BAKER HAS LEFT WAR ZONE; RAID IS CARRIED OUT

American War Secretary Returns from Inspection Along Entire Front of West Battle Line.

SCORE ANOTHER SUCCESS

Raiding Expedition With the French Troops Lasts Forty Minutes; Americans Report No Casualties.

With the American Army in France, (Wednesday) March 21.—Secretary of War Baker today concluded his visit of inspection through the American military zone in France with a trip which took him from the Verdun sector to the great headquarters and included a review of one brigade of the first division.

The secretary also went over the route which he traveled previously. Tonight Secretary Baker departed to fulfill other aspects of his visit to France.

America troops east of Luneville participated tonight in a raid on the German trenches, penetrating the enemy line for some distance. A hand to hand fight ensued. The raiders returned to the American lines after 40 minutes. At a late hour (10 p. m.) no casualties had been reported.

The raid was carried out in conjunction with French troops after a brief but intense barrage. The Germans retaliated with a heavy bombardment, firing numerous gas shells to stem the advance of the Americans.

The Soldiers Need Books And Aid Is Asked In Provision

Escanabans Are Asked to Contribute Good Reading for the Boys at the Front.

Does anyone in Escanaba question the value of books in the life of a soldier. If so, let him read the order issued by General John J. Pershing, setting aside fifty tons of cargo space monthly for the shipping of books to the soldiers overseas.

At least one hundred thousand books will be sent every month and this number will be increased by constant small shipments on army transports.

The thirty-seven libraries in the cantonments also will need from ten thousand to forty thousand books each and the nearly there hundred rather small camps, posts, forts and stations will need from a few hundred to several thousand volumes each. The task of handling all these books has been taken over by the American Library Association.

Campaign Here. The Carnegie library has charge of the campaign in this city. Let every household take time today to look over its books and decide what to bring to the city library this week.

Give the story that you enjoy the most not the one that you care for least. Give your favorite author, the novel that interested you last summer, the volume of poems with a meaning and message for you.

Remember that the war service administration hopes that for every book purchased at least five will be given to the libraries. It has been done in England; it can be done here. Call the library.

Daylight Saving Is Annual Measure

It Applies to All Railroads, Government Employees and is Effective Each Year.

Now that the Daylight Saving Bill has become a law, it is important that the public realize what it means. It means (1) That the hour's advance will apply generally to all railroads, government employees, etc.

(2) That the measure is not temporary, but permanent, that is, it applies not only in 1918 but EACH YEAR from the last Sunday in March to the last Sunday in October.

(3) That it goes into effect at two o'clock a. m. Easter Sunday this year, or, in the exact words of the measure: "That at 2 o'clock ante-meridian of the last Sunday in March of each year the standard time of each zone shall be advanced one hour and at 2 o'clock nante-meridian of the last Sunday in October in each year the standard time of each zone shall, by the retarding of one hour be returned to the mean astronomical time of the degree of longitude governing said zone."

"Thus because the last Sunday in March at 2:00 o'clock ante-meridian in each year the standard time in each zone shall be one hour in advance of the mean astronomical time of the degree of longitude governing each zone respectively."

Locally the signing of the measure by the president has caused much satisfaction. The great majority of Escanabans are pleased that it is national, realizing that all inconveniences due to conflict with railroad and government time, have been done away with.

Lenroot Confident; Late Returns Show Loyalty's Victory

Milwaukee, March 21.—Congressman Iryn L. Lenroot is due in Milwaukee tonight to consult with members of the Republican state central committee on plans for the forthcoming senatorial election.

The scant returns from the backwoods, over night did not change the relative standing of the candidates and the results as announced late last night are likely to stand as complete.

With the vote complete from many counties Lenroot today had a lead of 2,326 over James Thompson, La Follette candidate.

Lenroot's plurality is estimated at anywhere between 2,000 and 3,000. A newspaper supporting Thompson gives Lenroot a lead of 3,000 but does not admit Thompson's defeat.

ADMIRALTY GIVES OUT TOTAL LOSS OF U-BOAT DRIVE

In Spite of Tremendous Loss That Is Admitted, the Figures Do Not Approach Tenth Claim.

MAXIMUM IN LAST YEAR

Figures-Do Not Give Total Losses by Germany or Her Allies Which Are in Big Figures.

Washington, March 21.—Secret figures of the British admiralty on submarine havoc and world shipping losses were made public here today. They show from a total of both allied and neutral ships, the countries had lost 11,827,372 gross tons while the shipyards outside of America have turned out 6,275,000.

In spite of the tremendous loss the totals do not approach the claims of the Germans and with 2,589,000 tons of enemy ships added to the output of the war period, the net loss to the world shipping, exclusive of that of Germany and her allies, is only 2,632,297.

The maximum losses were reached in the second quarter of 1917 after the start of unrestricted submarine warfare which drew the United States into the war. In the fourth quarter it was 1,272,843.

In the last quarter of 1917 the loss was 932,023 tons. At that time the enormous increase of the facilities of the United States had not yet begun to get into action.

INTENSE GUNFIRE SHAKES WINDOWS AS FAR AS DOVER

Sharp Artillery Action Could Be Distinctly Heard at English Coast Towns During the Morning.

STARTED AT 3:00 O'CLOCK

The Teutons May Concentrate Where Fire Has Been Started or May Switch Scene of Fight.

British Army Headquarters in France, Mar. 21.—The Germans today launched a heavy attack on the wide front in and near Cambrai sector. This assault bears all the earmarks of being the beginning of the enemy's grand offensive which they have been promising for so many months.

London, March 21.—The Germans shortly before dawn this morning began a heavy bombardment over a wide section of the British front, it was announced officially through the British war office. Sharp artillery action could be distinctly heard at Dover and other English coast towns. Doors and windows were continually shaken. The firing, which was the heaviest ever heard in this district, began at 3 o'clock this morning and lasted until 7 o'clock.

At Ramsgate, beside the sound of cannonading bright flashes were seen at sea while the vibration of the cannons' fire shook windows and dislodged slate from roofs.

From Scarpe for a distance of nearly 50 miles the artillery firing is intense and the beginning of cannonading along this wide front may mean that preparations for the much advertised German drive have begun. All conditions point to a beginning of the drive today.

There is considerable belief that the bombardment in any particular area cannot be taken as a criterion. The most natural conclusion is, however, that the drive is to be made at some point in the area now under fire.

Berlin, via London, Mar. 21.—Artillery battles began in full force along the broad stretch of the battle front today, the army headquarters announced.

Vienna, via London, Mar. 21.—Austro-Hungarian artillery has taken part in the heavy cannonading against the English and French on the western front.

Berlin, via London, Mar. 21.—Bavarian troops over-ran the sector west of Ornes on the Verdun front yesterday and advanced as far as the Brule ravine, capturing 240 men, the army headquarters announced today.

Parents of American soldiers now in  
France who have feared for their moral  
safety, on account of sensational rum-  
ors which have reached this country  
from time to time, may feel reassured  
by the statement in which chaplains  
irrespective of creed have concurred  
that "the morals of the men of the  
American forces are most excellent,"  
and that "the men on duty in these  
towns in France are in less danger  
morally than they would be in the ser-  
vice in our own country."

In standardization there is economy,  
and an Eastern paragrapher suggests  
that a great saving could be effected by  
establishing a standard make and color  
for men's neckties. Uniform black bow  
ties, ready made to fasten round the  
neck, would save time in putting on.  
The men wouldn't mind—except those  
who are young and giddy, and a good  
many of that class are enrolled in the  
army and wearing uniforms, as it is.

It is a remarkable fact that all wom-  
en murderers described by the mush-  
and-gush writers are frail, pallid, deli-  
cate and shrinking. Apparently, the  
community's lives, if not property, are  
entirely secure with the powerful Kat-  
rinkas.

Personally, we do not care for substi-  
tutes for food yet. Any man who can  
eat the ancient hen fruit that a fellow  
has to eat nowadays is very apt to  
sistepst substitutes and demand that  
the real stuff be brought on, whether it  
be fit to eat or not.

We know how unsatisfactory to  
Americans is a name like "Boche" or  
"Hun" to apply to the enemy, but they  
must remember the press cannot al-  
ways call a spade a spade. In other  
words we are not allowed in print to  
call a Boche what he is.

A new revision of the old adage  
might read: Save your pennies and  
the war hogs will take care of your  
dollars.

Our plans of winning the war are  
very much in the air at present, but  
in the entirely new sense of the  
phrase.

In the interest of economy, why not  
use the largest stamp possible instead  
of smaller stamps of the same aggre-  
gate value?

### ANTI-AIRCRAFT GUNS FOR NAVAL STATION

Great Lakes Boys to Practice Shoot-  
ing at Balloons and Box Kites;  
Want Experience.

(BY ASSOCIATED PRESS)  
Great Lakes, Ill., March 21.—To give  
the men at the Naval Training Station  
here practical instruction in the man-  
ipulation of anti-aircraft guns, the Navy  
Department has authorized the install-  
ation of a three-inch, fifty calibre anti-  
aircraft battery. This announcement  
is made in the Great Lakes Bulletin,  
the new daily paper edited and printed  
by the sailors.

Present intentions are to mount the  
guns on the lake front so that men  
can be trained by target practice at  
captive balloons and box kites. For  
drill purposes, in connection with avia-  
tors at the station, it is planned to  
have airplanes make day and night  
"attacks." All guns will be fully  
manned, ready for instant action when  
an airplane puts in an appearance.  
The crew of the searchlight station  
will be constantly in readiness to pick  
up airplanes making a "night inva-  
sion."

Airplane detectors, similar to those  
used at the European battlefronts, are  
being installed, and experiments with  
types of projectiles for attacking air-  
planes will be carried on.

Another innovation about to be  
adopted is a "land battleship," equip-  
ped with modern appliances for the  
destruction of submarines. The ship  
has been built upon the lake-front  
and will be equipped with the fire con-  
trol and searchlight installations in  
use on the latest type American bat-  
tleships. A cage mast and a battery  
of three-inch, fifty calibre guns will  
be mounted for use in target practice.  
As a result of the "landship" training,  
men will be qualified for gun positions  
when they leave the station. The ship  
was planned by Captain W. A. Moffett,  
station commander, and Lieutenant-  
Commander Chester S. Roberts, execu-  
tive officer.

### JAPANESE LEAVING MEXICO FOR U. S. A.

Yellow Men From All Parts of the  
Country Are Waiting Steamers for  
San Francisco.

(BY ASSOCIATED PRESS)  
Manzanillo, Mexico, Mar. 21.—Many  
Japanese from all parts of Mexico are  
concentrating here and at other Pacific  
coast ports, awaiting steamers to take  
them to San Francisco. Although they  
are reticent about their reasons for  
leaving Mexico, it has been learned  
that they are answering a call to the  
colors from their government. Reser-  
vists also are being called from other  
countries of North, South and Central  
America, they say.

# Certain-teed

## Roofing - Paints - Varnishes

**Certain-teed means certainty of quality and guaranteed satisfaction—**  
the first and last object of careful buyers. Both quality and satis-  
faction are guaranteed by a business which has gained world  
leadership because of its ability to manufacture and distribute the  
highest quality products at fair prices.

### Certain-teed Roofing & Shingles

Certain-teed is a conservation product. It is made from rags and asphalt, skillfully converted into roofing that is impervious to the elements. Certain-teed is the most efficient type of roof for all kinds of buildings, from the modern skyscraper to the farm barn. It is light weight, weather-proof, clean, sanitary, fire-retardant. Certain-teed is not affected by fumes or gases, and cannot rust or corrode. Its first cost is moderate, laying cost low, and upkeep practically nothing. Certain-teed is guaranteed 5, 10 or 15 years, according to thickness.

### Certain-teed Paints & Varnishes

Made from the best quality materials, mixed by modern machinery in scientifically correct proportions to produce the highest quality paint. Certain-teed Paints and Varnishes are sold at cost plus a small profit. Each color is priced according to its cost. Paint makers usually charge the same for all colors, basing their prices on the cost of making the expensive colors. The Certain-teed policy puts each color on the right basis. Therefore most Certain-teed Paints cost you less than competing paints of anything like the same high quality.

### THE THEATRES

AT THE DELFT

From poverty and obscurity to a royal throne is a far jump for an American youth. And when the pretender to the throne objects to his occupancy and hires assassins to remove the new monarch, who is a determined and athletic young man, there is apt to be considerable excitement. This is one of the threads of the new Artcraft photoplay by Douglas Fairbanks, "Reaching for the Moon," at the Delft theatre last night and tonight, which teems with sensational incidents and laughable comedy. In staging this photoplay Artcraft has gone to extreme limits, and the popular Fairbanks must have experienced a strenuous time, for in some of the scenes he is handled very roughly. How he really escaped with his life is one of the studio secrets. The locale of the story is Europe and America, and the magnificent settings, gorgeous costumes and strong supporting cast make this one of the most costly offerings Artcraft has yet issued from its studios.

Next Draft Unit Leaves For Camp Saturday, Mar. 30

(Continued From Page One) of the Escanaba men's first morning in camp is the fact that the clocks of

the United States will be turned one hour ahead at midnight, March 31. Revellie in Camp Custer sounds at 5:30 o'clock in the morning, and though the timepieces will show 5:30 o'clock, the men will really be getting up at 4:30 o'clock on the first morning. However, the list of fine young men who will make up this county's next unit does not contain any "sleepy-heads," so Escanaba will be wide awake when the officers call "attention."

The Escanaba men, as will all others who move to camp during the five day period beginning March 29, will be taken at once into detention, and kept away from the "old heads" at camp, in order to guard against any chance of disease spreading. They will be kept there until they receive their three "shots in the arm," and will then be released from detention.

Men Notified. Notices will be sent the Delta county men who will leave a week from Saturday, ordering them to appear at the local board at 10 o'clock Saturday morning. At this time a "man in charge" will be selected, and the men given all instructions which they must carry out enroute to camp.

The entire party of Cloverland soldiers will include:

- Menominee, 52.
- Schoolcraft, 15.
- Delta, 63.
- Gogebic, 85.
- Iron, 46.
- Total, 261.

PARCEL POST SALE.

A parcel post sale and social will be held tomorrow night at 7:30 o'clock in the parlors of the First Presbyterian church under auspices of the Christian Endeavor society.

Parcels containing home-made fancy work articles and other novelties will be sold for 15 and 25 cents. Home-made popcorn balls will also be offered for sale. A musical program will be rendered and a jolly social time is promised to all who attend. Refreshments will be served.

Mrs. CHAPIN SAYS

Nujol Laboratories, Standard Oil Company, (New Jersey) Bayonne, New Jersey.

October 14, 1917.

Dear Sirs:

I don't think there was ever anybody, man, woman or child who was or is more constipated than my little three year old boy was. Why, sir, he was so bad before we got him the Nujol that we would have to leave his bowels unmoved for three or four days, then use almost a quart of water in a syringe to move them. The poor little fellow would almost go into spasms and his father could never stay in the room where he was. It would take almost an hour's work to get them to move.

He had been constipated for two years. I think these patent medicines did it. I have known the doctor to be here and give him five tablespoons of castor oil, one every half hour to get his bowels to move.

We tried four different doctors, one a well known specialist, but none could help him. Three advised operations, said it was the only cure. I have always had a horror of operations and I guess always will.

We were going to try a well known woman doctor who claims she cures without an operation, when I coaxed my husband to let me try Nujol. I had read so much about it, I told him even if it didn't help him it would not hurt. We tried it, started giving him three tablespoons a day, one after each meal, then as his bowels moved better we decreased the dose as per directions. We used two bottles and a half and we cured him.

How thankful we were. Tears come to my eyes, even now, when I think of how that poor little fellow suffered. Just think—a little tot, hardly able to talk plainly.

He has not taken a drop of it since last June. I have wanted to write before, but kept neglecting it till I thought perhaps my letter would relieve lots and lots of other people. Again I say, God Bless Nujol, and I will never be without it or cease to recommend it. From a mother whose heart will always be thankful for your great remedy for constipation.

# Spring Opening

The Fair Savings Bank

Extends to You a Cordial Invitation to View

## The Spring Exhibit of Apparel Millinery and Dress Accessories

We feel confident that you will approve our efforts to display not only the new in Spring and Summer fashions, but to offer for your consideration these latest modes in their most interesting and most acceptable interpretations.

### Apparel for Girls

The Miss is inclined to be a bit particular. She wants something different—something with an air of audacious jauntness to set off her youth and here she will find it.

### Opening Days

Friday and Saturday Of This Week

The New Suits for Women and Misses, New Coats, Dresses, Millinery and Blouses, as well as the many other delightful dress requirements of the coming season, all bear evidence, we believe, of a careful discrimination in their selection.

### Apparel for Misses

Natty styles, with just the dash and the kind of a grown-up air that takes the girlish eye. They are smart garments she will like at sight—and like better when she wears them.

## A. Comprehensive Millinery Exhibit

Women who depend upon the Fair Savings Bank for millinery style information—and there are many—have the assurance that their choice is not directed by the talent of one modiste, or by a single country's taste in dress.

It is a satisfaction, in the uncertain hours of "trying-on" to feel that the color, the style, the material and the adornment has the endorsement of modistes in whom confidence has been well placed—whose tastes and judgments are right.

New York and Chicago milliners who, independently, have established high reputations, are represented; adaptations of foreign models and creations of our own skillful designer are here to be seen.

### New Blouses

Distinctive and Original in Style Tendencies

There is a decided leaning toward the slip-over models. Some are draped, others of an almost Grecian simplicity; all are charming in the lovely Spring shades. So, also, are the new sleeveless over-blouses of Georgette, effectively embroidered or beaded in contrasting colors.

### New Shoes

Diversified Styles in New Colors and Styles

In no former season have we shown a more attractive line of Women's Shoes. They come in colors to contrast or harmonize with the new apparel. Come with either all-leather or cloth tops. It's indispensable that you should see the new shoes when selecting that new Spring outfit.

It is Estimated That Fully Fifty Per Cent Have Sons Serving in the American Army.

Detroit, Mar. 21.—Fully fifty per cent of the alien enemies in Michigan have sons in the American army, the United States marshal's office here estimated today.

Although the tabulation has not been completed, it is estimated there are about 10,000 enemy subjects in this state. Sixty four thousand are registered in Detroit.

With completion of the tabulation, the United States marshal will be able to keep tab on every alien enemy in Michigan. He now has agents in every town and city and any suspicious conduct will be reported and investigated immediately.

In a little room 6 by 10 in the federal building—lined with card indexes—a white-haired deputy marshal today practically finished tabulating Detroit's quota of Prussians—about two-thirds of his job.
