

"Moon of Crust on Snow."

Onabini gisiss

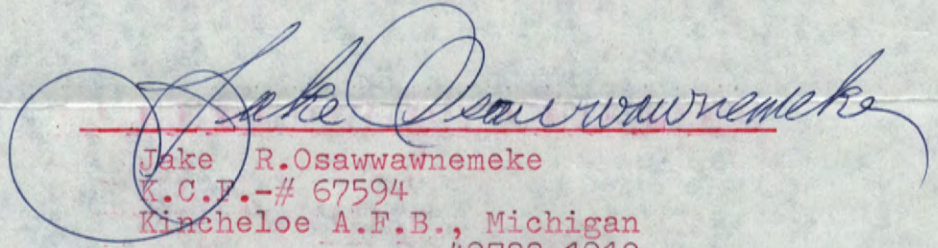

March 16, 1982

Ahneen Jim;

First off let me say (Megwetch) Thank you for remembering me in sending the work of Coy Ecklun over to me. It was appreciated his word pronunciation is quite similar to mine except that I use the broken sound phonetics and the like. I must say after reviewing his work that he done a nice job! I think that one of these days that I'll set down and write him a little letter on it and my compliments and comments! Unless he doesn't particular care to be hearing from a Nishnawbe Convict? But I don't think that he is one of those kinds of people or he would not have been dedicated enough to do the works his grandfather and father had asked of him in writing down the Ojibwa language as he has done. Oh yes another deal that I have done different than most is the illustrations . I am wonder sine Vickye quit over there if she left the last bit of work that I had sent over to the paper for the next edition she wrote and told me that she had quite and etc and asked me to try to continue to help the crew in my works and support over there which of course I will do as long as I possibly can! But whom ever is the editor or wheel please tell them to drop me a line or you or Nancy Hatch can and let me know if they have the material of mine for the next edition and to try and always let me know or have an idea when the next edition of the Nishnawbe News may be due to come out! Tell them to keep up the good work and not to give up when things do not always go as would be nice to right all the time. Everyone has their own opinions and agreements and disagreements but if one will try to be a little patient and not be one way and at least take a peek at the other persons views they might find a equal way to come to a compromise on their disagreements. I guess this is what makes the works of the world go around huh? I don't think we'd know what the heck to do if everything went in complete unity in the world it would be nice but weird huh? Well my friend I guess that this will do for right now you take care and keep up the good works. Drop a line if you'd care about this and that at the University. Oh yes one question; did you know Steve Platt when he was at the University? He was Assistant or associate professor of psychology I knew Steve well and his wife plus I had him in a couple classes at NMU in psych classes and a Substance Abuse - Alcoholic psych class a few years back. I was wondering where he went to from NMU or don't you happen to know. I had another goofey one there to in psych classes hahaha Commons little goofey

fat boy Michael Commons. I will say that he knew his stuff but was a real weird one. I think I learned more about the 60's at Berkly, Cal than I did in child psy and abnormal psych from him hahahaha! well you take care and May the Great Spirit always walk beside you and guide your footsteps and watch over you. Give my regards to old Nancy Hatch Tell her I said hi huh?

In the ways of the drum & Sacred Pipe
As always in Indian brotherhood,
