NO HIT NO RUN

MONTE OLMSTED OF THE ESCANABA TEAM PITCHES THAT KIND OF A GAME AT MEMONINEE

ONE MAN ONLY REACHES FIRST

Just Twenty-Seven Men Face Him at the Batting Station in Full Nine Innings—Walks but One Man and Does Not Allow a Safe Hit—Memoninee is Shut Out by Score of 10 to 0—Never Had a Chance to Win—Story of the Game.

At Memoninee Sunday afternoon Monte Olmsted, one of the pitchers on the staff of the Escanaba baseball team, performed the remarkable feat of pitching a no-hit, no-run game against the Memoninee team.

Although especially strengthened for the game with Escanaba, the Memoninee team did not have the slightest chance to win. They could not hit Olmsted's curves with safety and but one man succeeded in getting to first base.

Escaaba Plays Fine Game. In the succeeding eight innings the Memoninee players were retired in one-two-three order, so that but twenty-seven players faced Olmsted at the batting station in the full nine innings.

But that wasn't all, they saw, however. They witnessed the playing of a fast and errorless game by the Escanaba bunch, who never made an error. In fact, their glib support was largely contributory to the result achieved by Olmsted's pitching.

Memoninee Plays Loosely. While Escanaba made ten runs only two of them were earned, the remain-

der being made principally on hits, sacrifices and errors of the Memoninee players. Although strengthened by addition of two or three state university players, the Memoninee team failed to put up any better game than they did up here, while they probably could not save themselves from a shut-out because of the good playing of the Escanabans, they certainly should not have permitted the latter to make so many runs.

The Summary. R. H. E. Escanaba 0 1 1 2 2 0 0 2 2—10 13 0 Memoninee 0 0 0 0 0 0 0 0 0—0 0 10 Batteries—Escanaba, Monte Olmsted and O'Connors; Memoninee, Baker and Schimke. Earned runs—Escanaba, 2. First on balls—Olmsted, 1; off Baker, 3. Left on bases—Escanaba, 11. Wild pitches—Baker, 1. First base on errors—Escanaba, 7. Two base hits—N. Walsh, M. Olmsted. Struck out—By Olmsted, 6; by Baker, 4. Hit by pitcher—Enders and Lantz. Time of game—1:50. Umpire—Dotsch.

HIGH SCHOOL FIELD MEET ON WEDNESDAY

Students of the Escanaba High school and others interested in school athletics are taking great interest in the annual field meet of the Senior, Junior, Sophomore and Freshmen classes of the High school, which is to be held at the old fair grounds next Wednesday afternoon, beginning at three o'clock.

The card of events to be contested will include pole vaults, hurdlings, sprinting (50, 100, 440 and 880 yard dashes), shot put, discus and weight throwing, jumping, etc. To the winner of the greatest number of points a handsome silver cup will be awarded and the class securing the most points collectively will receive a pennant.

C. M. FROST HAS NOT RESIGNED POSITION

Charles M. Frost states that he has not, as has been reported, resigned his position as chief clerk in the office of Master Mechanic Frank Slater of the Chicago & Northwestern road in this city. Mr. Frost states that on account of having trouble with his eyes he applied for and obtained ninety days' leave of absence from the Northwestern's employ and that during the period of his vacation he will undergo treatment for his eyes and do some life insurance work on the side.

TO SHOW COURTESY TO THE VISITORS

Meeting of Business Men and Citizens Appointed on a Special Committee Will Be Held This Evening to Arrange Plans to Entertain Chicago Trade Boosters.

Notice has been issued by the directors of the Escanaba Business Men's association that a meeting of the association members, the city council members and a special committee of business men will be held at the city hall this evening for the purpose of planning some sort of a program for the reception and entertainment of the members of the Chicago Association of Commerce, who are scheduled to arrive here next Wednesday on the steamer Theodore Roosevelt.

Although the prospective visitors have expressly signified that it is their wish to entertain the people of Escanaba on board the steamer rather than to be entertained, the business men feel that something special should be done as a matter of common courtesy to their visitors. Just what shall be done is to be determined at the meeting this evening. The members of the special business men's committee appointed to meet with the Business Men's association directors and members of the council tonight are as follows:

W. B. Linsley, J. A. Allo, Frank Slater, D. A. Oliver, Edward Erickson, E. C. Voght, T. M. Judson G. T. Stephenson, R. E. MacLean, C. W. Kates, G. H. Mashek, M. Perron, W. W. Oliver, H. W. Reade, J. M. Clifford, H. H. Allyn, J. C. Kirkpatrick, Lealie French, A. J. Young, John Christie, E. C. Norton, A. F. Shaw, August Erickson C. R. Williams, J. K. Stack, F. H. Van Cleve, A. R. Moore, Solomon Greenhoot, L. C. Jennings, H. W. Coburn, A. R. Northup and J. A. Burns

AN EMPTY KEROSENE BOTTLE NEAR A FIRE

At two o'clock Sunday morning the fire department was called to put out a fire that had evidently been started by some person in an old house adjacent to the abandoned planing mill owned by the I. Stephenson company and located at the west end of Ludington street. The fire in the house was put out with the fire extinguishing apparatus carried by the department and though the blaze was well started, it was easily handled without the use of water.

Close to the building, Chief Kamrath found a bottle that had but recently contained kerosene and burning kerosene could be smelled by the firemen when they entered the building.

BASEBALL TODAY'S GAMES: NATIONAL LEAGUE

Table with columns for location, R.H.E., and batteries. Includes games at Brooklyn, Philadelphia, Boston, and Philadelphia.

LANGFORD-KAUFMAN FIGHT CALLED OFF

(By Associated Press.) San Francisco, Cal., June 20.—Louis Blot, the promoter of the Langford-Kaufman prize fight, declared this morning that the fight had been called off and would not take place at all.

RAPID RIVER WINS THE SUNDAY CONTEST

Gladstone and Rapid River played ball at Rapid River Sunday afternoon and Rapid River won by a score of 7 to 5. It wasn't a case of the umpire either, it is stated. The two teams are playing again this afternoon.

FINE LECTURE TO BE HEARD THIS EVENING

Prof. J. C. Monaghan, well and favorably known in Escanaba, will deliver an address in Peterson's opera house this evening under the auspices of the Escanaba council of the Knights of Columbus. There will be no admission fee and the Knights of Columbus cordially invite the people of the city to attend.

The advance sale of seats for the commencement exercises of St. Joseph's school were placed on sale this morning at the store of the Mead Drug company. The exercises are to be held in Peterson's opera house tomorrow evening.

COMMENCEMENT OF ST. JOSEPH'S SCHOOL

Exercises in Connection Therewith are to Be Held in Peterson's Opera House Tomorrow Evening—Attractive Program is Arranged for Presentation—Details.

As briefly noted in The Mirror some days ago, the commencement exercises of St. Joseph's school will be held in Peterson's opera house Tuesday evening, June 21. All preparations for the event have been completed and it promises to be most interesting and entertaining, and there is assurance that a large audience will be in attendance.

Entrance March—A. Bauban. The Last of the "Silver Fleet"—Mary Katherine Decker. Flag Salute. Pluie de Rubis—S. Mazurette. Butterflies and Flowers—H. Smart. "Results that Endure"—Anna Claire Barron.

Class Song—"On the Beautiful Sea"—G. B. Nevin. "Vesper"—E. Lux. Valedictory, "The Message of the Shell"—Emma Josephine Girard, Mary Adeline Henry. "Among the Sheaves of Golden Corn"—M. Peuschel. "Charge of the Hussars"—F. Spindler.

Presentation of Diplomas. Address—Rev. H. Buchholz.

EXCURSIONISTS VISIT ESCANABA

Marquette and Memoninee people to the number of 300 or more were visitors in Escanaba Sunday and from all reports they enjoyed themselves. They came here as members of an excursion given by the Marquette City band on the steamer Eugene C. Hart and remained here about five hours. The boat arrived here about 1:30 o'clock in the afternoon and left on the return trip at 6:30.

BAND EXCURSION IS GREAT SUCCESS

As was anticipated, the Escanaba City band's excursion to Memoninee and Marquette Sunday on the steamer Maywood was a great success, the weather being fair and all that could be desired for a water trip.

that is to say, there were fully 300 excursionists on board. The trip going and coming is reported to have been exceedingly pleasant and was therefore greatly enjoyed.

The Maywood arrived at Memoninee about 2:15 o'clock and left on the return trip at seven o'clock, reaching here about 11:15. The excursionists had a good time wherever they went either in Marquette or Memoninee. Of course many of them went to the Escanaba-Memoninee baseball game, described elsewhere in these columns, and were greatly rejoiced over the Escanaba team's great victory and Pitcher Monte Olmsted's great feat in pitching a no-hit, no-run game.

THE BACCALAUREATE SERVICES ARE FINE

Auditorium of the High School is Filled to its Capacity with Audience Attracted by Annual Event—Program is Well Rendered and Highly Enjoyed—Details.

Notwithstanding the warm weather prevailing, the Escanaba High school baccalaureate services attracted to the high school auditorium Sunday evening an audience that filled the large room to its complete capacity. And those who attended the services were repaid, for the program was one of rare excellence and finely rendered.

It was opened with a march, "Prince Imperial," played on the piano by Miss Esther L. Englund. Then followed the singing of Mendelssohn's "The Lord is Great" by the High school chorus; vocal solo, Oliver Thatcher; song, "Our King," Girls' Glee club; class address, City Attorney Ira C. Jennings, and the singing of Gloria from Mozart's "Twelfth Mass." All of the song numbers were especially excellent and greatly enjoyed.

Mr. Jennings in his baccalaureate address did not speak on a set subject, but gave his conception of what forms the basis of the public school system and the advanced ground education is attaining in this country. He pointed out some of the defects in the system and also many of its best points.

Much of Mr. Jennings' address, which covered about thirty-five minutes, was devoted to the members of the graduating class, with most of whom he is personally acquainted and whom he has seen grow up into budding men and women. He gave them some sound advice and encouragement for them in their future study and life work.

Next Thursday evening the Commencement exercises of the High school will be held and it will be an event of great importance not only to the school, but to the people of the city at large who take an interest in the schools and what they are doing. The program of the exercises has practically been prepared and will be made public in due time.

STARTS FIGHT

ATTORNEY GENERAL OF MISSOURI BEGINS OUSTER ACTION AGAINST PACKING COMPANIES

CONSPIRACY ONE OF CHARGES

Companies Attacked are Five of the Most Prominent in the Meat Packing Business—They are Charged With Violating Anti-Trust Law and Conspiracy to Control Prices to Be Paid by Dealers for Meats and Produce—Other Details.

(By Associated Press.) Jefferson City, Mo., June 20.—Attorney General Elliott Major began ouster proceedings against five meat packing companies today by filing quo warranto informations in the supreme court. The companies attacked are Armour Packing company, Morris and company, Swift and company, Hammond Packing company and St. Louis Dressed Beef and Provision company.

The Armour, Swift and Morris companies are charged with violating the Anti-trust law and conspiracy and the Hammond and St. Louis Dressed Beef and Provision companies, as subsidiary companies of the National Packing company with conspiracy to control the business in Missouri. The five corporations are named in two petitions which ask that the corporations be excluded from all corporate rights, that their licenses be forfeited and that all or such portion of their property as the court may deem proper be confiscated or in lieu thereof a fine be imposed.

Charged With Conspiracy. Armour, Swift and Morris are charged with having entered into a conspiracy in 1909 to control the prices to be paid by dealers and wholesale dealers for dressed meats and to control the prices to be paid by all retail and wholesale dealers for butter, eggs, poultry, game, dairy and agricultural products and by-products from the business of slaughtering live stock.

TODAY IS HOTTEST OF SEASON SO FAR

Although there was a strong down-pour of rain in Escanaba Sunday afternoon, it did not serve to cool the atmosphere to any great or lasting extent and today probably will be the warmest of the season thus far. At noon the temperature was eighty degrees in the shade, according to the weather bureau records. This is the warmest it has been at noon on any day this summer up to date, the weather man states.

ACCIDENTALLY SHOT BY HIS CLOSE FRIEND. Probably Fatal Accident Occurs This Afternoon at North Escanaba-- John Koos a Victim of "Didn't Know It Was Loaded" Carelessness--Condition is Critical. This afternoon at three o'clock John Koos, an Austrian living at North Escanaba, was accidentally shot by John Bodelick, a close friend, while the two were examining and cleaning a rifle that "they did not know was loaded." His condition is very serious and probably fatal.

DIAMONDS FOR GRADUATION. Our Diamonds You Can Implicitly Rely on. The Price is the Lowest and Quality Just as Represented. DIAMOND RINGS FROM \$10 UP. Blomstrom & Petersen, The Wide Awake Jewelers.

Are YOU Working for Nothing? During the past month you have earned \$50, \$80, or perhaps \$100. You have paid the bills of your butcher, grocer, landlord and coal man. How much did you pay yourself? Are you not entitled to some pay for management of your affairs?—Just as well as the manager of any factory, store or other business? Usually the manager's pay depends upon his ability to manage. So does yours. Better management—bigger salary. Manage well and have surplus money for yourself. LEARN TO SAVE. If you recklessly spend all your surplus money, you cheat yourself. Why not chop off unnecessary expenditures—the small extravagances. Deposit this surplus systematically each week with this institution and watch it accumulate. Three per cent interest will be added to your savings if you make time deposits. Not tomorrow—TODAY. NOW is the time to start. Take one dollar if you cannot spare more, and open an account TODAY. Don't think that ONE DOLLAR is too little. It is plenty to start with. The determination to begin saving is the thing that counts. When the start is made, it is easy to add a little more each week and the three per cent interest paid on time deposits helps to swell the amount. First National Bank. Depository of United States and State of Michigan. Capital \$100,000.00. Surplus \$100,000.00. OLDEST, LARGEST AND STRONGEST BANK IN DELTA COUNTY.

Safe and Sound Athletics.

Not the least among Edward Payson Weston's admirable and wonderful qualifications is his ability to face all weathers. He is trained for steady work, not for spurts, and the only way to make time is to keep going. In this respect he differs from the record makers as a class. Personally this is a blessing to the veteran pedestrian. It is a good example to all who want to get benefit from walking as an exercise.

Weston's powers of endurance could probably not be paralleled among champion athletes in any field, although hundreds could outdo him in a day's work on the road. Most athletes in these days train themselves for a contest with trained opponents. They train to overcome this or that strong point in the rival. This is narrow training and while it produces marvels now and then, fails to produce an all around man for the tests of life. Athletics should be for the man, not the man for athletics.

The New York suffragists are a hopeful lot. They are cheered by forty-seven friendly votes against eighty-seven unfriendly ones in the state assembly. It might have been worse, and in former years it has been. People who take defeat that way will be heard from again.

Former Secretary Shaw tells us that foreign countries sell their goods to America cheaper than they sell them at home. But foreign consumers have no cause to complain, as American manufacturers reciprocate.

Wireless telegraphy is to be tested for train dispatching. Such a system should prove invaluable in correcting mistakes in train orders before the collision occurs.

Wilbur Wright has put an end to so much skepticism that when he says he can fly across the ocean no one will think of contradicting him.

KIDNEY-ETTES FOR KIDNEY DISEASE

SHOOTING MAN FOR DEER COSTS 5,000

Guide, Taken for Game in Northern Forests, Wins Case Against Hunter in Milwaukee Court—Special Verdict Rendered by the Jury—Details of the Case.

Milwaukee, Wis., June 20.—To shoot Charles W. Harper, a Mercer hunter guide, in mistake for a deer cost Martin E. Holcomb, Milwaukee hunter, \$5,000. Harper had asked for \$25,000. Damages, in favor of Harper and against Holcomb, were assessed by the trial jury in Judge Lawrence W. Halsey's court, reporting Saturday.

From 4:25 o'clock Friday afternoon until about 5 o'clock next morning the jurors struggled to reach a verdict. At times the arguments were decidedly strenuous, judging from the pitch and earnestness of the voices that could be plainly heard by heated Milwaukeeans, seeking cool spots in the court house park.

The finding came in the form of a special verdict in four questions. The jurors found that the defendant did not exercise ordinary care in distinguishing the object at which he fired at the time of the shooting. This lack of ordinary care, the jurors held, was a proximate cause of the resultant injury. They found, too, that there had been no want of ordinary care on the part of the plaintiff contributing proximately to the accident. Then came the assessment of damages at \$5,000.

RAILROADS VIOLATE STATE LIQUOR LAW

Lansing, Mich., June 20.—"Every time a drink of liquor is sold on a train the railroad company is a violator of the state law," said one of the state's attorneys this morning. It is known that the companies pay a government license of \$25 for the purpose of carrying liquor on trains, but this license does not give the companies the privilege to dispense the stuff at so much per drink. At the last session of the legislature an effort was made to have a law passed requiring that the railroad companies pay the state \$50 for the purpose of dispensing drinks in the buffet cars, but the brewing interests increased this to \$250 and the legislature refused to pass it.

NOTICE

The annual meeting of the Lakeview Cemetery association will be held at the office of Emil Glaser on Monday evening, June 20, 1910, at 7:30 o'clock. By order of the committee. 302-1f.

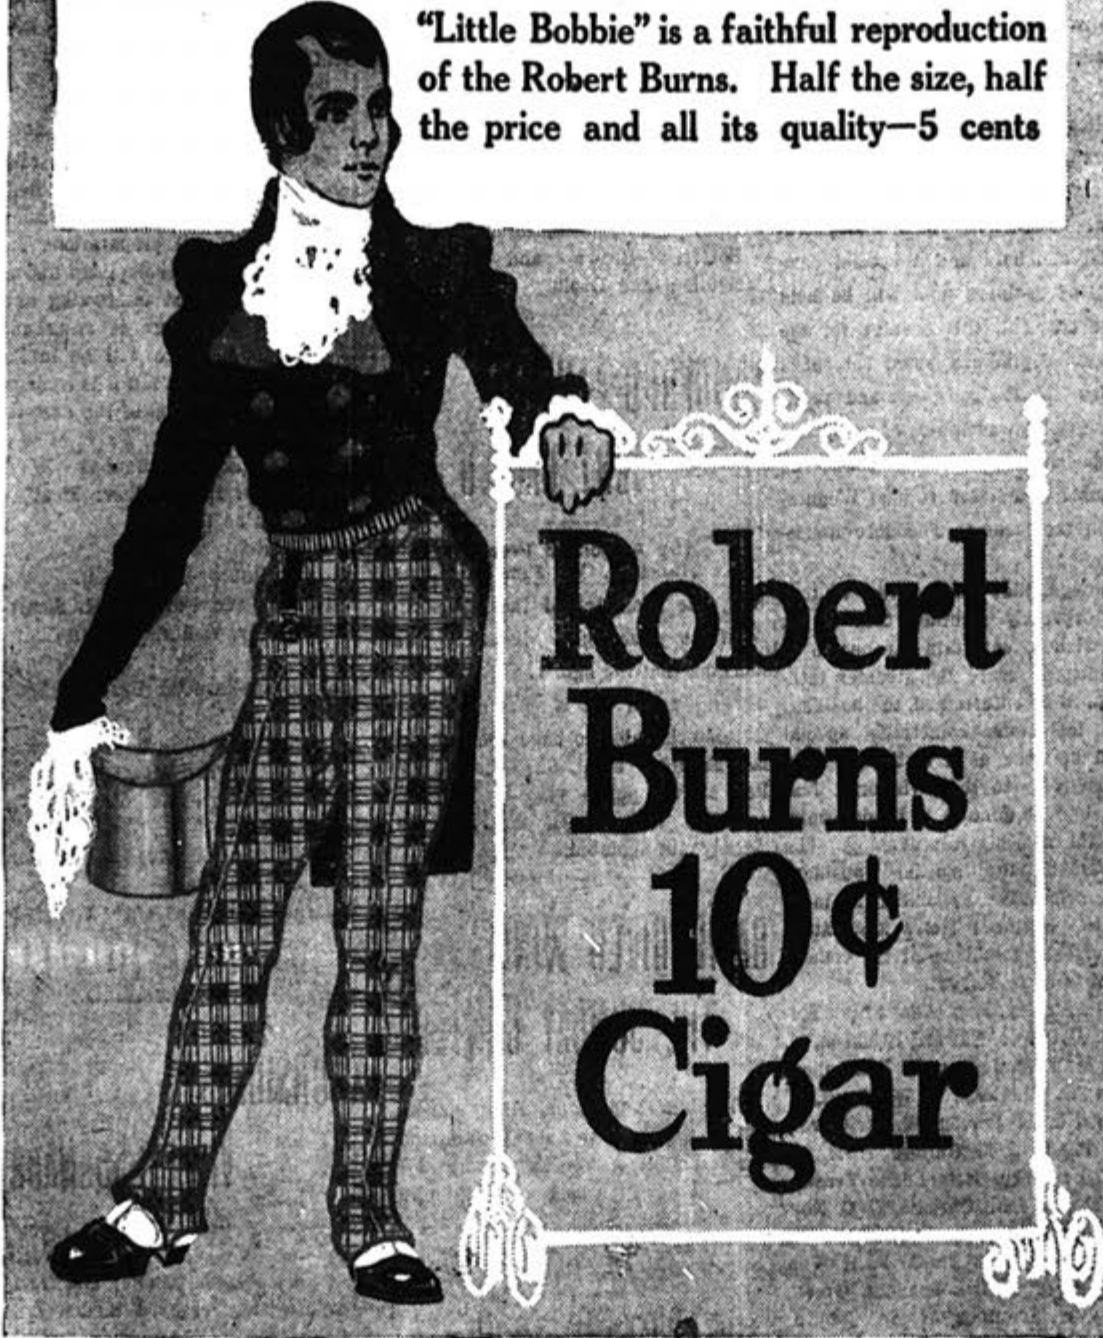

Stimulation Without Irritation.

In case of stomach and liver trouble the proper treatment is to stimulate these organs without irritating them. Orino Laxative Fruit Syrup aids digestion and stimulates the liver and bowels without irritating these organs like pills or ordinary cathartics. It does not nauseate or gripe and is mild and pleasant to take and is sold by all druggists.

SENATOR STEPHENSON IS EIGHTY-ONE YEARS OLD

Still in Vigorous Health and Attending Actively to Business and Official Duties.

United States Senator Isaac Stephenson of Marinette was eighty-one years old last Saturday. He is in Washington attending to his duties in the upper house of the national legislature. Senator Stephenson is so well known and has so many friends in the upper peninsula, particularly in Delta county, that there are many among The Mirror readers who will appreciate in connection with the announcement of his eighty-first birthday some additional information regarding the remarkable old man.

Mr. Stephenson although one mile stone past the allotted three score and ten is still vigorous in health. He is attending all the sessions of the senate and is active in the duties of his high office. He also keeps in touch with the big manufacturing enterprises of which he is the head and is master of his immense business still. The Milwaukee Free Press in an appreciation of Mr. Stephenson gives the following signal facts concerning his career:

American born, across the line in York county, New Brunswick, of good stock—his mother was a native of London, England, and his father Scotch-Irish—eighty-one years ago today, the beginning of a typical American career of the best sort. Taught by Experience. He did not get much "schooling"—he attended the common schools "a short time," a biographer says—but he got a lot from experience, where the most useful educations are secured. He is one of those to whom the education of colleges would have meant much. When he was a few months past seventeen he struck out from his Maine home for Wisconsin, going onto a big unmade farm near Janesville, and that summer he broke 130 acres of land, with a string of oxen and a prairie breaking plow. It

Senator Isaac Stephenson.

is a good proposition to bet money on that a 17-year-old boy who breaks a hundred and thirty acres of land in a summer will be heard from somewhere later.

Before he was 21 he was assisting the man with whom he had lived since coming to Wisconsin in purchasing great tracts of pine in northern Michigan; and when he was 23 he was a partner in the firm of N. Ludington & company, getting out the timber that was used in putting in the first breakwater in the upper waters. At 28 he owned a quarter interest in the N. Ludington company, of which

he has been vice-president and president for forty-two years. This is but one of several large corporations of which he is the controlling genius.

Man of Large Affairs. He has been a man of big affairs ever since he entered man's estate. At 17 he was tearing up the prairie in Rock county. Twenty-one years later he was manager of the N. Ludington company, capitalized at \$100,000, and vice-president of the Peshtigo company, capitalized at \$1,500,000, and then of the Stephenson Transportation company, and the Menominee River and Boom company, which has handled more logs, it is said, than any other company in the world. He controls the Stephenson company of Escanaba. He is at the head of the Stephenson National bank. He is largely interested in the Marinette & Menominee Paper company, and in other business enterprises.

How came Isaac Stephenson to be known as the Millionaire Luberman and a great figure in the manufacturing and commercial world, for he has been that these many years. In what particulars did he differ from the thousands of Wisconsin young men of fifty years ago?

Not Made by Luck. It was not luck that made Isaac Stephenson the lumber master of northern Wisconsin and Michigan. There was the opportunity, which he saw and understood, and there was the strong, vigorous and alert young fellow, with the brain and pluck to grasp it and stick to it, when sticking to it meant harder work than young men know much about today.

Mr. Stephenson and his companies have been great factors in the development of Wisconsin and northern Michigan.

4TH OF JULY EXCURSION RATES VIA THE CHICAGO & NORTHWESTERN RY. From this station to points on C. & N. W. Ry., in Michigan, July 2nd, 3rd and 4th. Return Limit July 5th. Ask ticket agents, The North Western Line for rates and information. 316-173.

\$275 Buys the Beautiful Mendelssohn Piano

Largest model; full metal plate; double veneered case; Ivory keys; choice oak.

When you hear the sweet, sympathetic tone of mahogany or golden of the "MENDELSSOHN," and note its smooth, delicate touch, you will ask the question so many of our customers have asked—"How do you sell such a splendid Piano at so low a price?"

Our answer is—We are the largest Mendelssohn dealers in the U. S. We contract ahead for Pianos enough to supply all our 24 Stores, frequently placing a single order with this concern for MORE THAN 1,000 PIANOS. Does it not stand to reason that we buy at a lower price than any other house? Would not any manufacturer make extraordinary inducements to secure our trade?

Every purchaser of a "MENDELSSOHN" gets the benefit of the big saving we make—that's why we are able to offer, in this highly attractive Piano, value that is absolutely unequaled elsewhere.

\$10 Will send a "Mendelssohn" Piano to your home. \$6 Monthly will pay for it.

You take no chances when you buy a "MENDELSSOHN." We know from long experience how splendidly it is constructed and what excellent service it gives. This knowledge warrants us in recommending it with every confidence and in adding our Guaranty to that of the manufacturer—thus absolutely protecting every purchaser.

### HUGE DAM WILL BANISH DROUGHT

Roosevelt Reservoir In Arizona to Irrigate 2,000 Square Miles of Arid Land Before Summer Is Ended Is Prediction.

DAM'S GREAT SIZE TOLD BY FIGURES.

Height of wall.....	224
Base of dam.....	235
Top of wall.....	1,080
Depth of reservoir.....	250
Capacity—can flood 2,000 square miles to one foot depth.	

THE greatest irrigation project the world has known or planned is soon to begin its work of watering one of the sandiest valleys imaginable. This is the Roosevelt dam in the Salt River valley in Arizona, erected at a cost of \$9,750,000.

The dam is immense. To give figures would be to say that the wall is 224 feet high. Put it beside the Metropolitan tower in New York and it would reach over a third of the height of the tower.

Can Flood 2,000 Miles.

The camera cannot do justice to this wall. Only when you stand at the base and, looking up, see it towering high above you can you realize its dimensions. It will hold back an inland lake intended to contain enough water

### AIRSHIPS FIGHT FUTURE WARS

Four Years of Work and \$9,750,000 of Uncle Sam's Money Needed In World's Greatest Project of Reclamation.

The Salt river to help in the construction of the great wall that was to hold it a prisoner. Like other streams in the southwest, the Salt river rushes swiftly through foothill and valley, giving it such a current or head of water that the dam builders realized that here was a substitute for steam power to operate their machinery. It was lucky it was so, for the nearest coal mines were 50 miles away and wood was too precious for fuel.

The first work done was to build a power canal twenty miles long. The canal connects with the river where it makes a sharp curve at a point higher than the bed of the stream at the dam site. Tunnels through hills, cut through valleys and lined with concrete, when they opened the head gates the canal delivered power equal to the combined strength of 4,200 horses and capable of supplying all the electricity they needed.

#### Power Aids Labor.

In the big cement mill it turned the grinders and crushers, it ran the machines in the repair shop, it sharpened tools, it lifted and carried those sixteen ton stones from the quarries to their beds, it drove the drills into the rocky cliffs for the dynamite holes, it lighted the town of Roosevelt and then had enough strength left to pump water from wells for thousands of acres of irrigated farms fifty miles away in the Salt River valley. A new empire is predicted for the southwest.

What the workers did with the aid of the electric power may be told in figures. This canal, which is distinct from the reservoir, develops a head of water that actuates water wheels connected with electric generators. From the power station extends a transmission line. Under a head of 250 feet by hydraulic jets with nozzles eleven inches in size, throwing water with the force of a five horsepower engine, have

### CURTISS PREDICTS SUPREMACY OF AEROPLANE IN BATTLE.

AIRMY OFFICER DISAGREES. Curtiss Predicts Supremacy of Aeroplane in Battle.

Cruisers of Air Not Dangerous to Forts and Navies at Present Time, Asserts Commander of Eastern Department, but Admits Conditions May Soon Be Upset by Inventors.

Glenn H. Curtiss in commenting on his aerial flight from Albany to New York asserted that the battles of the future would be fought in the air. Though practically all aviators agree with Curtiss, some army men take vigorous exception to a premature abolition of armies and navies.

It is pointed out that 6,000 aeroplanes, each of which can duplicate Curtiss' flight, may be purchased for the price of one great battleship. Yet a single one of these insignificant machines, manned by a competent operator fired with patriotic zeal, can utterly destroy a \$10,000,000 Dreadnought like the recently launched Florida, with its crew of 1,500 men.

#### Aerial Militia Needed.

"The first thing to do, however," said Charles K. Hamilton, the aviator, "is to organize an aerial militia. We have aeroplanes that are practical for all purposes, and we can ride them in any reasonable wind. What we need is an efficient corps officered by such men as Curtiss, Baldwin and the Wrights to teach young men how to handle an aeroplane. We have the aeroplanes, but not the aviators."

"I have demonstrated," said Mr. Curtiss, "that it is easy to fly over cit-

HOW CURTISS EXPECTS FORTS TO BE DESTROYED IN FUTURE.

les and fortifications. I think I showed the possibilities of the aeroplane in warfare. It would be perfectly practical to drop enough dynamite or picric acid down on West Point or a city like New York to destroy it utterly. Of course the speed of a flying machine cannot be reduced below forty-five or fifty miles an hour, a speed necessary to keep it aloft. So to hover over cities or fortifications you must circle around or swoop down from a great height and thus get near enough to the objective point to discharge your stores of explosives.

"Explosives could be dropped by pressing a foot trigger that would release a clutch holding the dreadful compound. To be sure of getting the exact range I would have, if necessary, a lot of small dummy cartridges. These I would discharge first. The moment I got the range I would drop the dynamite.

#### Warships' Doom Predicted.

"Then suppose we were attacking warships. We could dynamite their decks and blow them in even if we missed dropping the charges into smokestacks and funnels. Take my word for it, the days for big warships are numbered. I read that Japan is now turning to small vessels of war and will have no more expensive Dreadnoughts.

### That New Suit is a Part of Your Business Expense

To neglect it is to neglect your business. To make the old one "do" is not the way you do business OTH- ERWISE. YOU and your business interests are not often SEP- ARATED. And the impression your clothes give is the impression YOU give. Don't allow that impression to "hurt business"—for it might just as well HELP busi- ness.

## C. FLAGSTADT.

### STORY AGAINST THE WOODMEN IS DENIED

Officials of the Order Declare Interest "Rake-Off" Claims are Unfounded— Enemies are Blamed by Them— Charges are Being Investigated in Illinois.

Escanaba members of the Modern Woodmen of America will undoubtedly be interested in the following which appeared in a recent issue of The Chicago Tribune:

America's largest fraternal order, the Modern Woodmen, was made the subject of an inquiry in State's Attorney Wayman's office in Chicago a few days ago. Simultaneously a series of charges was framed by a member of the order before State Insurance Superintendent Potter of Illinois. This member of the order claims to have made a search of several years for evidence and alleges large irregularities.

Officials of the order say the man making this charge is a distinguished ex-official and that his allegations have no serious basis.

State's Attorney Magill of Rock Island county, who is in the midst of an investigation of various fraternal societies having headquarters in Illinois, has also conferred with State's Attorney Wayman of Cook county on the developments as related to the Woodmen. Mr. Wayman's interest in the Modern Woodmen's management has been stirred by allegations that for several years a controlling clique in its directory has not been turning into order's treasury all of the interest on its big deposits of funds, but has been "raking off" interest above two per cent by special arrangements with certain banks. The possible profits in such an arrangement are shown by the statement of cash on hand on April 1, 1910, when there was \$2,418,855 in the benefit fund and \$302,158 in the general fund, a total of \$3,221,013. On this basis of average deposits and assuming that the depository banks paid 3 per cent the yearly profits in the alleged private agreements would be \$32,000.

#### INTERESTING NOTES FROM STATE CAPITAL

Lansing, Mich., June 20.—The state geological department has added another skilled worker to its staff for the summer months, R. W. Clark, instructor in petrography at the University of Michigan. Mr. Clark has joined a field party in the Iron Mountain district of Upper Michigan where geological surveys of the land are being made.

The state treasury has collected \$2,395 this fiscal year in license fees from hawkers required under the state law to pay a license fee to the state. The June collection is not included in this amount.

The board of state auditors and joint board of control of state institutions will meet in Lansing on June 29 to fix the rate of maintenance of inmates of the Home for the Feeble Minded and Epileptic at Lapeer, for the next fiscal year.

Lieutenant Governor Kelley was the first of the gubernatorial candi-

dates to file his petitions with the secretary of state. While but 6,000 names are required Mr. Kelley filed 10,000 names to give room for some to be checked off when the list is gone over. Mr. Kelley states he has as many more names on his petitions.

### MUST WRITE LETTERS TO KEEP FROM JAIL

Toledo, Ohio, June 20.—Instead of sending them to the federal prison, Judge R. W. Taylor of the United States District Court has sentenced Frank Shaughnessy and Patrick Ryan to write a series of forty-eight letters to the district attorney. This is to be their punishment for raising a \$5 bank note. The men both pleaded guilty.

The judge sentenced Shaughnessy to five years and Ryan to one year in the Leavenworth penitentiary, but suspended the sentences. The condition of suspension is that the men shall write once a month for four years to the district attorney, telling that official where they are and what they are doing.

Shaughnessy and Ryan had been confined in the county jail six months awaiting trial.

### THE PRETTIEST YET

TALK ABOUT OUTING SUITS! THERE ARE ABSOLUTELY NONE IN OR WITHIN REACH OF ESCANABA TO COMPARE WITH THE SPLENDID GARMENTS WE SHOW. PERFECT IN STYLE, PERFECT IN CONSTRUCTION, PERFECT IN DESIGN. PRICED WITHIN REACH OF ALL.

### Mirror want ads bring results

### Only an Ad-Reader Can Wisely Manage Household Finances

THE ADS. make "management" of "money matters" in the home POSSIBLE. The wife who always studies the ads. is working in business partnership with the husband—who, supposedly, has to "know things" in order to EARN the money. On her part, the wife comes to know values, and prices, and where and when and how to buy—and such knowledge, such education, comes chiefly through reading and answering ads.

### "Household Prosperity" is assured if the wife makes Ad-Reading a part of her daily routine.

SITE OF ROOSEVELT DAM, SHOWING ROCK FORMATION IN CANYON WHICH AIDED GOVERNMENT ENGINEERS.

to flood 2,000 square miles to the depth of a foot. The lake extends back in the valleys twenty miles, and near the dam it will be over 250 feet from surface to bottom.

The valley of the Salt river is so situated as to form one of the most arid portions of America. Yet here the world's greatest water supply works have been created. The quantity of water to be stored is much larger than the volume held in storage by the greatest Nile reservoir. Verde and Salt rivers, furnishing the supply, drain a basin of 6,200 square miles.

The average yearly rainfall in this basin is not more than twenty inches. The annual rainfall upon the territory to be irrigated ranges from three to ten inches, and the rapid evaporation of moisture is indicated by the fact that the temperature in summer ranges as high as 120 degrees, although the elevation varies from 1,000 to 1,800 feet above the sea.

Work upon the construction of the dam proper has been in progress only since Sept. 20, 1906, owing to the great amount of labor required in making the excavations to bedrock. When it is remembered that the height of the dam above the rock is 284 feet, the length at the top 1,080 feet, the time and labor required in repairing the site for the wall do not seem excessive.

#### Nature Helps Engineers.

The work is technically known as a masonry arch dam with a gravity section arising from the foundation. It ranges in thickness from nearly 175 feet at the bottom to 16 feet at the top. An enormous quantity of rock is required for filling in behind the face of the barrier, and bowlders as large as can be handled are used. Nearly 400,000 cubic yards of masonry were placed in position. The ingenuity of the engineer forced

been used to wash away the loose formation and accumulation of dirt above the bedrock upon which the dam proper is being built. Much of the gravel thus secured has been utilized for construction material. To remove the gravel elevators have been placed in service.

The dams used for diverting the water to the power canal represent a cost of \$40,000, while the canal, including its pressure pipe and auxiliary structures, represents a total of nearly \$1,000,000.

#### Rocks Aid Economy.

How to get the immense quantity of concrete needed was a question. The railroad was so far away that the cost of wagon haul was more than the price the government must pay the nearest manufacturer. The geologists began tapping the rocks with their hammers and looking at the sands through their magnifying glasses. They found a limestone formation from which cement could be made and sand and gravel to complete the concrete. So nature had favored them in another important way.

To buy the stuff would cost \$9 a barrel delivered at Roosevelt. To build a mill and make it on the spot would furnish all they wanted at less than \$2 a barrel. So the reclamation service allowed them to spend about \$225,000 on a plant, and this scheme saved the government nearly half a million dollars for concrete alone.

The 2,000 square miles to be reclaimed will make 25,000 farms, each large enough to support at least five people, so that this work means a home land for fully 125,000 Americans. From what irrigation has done on a desert each acre, it is estimated, will yield the farmer yearly crops ranging from \$25 to \$150.
