contest and premium schemes.

The Escanaba Morning Press is the most popular advertising medium in Delta Co.

Because---It reaches 20,000 readers daily

Because --- It covers a field untouched by another Delta county newspaper

Because --- It is the paper that all people read for news when it is news

A CHEROKEE INDIAN EDITOR NOTICE OF ABANDON.

John M. Oskison Graduated From the Back of a Cow Pony In Oklahoma,

Vinita, Okla.-From the back of a cow pony to an editorial chair in the office of Collier's Weekly is the road traveled by John M. Oskison, a Cherokee Indian citizen, whose father was 73.5 of the Nahma Road as adopted one of the pioneer cattlemen of the Indian territory.

Oskison left Vinita in 1894 and gradnated in thrn from Leland Stanford Sta. 202 plus 62; thence S. 26 degrees university and Harvard. He entered the writing game by winning a \$250 plus 21.8; thence S. 9 degrees 33 minprize from the Century Magazine for utes W. 122.9 feet. to Sta. 205 plus the best short story. Later he became

a reporter and an editorial writer on the New York Evening Post. He became an editorial writer for Collier's

He wrote two of the "Senate Undesirables" for Collier's-Long of Kansas was one-and a series of articles about the loan sharks, that helped to start the Russell Sage Foundation on the job of driving them out of bustness by establishing good loan agencles. He fired a broadside into the flock of get-rich-quick promoters that roost in New York, and as one result Collier's has established a department called "The Average Man's Money." the writing and editing of which is o'clock. This examination is open to Oskison's principal employment. Now and then he gets time to write a short story and, more happily than in the earlier days, finds a market for it.

But the land of the Cherokees-the Spavinaw, the "flint hills" and the hay ty School Commissioner. prairies-know him no more.

MENT OF ROAD

Resolved: That the Board of County Road Commissioners of the County of Delta do hereby abandon all of those portions of the Nahma County Road described as follows:

Commencing at Station 200 plus Dec. 15th., 1910, and running N. 86 degrees 19 minutes E. 188.5 feet to 45 minutes E. 159.8 feet to Sta. 204 44.7; thence S. 50 degrees 44 minutes W. 309.6 feet. to Sta. 208 plus 54.3 a total distance of 7.80.8 feet.

And be it further Resolved, That the County Clerk notify the Highway Commissioner of the Township of Nahma of the action of this board and that the County Clerk cause notice of this action to be published once each week for three successive weeks in the Escanaba Morning Press.

And Be It Further Resolved: That the Board of County Road Commissioners do hereby adopt as a portion of the Nahma County Road a strip or parcel of land four (4) rods in width the center line of which is described as follows:

Commencing at Station 200 plus 73.5 of the Nahma road as adopted four hundred and seventy-two (472) feet to Station 208 plus 54.3 of said feviously adopted road.

And be it further resolved that the County Clerk notify the Highway Commissioner of the Township of Nahma of the action of this board and that the County Clerk cause notice of this action to be published once each week for three successive weeks in the Escanaba Morning Press.

SLEEPS NAKED

Ogden, Utah.-Near White Rock, Utah, is a demented Indian who is known as "Crazy Indian." There is no doubt about his deserving this title. He has slept in the open for over 30 years without any shelter or clothing. If his Indian friends build him a "wickeyup" he burns it down in a few days. He generally has an old

overshoe on his left foot. The picture shows a winter scene with "Crazy Indian" lying at the entrance to his tent while the ground is covered with snow. He is about 50 years of age. Strange to say he does not seem to be any the worse

Sleeps Without Shelter.

for his exposure to all kinds of weather, being quite robust physically. He will sit for days at a time un-

der the poles of his tent after having torn the covering from it, evidently thinking that, "be it ever so humble, there's no place like home."

Deer Takes Cow's Milk.

Bedford, Pa.-For some days Hart Bush, a farmer at Oppenheimer, this county, had found no milk from his cow at milking time. The cow was kept in a field near the house and it was thought the calf had stolen it, so it was locked up in the barn. This morning Mrs. Bush thought she saw in the early dawn the calf with the cow and started to drive it away, when a large deer lightly leaped a fence and made off.

Antiques Bring Big Prices.

Paris.-A carved wooden bed, armchair and screen, which were made Dec. 15th., 1910, and running south for Marie Antoinette at Versailles, were offered at auction on June 2 at a reserve price of 1,000,000 francs, or about \$36,000. They were the property of the Marquis Cazeau, whose father found them in a conclerge's room and bought them very cheap.

ADDITIONAL LOCAL

Father Leo arrived yesterday from Cincinnati, Ohio, and will succeed Father Herbert as assistant pastor of St. Joseph's church. Father Herbert has been transferred to Streator, Ill.

The Misses Edith and Mary Champion, sisters of the late I. G. Champion of Gladstone, residing at Moria House, College Road, South Dulwich, London, England, will leave England on August 12th and are expected to arrive at Gladstone on August 22nd, where they will be the guests of Mrs. I. G. Champion.

Wednesday's issue of the Detroit News contained the following interesting mention of Prof. J. O. Kinnaman, formerly an instructor in the lo-

"I was most beautifully, if not scientifically taken in."

Thus frankly, almost joyously, does Prof. J. O. Kinnaman, of Benton Harbor, Michigan, admit that he let his enthusiasm run away with him when hke came to Detroit to look over the relics of a prehistoric people. Prof. Kinnaman is a noted scientist and is editor the American Antiquarium and Oriental Journal. When he said the relics dug up by Jas. O. Scottford and his son and described by D. E. Soper, former secretary of state, were positive proof that a great people lived in the vicinity of Detroit before the Indians came to exterminate them via the tomahawk route, he created world-

wide attention in the fields of science. The professor now regrets that he ever pictured a race of people lingering on the shores of the Detroit river long before Noah built his now famous house boat. In a signed statement issued in Chicago, the professor exonerates the lost tribes of Israel from any blame in connection with the Highland Park mounds and their contents.

"I have spent the afternoon with Prof. Frederick Starr, of the University of Chicago, and we have been comparing notes. We have come to the same conclusion, even if I am a trifle late in reaching it. But if I am to tell the story in my own way I must go back a bit.

"It is a little more than twenty years ago that I first saw the specimens of Michigan archaeology which have been accredited to Caucasian civilization, to the lost tribes of Israel and perhaps to other antecedents. They were owned by a citizen of Montcalm county, Michigan, an enthusiastic collector of Indian relics, and he had paid for the specimens-I'm sorry I cannot say to whom-prices running as high

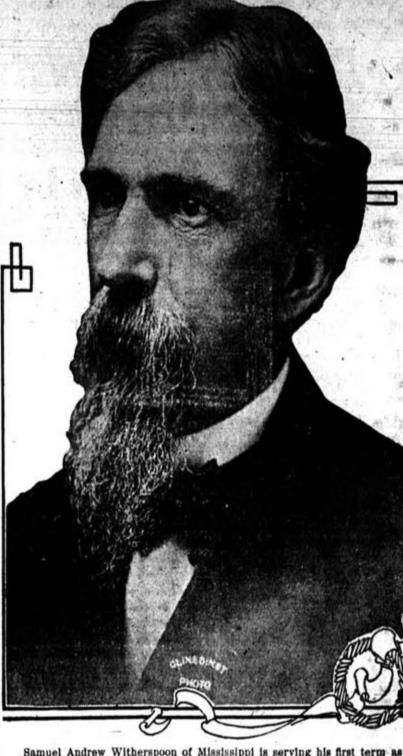

"Then years later, in 1901, I spoke of them to Prof. Starr, but there was no special weakening at that time. Then came the famous denunciation \$200,000. There were no bids, and specimens the grossest of fakes. In the articles were put up again today. 1908 Prof. Kelsey wrote an article in They were bought in for 180,000 francs, | sent to me. I used it in the Antiquarthe Nation, which subsequently he fan last spring, together with an article written by Dean Savage, of Detroit, defending the discoveries.

In June of the present year I went on invitation, to Detroit, to inspect the mound at Highland Park, where Prof. Starr subsequently investigated. At the time four or five pieces were taken out of two mounds. One of which, a slate tablet, I have here in

Mr. Johnson's brother, Carl Johnson.

SAMUEL A. WITHERSPOON

Samuel Andrew Witherspoon of Mississippi is serving his first term as member of congress, representing the fifth district. He succeeded Adam M. Byrd. Mr. Witherspoon was born in Mississippi in 1855 and was educated in the state university. He is a lawyer and never before has held a public office. He was married in 1880 to Miss Sue F. May of Versailles, Ky., and they make their home in Meridian.

"Who selects the mound for the rucial tests?"

"That, I believe was done by Mr.

It was worked presumably by planting, though Prof. Starr is convinced that slight of hand has played its part in the business. Of course, the plantwas overgrown with brush, and Allen had to cut away a small tree before he could begin to dig. This was done the times when patience had its perfect work. It takes enthusiastic science to plant a crop of relics and then wait years for the crop."

GARRICK THEATER

The Musical Comedy Stock company will open an engagement at the Garrick theater with a matinee performance this afternoon. With 15 people in the cast the company comes to Es-"Yes, I was badly fooled. And for canaba with an excellent reputation week and nothing will be left undone "Everything seemed so square and to make the company a permanent

WANTED-To rent, five or six room house. Rent must be reasonable.

In Rhenish Bayaria two associations have recently been organized to obtain a \$400,000 inheritance left in 1676 by the Dutch Field Marshal Baron von Ornholm. In Bavaria there is a new effort under way to secure tve for-tunes now estimated at about \$17,000,-000, the amounts left by five Datchmen to their German relatives, between 1636 and 1706, plus the interest that has accumulated since that time. Every one of these five fortunes, the largest of which was \$1,120,000, has completely disappeared.

There is a record that the money left by Johann Joas, an Amsterdam ship's captain, who died in 1707, reached the representative of his heirs in Augsburg in 1785. In the next year the heirs were informed that \$700,000 had been deposited for them in an Augsburg bank. The heirs of a leather dealer, Van Gratz, received small payments on account, and even obtaining \$40,000 about 1791. In 1855 an Augsburg banker by the name of Von Halde confessed on his death had that the inheritances had been deposited in his bank, and that by means of them he had made his own

Since then every effort has been made to trace the bequests through the municipality of Augsburg, the Bavarian minister of the interior, and the courts. There are endless documents in the case, but the money has never appeared. Recently the Dresden bank absorbed the Von Halde bank business, and the heirs are now of the opinion that it must account to them for \$17,500,000 and they have engaged a distinguished Munich lawyer to devote his time to a search for the

DOG'S EYE GRAFTED ON MAN'S

American Oculist Restores Lost Signt by Performing Wonderful Operation.

That a person totally blind from ophthalmia, even from birth, can be made to see by having a portion of a dog's eye grafted on his own was the startling communication made by Doctor Borsch, an American oculist at present in Paris, in a paper read before the meeting of the French Ophthalmia society a few days ago. Doctor Borsch explained that as a

result of blindness from ophthalmia, as also from some other causes, the cornea, which is the transparent membrane in front of the eye, becomes chance of restoring sight is to replace the defective cornea by a healthy one, To perform this feat, Dr. Borsch first operates on a dog and lays back from its eye the conjunctives or skin of the eyeball surrounding the cornea.

He removes a portion of the latter and places it aside in blood serum. He then performs the same operation on the patient's eye, removing part of the front of the eye of the same size as the cornea, taken from the animal. The dog's cornea is now placed in

position on the human eye and secured with stitches of the finest possible silk, the surrounding skin, which had been laid back, being brought into place over the edge of the cornea and also sewn

The new graft unites with the eye in a few days, aided by a temporary glass cover to keep it in shape and injections of serum to stimulate vital-
