SINGLE COPIES, FIVE CENTS

FUGITIVES HEADED TOWARDS THIS CITY

BROKE THROUGH POLICE LINES AT MANISTIQUE

Ed. Wheeler and Followers Are Now in Flight.

Wheeler Is Wanted for Passing Bogus Checks Representing Himself as Butter Buyer.

Late this afternoon Sheriff Carney received a telephone message from Manistique notifying him that the four men and one woman who were said to have been surrounded in a school house north of Manistique, were headed for Escanaba and to look out for them. Sheriff Carney and his deputies at once got out towards Manistique and hope to meet the party coming this way. According to early information received this morning Wheeler and his party had been trapped in an abandoned school house and it was thought their capture would only be a matter of a short time.

Were Trapped, Was Report.

MANISTIQUE, Nov. 19.—Surrounded by state troopers headed by Capt. Downing of Negaunee, Schoolcraft county police officers, sheriffs and deputies from Menominee, Ed. Wheeler, bad check buyer, who fled Menominee merchants and is thought to have passed some bogus checks in this county, and his gang are in an abandoned school house 18 miles north of Manistique, where Wheeler and his wife and the rest of the gang are expected momentarily to be taken captive. It is also indicated that the band has been caught in mantrapping.

Positive identification of Wheeler was made by Louis Peterson, Menominee grocer, one of Wheeler's victims, when he operated in Menominee county. Following his getaway from Menominee county the authorities notified police and sheriff's departments all over the surrounding country to look out for the men.

Finally the offices of Schoolcraft county located the rendezvous of the man supposed to be the missing fugitive and asked that some one be sent from Menominee county to make identification positive. Peterson went over to Manistique and after going out to the school house not only identified Wheeler but the woman who was with him as being the same one who was in Menominee.

With Wheeler are four other men and close by the old school house was a Ford car, Ford truck and a Nash touring car. Wheeler refused to submit to arrest and wanted to go the warrant. It appears that the sheriff did not really require a warrant. The men composing the gang are said to have bullet hips and waist bands which indicated to the officers that they were heavily armed or else heavily laden with "moon."

Indian Names Used in Football Battles

LAWRENCE, Kans., Nov. 19.— Haskell Indian Institute's football eleven this season embraces 19 tribes, originating in eight states and one territory. Oklahoma leads with nine representatives on the squad. Others fall from Missouri, California, South Dakota, Montana, Wisconsin, Washington, Kansas and Alaska.

The official line-ups this year do not carry the tribal names. Each member knows them, however, and in the heat of battle they frequently are employed. Observers say the native call lends a lusty touch to human skirmish. Some of the Christian names, tribe and Indian names of the squad follow:

J. Levi, captain; Arapaho, Big Buffalo; Carpenter, Sioux, last Winter; G. Levi, Arapaho, Antelope, Kipp, Blackfeet, Sun-Dance, Casey, Creek, Running Wolf, Perotrovitch, Thulegat (Alaska), Eskimo Pie, Sunpinter, Choctaw, Turn Bull; Ward, Yaktina, Fire Starter, Norton, Hoopa, Lost Hare; Smith, Oneida, Kill, End Quick; Elkins, Caddo, Rapid Water, Kilbuck, Munise, Kill Buck; Hood, Shawnee, White Turkey; Gurnow, Chipewa, Wrinkle Meat; Hawley, Gros Ventre, Horn Weasel; Otipoly, Comanche, Two Hatchets; Parness, Asiniboin, Afraid of His Track; L. Colby, Klamath, Takes the Gun.

Edward Henriksen, manager of the Henriksen Sanitary Dairy Company, of Iron Mountain, spent Sunday in this city.

Candidates Pick Hotels for the Big Convention

CHICAGO, Nov. 19.—Although the republican national committee will not formally decide upon the convention city until next month, definite hotel reservations for Coolidge headquarters and for Johnson headquarters already have been made and a mid-western Coolidge headquarters was opened today by friend of the president at the same hotel.

FRANCE VOTES APPROVAL FOR AN AGREEMENT

Ambassadors Adopt a New Agreement for Germany.

Germany Will Be Asked to Furnish Better Facilities for Control Commissions Hereafter.

PARIS, Nov. 19.—The French cabinet called to consider the agreement in principal reached today by the allied council of ambassadors regarding the attitude to be adopted towards Germany. Aed a communiqué at the close of its session this afternoon to the effect that the cabinet unanimously approves the attitude taken by M. Clemenceau in the negotiations.

Agreement Is Reached.

PARIS, Nov. 19.—An agreement in principal was reached by representatives of the allies, assembled in the council of ambassadors today, and which will give a break between Great Britain and France on the question of the attitude to be adopted towards Germany, at least temporarily. It was announced after the conference had agreed in principle on the measure to be taken toward the military control in Germany.

The agreement was subject to the approval of the French and Belgian cabinets called for the early afternoon. The French cabinet as expected approved the measure and the Belgian ambassador got into communication with Brussels and was informed to be awaiting his government's decision on the new agreement.

The understanding was that the agreement calls for sending Germans a protest against the lack of funds she was furnishing for the work of the military control commission without mentioning what action the allies might take in case Germany fails to give the required assurance of protection.

Basketball Lid Pried Off Here in Sunday Game

The first half of the game of the season was played Sunday when Sandman's Cardinals defeated the Arizona All Stars, 12-5. A notable feature of the game was the guarding of both teams, keeping the score at 5.

"Big" Schram was the All Star best performer and Sandman's best.

The game was played on the field on School grounds.

MI Stars Sandman's Cardinals Schram R. P. ... Sandman Putvin L. E. ... Moore St. Louis C. ... Wilson S. Paulin R. Q. ... C. Toushak L. Q. Christensen.

FORD WINS AUTO RACE OVER FOREIGN RIVALS

NEW YORK.—Three thousand persons stood breathless at the Stevens Technical Institute track, Hoboken, Saturday. The unmuffled engines of five automobiles roared at the start.

Good Clothes Count More Than You Think

That old adage that clothes do not make the man is very true. But good clothes have a lot more to do than just to follow fashions or to keep you warm in winter.

Women's appearance is a big factor in this country. Less than 20 years ago, we were wearing what we could afford in all-fitting clothes.

With good clothes comes better health, better looks, better posture, longer life, and full-pattened,

Carly Jackson

RUM RUNNERS ON THE DETROIT RIVER HAVE ESTABLISHED SET OF SIGNALS FOR PROTECTION

Red, Green and White Lights Twinkle Very Mysteriously.

Dry Fleet will Have to be Careful or Their Movements will Be Flashed from Shore to Shore.

DETROIT, Nov. 19.—Lights that twinkle red, green and white are the rum runners' radio on the Detroit river.

In the blackness of night, the craft of the liquor smugglers move slowly about, alert to danger from the Prohibition fleet that maintains a 24-hour watch along the river. Federal agents engaged in watching rum running on the river declare that there has been a noticeable curtailment of smuggling operations since the dry fleet's vigil was increased late in the summer.

Eyes that never close are constantly watching for the government men, according to reports to the office of James R. Davis, prohibition director for Michigan. These eyes are on American and Canadian shores, river itself and on Fighting 2500 acres of land in the opposite Ecore.

Flashlights with variable focus are used at night as a signal between runners and the Federal agents decide to stop smuggling for a time. A man stationed on the island and that is signaled when a boat was near, or when the coast clear. The blind eye of the smugglers are often on the river. Hogan Alley is the name given to the island.

Hand has served to many rum smugglers to Director Davis and his men in Canadian waters, so American line, if marks indicate that may provide a shield for the American mainland.

The island has figured more or less prominently in the history of the Detroit river for nearly a century. It was a boundary problem for 44 years before it finally was awarded to Canada in 1827.

The application Fighting Island was first applied following the Canadian rebellion of 1837-8. The uprising, which caused an upheaval in Canadian political circles, resulted from agitation by communists against the "Family Compact," which means a political preference in the hands of the aristocratic and land owners of the dominion.

A band of 38 rebels organized in Detroit and crossed to the island with a view of making it a stronghold and base for their operations against Canada. The rebel dream of freedom, however, was dispelled, and after one half-hearted battle the band was overpowered. Thus sprang the name.

The island, 12 miles down the river from Detroit, has withstood many attempts at occupation and settlement. In the summertime mosquitoes and snakes infest it. At present it is being used as a dump.

When prize fighting was under the ban in Michigan, the fights were held on the island within the jurisdiction of the Canadian government. Two Detroit men took it over many years ago and named it Des Chene Shores, and erected a number of pavilions and held prize fights. The venture was short lived.

Capitalists with visions of a pretentious summer resort on the island, built cottages and a hotel there, but the attempt was abandoned finally with heavy loss. At the tip of the island a modern hotel was built, but resorters failed to patronize it because of its unattractive location, and the venture collapsed. About 18 years ago the hotel burned to the ground.

FLYING FEAR IMPEDES U.S. SAYS AIR OFFICE U.S., CLAIMS OFFICER

CHICAGO, Nov. 19.—Airplane manufacturing on a large scale has virtually no encouragement in the United States, it was declared by Major F. L. Martin, Air Service officer of the Sixth Army Corps Area, U. S. A., in an address here at the air transportation conference of U. S. A. Service officers with the National Transportation Institute. Because the aircraft business cannot develop and the American public is afraid to fly, he said, the country is in a dangerous position.

"There is practically no manufacturing concern in this country in a position to go into the production of airplanes or air engines in any quantity today," said Major Martin. "It takes a year to train a pilot. Mortality will be extremely heavy in the first air fight. Replacements of men and material will be approximately 100 per cent."

"One of the greatest needs is to build up the confidence of the people so they will use the airways. American people will not fly today

CONVENTION WILL BE UNIQUE WITHOUT SET SPEECH ON PROGRAM

WASHINGTON, Nov. 19.—A convention program without a single set speech will make the world power conference, to be held in London next July, one of the unique gatherings of all time. Representatives of every nation in the world interested in the production or utilization of power will meet to discuss the policies and practices of each country.

Possibly mindful of the boredom incident to days of long ago and technical speeches, the directing committee have promulgated the no-speech rule and instead, the many papers to be presented will be submitted to the delegates beforehand and the sessions, continuing two weeks, will be left to informal discussions of problems presented.

The conference will be held at the same time as the British Empire Exposition. While it is being promoted by the British Electrical and Allied Manufacturers' Association, it is not supported officially by the British government, but by British and American technical and industrial organizations.

C. C. Merrill, executive secretary of the Federal Power Commission, is general chairman of the American committee arranging for American participation. Secretary of War Weeks is honorary chairman and Secretary of War, Wallace and Hoover are honorary vice-chairmen.

CANADA IN SECOND PLACE IN AUTOMOBILE EXPORTS

OTTAWA, Ont., Nov. 17.—Canada has become second among the nations of the world in exporting automobiles. Exports of cars by the Do-

minion, official figures show, amounted to \$1,542 in the twelve months ended September 1. This was within 40 per cent of the total cars exported by the United States during the same period, which numbered 101,000.

If Kidneys Act Bad Take Salts

Says Backache Often Means You Have Not Been Drinking Enough Water

When you wake up with backache and dull misery in the kidney region it may mean you have been eating foods which create acids, says a well-known authority.

An excess of such acids overworks the kidneys in their effort to filter it from the blood and they become sort of paralyzed and loggy. When your kidneys get sluggish and clog you must relieve them, like you relieve your bowels, removing all the body's urinous waste, else you have backache, sick headache, dizzy spells; your stomach sours, tongue is coated and when the weather is bad you have rheumatic twinges. The urine is cloudy, full of sediment, channels often get sore, water scalds and you are obliged to seek relief two or three times during the night.

Either consult a good, reliable physician at once or get from your pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithium, and has been used for years to help clean and stimulate sluggish kidneys, also to neutralize acids in the system, so they no longer irritate, thus often relieving bladder weakness.

Jad Salts is inexpensive, can not injure and makes a delightful, effervescent lithia-water drink. Drink lots of soft water. By all means have your physician examine your kidneys at least once a year.

400 Pleasant Room

Hotell

Lafayette Boulevard & Franklin Street Close to Detroit's Business District

In the front park of Detroit's Fort Shelby close you will find a quiet, comfortable place to stay. The location, environment, atmosphere, and especially the service of Fort Shelby's hotel are unequalled.

Fort Shelby service includes many extra courtesies, such as receiving calls, express, telegrams, and other errands handled in a personal manner.

CURTIS WOODWORK

The Cozy Interior

Chances are you are thinking of this ruddy fireplace when you say, "Is it Bill Smith's place great?"

You can have one, too, at no great cost—along with bookcases, breakfast nooks, ironing boards and other pieces. Through quantity production Curtis Woodwork has earned a surplus last year of \$2,400,000, and that present conditions indicate similar profits for this year. This gratifying success is due to rapidly increasing consumption on the one hand and a marked decrease in the cost of production on the other.

In announcing these reductions the administration of the municipal industrial reported that the three utilities of gas, electricity and water had earned a surplus last year of \$2,400,000, and that present conditions indicate similar profits for this year.

This gratifying success is due to rapidly increasing consumption on the one hand and a marked decrease in the cost of production on the other.

The Americans appear to go twice our speed," Lord Cholmondeley said. "They take their man at once instead of waiting for him to hit the ball, and they take the ball, if possible, before it hits the board, should be going on to them, and so speed up the game.

When we first arrived, all three teams were painfully slow. My own ponies appeared to be third class as they had acquired the bad methods of their masters, who were checking on all their shots. The longer we stayed the more we got into the American style, and my own ponies

were a month before us.

SOLVING MANUFACTURING PROBLEMS.

More than 50 New Jersey factories had to close some time ago due to local water shortage. Other plants from New England to Georgia were crippled.

The situation has emphasized the advantage to industry that would result from inter-connected power systems or power pools through which hydro-electric and steam generated power plants may supplement each other to avoid failure of power supply.

Not many years hence, these state-wide of interstate power pools will enable the manufacturer to choose a site for his factory without worrying about the source of his power, according to Sanford J. Magee, president of the New York State Gas and Electric company. Mr. Magee was elected president of the Empire State Gas and Electric Association which is engaged on plans for linking up the steam and hydro-electric central stations of the state in a power pool which would take in all important generating sources.

The advancement of electricity is rapidly bringing about an end to this condition which has carried with it many economic and sociological ills. Long distance transmission of electricity is making it possible in this and all other states for a factory to locate without considering its power supply as the dominant element in the situation. Power over the wires is destined to do much to relieve the congestion of cities by taking factories into the country districts where the labor problems of the manufacturer and the living problems of the workers will be vastly simplified.

THE PRESIDENT'S MESSAGE.

There is a decided confidence attached to the impending message of President Coolidge to congress in that besides setting forth the policy of the president it will be his first public address since his inauguration. Events at will be the first official utterance of the president this message to congress is the more eagerly awaited by the nation.

But there is positive assurance that President Coolidge has been quite active, although silent. Word has leaked out of systematic visits to the White House by the recognized authority on national problems and of regular and frequent conferences between the president and cabinet members. President Coolidge has tried to make wise of studying this subject before publicly discussing it. His message to congress is to be based on fact as near as it is possible to do so. If he submits recommendations on tax revision, railroads, world court, wages or any other matter those recommendations will be based on a thorough study of the question, re-enforced by the knowledge of the president's official and eminent advisers.

Therefore, it is assured that when President Coolidge addresses congress it will be clear to all that he speaks with knowledge of his subject. President Coolidge has not been regarded as ignorant but when he does speak his utterances may be understood and at the same time are of some purpose. His first message to congress and the people of the United States may be expected to reveal both the man and his administrative policy.

WITHOUT INSURANCE, WHAT?

Berkeley, California, with fifty residential blocks swept clean by fire some time ago, leaving only a forest of brick chimneys standing as a monument of burned happy homes, emphasizes the necessity of adequate fire prevention and fire fighting equipment in every community.

The only thing that stands between the average citizen and financial ruin in case of fire is insurance, which is probably more intimately related to the public welfare than is almost any other human enterprise.

The ignorance of the public in regard to insurance and its vital part in maintaining economic, social and political stability has led to an ever-increasing army of repressive and even confiscatory rules, regulation and laws concerning it.

It is entirely possible by political tinkering to undermine and retard the growth of the fire insurance industry to such an extent that it would be unable to promptly such losses as resulted in the San Francisco and Berkeley fires will be sadly impaired. In such a case the public would be the great sufferer.

Instead of the public being directly or indirectly responsible for crippling an industry which stands as the basis of commercial credit let the people work to reduce fire hazards and oppressive taxation and legislative policies which limit or prevent the normal growth of an industry which is the safe guard of their savings and investments.

CHECK THE EXPLOITERS, FIRST.

There are rumors that the United States will be called upon to send food to Germany this winter to prevent the population from starving. It looks like a repetition of the Russian situation. Largely due to the confiscatory policies of the soviet government, the Russian peasants were not permitted to consume the crops they had raised, and the United States presented them with about \$20,000,000 worth of foodstuffs, bought by this government, in addition to huge public subscriptions for their welfare.

In Germany a variety of causes seem to be responsible for the shortage. Unscrupulous Germans are exploiting their country to their own personal advantage, the workers in the Ruhr prefer idleness to laboring for the French, and numerous political uprisings are adding to the discontent and loss of production. In other words, the condition in Central Europe is directly due to the selfishness and hate of its industrial and political leaders.

The United States is no more responsible than it was for the deplorable situation in Russia. But Americans are to be called upon just the same to keep the population alive for further exploitation in the future.

FLINGS AT FOLLY

Governor Walton opened with a bang, and may close with a bang.

Venus is said to be drawing close to Jupiter. Well, that's their affair.

When it comes to Dad and his dough, Christmas is a real separatrix.

The only domestic science grandma knew was the science of doing without.

To add to the confusion of enforcement agents comes the odor of anti-freeze.

To think that roast beef tastes like turkey is asking too much from the imagination.

Europe seems headed toward settlement with all the speed of a snail with cramps.

A Japanese says he prefers his native earth tremors to our thunderstorms. It's all right with us.

No man is a hero to his valet and it is because of the way pretty nearly every man looks in a dress suit.

Autumn is a symphony, until Boreas starts playing jazz.

All is well that ends well, but a lot of speculation in oil ends in stillness.

This is a pretty good time to admonish the child not to talk too much and he may be president some day.

During the last year poison liquor killed 2,000 men who would drink it or leave it alone—but didn't.

The Turks want a new name for their country, and probably would like to have it before Thanksgiving.

Two injunctions were secured in court against a Kentucky man the day he died, but, apparently, he went right on and died.

If it is true that a Chicago man sent two injunctions to a laundry, pinned to a shirt, isn't the first fortune that has been made.

A New Jersey man who is 102 years old smokes, chews and drinks, and evidently crosses the street at regular intervals.

Most men on the road to riches ignore the scenery.

Sounds like a deer, looks like a deer—but it may be a guide.

Who can remember when Europe wasn't on stage one everyday?

Shoot! if you will, at this bolded headline—she's pretty good to me, I said.

Another person who sees red is the man who finds himself face to face with a flapper.

Old item. The man who is little popular in this country died the other day of natural causes.

Sweden Has Royal Residence for Sale

STOCKHOLM, Nov. 18.—One of the most beautiful of the royal residences in Sweden is for sale at \$1,000,000. The last occupant was Nelson Morris, recently American minister to Sweden.

The villa was built 12 years ago for the Romanoffs for Princess Maria Pavlovna, who, she married Prince Wenzel. Today it is again being offered for sale.

The villa is now owned by the Russian royal family told the Russian minister at Stockholm what it desired in the way of a house for the princess, and the cost.

The villa was built 12 years ago for the Romanoffs for Princess Maria Pavlovna, who, she married Prince Wenzel.

Today it is again being offered for sale.

PARTIDGE SEASON MAY BE CLOSED BY LAW FOR SOME TIME

Sportsmen's Associations from Several Sections Will Ask for Amendment of the Law.

LAW Michigan legislators will be asked by various sportsmen and conservationists to close "gates" on the hunting of partridges in the state for a number of years, if favorable action is taken on such a proposition which is now before the local legislature.

Information given places credit the birds formerly more abundant in great numbers to the effect that they have thinned out considerably more than twice as many before. The last deer skins of last winter and the winter of 1921-22 are said to have been largely responsible for present scarcity of these birds.

The deer hunted here, sportsmen here say, and here the birds are the ground, sometimes freezing them to the spot. There, unable to get food, they perished. Others hurried into snow banks to escape the fury of the storm, and when they attempted to emerge from their temporary places of refuge, the ice had formed over the only place of egress.

PERSONAL

Alice Holmes, 316 South Thirteenth street, spent the weekend with parents in Cornell.

Mrs. Fred Holmes, Tenth avenue south, who was in a critical condition at St. Francis Hospital last week, is now out of danger.

Miss Lulu Moore, a student in the Escanaba High School, who was called to her home in Nahma, because of the illness of her mother, has returned to school again.

Wesley Erickson, 1215 Seventh avenue, south, has returned from a week end visit in Iron Mountain.

Miss Rosella Mulvaney was taken to the hospital last night to be operated on for appendicitis.

Leo ("Maggie") McGuire and Charles ("Chuck") Princeton returned to Milwaukee Saturday night after a three weeks' visit with friends and relatives here.

John Lemmer, Robert Salkirk and Glenn Thompson, instructors in the Escanaba High School, returned last night after driving down to Madison to witness the Michigan-Wisconsin football game played there.

Isabel Fish, student of the Escanaba High School, returned to resume her studies after an absence of six weeks on account of illness.

Harry C. Work, 814 South Ninth street, returned home Saturday night from Neenah, where he was operated on for appendicitis. Mr. Work is improving slowly.

Miss Lucille Perron, Fourteenth street, who is at St. Francis Hospital, is improving nicely.

Miss Edith Sundberg, Seventeenth street, spent his weekend here at home. She is teaching school at Pine Ridge.

Miss Ella Snyder, Tenth avenue, south, is home on a short visit.

Miss Henry Peterson, Lake Shore Drive, who is at St. Francis Hospital, is doing nicely.

Miss Jessie Nease, spent the weekend with her family at Perkins.

MANY FARMERS ARE IGNORANT AS TO USE OF NEW EXPLOSIVE

Demonstrations Are Going to Be Made for Benefit of Lower State Farmers Very Soon.

EAST LANSING, Mich., Nov. 19. It has been so long since the day when the farm boys of southern

Michigan were cleared that farmers of that section do not understand the process or explosives and in many cases are somewhat timid about using them. This is the statement of A. J. McNamee, who, with J. L. Livingston, has been working near the Oho line for some time, after considerable experimental work in showing farmers of the northern part of the state how best to clear land. Their mission in the southern part of Michigan has been to urge the farmers to do away with the trap stamp and single rock that interfere with efficient and economical farming.

County agents have reported to the extension department of the Agricultural college here that following demonstrations by extension department men, orders for carbide lots of sulfur have been received in Alpena, Kalkaska and Jackson counties. Sodium is the new explosive released by the government for agricultural explosive work.

Marilyn McDonough, who has been confined to her home for several days with an attack of grippe, is now able to resume her work.

MUCH WASTE IN HOME HEATING; LEARN TO FIRE

Government Sends Out Lengthy Report for Benefit of Home Owners; Know Your Furnace.

ANN ARBOR, Mich., Nov. 18. People of a household using a central or individual furnace of various fuels in the home know not exactly what Michigan iron the Smithsonian Institution in Washington. It was presented by Samuel H. Wyeth of the Bureau. The work treats first with the fundamentals of heating, explaining draft control, radiation, ventilation, how to obtain complete combustion and common defects in house heating.

Further chapters deal with the essentials in heating apparatus, the installation of heating systems, the manufacture and

use of coal and oil.

Smithsonian Institution in a Michigan public utility statement says:

"The use of fuel in the home is an important factor in the economy of the country."

"It can be used more effectively and inexpensively than any other fuel."
