Very Simple!

"I have often wondered why it is," a customer said recently, "that I see so many familiar faces every time I come in this store."

The reason is very simple. A great many prudent housewives have learned that by trading here it costs them less to set their tables, and with a better quality of foods-that's all.

If you're not already doing so, let us show you how much better you can do here than anywhere else in this city.

Why Abe Likened Himself to the Boy

Without Gingerbread. A group of Lincoln's cronies were in his law office once swapping experiences, spinning yarns and comparing notes on life as they found it. They drifted to the subject of romance and sentiment in life, and the talk at last centered on the bliss of lovemaking, of "courting" girls and feeling that you made them fall in love with you by your superior charms. Finally some one of the party asked Lincoln for his personal views on the subject. Abe straightened out his lank and ungainly frame, and a quizzical smile stole across his exceedingly homely

FACTS ABOUT KERR

The Keweenaw Miner which is owned y close associates of Angus Kerr and s practically the only paper supporting Mr. Kerr in this district takes umbrage at a statement made in Mr. Young's announcement. The part objected to

"Whenever he (Mr. Young) has been wanted by his constituents he has been found at Washington attending to the duties his position impose upon him and not at home attending to private business as was the case with his opponent when a member of the state legislature

The Miner then goes on to acknow ledge the fact that when Mr. Kerr was a member of the legislature and of the tax commission he did neglect his duty but insinuates that Mr. Kerr's absence was necessitated by ill health caused by his having been a soldier in the Spanish-American war. It is a clever piece of excusing but it won't stand up when the facts are looked into.

Briefly stated. Mr. Kerr was a member of the state legislatures elected in 1898 and 1901. There were 106 days in the session of 1901. The House Journal shows that Mr. Kerr was present exactly 27 of those 106 days. The records of the auditor general show that Mr. Kerr drew money from the state for his services during that session as follows:

Per diem \$780.00 Mileage 106.60 Stationery

Charges Are Specific.

Armour, Swift and Morris are charged with having entered into a conspiracy in 1909 to control the prices to be paid by dealers in live stock, poultry, butter, eggs, dairy and agricultural products, to control the prices to be paid by retail and wholesale dealers for dressed meats and to control the prices to be paid by all retail and wholesale dealers for butter, eggs, poultry, game, dairy and agricultural products, to control the prices to be paid by all retail and wholesale dealers for butter, eggs, poultry, game, dairy and agricultural products, to control the prices to be paid by all retail and wholesale dealers for butter, eggs, poultry, game, dairy and agricultural products, to control the prices to be paid by all retail and wholesale dealers for butter, eggs, poultry, game, dairy and agricultural products, to control the prices to be paid by retail and the prices to be paid by a state of the senate today when it adopted a resolution providing for an inquiry. Senator Borah sought to have the resolution so amended as to direct that the inquiry shall proceed immediately, but his motion to that effect was voted down. In presenting amendment, Mr. Borah argued that expedition was necessary both in the interest of Senator Lorimer and the prices to be paid by all retail and wholesale dealers for butter, and the prices to be paid by a senate today when it adopted a resolution providing for an inquiry.

These companies entered into a trust to unlawfully regulate, fix and control the prices at which dealers should sell and ofdressed meats and eggs, poultry and others all dressed meats and eggs, poultry and other products and to control the prices to be paid for such articles, when so regulated, and to unlawfully limit the trade in all products with a view to lessen, restrict, limit and destroy trade and full competition in the purchase and sale of meat products with a view to lessen, restrict, limit and destroy trade and full competition in the purchase and sale of meat products. CHICAGO, Ill., June 20.—Judg Surly today overruled a motion to

tion in the purchase and sale of meat products, poultry, butter and eggs.

That in pursuance of an unlawful trust the corporations have met and agreed upon and fixed from week to week and day to day, an agreed price paid and to be paid by all persons for livestock and products which should be purchased, sold or offered for sale in Missouri; that the prices at which the products were to be sold were unlawfully fixed by means of which competition in the purchase and sale of meat products has been lessened, restricted and destroyed.

Surly today overruled a motion to take the case of Lee O'Neil Browne, charged with bribing legislators to vote for Senatoric Lorimer, from the jury. The court declined to exclude the testimony of Representatives White, Beckemeyer and Link, all of whom have testified to receiving \$1000 for their votes for Lorimer.

MOTORMAN HERO DYING destroyed.

The second count of the petition charges that the three packing companies conspired to restrain trade and destroy competition in the purchase and sale of meat producets, live stock, poultry, butter and eggs by fixing a price to business of buying, selling and dealing in packing house products.

Continuing the petition says:

Through these agreements trade, commerce and competition in the purchase and sale of packing house products have been restrained and the companies have obtained control of and monopolized, to the exclusion of all others, the business of buying, selling and dealing in a commendation.

selling and dealing in of commodities, products of packing houses. Alleges Absorption of Concern.

The alleged absorption of the Ham-mond and St. Louis dressed beef provision companies by the National Packing company is said in the petition of the attorney general to have taken place in September, 1902. The Hammond and St. Louis companies are charged with having entered into an unlawful agreement with others engaged in meat packing for the purpose of restricting competition and prevent lawful trade.

The National Packing company, the information filed in the court today alleges, was chartered in New Jersey in 1902 with a capital stock of \$15,000,000 to engage in meat packing and selling and to hold stock of any other corporation. Continuing the petition says:

The National Packing company was not organized in good faith for the purpose of engaging in the business authorized by its charter, but as a corporate scheme to effect an unlawful trust among the Hammond and St. Louis Dressed Beef and Provision companies, and numerous other corporate companies, and numerous other corporate and numerous other corporates. vision companies, and numerous other cor-porations, individuals and partnerships en-gaged in the same business in Missouri and throughout the United States with a view

Obtains Complete Control.

It is charged in the petition that the National Packing company obtained con-trol of the Hammond and St. Louis companies which had previously been engaged in Missouri as legitimate competitors and that the National has ever since voted the stock of the companies, collected the dividends and used the companies in furtherance of the alleged unlawful trust.

The voters of the country have often been imposed on by the tariff taxes levied ostensibly for public revenue, but really for private profit. But they were never before fooled by a promise of substantial reductions of these taxes broken in their faces as soon as their votes were secured. A power so insolent in its control of the law-making powers must be overthrown without delay and will be if the American peo-

There can be no relief as long as the interests which profit through tariff laws are terests which profit through tariff laws are allowed to frame them, as thus far they have always done. It has just been shown, in the most striking way, that these have complete command of the Bepublican party, as an organization. Insurgency is merely a protest. They scoff at it. EXEMPT UNION LABOR?

Congress Faces Question of Whether or Not Sherman Anti-Trust Law Is Violated.

WASHINGTON, D. C., June 22 .-Congress is facing the question whether union labor shall be exempt from prosecution under the Sherman anti-trust law. Conferees on the sundry civil bill have the question under consideration today.
The House by a decisive vote, insisted upon the exemption which is sharply opposed by the Senate.

TAFT UPHELD BY REPUBLICANS IN KEYSTONE STATE

STATE PLATFORM SAYS PRESIDENT HAS ACCOMPLISHED MUCH IN SIXTEEN MONTHS.

THE TARIFF LAW IS ENDORSED

Executive Has Carried Forward and Developed Policies of McKinley and Roosevelt.

ADMINISTRATION RECORD UNIQUE.

HARRISBURG, Pa., June 22 .-Probably the briefest and most harmonious convention in the history of the Republican party in Pennsylvania met today and unanimously named the following ticket:

Governor - Congressman John K. Tener, Washington county.
Lieutenant-Governor — Congressman John
M. Reynolds, Redford county.
Secretary of Internal Affairs—Henry
Houck, Lebanon county, present incum-

State Treasurer-Former Congressman C. Fred Wright, Susquehanna county, present incumbent.

Text of Platform. The following platform was adopted:
The Republicans of Pennsylvania through their chosen representatives in Congress assembled, heartily endorse and commend the administration of President William H. Taft which less than sixteen months old, is unique in its record of accomplishment. He has, in his own way, carried forward and developed the policies of William McKinley and Theodore Rooseveit while enforcing his own and those in favor of which the party has in national platforms declared. With unwearying patience and gentleness of manner, but with great firmness of purpose and unyielding determination, he will, by the time the gavel falls at the close of the present session of Congress have succeeded in the enactment into law of more important recommendations than another President has ever secured within so brief a time after his inauguration. Among this legislation may be mentioned the revision of the tariff; the bill for the more complete regulation and control of railroads; the establishment of postal savings banks; the creation of a tariff board; the abolition of the The following platform was adopted: lation and control of railroads; the establishment of postal savings banks; the creation of a tariff board; the abolition of the immunity bath; the establishment of business methods in various government departments; legislation for the conservation of our natural resources; the creation of a commerce court; providing for the investigation of railway accidents and monthly reports of the same; important legislation amending and extending the laws requiring the use of safety appliances for common carriers; the passage through the House providing a complete constitution for the government of Porto Rico and conferring citizenship according to the promises of the party platform; and the addition of two stars to the flag.

What Taft Has Done.

What Taft Has Done. We call especial attention to his prompt and effective intervention to prevent the arbitrary increase of rallway rates; his faithful and impartial enforcement of antitrust laws; his enforcement of the law against illegal dealing in stocks through the instrumentality of what are commonly termed "bucketshops;" the conviction of the perpetrators of the so-called sugar frauds upon the government; and the indictment of those engaged in unlawfully cornering and artificially advancing the price of cotton and necessity of cotton goods which enter into such large extent into the expense of every family.

We believe that the tariff bill recently enacted is in accord with the Republican party as expressed in its last national platform.

We agree with President Taft that "it is the best tartiff bill the Republican party ever passed." call especial attention to his prompt

The convention unanimously favored state and national regulation over all transportation companies and endorsed the tariff commission plan. A county option plank failed of adoption.

"The Republican party has ever been a constructive party, a party of progress and advancement. It has done more for the promotion of the welfare and prosperity of the common people than any other political party in the history of the world."

CONGRESS IN SESSION.

In the Senate.

After two and a half hours of consideration the Senate on the 16th passed the bill granting statehood to Arizona and New Mexico. Upon the final passage of the bill a roll call developed a unanimous vote of 65 senators in favor of the measure. The conference report on the railroad bill was taken up, but action was postponed. A number of minor bills, including many public building measures, were possed. ing measures, were passed.

By a vote of 50 to 11 the Senate on the 17th agreed to the conference report on the railroad bill. Before adjourning, the motion to concur in the House amendments to the postal savings bank was made the unfinished business.

The Senate on the 18th discussed a motion by Senator Bristow to discharge committee on the judiciary from the fur-ther consideration of the resolution pro-viding for the election of United States-senators by direct vote and a motion by Senator Carter to concur in the House amendments to the postal savings bank Neither motion was acted on. resolution authorizing an investigation of the charges made against Senator Lori-mer of Illinois in connection with his election was reported favorably from the committee on crivileges and elections and was referred to the committee on contingent expenses.

The Senate on the 20th adopted the resolution directing the committee on privileges and elections to investigate the charges of bribery in connection with the election of Senator Lorimer. Senator Carter's motion to concur in the House amendments to the postal savings bank bill was considered, but not disposed of. Senator Bailey started a filibuster against the bill increasing the engineer corps of the army. Senator Borah de' livered an extended speech on the west's ettiinde toward conservation.

aftitude toward conservation.

After passing the general deficiency appropriation bill, the last of the great supply measures, and the bill to retire Justice Moody, the Senate on the 21st again took up the postal savings bank bill and spent about four hours in disconsing the motion of Senator Carter to concur in the House bill. The motion was strenuously resisted by Senators Cummins, Bristow, Bacon and Newlands, and supported by Senators Carter and Burton. There was great desire on the part of friends of the bill to bring it to a vote but, failing in that effort, an agreement was reached to vote at

o'clock on the 22d. The Senate on the 22d passed four important general measures. First, the building bill, carrying a total appropriation of about \$24,000,000, was disposed of. Three hours were given to the postal pank measure, on motion to concur in the House amendment, which motion pre-vailed, 44 to 25. The Senate also amendvailed, 44 to 25. The Senate also amended and passed the House bills authorizing \$20,000,000 worth of certificates of indebtedness to aid the completion of existing irrigation reclamation projects and requiring the publication of contributions mode through compaign commitbutions made through campaign commit-tees in the interest of members of the House of Representatives.

In the House In the House

The consideration of the deficiency bill bill occupied the House on the 16th. General debate was concluded and it was partly read for amendments. Mr. Humphrey of Washington spoke upon combinations by foreign steamship lines for the purpose of keeping up rates upon goods shipped from ports of the United States. He said the Standard Oil company, the steel corporation and Oil company, the steel corporation and the harvester combine received preferential rates which destroyed competition with them.

The House concluded its session on the 17th by adopting a new rule by which a majority of its membership may at any time recall from a committee any bill or resolution referred to it and place the measure upon the calendar for consideration. Advocates of this new rule claim that it will effectually prevent the pigeon-holing of any proposed legislation which has the approvai of a majority of the House. The adoption of the new rule was by a unanimous vote. The deficiency appropriation bill was under consideration during most of the session of the day, but was not disposed of.

The House on the 18th finally disposed of the railroad bill and the bill granting statehood to Arizona and New Mexico, only the approval of the President being required to make them laws. Both of these administration measures received a practically unanimous vote. The general deficiency bill, appropriating nearly \$6,000,000, was also passed.

NEW HEAD FOR LAKE COPPER CO.?

CHANGE IN DIRECTORATE IS LIKE-LY TO TAKE PLACE AT THE ANNUAL MEETING.

RED METAL MARKET IMPROVES.

Negotiations Are Under Way Between Big Buyers and the United Metal Selling Company.

NEWS OF THE SUPERIOR DISTRICT.

CALUMET, Mich., June 18.-[Special.] -The latest and most interesting development in Lake Superior mining circles is the prospective change in the control of the Lake Copper company at the annual meeting to be held at Houghton, Mich., next Tuesday, June 21. Hayden, Stone & Company and Paine Webber & Company have joined forces with Fitzgerald, Hubbard & Company and other large stockholding interests in Boston, for the purpose of electing practically a new board of directors.

As these interests have proxies for 53, 000 shares out of the 86,000 outstanding. it is certain that the changes proposed will be made. No fight has been made by the Lake directors, now in control, to retain the management of the company's affairs, and apparently they are satis fied with the proposed new arrangement, inasmuch as the management of the property would pass to experienced people in Lake Superior mining matters. In fact, at the last annual meeting of the company, R. C. Pryor was opposed to staying on the board, but consented to at the earnest request of his associates. Mr. Pryor has been in poor health for some time and will welcome a change in

Paine for President.

It is understood that William Fitzgerald, Galen L. Stone and William A. Paine will go on the board, and that Mr. Paine will become president. It is not impossible that J. H. Rice of Houghton, who has been prominently identified with the financial affairs of the company may be prevailed upon to continue as a director. It is felt that under Mr. Paine, with the railroad and stamping facilities of the nearby Copper Range properties, the Lake Copper company will be assured of better results than are now possible. It is contended that the Champion mill will be able to treat Lake rock more economically than the Franklin mill, and at a less charge for transportation. The proposal to make Mr. Paine president of the company is not indicated by any riding. wishes of Mr. Paine, and if he is chosen he will serve without salary, as he served the Copper Range company until it paid

transaction will soon be made at around 13 cents per pound, and if the deal is put through it will have a decidedly stimulating effect upon both the metal and stock markets. It will leave a surplus of only 60,000,000 pounds, and as it is said there is not a consumer's yard in the country that contains more than an immediate supply, which in many cases could be shaded to at least two weeks, it can be readily seen that this surplus will soon be wiped out.

Osceola directors are booked to meet soon for semi-annual dividend action. There is considerable supeculation as to whether they will vote to distribute \$4, \$5 or \$6 per share on he stock. It is likely that there will be a reduction from the disbursement declared last December. Six dollars per share was declared at that time, making \$10 for the year 1909. At the coming meeting the directors undoubtedly could vote a \$6 dividend, but the probabilities favor a reduction in face of the low price of the

INDUSTRIAL WORLD.

The magnitude of building operations throughout the country is indicated by the submission of bids by fabricators on about 172,000 tons, still pending, only about 25,000 tons of which is for railroad work.

It has developed that many consumers of pig iron are trying now to close con-tracts covering their requirements as far ahead as possible, but some furnace in terests have refused to quote present prices for forward delivery which has had the effect of holding up some of the work that would readily have been placed over the second half of the year were th present prices made effective on the whole of the work.

A better movement has occurred in steel rails, although the volume of buy-ing has been small. The mills making standard gauge rails, however, on the average are not working much above 70 per cent. of their capacity if they really reach that figure, yet it is the best they

The reduction in the output of pig iron in May was very close to the est-mates made early in the month, there having been a decrease of about 3000 tons per day, making the total reduction in production since the high daily record in February of a little over 9000 tons daily or at the rate of about 3,250,000 tons annually. Current output is now at the rate of about 28,000,000 tons per year, or, with charcoal iron, about 28. 500,000 tons. In February the daily rate of coke and anthracite iron was 85.600 as of pig iron, and the annual rate of kinds, including charcoal, was 300,000 tons. Wedding of Ex-President's Son and Miss Alexander Takes Place in New York.

NEW YORK, June 21.-In the presence of 1500 persons, Theodore Roosevelt, Jr., son of the recent President of the United States, and Miss Eleanor Butler Alexander, daughter of Mrs. Henry Addison Alexander, were married Monday afternoon at the Fifth Avenue Presbyterian church. One of the biggest crowds ever attracted to view a bridal party stood in the glaring heat outside the church at Fifth avenue and Fifty-eighth street, and a cordon of 250 police-men, 100 of them mounted, were kept busy handling the spectators. Many attracted there to get a glimpse of Col. Roosevelt as he arrived to attend

his son's wedding.

Long before the first of the guests for whom the 1500 invitations had been issued entered the church a mob of curious people gathered about the sidewalk awnings. A hundred policemen under Inspector Walsh and Capt. Lanley formed a line to keep them from grabbing hold of the dresses of the guests to examine their texture. Conspicuously peeping around the shoulders of the police were milliners and dressmakers with note-

Some Ways in Which It May Happen and Hints on Action When It Does.

HOW TO EXTINGUISH FLAME.

Conflagrations at Night and the Best Methods of Escape From Burning Buildings.

Attics and closets are the breeding places of many fires, according to Good Housekeeping. An attic is generally the asylum for all sorts of inflammable material, and as it never is properly ventilated it becomes a fire incubator when the summer sun strikes the roof. Among the odds and ends that make

up the contents of the average attic are old varnished furniture, dry as tinder; rage, many of them greasy and ripe for spontaneous combustion; painting oils, liable to take fire when the sun beats on the roof; broken toys and old clothes, the pockets of which may contain matches. Attics and garrets often have a temperature of 110 degrees Fahrenheit, which is the ignition point for matches.

Floor sweepings under furniture or in a closet are liable to take fire spontaneously or from a flying match head. Sawdust used in sweeping floors, if left in a corner where there is no current of air to carry off the heat it generates, is very likely to become hot enough to ignite itself. Greasy overalls kept in a tight wardrobe have been known to ignite. The most dangerous closet is that under a stairway, because inflammable materials may hide there, and if a fire starts in it the best avenue of escape from upper stories is cut off. Furnace ashes in the cellar have in them so much fine coal and litter that they are liable to spontaneous combustion if an open window permits them to get wet by a rainstorm. The fine coal from the winter's supply may ignite if wet. Playing with gers who came on the train and took the fire and matches by children is a pro-

> How to Extinguish Flames. One's ability to extinguish a starting fire depends upon intelligence and self-control. If the blaze is just starting throw water on the burning material, not on the blaze. One bucket of water will do more good if thrown on by handfuls or with a broom than dashed on at once. A small fire may be smothered with a rug or blanket,

If you cannot put out the fire in a minute then give an alarm at once. Do not leave a door open when you run but you see that I am very busy."

Novel Rope Fastener. No knots are needed with the novel and effective rope fastener that has just been patented. Therefore, as

there is nothing to tie up or unite, its use means a big saving of time. The fastener is shaped like a letter "W" with an inverted "V" on the bottom. This makes three slots, two above and

one below, and to FIRM AS IF TIED. fasten a rope the latter is brought over one of the upper slots, down the lower one and up again over the other arm of the W. Wound over the fastener in this way the rope cannot slip, but will hold its position as firmly as if tied. This device has a spring hook at the apex of the middle section of the W by which it can be attached to any projection. The fastener will be found very useful on sailboats or for hanging up clothes lines. The average person ties a knot that requires much time and patience to untie. With this fastener he is saved the trouble of making and opening weird

A waiter in a coffee shop in Vienna was arranging the tables, seeing that the ware that is usually kept on them was in order, when the door opened, and a gentleman walked in and asked for a cup of chocolate. "You are too early," said the waiter.

'Do you suppose we can serve guests till 2 o'clock in the morning and be up at 4 to begin another day? You'll get nothing here till 9 o'clock. Be off with you!"

The stranger made no reply, but left the shop. Walking across the street, the waiter watching him the while, he entered another coffee shop and

made the same request, "Sit down, sir," said the landlord cheerily. "The chocolate will be ready

in a moment." While the guest was waiting for his chocolate he conversed with the landlord. He did not take the proffered seat, but walked back and forth. He asked many questions about what was going on in the neighborhood-whether the people were satisfied with their condition, how the city government suited them and if the inspectors troubled them much.

While they were talking the landlord's daughter, Rosina, a very pretty girl, came in with the chocolate. The stranger wished her good day and made some very pretty speeches to her. When she went out, pouring the chocolate, he said to her father:

"She is a nice girl. But I warn you that flowers are not always in bud nor even in bloom. She should be married before she fades."

The landlord, who stood before his guest, with a napkin on his arm, shrugged his shoulders, spread out his hands on either side and rolled up his eyes

"She is fading very fast," he said, "not from age, for she is only nineteen, but because she loves a young man, and since I have no dowry to give her she cannot marry him." "Who is the young man?" asked the

"He is an optician, a maker of glasses, a fine young man. He served his term in the army and was very brave. The landlord, wondering whether he was awake or dreaming or out of his senses, brought writing materials, and the stranger scribbled something on a bit of paper and handed it to the landlord, saying:

"Give that to your daughter and tell her to go to the palace tomorrow at 12 o'clock noon. And be sure she takes her soldier with her. They will be admitted to the emperor's presence Dr. A. H. The twenty Delta county granges will be present in force, and visitors are Tuesday afternoon N. P. Hull, master of the state grange, will address an audience. Tuesday morning there will be a basket picnic. All grangers are requested to bring their own provisions. The attendance will undoubtedly be immense. The wealth of beautiful scenery around Fayette harbor makes the locality selected an ideal picnic

At Monday's council meeting it was ordered that a list be prepared of those delinquent on personal taxes during the past three years, and that dog tags be procured and the payment of the tax rigorously required. The application and bond of Warren Chandler to do plumbing was accepted, and the electric light pole in front of Tardiff's ordered moved across the street. The bid of C. W. Next year the Soo Line will build a cut off from Burlington, Wis., to Nekoosa, discontinuing the old Portage branch of the Wisconsin Central. This will shorten the line from Chicago to the Twin Cities and Duluth. The Soo is now preparing to build its own depot into Milwaukee. The extension, also, of the Wisconsin Central from Lake Winnebago to Gladstone, thus making a direct line from the C. P. R. to Chicago, will follow at no very distant date, revolutionizing freight and passenger service on this division.

The Escanaba Traction Company has been handling a vast quantity of light and heavy freight over its line during the month, and the business is increasing. J. T. Whybrew, who is the company's sole freight agent here, is now building a depot and warehouse at the corner of Eighth and Superior, and it is probable that a hundred and fifty yards of sidetrack at this point will be ap-

The upper peninsula Elks planned to appear at the parade of the big annual eunion at Detroit in July clad in miner's costume, with lamps in their ats, and accompanied by the Calumet & Hecla band. However, Escanaba, Manistique, and Sault Ste. Marie, having no miners, have struck and will not fall in line. Could they not get up a parade with knee breeches and spiked shoes, and carry peavies?

According to the Mirror, Escanaba has a cow trouble, resulting in an open battle Thursday between the poundmaster's force and owners of bovines. who rescued impounded animals. It sounds like some of the occurrences in Gladstone, before this city had outgrown its village ways. Escanaba will get over her difficulties when she grows a little older.

There are now almost twenty automobiles in Gladstone, not counting the hourly ones that John Cleary runs for the Escanaba-seeking public, and there will be several additions soon, especially in the low-priced runabouts, which are now made by the hundreds of thousands. But then Michigan is the banner automobile state.

A Cleveland-Cliffs league has been organized, with three teams, Gwinn, Munising, and Marquette's second nine. with a regular schedule, from June 25 to September 11. It is believed they will put np some good games, though hardly equal to the Marquette-Iron county league.

And even the Detroit News has been MACLAURIN & NEEDHAM wearied enough to remark: "To be the entertainment of the populace, the idol of the mob, or the plaything of publicity, these may distil a subtle delight; but nothing wears like the calm and peace of obscurity."

This is not only the season of heat, but one of business. Seldom has the Soo line or the Soo docks been so busy, or so much merchandise transhipped here. This is Gladstone's busiest year with every industry she possesses.

Two professional gentlemen escaped Sunday evening from their fishing trip, and asseverated, with a physiognomic effect that might have been a smile but for insect bites, that they had immensely enjoyed themselves.

HARVARD MAN MISSING. Members of Class of '08 Asked to Look

for A. D. Pike.

The strange case of a Maine boy who disappeared while a junior at Harvard three years ago has been brought to light. Guy Emerson, secretary of the class of 1908, in compiling a list of the members of the '08 class chanced to write to A. D. Pike of Lubec, Me., wishing to learn his occupation and other matters which might be of interest in a class compendium. Young Pike's father received the epistle and wrote to Mr. Emerson that he had not heard one word of his son since he left college in March, 1907. The father has searched unceasingly for the boy without success, and in his letter makes a stirring appeal to the members of the class to aid him in his hunt. A. D. Pike is the son of B. M. Pike, a prominent resident of

END OF STEIN PARTIES.

Decision Purifies Life at Leland Stanford University.

No longer will the famous old song with the Menlo Park and Charlie Myers rhymes, be sung by the students. The days of the foaming steins are things of the past. Future generations of Stanford students can only look back with awe and admiration at the exploits recited to them by their elder brothers or fathers. As a result of a decision handed down by the appellate court in San Francisco the drinking resorts of many of the university elite are closed. With-out leaving the bench the court rendered a decision remanding Barney Burke to the custody of Sheriff Robert Chatham for the purpose of serving the remaining portion of his forty-eigat-hour sentence in the county jail. Burke made a test case of the law passed by the last Legislature with the support of President Jordan and his colleagues, prohibiting the sale of liquor within a mile and a half of the Stanford university campand Arrested for its violation by Sheriff Chatham, a forty-eight-hour sentence was imposed upon Burke, whose attor-neys were granted a writ of habeas corpus by Supreme Judge George H. Buck. On his appeal Buck upheld Justice Han-non; a new habeas corpus writ was secured from the appellate court and the case was tried again, with an upholding of the law by that body. Although the case was against Barney Burke, it was Charlie Myers that was back of the continued proceedings for the defense. He has still a chance to carry the mat-ter to the supreme court, but has de-cided that he will quit. At the height of the "steam beer" wave that swept over the campus a couple of years ago, Myers did an enormous business. Dray-loads of the foaming fluid were hauled around to the various fraternity houses and real keg parties were held amid the singing of many of the famous convivial songs, such as "Oh, There's a Road to Menlo." "Charlie Myers" and the "One, Two, Three, Four" song.—Dispatch from Leland Stanford University.

CARL HAGENBECK, the world's greatest wild animal trainer and dealer, was born in Hamburg, June 10, 1844. His father was a fisherman who later embarked in business as an animal trainer with a small collection of seals and a polar bear brought by a whaling expedition from the Arctic. The father's dition from the Arctic. The father's venture proved a failure, whereupon young Carl at 15 years of age took over the outfit and started out for him-Thus was commenced the largest animal business in the world. Within a few years he had collected a fair-sized menagerie and he made a business of training the wild animals for exhibition. With the increase of the business he sent expeditions to the wilds of Africa, Asia and South America to collect and mals. In the suburbs of Hamburg he established a great zoological garden where he keeps his stock in trade, con-sisting at times of animals to the value of over \$5,000,000. Nearly one hundred trainers and attendants are employed to look after the great menagirie which supplies circuses and zoological parks all over Europe and America.

HENRY U. MUDGE, president of the Chicago, Rock Island & Pacific railway, was born in Madison, Mich., June 9, 1856, and received his education in the public schools of Michigan and Kansas. He began his railroad career in 1872, at the age of 16, in the capacity of water carrier to the section hands on the Santa Fe. Since that time some of the positions he has filled are those of telegraph operator, brakeman, baggageman, conductor on freight, passenger and work trains, dispatcher, road master, work trains, dispatcher, road master, train master and assistant division super-intendent. The last post marked the second stage in Mr. Mudge's upward course. Thence he went to higher and higher positions, each of which required increased ability and versatility. In 1894 he had risen to be conserved superintendent of the eastern states many other wells from 1395 to iger. In 1905 Mr. Mudge left his long service with the Santa Fe to accept the vice presidency of the Rock Island system and continued in that position until elected to the presidency last December.

Government Expert Who Can Locate Water at Great Depths.

H. Darton is a government geologist who does surprising stunts in the way of finding water. The geological survey has carried on extensive investigations of underground waters, which make Mr. Darton's phophesies possible. One of his most notable successes was a well at Edgemont, S. D. Mr. Darton predicted that water should be expected in the Deadwood sandstone about 3000 feet below the surface.

Accordingly the boring was begun, but

meeting with many difficulties which caused great delay and expense there was a disposition to abandon the work. The engineers in charge, having con idence in Mr. Darton's prediction, urged a continuance of the boring, and according to the National Geographical Magazine, their faith was finally rewarded by striking a great flow of water at a depth of 2695 feet.

The well yields 500,000 gallons a day

Fifty cyclists of over two years' service undertook a march of sixty-five miles in eight hours, the return journey being against a strong head wind. Before and after the march they fired ten rounds at target representing a section of twenysix men, in extended order, lying down

at 500 yards. The experiment was repeated with a section of forty-two non-commissioned of ficers of the school of musketry before and after a twenty-three hours' exercise in the field during which thirty-three miles were covered. This section, chief ly marksmen, made eighty-one hits on twenty-one out of twenty-six figures before starting, and sixty-two hits on twenty figures after two hits on twenty figures after their return. Americans are overstocked with cleverness, while they have a tendency to a shortage on honesty, according to Rev. Dr. Eugene A. Noble, president of Goucher college, Baltimore. In his baccalaureate sermon to the young women graduates he called attention to the fact that many of the dangers which beset the land were due to excessive cleverness, coupled with little enlightened responsibility in industrial and political affairs. Unless there was a high sense of honor among the leaders of the nation industrial and political eminence could not continue. He pointed out that one of the encouraging aspects of American life was the larger recognition given to women and the wider exercise of powers by them. Instead of being the occasion for scorn, it was an opportunity for the in-troduction of finer moral perceptions into American life, as a larger field was given

B. C. Craner's "Widow McCarthy" is easily classed among the few attractions that have earned good money the past season; when so many attractions have not prospered. The piece possesses the attributes that go to make up an entertainment popular with all classes of patrons.

The "Widow" is bright, snappy, fast and piquant; and the music is the kind that makes the public appreciate and sit up and take notice. It contains enough musical numbers for two such entertainments.

Ben Craner has added immensely to his reputation as a popular writer.

He has woven a fabric of fun and melody of sufficient strength to produce uninterruptedly good business all over the country. "The Widow McCarthy" has more than any other attraction of a similar character the fun diversified. There is the drollery of Russell Craner, in his many sided character of O'Holligan, the Irish Alderman, the irresistible flirtation of Mayme McPharlan as the dashing widow, and Frank Cristie as the honest Irishman.
