## STILL TIME TO AID SUFFERERS ACROSS THE SEA

### GLADSTONE GIVES NEARLY \$700 FOR RELIEF OF HUNGER IN EUROPE

The drive isn't over. If you wish to contribute to the fund for the saving of the lives of the starving children of Europe and to aid in the Near East Relief campaign, a check or a contribution can be mailed to the First National Bank or the State Savings Bank Tuesday or Wednesday. A ten dollar bill will assure life to a child for a period of several months. In other words, you can buy a child's life for ten dollars. In Europe, over three millions of children are starving to death and will freeze to death during the coming winter unless a fund of \$25,000,000 is raised. Gladstone has taken hold of this matter and has functioned in a most splendid manner. Contributions are substantial.

Ladies were stationed at various places about the city and explained the purpose of their collections to men and women patrons of the places in which they were stationed. Friday and Saturday. The result was that \$658.56 had been turned in by the generous-hearted people of this community up to Saturday night. Under the circumstances and in view of the fact that perhaps a great many people had not been seen, it was decided to leave the campaign open for another two days, Tuesday and Wednesday. Contributions will be received by the local banks and you still have time to enroll your name among those who have so nobly upheld the Gladstone reputation for generosity.

## Irish Bonds Selling Satisfactorily Here In The Last Week

Sales of Irish Bonds in this city have been moving along quite busily and acceptably. The various committees appointed here several weeks ago have been working among the Irish people of the community and scattered reports indicate that considerable progress is being made. Gladstone is not being a very large community, not a great deal was expected, but the Irish people of the city have risen nobly to the demand, in spite of calls for other funds, and have made a most respectable showing.

This is about the last week of the campaign. Committees now are ready to call on those who have been missed in former canvasses and it is expected the drive will have been brought to an end by the latter part of this week.

## Gladstone Eagles To Eat Venison In Escanaba Tonight

A large number of local Eagles planned to go to Escanaba tonight to attend a venison feed which has been prepared for members of the order. Invitations have been issued to the local lodge and a big time is anticipated.

## Popular Young Couple Wedded Here Today

Otto Kebler, of Escanaba and Miss Alma LeMay, daughter of Mrs. William A. Smith, of Delta avenue, were united in marriage at 5:30 o'clock this morning at the chapel of All Saints' church by Rev. O. J. Bennett, pastor of All Saints' church. Following the ceremony the bridal party had a wedding breakfast at the home of the bride's mother and left for a wedding trip through lower Michigan and points in Illinois.

They will make their home in Escanaba where the groom is engaged as a stone cutter. Both are well and favorably known here and the wishes of a host of friends are extended to them for a happy and prosperous voyage on the sea of matrimony.

The witnesses were Charles Grovols, of Escanaba and Miss Rose LeMay, a sister of the bride, of this city.

## Duck Hunters Find Shooting Is Good

Gladstone miradors have braved the raw weather to get a little duck shooting and meeting with reasonable success. Over in the vicinity of the Beaver Point Light house. Some 2500 a large number of birds were downed by men from this city and as they are now heading south in large numbers.

## Church Work Showing Rapid Progress Now

Work on the new All Saints' church is progressing very rapidly during the last few weeks, due to the splendid weather conditions. The brick work is now up to the second story windows, and contractor Arntzen says if the weather will just continue to be favorable, he will have the church under roof some time within the next five weeks.

## SCHOOLS OF CITY SHOWING SPIRIT OF THRIFTNESS

### SAVINGS INCREASE AND SHOW AN INCREASE OF ABOUT \$5 A WEEK

Quietly, little by little, the habit of thrift is growing among the pupils of Gladstone's schools. It isn't a part of the curriculum, but the pupils are being taught thrift and economy and the habit of saving, through suggestion and example.

It was stated yesterday that school savings are now averaging better than \$5.00 a week. When it is considered that this is a representation of a large number of pennies, most of which, it is believed, are actually earned by the pupils, it speaks volumes for the future of these young people.

Orchestra is Progressing. A feature of the high school work which is especially worthy of commendation, is the progress being made by the high school orchestra. This organization supported for the first time this year, in the Thanksgiving Day program, under the direction of Mr. Miller. Mr. Miller is a newcomer to Gladstone. He is fortunate in having combined within him the double advantage of being a musician and a teacher. The Gladstone schools were particularly fortunate in being able to get him and it is believed that within the next few weeks he will have developed the orchestra to a high state of efficiency. The Thanksgiving appearance was the first public appearance of the year and it speaks volumes for the developed capacity of the young musicians.

The orchestra has received a new bass drum and the accessories which accompany that booming but necessary instrument and a new Knabe piano has also been received. This new piano will replace the old instrument, which is to be used in the gymnasium.

Mour Cry of Distress. One of the most gratifying features of the last week's activities, was the splendid response of the children of Europe. A collection was taken a short time after the conditions were explained, and it resulted in the sum of \$106.58 being contributed.

Inasmuch as this represented the personal contributions of the pupils themselves and was not money given them by their parents, it is felt that it is a splendid augury of sentiment existing among the young folks.

High School Growing. During the month 19 new pupils were enrolled in the high school. This makes the schools rather crowded in spite of the fact that additional facilities had been provided but they are being handled in a satisfactory and efficient manner and the school is going along in the even tenor of its way, bringing the young folks into a greater sphere of usefulness day by day.

The children of the ninth grade have been devoting some time to the preparation of little stories. Many of them are especially meritorious and indicate that the young folks have a capacity for expression and an ability for observation which is most creditable to youngsters of their years.

Entertains at Dinner. Mrs. Emma Raymond entertained a few of her friends at dinner Thanksgiving Day. After the sumptuous repast, the afternoon was enjoyably spent with music.

## ABOUT THE WEATHER

Probably rain or snow late tonight and Tuesday; no change in temperature. Temperature for the past few weeks.

|          | High | Low | Preced. |

## The Ultimatum

## LYCEUM PROGRAM FOR WINTER IS VERY HIGH CLASS

### Five Big Numbers to Be Put on at Price In Reach of All

Gladstone people will be glad to learn that arrangements have now been completed for putting on a Lyceum course commencing December 1st. The program is very high class and received this afternoon and the program is one of the best that has ever been offered to audiences of the Upper Peninsula. Last year's Lyceum course was a decided success. There is no doubt about it. There is no other line of entertainment on the market as clean as that furnished by the best Lyceum courses.

Discriminating people patronize the Lyceum courses. Young people should go so as an aid to their cultural education. This year's course promises to be much better than that of last year. It will cost twice as much, while the price of the season tickets will not be advanced. The numbers heard on the Gladstone program will be heard in all the larger cities of the upper peninsula.

Just as a matter of comparison, last year's program was composed of numbers by the Venus at 60 cents, the Harvesters at 60 cents, the Dunbars at 90 cents and the Lombars at 50 cents, making a total of \$2.60.

This year's program is made up of the Alpine Yodelers at \$1.50, the Landis Orchestra at \$1.50, Dr. Wood \$1.50, Dr. Balloy at 50 cents and a home talent number all for \$5.00. Season tickets last year, for four numbers, sold for \$1.75. Season tickets this year for 5 numbers are \$2.00. Student season tickets will be \$1.25 and single admissions 75 cents.

All numbers come on Monday or Wednesday night. Additional information regarding the Lyceum program will appear in Thursday's issue of the Reporter.

## Nice Sum Contributed To All Saints Church

Rev. O. J. Bennett stated to the Reporter today that he had received information that the First Savings Bank of Escanaba had contributed the sum of \$210.15 to the All Saints' church fund. This sum represents five per cent of the cash sales made in the store on Saturday. Father Bennett is extremely pleased at this generous gift, and coming unolicited, it is most appreciated.

## RED CROSS SEALS GO ON SALE HERE ON DECEMBER 1ST

### CIVIC LEAGUE TO HAVE CHARGE OF DISTRIBUTION OF 25,000 SEALS

Members of the Civic League today received a large supply of seals, advertising literature and other matters pertaining to the sale of seals which will go a long way toward helping to curb the "great white plague" in the state of Michigan.

Gladstone's quota is 25,000 stamps. Last year the ladies sold 7,700 worth of stamps. It is up to them to sell \$500 worth this year. It has been given out that Michigan expects about 10 cents per capita. The sale begins Dec. 1st.

Without question this is the greatest single opportunity the people of this city will have to contribute to the knocking out of tuberculosis in the state, and at the same time, indicate to their friends in other parts of the country that they are trying to observe the spirit of Christmas.

It costs no more to put a Red Cross Anti-Tuberculosis seal on a letter, than it does to put on an ordinary Santa Claus seal.

Letters since have been received and these will be shown at the local moving picture houses. Also 60 large posters have been received and these will be put up at once to call attention to the fact that the seals will be on sale.

Further details about this sale will appear in the next issue of the Reporter.

## Auction Sale Begins At Lutheran Church

Members of the Ladies' Aid society of the Swedish Lutheran church will meet Thursday afternoon at 2:30 o'clock at the church in the evening at 8 o'clock an auction sale of new goods will be held in the church parlors.

## GIFTED FORMER RESIDENTS MAKE RECORD IN CITY

### Edwin and Helen Bidwell Are Chosen For Import Musical Work

Local friends will be deeply interested in the progress being made by two former residents of this city, musicians who are making their mark in the musical world. They are Edwin Clarke Bidwell and his talented sister, Miss Helen Lee Bidwell, son and daughter of Dr. E. H. Bidwell, now located in Kalamazoo, Mich.

Edwin has been offered a position in Grand Opera but prefers recital work. He is singing in St. Louis during the present week and is mentioned as "one of the leading baritones of Chicago."

Of Miss Helen Lee Bidwell, the Niles Herald says: "This gifted young vocalist is engaged for the Chicago Grand Opera for the 1920-21 season and makes her appearance tomorrow night in the second act in Jacques. Miss Bidwell is a coloratura soprano, taking high C with much volume and purity, which resulted in her engagement for the role she is to essay."

Gladstone friends will be more than pleased to note the rapid progress made by these two cultured and refined Gladstone young people and will watch their careers with the deepest interest.

## LIBRARY ASS'N. TO HAVE BENEFIT PICTURE

A benefit picture will be given at the Gladstone theatre Thursday night, Dec. 3 for the purpose of raising funds for the Gladstone Public Library. The picture will feature Bessie Barriscale in "Life's Twist" and it promises to be a role particularly suited to Miss Barriscale and is a play of intense interest. A two reel comedy will also be shown.

It is hoped here will be a large attendance it being an extremely good way to help the local library. Plan to go, bring your friends and Boost the Library fund.

## Intoxication Cases In Justice's Court

Justice Huys has been transacting a little business having to do with matters of intoxication, in the past several days. Phillip Sheridan Waterbaugh, a floater, was fined \$5 Saturday. Frank Robertson, alias Frank Carlson, paid a similar fine and Alfred Anderson, an old timer was fined \$10.

## Liquor Defendant Dies In Escanaba

Matt Eskola, proprietor of the "Dino Place" in Escanaba, one of those raised recently and for whose arrest a warrant had been issued, died in St. Francis hospital following an operation and before the warrant had been served.

## TAX LAWS WILL REMAIND UNTIL AFTER MARCH 4

### REPUBLICANS TO STUDY SUBJECT AND FORM PROGRAM FOR SPECIAL SESSION

Washington, Nov. 29.—In the opinion of Senator Pease, Chairman of the Finance Committee, communicated to Senatorial colleagues here and to influential members of the Ways and Means Committee, no attempt should be made to repeal the excess profit tax or amend the revenue laws until the special session of Congress, which President-elect Harding has announced that he will call soon after March 4.

Senator Pease said that in his opinion anything that might be done by the Republican Congress along these lines would probably be vetoed by President Wilson, and, therefore, it would be a waste of time for the Republicans to attempt to carry into effect party policies during the final months of the Wilson Administration. "It may be wise not only to repeal the excess profits tax, but to simplify tax forms for the calendar year 1920," said Senator Pease, "but I do not believe that the consensus of opinion in Congress would favor undertaking the repeal of any taxation schedules until the Republican Congress alone has control of the Government. I myself favor simplification of the tax forms so that the taxpayer can know what he has to report. I hope that we may not be before the Congress are required to make the 1920 report."

Senator Pease further indicated that no advantage could be gained by repealing the excess profits tax at the coming session, as Congress undoubtedly would not favor repealing the tax for the calendar year 1920, and there was sufficient time to repeal it at the special session, which other features of the revenue law would be considered and general revision might be undertaken.

There is such a demand from business men for repeal of the excess profits tax, supplemented by the recommendations of Treasury officials, that there is reason to believe that Congress will not delay action until the whole subject of tax revision can be undertaken. It is the opinion of those concerned with taxation matters that this tax will be repealed early in the special session so that the tax need not be collected at all. This must be done in the summer of 1921, or, according to Secretary Houston, it will be necessary to collect the tax for that calendar year.

What is puzzling the authorities is how to find a substitute for this tax. There is no argument against its repeal. In the Ways and Means Committee last session, R. C. Leffingwell, then Assistant Secretary of the Treasury, suggested that the income tax might be increased to provide revenues coming from excess profits. This view was opposed by the committee, which was nearly ready to accept a tax on sales and real estate transfers. Many object to a sales tax.

Another suggestion is to repeal the profits tax without trying to supply another source of revenue to take its place. In such a case the expenditures of government must be reduced to a minimum. If this is done, it is argued, there will be sufficient revenue to meet ordinary expenses of government, but not to redeem the Treasury certificates and Victory notes in 1922 amounting in all to about \$6,000,000,000.

Some financial experts hold that these obligations should not be redeemed, but should be refunded into long term bonds and canceled in five or ten years, when the condition of the Government will be such as to carry out the transaction without putting such a burden on present-day taxpayers.

## AN APPRECIATION

In another column of this issue of the Reporter will be found returns of the drive for the suffering children of Europe and the Near East. This opportunity is taken to express appreciation to those who have helped to make it possible, both in time and contribution, especially to the ladies who so generously presented the cause from the various places of business.

CHARLES BATES.

# INFLUENZA NOT FEARED THIS YEAR AS IN THE PAST

### HEALTH CONDITIONS IN STATE CLAIMED TO BE VERY SATISFACTORY

Health conditions in Michigan, with the exception of diphtheria and scarlet fever, compare favorably with other years, and influenza, with practically no cases reported, has assumed the role of minor disease, writes Dr. Rich- ard M. Olin, state health commissioner, in a communication received by Dr. C. P. Drury, city health officer.

The thirty-three week interval, in which many authorities believe influenza occurs, passed actively in October. Thus the danger period of the next cycle will come some time in May 1923, a season not conducive to the development or spread of influenza.

While there likely will be numerous sporadic cases of influenza this winter it is probable that few will be of the malignant form, according to Dr. Olin.

To prepare for a possible epidemic of the disease, however, Dr. W. J. Am J. V. Deason, director of the bureau of communicable disease is sending to the 4,100 physicians and health officers of the state a report covering the influenza situation and suggestions to combat any outbreaks.

No Public Warnings  
No public warnings against influenza are being issued by the state health department this year because, according to Dr. Olin former epidemics of the disease have taught that influenza is preceded by certain bacterial flora in throat cultures that do not exist at any other time, and no trace of this flora has been found in Michigan this year.

"Epidemics of influenza last a 'shadow' in advance of their appearance, and we detect this 'shadow' in our laboratory work," Dr. Olin said. "We believe we can predict the coming of an influenza epidemic from four to six weeks in advance of its actual outbreak."

That Michigan is not unique in experiencing an actual increase in the prevalence of diphtheria and scarlet fever is shown by the number of other states reporting similar increases. Up to Nov. 12, a total of 7,822 cases of diphtheria and 8,977 cases of scarlet fever had been reported, while in 1919 there were 5,283 and 4,104 cases, respectively, of the two diseases, the average number of cases reported annually during a twelve-year period being 4,497 and 4,867.

Better Reporting  
Through the reorganization of the old state board of health in December, 1919, the new state department of health now is enabled to obtain more efficient reporting of all diseases. While all diseases except infantile paralysis show a definite increase in the number of cases recorded, officials of the department say that the ratio of deaths proves the increase to be due largely to better reporting. In former years, the same proportion of disease existed, but it went undetected.

Under the new system it is possible for the state health department to curb epidemics at their outbreak. This is exemplified by the present hillside typhoid fever epidemic, officials being sent to Hillside at the first warning case to find the source of the outbreak, correct it, and to take steps, by vaccination and sanitary measures, to prevent a general spread of the fever. This single epidemic, that ordinarily would have developed into at least 125 or 150 cases, likely will be limited.

### Attorney General Will Aid Sheridan

The defense of Joseph M. Sheridan, the state trooper who fired the shot during a raid last Monday night which resulted in the death of John Kerensky, a bartender in a Sinclair street saloon, will be in the hands of the state attorney general's office, according to a telegram received by County Prosecutor T. E. Strom.

The telegram was signed by Andrew B. Dougherty, assistant to Attorney General A. J. Groenbeck, Michigan's governor-elect, and it asked that the preliminary examination in the Sheridan case, scheduled for December 1, be postponed for two weeks. To this Mr. Strom agreed.

Bull Baiting  
This was a sport once popular in England, but declared illegal in 1835. A bull was attacked by dogs, and sometimes the nostrils of the bull were blown full of pepper to increase his fury. Another form of the sport was to fasten the bull to a stake by a long rope and then set bulldogs at him, one at a time, which were trained to seize the bull by the nose. The bulldog seems to have been developed for this sport from a short-eared mastiff called "bantam."

AUCTION SALE  
Auction sale will be given by the Ladies Aid of the Baptist church Wednesday Dec. 1, 1922 at 7:30 p. m. Fancy work and other articles offered for sale.

### Everybody Hankers For a "Side Line"

There has never been an age that offered such attractive opportunity for putting an extra iron in the fire. It seems there is a demand for every thing Everybody wants men. And everybody seems to want anything he can buy. And strange as it may seem, most folks seem to have the whimsy to buy what appeals to them. So the demand goes on. One can sell at most anything. So the fellow with reasonable gusto works hard at his job and then begins a little something on the side to get farther ahead with. It may not be much but it's an extra iron in the fire. Roomer or laborer will get hot and then if the fellow isn't there with the hammer his iron will burn and he will be poorer than if he had not attempted anything extra. Lucky the man who knows how to do it when the time comes.—Exchange

### CONSTABULARY HAS BUREAU'S SUPPORT

#### MARQUETTE SUPERVISORS HAVE NOT CHANGED MIND AS TO VALUE

Marquette county still remains one of those whose officials are standing by the Michigan state police and there is no indication that members of the board of supervisors will withdraw their endorsement of the organization. The cost of running the department last year was \$252,425, while the cost in 1922 will be \$247,450, according to the budget figures. The increase includes an addition of \$70,000 a year to the salary item. Mr. Rogers said that this is made necessary by employment of additional help to care for the rapidly growing road construction program.

Besides caring for cost of running the highway department's offices and field forces, the automobile tax accord-

### HIGHWAY ADMINISTRATION COST AND COUNTY REWARDS MET FROM TAX

All expenses of the Michigan Highway department administration, as well as state rewards on county roads, can be paid during the next two years from the state's share of automobile license tax fees, which have increased 60 per cent since the new license law went into effect. Frank Rogers, highway commissioner, told the budget commission last week Thursday. The cost of running the department last year was \$252,425, while the cost in 1922 will be \$247,450, according to the budget figures. The increase includes an addition of \$70,000 a year to the salary item. Mr. Rogers said that this is made necessary by employment of additional help to care for the rapidly growing road construction program.

lag to Mr. Rogers' estimates will be sufficient to pay the \$2,010,000 of money to be paid in state aid during 1922 and the \$2,200,000 to be paid in 1923.

Mr. Dodge's said the department now has under construction or contract between \$90 and \$60 federal associated roads, at a cost of \$6,000,000, 400 miles of trunk line roads, a total of \$10,750,000 to be paid from the money available under the good roads amendment, and 400 miles of assessment district roads, the cost of which cannot be determined accurately until the roads are built, since many are being constructed by countries on a cost basis.

Proposing Made Easy.  
In Sioux a declaration of marriage is very simple. It is considered a proposal merely to offer a lady a flower, or to take a light from a cigaret if she is holding it in her mouth, so that even the most timid youths need not fear the ordeal.

Dates Served in Forty Ways.  
The date is the staple article of food in Paesia, and a good cook there can prepare more than 40 dishes in each of which dates figure in an entirely different way.

Placing Blame.  
A vulgar man, in any ill that happens to him, blames others; a noble in philosophy blames himself, and a philosopher blames neither the one nor the other.—Epictetus

### "THEY SAID I HAD T. B. AND WOULD NOT LIVE THREE MONTHS"

Mr. Harold W. Schmidt, Box 86, Revere, Clinton Co., Ill., believes he has reason to praise Dr. Hartman's Remedy for Catarrhal Conditions.

"I had former eight months for Chronic Catarrhal Cough. I was so bad, that I could not work every day. In March, 1918, I secured a quantity of your medicine and took it as you had. They said I had T. B. and would not live three months. After taking a small box of the medicine a box of 100 was ordered. I could walk around and in three months was able to work. My cough was cured. After three months I had had my cough for three years, extending down into the bronchial tubes. I'm glad to say I'm all right."

## YOU! Here's What Happened!

Our Mr. Gossner on his way to the convention in Buffalo—stopped over in Chicago—visited the different makers from whom we buy clothing—Not with an idea of making a purchase—but just for information—makers of Walton clothes offered him a lot of 110 Overcoats at a price so low that he could not resist temptation—Having cleaned up on nearly all our best men's and young men's overcoats—We were in good shape to handle the lot—as we were nearly cleaned up on young men's overcoats—When they quoted special price it didn't take Mr. Gossner very long to make his mind about buying them—deal was closed in a hurry—Coats came in by express last week—Just in time to put them on sale today.

When we can offer best Overcoats at less than makers' cost—surely have a right to make some noise about it—WHAT DO YOU SAY DEAR READER?

Here's your chance, Men to make a mighty big saving on a beautiful new Winter Overcoat

If you want cheaper Coats—still have a good line on sale at \$24.75 to \$34.50

### THREE IS CURE FOR MANY OF PRESENT DAYS

EXPERT POINTS OUT HOW AMERICAN "COME BACK" WILL WORK

An editorial in the October issue of one of the leading magazines had the above heading, "Are we down-hearted?" The final paragraph of that article is quoted as follows: "The truth is that there is no need to be pessimistic with us or to be pessimistic about our mental reaction from the effects of the war and in this we have indicated ourselves long enough by the time we ask ourselves, 'Are we down-hearted?' Answer 'No' and mix up the old American formula of confidence and a little bluff, good humor, sentimentality, a little altruism, and a keen appreciation of the main chance. Take a big dose of it, forget our troubles and go to work. There are half a dozen big jobs beckoning in many of us are in the prime of life. What more could a nation want?"

The writer found the personification of the above sentiment in a short trip through the State of Montana. Montana, as you all know, has just come out of four years of extremely difficult times. The first three years of the four were drought years and now that the fourth year has produced a crop failure in most parts of the agricultural sections of the State, the markets for the products raised has been shipped away from them to a price which is almost impossible to make a profit on in any line.

The Montana split in Montana the price of copper, instead of being 32c as it was recently, is now about 14 1/2c a pound; there is no profitable market for wool; the wheat market has dropped 66c a bushel in five weeks and cattle are selling at prices which in many instances are less than the cost head of carrying them through last winters terrible cold and snow. The people of Montana have, in spite of all handicaps, simply taken up their little couple of notches, stuck out their chins a little further and said to each other and the world at large "Are we down-hearted. No, we are not. We are going to get on with us just beginning to fight." It seems to me that without any criticism whatever of any other part of the Ninth Federal Reserve District, there are many of us who could learn a great deal from these splendid men who are carrying on such constructive work in the State of Montana. There are many of us who are enlarging upon our own little grievances and forgetting the fact that as a nation, we are commercially just getting started and that the recent inflation in business generally is the same condition which a patient undergoes who given stimulants to temporarily lull him over a severe illness that he may regain his normal health.

We are firmly convinced that in most parts of the Ninth District, the great wave of extravagance from which we have suffered so keenly since the Armistice has practically amounted to before the Treasury Department made public its statement after a canvass of tax returns upon luxuries. The records of the Treasury Department compiled for Secretary Houston show expenditures for so-called luxuries during twelve months period amounted to \$22,000,000,000 based on tax returns and tax receipts.

Here's One Cure What's the cure? Why Montana found it last year. Think of it—that State completed a year of investment in Government Securities ranking them third per capita in the nation. The District of Columbia first, the State of Ohio second, and Montana third. The first if because of property and Montana because of thrift, which meant going without things the rest of us thought we needed. No wonder they say out there they are all right. They ARE all right and with plenty of food to carry stock through the winter, will be in still better shape next spring.

Don't you think the rest of this great district will do well this winter to follow the example set by Montana in promoting Savings? Bear in mind that there are still a lot of people who believe no man ever made "big money" by the simple process of saving it and who still believe the very rich only got there by making more than they could spend. These people don't know until they are broke that "big money" is a five dollar bill. If we can show them that instead of trying to earn more than they can spend, they should simply spend less than they earn and save the rest—we shall have better times, better men and women, healthier children and no debts.

Constitution Most laxatives and cathartics afford only temporary relief and should be used only for that purpose. When you want permanent relief take Chamberlain's Tablets and be careful to observe the directions on each package. These tablets not only move the bowels, but improve the appetite and strengthen the digestion.

### HEALTH DRIVES PROVE SUCCESS

Red Cross Centers Are Teaching Public How to Keep in Condition.

Realizing the importance of combating and preventing disease this winter, the American Red Cross Health centers are centering their efforts on health campaigns in the various states of the central division, where health centers have now greater service to the well than the sick, for by means of health education it prevents disease and conducts its health campaigns to meet local needs. A Red Cross health center may be only a room with a volunteer or paid lay worker in charge, yet it can be a most important factor in the prevention of disease and the promotion of health in the community. The health center work has advanced so rapidly during the last year it now is a part of the civic welfare organization in the majority of towns.

For the coming health campaigns in the states, the Red Cross attention is being paid to the small community and to the outlying districts. The influence of the chapter's headquarters is being considerably increased or extended throughout the county by the establishment of small branch health centers in the more remote sections.

In most cases these branch centers are being placed entirely under volunteer management and the exhibits, demonstrations, lectures and the like of the main health service are being repeated at each of the branches.

In reports from many chapters it is found that the health center director is successful to the extent that she does not wait until people call for information. She will stimulate constant demand for health information and provoke inquiry. In this way she reaches many who otherwise would be neglected. In still other counties where trained workers are not available at this time, some women have stepped in and organized the work and carried it on until they have received assistance.

The Red Cross health center is governed by business principles, applies business methods, and in its more simple form can be established and conducted by lay people.

Uses Business Methods. It proceeds upon the demonstrated fact that health is a commodity that can be bought and sold like brooms and soap. Therefore, it establishes itself in a store room in the principal business section of the community. It displays its goods in the form of attractive health exhibits in its show windows. It advertises constantly and extensively. And it uses every business and social device to attract customers.

The Red Cross health center is of service to the sick in that it obtains reliable and complete information about existing clinics, hospitals, sanatoria and other institutions for the sick and the defective; about available nurses, both trained and practical; about where to consult a physician and why to shun the quack and his nostrums.

The central division has thirty-three health centers in operation. Many of them also conduct medical clinics, but the one chief, outstanding feature of the American Red Cross health center is its health education service which teaches well people to keep well.

### Christmas Trees Are Going Out Rapidly

Thousands of Christmas trees will be shipped from upper peninsula points to the larger cities this fall. The movement has been under way for the past two or three weeks, with the consignments growing in size daily. From two to four carloads pass through Gladstone and Escanaba every day bound for Milwaukee and Chicago, from which points many of the trees are sold by the dealers and shipped to other points, including New York, Philadelphia and Boston. The trees do not bring a big price here, but it is said that to wealthy buyers in the eastern cities the choice ones bring as high as \$25. A number of land owners of this section, who have trees on their tracts, have been shipping to dealers in the larger cities for several years past, and they find it a profitable business.

When Furniture is Desired. For a desk in furniture, first of all wet the part with warm water. Desks to be cleaned with a paper into six thicknesses, soak in warm water and lay it over the desk. Then apply a hot solution until the moisture has quite evaporated. If the brush has not gone, repeat the process until the desk is raised level with the surface.

A Good Cough Medicine for Children. Mrs. J. W. Phillips, Redon, Ga. phoned to J. M. Floyd, the merchant there, that she had a coughing child. Cousin Kennedy said she had bought a bottle of it at his store recently and it was just what her child needed. She said that she wanted to keep up the treatment. You will find nothing better for coughs and colds in children or for yourself. It keeps the cough loose, expectorates mucus and soon frees the system from the cold.

### BUTTER TO STAY DOWN; EGGS JUMP

THAT IS PREDICTION OF U. S. BUREAU OF MARKETS REPRESENTATIVE

Chicago—Butter is and will probably continue considerably cheaper this year than last while eggs are higher and will probably continue higher, according to J. S. Brown, Chicago representative of the U. S. Bureau of Markets in charge of dairy products.

This contrasting situation Mr. Brown attributed to a surplus of butter, due chiefly to lack of export trade, and a heavy import trade in butter, and on the other hand to an actual shortage of eggs due to small production.

The situation in butter and eggs at the present time is a little different than it is in other food commodities, because of the fact that the public is now dependent for adequate supply on stocks put away in storage months ago when prices were all high, the agricultural official said. "Present prices are therefore on that basis.

Export Business Fees. "There is a very liberal supply of storage butter in the country. There is more on hand now than a year ago at this time. It is being taken out of cold storage and used, but it is not going out as rapidly as last year. Export business in butter was good in 1919 but it is poor this year, and in addition butter is being received from New Zealand, Denmark and Argentina. Receipts of Danish butter have already made a heavy showing.

Fresh butter is selling at prices 10 cents under last year and storage butter is now losing its holders money. If its price continues to decline they face the possibility of a serious loss. "With eggs the situation is different. There was a shortage right through the producing season. This may leave a shortage later on. Eggs are the one thing in the food line that is likely to stay high, until February when eggs usually drop because of new receipts."

Only a Cold. Are you ill? Then answered: "Oh! it's only a cold," then answered: "Oh! it's only a cold," as if a cold was a matter of little consequence, but people are beginning to learn that a common cold is a matter not to be trifled with, that some of the most serious diseases start with a cold. As soon as the first indication of a cold appears take Chamberlain's Cough Remedy. Remember that the sooner you get rid of your cold the less the danger, and this remedy will help you to throw it off.

NOTICE OF SPECIAL ASSESSMENT To M. J. Magoon, John Richardson, Forest Miller, Milton Danitz, E. H. Siple estate, C. Tordeur, A. W. Wolfe, A. L. Empson, John Cowell, C. W. Lightfoot, F. H. Huber Estate, Arthur Berg, and to all other persons interested.

TAKE NOTICE: That the roll of the special assessment heretofore made by the City Assessor for the purpose of defraying that part of the cost which the council decided to be paid and borne by special assessment (the laying of main sewer, laterals to lot lines in Dakota avenue between Eleventh street and Twelfth street) is now on file in my office for public inspection. Notice is also hereby given that the city council and city assessor of the City of Gladstone, will meet at the council chambers in said city, on the sixth day of December, 1929, at eight o'clock P. M. to review said assessment, at which time and place opportunity will be given to all persons interested, to be heard.

Dated November 12, 1929. A. L. WILLIAMSON, City Clerk.

### Refrigerator Car Shortage Affects Michigan Shippers

With 6,000 cars of potatoes, 300 cars of apples, and a considerable amount of small truck to ship Michigan farmers face a shortage of refrigerator cars which will make it necessary for some shippers to use box cars instead, according to the state farm bureau.

In a conference with H. O. Halstead, superintendent of car service of Pere Marquette railway, and Carl Stewart of the Michigan Public Utilities Commission, the farm bureau traffic department reports it has secured an extension of a plan providing that box cars lined by local cooperative associations at their own expense be returned to them.

If the Michigan Public Utilities Commission issues an order covering this proposition it will become effective in all railroads in this state. Mr. Halstead has already stated that the Pere Marquette will agree. To become effective outside of the state the Interstate Commerce Commission will have to issue an order. To secure return of cars under this plan co-operative associations would have to notify local agents and divisional freight agents, giving car number, consignee, and destination.

Lining cars is expensive but such a provision would make it possible for associations which have a number of cars to ship to do so more economically. When such cars were returned they could not be held any longer than ordinary loading time without demurrage charge.

Helps the Circulation. One of the largest New York hotels supplies each of its guests, who average 2,000 a day, with a free copy of Chamberlain's Cough Remedy.

Church Bells. The Angelus bell, always rung three a day, takes its name from the first words of the prayer. In Germany a bell is rung an hour before the evening Angelus, or Ave bell, and is intended to remind its hearers to say the creed. The De Profundis bell sounds one hour after the Ave, in Italy on Friday afternoon at 3 o'clock thirty-three strokes are sounded in many churches not converts in memory of Christ's death at the age of 33. The custom probably is followed elsewhere.

Usual Thing at the Opera. Myles—And you say Mrs. Styles at the opera? Fyles—Yes; she sat just in front of me.

Myles—And you saw Mrs. Styles at usual, I suppose? "No, her back was quite bare,"—Tinklers Statesman.

Bobbed Hair Wins Husband. It may be possible girls are bobbing their hair that it won't take them so long to get ready when an automobile takes outside. Many a husband has been lost to a girl because she used forty-nine hairpins.

### Kill That Cold With HILL'S CASCARA QUININE AND La Grippe

FOR Colds, Coughs, Bronchitis, and La Grippe

Neglected Colds are Dangerous. Take no chances. Break up a cold in 24 hours—Relieves Croup in 3 days—Excellent for Headache. Quinine in this form does not affect the head—Cascara in best Tonic Laxative—No Opium in Hill's.

ALL DRUGGISTS SELL IT

### Where Discipline and Recreation Combine to Better Service

Work is more than just a living to the girl at central. There is always an abundance of fun and recreation, too, during regular rest periods and whenever she is off duty.

Lots of people who have visited our larger exchanges marvel at their simple, homelike atmosphere—the delightful lounging and reading rooms—the immaculate kitchens and pleasant dining rooms—and most important of all, their watchful, helpful sensible matrons.

Long ago, your telephone company learned that in order to have efficient operators, their girls must also be happy and healthful. So these comforts, which mean so much to our girls, are, after all only instruments to improve your telephone service.

Our girls' health is always carefully guarded. Frequent physical examinations are given and healthful athletics encouraged. In rainy weather dry footwear and stockings are loaned. In the dining room meals are very, very good and are provided at very low prices.

To insure the best service possible, strict discipline, it is true, must be maintained in the operating rooms but after hours and during rest periods complete relaxation is encouraged.

We believe that the life of the telephone girl has all the pleasant, clean joys that should surround the life of a normal girl. We believe, too, that you will find that the careful supervision which we maintain over them is being reflected daily in the improved telephone service which they give.

A THOROUGH JOB

Since the election of General Hoover to the Democratic party in Congress as the result of the Harding landslide is indicated by the complete or nearly complete elimination of all representatives of many of the most populous states of the Union.

In Ohio not a Democrat is left to defend his political faith. General Isaac R. Sherman, who has been in the House of and in since his first term in 1877, when he and "Uncle Joe" Cannon came in together, just out, as did G. W. Werry, Brewster, Henry, Moody, Gaska, and A. A. Brock, whose district was regarded as impregnable. Among the new members will be Theodore E. Burton, who was formerly chairman of the House Committee on Rivers and Harbors, succeeded Joseph B. Foraker in the Senate and was the choice of his state for the Presidency in 1916. Not even Pennsylvania did as well for, while all Democrats fell by the wayside, one yet remains in Guy E. Campbell, of Pittsburgh, who was also indebted by the Republicans.

In Indiana the delegation remains as it was—all Republicans and all re-elected. So it is in Iowa, with the exception of Kopp, a Republican who succeeds Kennedy, another Republican.

The result in Illinois with three districts still in doubt. It appears that every Democrat has gone down to defeat for the first time in the memory of the oldest inhabitant. Likewise, Connecticut, a new Republican, is in Kansas, by the defeat of Agnew, a Democrat, in the Eighth district, and Michigan, by the defeat of Doremus in the First district. Minnesota party made of even an independent by being at home W. L. Cass, and now every member is a Republican.

Most remarkable of all was the shift in Missouri where the Democrats were to defeat including the veteran Champ Clark and where all but one of the sixteen representatives are now Republican. The majority was so large that the state is now considered safely Republican, for a long time at least. Montana was bereft of its one Democrat and Utah defeated its two Democrats and Republicanized two.

Republican Nevada went over. In public instead of a Democrat, California sent three more Republicans instead of two Democrats and a prohibitionist, so that the delegation will contain nine Republicans and two Democrats.

In New Jersey four Democrats were beaten and only one now remains in the delegation of twelve. In New York eleven Democrats were shown of the number in the awful blizzard of November 2. Nine now remain out of the forty-three in the delegation, which also includes one Socialist, J. V. Ganley and R. F. McKinley, "bad boys" who lived at the same hotel, had editing offices as well as districts and were inseparable, were among the casualties.

In Oklahoma five Republican members will grow where only two grew before, and this leaves only three Democrats. Exactly the same shift was made in Tennessee, except that there five Democrats are left. The one Republican from Texas is confirmed, as great as he considered the election of a Democratic senator from Missouri in the Roosevelt landslide of 1904.

South Dakota gave up its one Democrat and now had three Republicans, and West Virginia threw out M. M. Naylor, a veteran Democrat, so that the delegation of six could be entirely Republican. In Wisconsin three changes were made, but the delegation of eleven is entirely Republican.

LET'S LOCATE THE "JOKER"

The average cost of mining a ton of bituminous coal in the month of October was \$7.44—and that includes an overhead of 71 cents for interest, "overhead," etc. This figure is supplied by the mine operators themselves. It is set down in statistics compiled by the U. S. Chamber of Commerce from figures furnished by 555 mine operators producing 18 per cent of the total coal of the country. A production cost of \$2.44 is big compared with a production cost of ninety cents or one dollar five years ago. But it is mighty near \$12 to \$15 a ton, which is the present tax upon the ultimate consumer. After freights and haulage and all related expenses are added to a production cost of \$1.44 a ton, what a liberal measure of legitimate profit also is accorded—there is still a long spread before the final price of \$12 to \$15 a ton. The fact remains that if it costs \$2.44 to produce a ton of soft coal (after adding 75 cents for that elastic thing known as "overhead") it ought not to cost \$12 or \$15 or \$18 for the ultimate consumer to buy that ton of coal from his dealer.

Uncle Samuel (who is rather powerful when he wants to be) were to include these restrictions on fire a million tons and force all coals face up upon the table, the poker would fall out of somebody's sleeve. There has been a large portion of bituminous spread around the country. In the case of "prospecting professors" there has been a serious harassment of "professors" where they are not. But there is yet to be some real federal business done in the matter of finding out who gets the difference between \$1.44 and \$15 for a ton of soft coal—Grand Rapids Herald.

REFUTING A SLANDER

About the time of year begins to look out for jokes and gibes about the report boy and the coming of Christmas.

He is pictured as an expert grafter, extracting coin from all the family, particularly father, and assuming an assumed name for the same purpose.

Now as a matter of fact, the American boy early begins to free at his father's side, and returns for the time when he can come home with a pay envelope and help relieve the "old man" (a loving appellation) of the family burden.

It is more or less of a struggle to keep the average American boy in school. He wants to be doing things and doing them in some way which will express itself in monetary returns.

Nine times out of ten, given half a chance, he will find some way of making money out of school and hang to the job with a persistence which is the mark of his mother and the secret administration of herself and every one else who touches.

It is a proud day with him when he tells the family, with an assumed and the embarrassed confidence that doesn't want any more interference with his clothes because he's picking 'em out and putting 'em on himself.

Add as for Christmas, it takes the united plea, protest and persuasion of the entire family to keep him from buying himself worse than Pontiac.

REPARATION

The peace treaty provides that the allies shall notify Germany by May 1, 1921, of the total reparation claims against her. The treaty also says that before the claims are fixed, Germany shall be given a just opportunity to be heard. France has now consented to recognize this part of the treaty to which the signatures of her representatives were affixed.

It is very late to begin the work of assessing Germany's capacity to pay. But France has opposed all previous efforts to start the inquiry going. The hope that the treaty pledge to Germany could be evaded. For it has been France's desire to assess no final amount, but to claim all of Germany's surplus production.

No other treaty supports France's desire to crush Germany economically. If therefore the French government can be held to its agreement, less than six months will elapse before Germany knows the worst. By May let Germany have paid the allies in money, shipping, animals, coal and otherwise the five billion dollars, in accordance with the peace treaty terms. Thereafter, for thirty years, she must continue paying the new assessments which the allies are now to levy.

It will be a gigantic sum. But, whatever it is it will be known to the Germans, in advance. Germany will have the assurance that whatever she produces above the stipulated amount will be her own. There is reason to believe the German people will have purposely refrained from making an effective effort at economic reconstruction to barter the estimates of the allied experts concerning Germany's future capacity for production. But once the indemnity is fixed, Germany can begin her real recovery. Next summer, therefore, should reveal Germany's true economic strength.

WHAT THEY'RE THINKING

An edit from Moscow has clouded Russia to its future. However, very few of us have been intending to spend the winter there.—Cleveland Plain Dealer.

Prince Paul is fond of tennis, rowing and dancing, making him well qualified to occupy the Greek throne.—Indianapolis Star.

As usual, Gladstone has responded with her usual generosity to the appeal for funds to help save the starving babies of Europe. All that is necessary here is for the people of the ally hear a cry of distress and action follows automatically.

AROUND THE U.P.

Created Blocks Station

Approximately 1,500 concrete blocks were window by residents of the eastern part of the town, and now are either piled high in the woodsheds of those who took them or have kept back heavy smoke rolling out of their chimneys. The blocks were the ones taken from the Fortgate avenue bridge after the fire. A number charged with stealing the blocks were taken before the city manager and the judge. Some said they had burned them and others said they brought them back. It is expected that as soon as the city returns prosecution will be started and the thieves be made to pay for the blocks. The blocks were going to be used in the reconstruction of the bridge. It is said that some of the people down the blocks away in Detroit. Material such as concrete blocks which sell at about \$75 per thousand, do not make very cheap fuel.

Round Up Personal Taxes

Eight thousand dollars in personal taxes, according to Mayor Doyle, has been collected at Monticume within that in the past twenty-five years, for more of city administration there has been a considerable portion of this \$8,000 which has been carried over from year to year, which has placed an unnecessary burden on the willing tax payers. "There is no reason why this tax should not be paid promptly," he said. During the past two weeks, Mr. Kriffin, also city assessor of weights and measures, has been cooperating with the mayor and every cent, excepting \$115 not as yet paid by one man, or one to absent from the city, has been paid in to City Treasurer Lynn.

A bank run that the women would like to have stopped is the too frequent case in the city bank.—Toledo Transcript.

AUCTION SALE

The Ladies of the Swedish Lutheran church will hold an auction sale in the church parlors, Thursday evening, Dec. 2 at 8 o'clock. 78-21.

PAT YOURSELF ON THE BACK!

You are the cause of these low prices! If there is any credit to be derived from that fact, the public can have it. We cannot ignore the fact that everything we ate, drank or wore had been raised and re-raised in price so often that it made one sick at heart every time we had to purchase anything. Everybody, the merchant, the manufacturer, the farmer and the laborer was out for all the traffic would bear.

AND EVERYBODY HAD A GOOD EXCUSE!

We (you and I) all said we had to do it because everything was getting so high and we could not pay the awful prices that were being asked if we "did not get ours." And it was true. But it kept getting worse and worse. Then we all quit buying because we could not afford to pay the prices.

Thousands of laboring men in the East, West, North and South offered to go back in the factories at a voluntary cut in wages. But no one was buying and the factories would not operate without orders.

The farmer grew more corn, more wheat, more cotton and more of everything than we had raised for years. So he had to drop his prices.

The Manufacturer wanted to operate his factory. So he had to drop his prices.

The Merchant then had to drop his prices to meet the new market prices.

Everybody quit but the public

That Made the Merchant Come to Time. He had been making so much money that it was a crime.

That Made Labor Come to Time. They had been making so much money that it was a crime.

That Made the Farmer Come to Time! He had been making so much money that it was a crime.

That Made the Public Quit Buying Last. The Public Should Start Buying Now.

The longer you wait, the longer these thousands of men now out of employment are going to stay out and it will hit every factory in the United States, every town will suffer, our town will suffer.

We Merchants Have Dropped Our Prices to the New Prices For Spring.

We have dropped them six months in advance. If you say we have not done the right thing you are wrong. BUY WHAT YOU NEED NOW. Do not load up but help keep these factories working.

If you do not, you will be the last to suffer, but you will probably feel it the worst. And don't fool yourself. We are all guilty, do not make a little saint of yourself and start building a halo for yourself. You are in it too. Let us all realize it together. Then we will act together and good times will be with us again. In the meantime, you can buy good goods at the new low prices from

AND THE PUBLIC QUIT FIRST

And now we all have to quit. When the Public quit buying the merchant quit buying. The manufacturer quit manufacturing because his orders were all cancelled and he had to sell his goods at a loss.

If the merchant would not order goods he would not run his factories at a loss, make up goods and pay his labor for making up goods that he could not sell. And so they laid off one third their crew, some laid off one half, some two thirds and some shut down entirely.

To Be Or Not To Be

I'd rather be a 'Could Be' If it could not be an 'Are' For a 'Could Be' is a 'Maybe' With a chance of touching par. I'd rather be a 'Has Been' Than a 'Might Have Been' For: For a 'Might Have Been' has never been. But a 'Has' was once an 'Are'.

Usually a "Bluffer."

A person who goes around bragging about his "awful temper" is the easiest person in the world to ease by a very small show of business and determination.

### The Columbia Grafonola is the Phonograph Plus

Here are five reasons why the Columbia Grafonola excels all other phonographs:

1. Exclusive Tone Levers. Give complete and accurate control over tone volume.
2. Straight Tone Arm. Allows the sound waves to develop fully and naturally.
3. Scientifically Correct Acoustic Design. Gives exquisite clearness and purity of tone.
4. Streamline Cabinets. In perfect accord with modern artistic furniture design.

Plus  
5. The Only Non See Automatic Stop. Never stops before it should. Always stops at the very end. Nothing to move or set or measure. Just start the Columbia Grafonola, and it plays and stops itself.

Come in today and let us demonstrate the stop that needs no setting.

# PLAN TO BOOST DOELLE FOR THE "ACCIE" BOARD

### WOULD MAKE A SPLENDID REPRESENTATIVE OF UPPER PENINSULA

John A. Doelle, of Marquette, graduate of the University of Michigan, principal and superintendent of public schools in Benton Harbor and Houghton for sixteen years, and organizer of the first county agricultural school in Michigan, has been selected by alumni of the Michigan Agricultural College and other influential men in upper and lower Michigan as a candidate for a place on the state board of agriculture.

Mr. Doelle has been approached and has consented to be a candidate. It is instrumental in inducing him to consider the candidacy are preparing the way for his nomination at the state convention which will be held in February or March and it is almost certain that he will be unopposed.

The movement to put Mr. Doelle on the state board had its origin in Lansing within the circle of men officially associated with the state agricultural college. In the opinion of these men it is absolutely essential, if the college is to function properly throughout the state, that the upper peninsula be given representation on the board of agriculture.

**Doelle Popular Choice**  
The college chiefs took the matter up with a large number of alumni in upper and lower Michigan and other influential men. They found a popular opinion prevailing that the program for agricultural extension in Michigan cannot be properly carried out unless a man on the board who is well acquainted with conditions in the district north of the straits.

It then became a question of picking the man and the unanimous opinion among men well acquainted in the state was that Mr. Doelle would be the logical selection.

He is recognized as being in closer touch with agricultural conditions in all parts of the peninsula than any other man in the district.

**The Elect Two Members**  
Two members of the state board of agriculture will be elected next spring by the people. The board consists of six members, who serve for six years, two being elected every two years.

Although the nomination and election of these men become a political matter after they enter the field as candidates, the movement to bring about the nomination of Mr. Doelle is not of political origin.

His selection was decided upon entirely without his knowledge, his first intimation of it coming this week when he was approached by attacks of the agricultural college and urged to accept the candidacy.

## CONVERTED IN STRANGE WAY

### Woman Led to See Beauties of Christianity Through Advice Given by Brahmin Theosophist.

How a woman was converted to Christianity by a Brahmin is told in the Boston Herald by Miss Lillian Freeman Clarke.

Celia Thaxter, the poetess, was an earnest student of strange and mystical teachings. At one time she was much dominated by the teachings of John Weiss, and she did not appreciate the beauty and power of the Bible. She saw a good deal of a Hindu Theosophist named Mohini, and under his guidance came to regard herself as a theosophist.

One day she said to her friend, Mary Parkman, "I do not speak contemptuously of such a religion, but I do not, for one of the principles of theosophy is to feel no contempt for any human being."

Miss Parkman replied: "But did not Jesus teach that it is not all in the Sermon on the Mount?"

By and by Mohini himself happened to get hold of a copy of the New Testament, and was much surprised and pleased by the beauty of its contents. He spoke of it to Mrs. Thaxter, and found to his amazement that she knew nothing about the New Testament.

"What?" he said. "You do not read your own religious books? I never heard anything more beautiful than this."

Mrs. Thaxter forthwith began to read the New Testament and became much interested in it that she went about with a copy in her pocket; whenever she had a chance she would read it. From that time she began to attend Phillips Brooks' church. She was converted to Christianity by a Brahmin theosophist.

**Not to Be Blamed**  
He—A self-made man is common enough, but we seldom hear of a self-made woman.

She—Well, considering the kind of article the men in the self-made business turn out you can hardly blame us women for not taking it up.—Boston Transcript.

# PREFERS INDEPENDENCE TO HIGH POSITION

The Democratic party of the Philippines will join the Nationalists party, which is now in power, in the demand for immediate independence of the Philippines, Senator Teodoro Sandico, only member of the Democratic party in the Philippine senate, said in an address at a luncheon at Manila. This dress at a luncheon at Manila. This

Gov. J. P. Sweeney, federal prohibition officers who, with letters from the Chicago officers—C-1118 3 - DG Chicago office of the central division took part in a raid on the Hurley-Mercer, Wis., road October 8 that resulted in the death of John M. Chisputo, Hurley bootlegger, will be at Lansing December 5 to show cause before Governor Albert E. Sleeper why they should not be extradited, for trial in Hurley courts, for the killing of Chisputo.

John E. Gillon, court chief for the western district of Michigan, with Scully and J. P. Sweeney, returned Wednesday night from LaCrosse and Milwaukee, Wis., where they had been for the past two weeks presenting evidence and preparing for the trial of the Hurley men.

**Denies Reid's Request**  
Governor Sleeper, it is understood, will not honor the request of Prosecuting Attorney Marion F. Reid, of Hurley, for extradition of the federal agents, Reid, who was at Lansing earlier in the week, has gone to Springfield, Ill. It is understood that the extradition of the Chicago agents, Governor Philip, of Wisconsin, has been reported in press dispatches as favoring extradition of the men.

Gov. Scully and Gillon will leave about Tuesday for LaCrosse, where they will appear before a federal grand jury in connection with the Hurley affair. The grand jury convenes Tuesday. It is not expected, however, that the alleged rum runners will be brought to trial before early in January. No indictments have yet been returned against them, it is said.

**BEER SLAUGHTER REPORTED HEAVY**  
Deputy Game Warden John Rough arrived home Wednesday morning from a four week stay in the woods in company with Deputy Herman Leisner, of Escanaba, patrolling the territory along the main line and branches of the Escanaba & Lake Superior railway. This road extends into what is regarded as the best deer hunting country in the upper peninsula. The deputies were kept busy in the district around the Channing branch of the railway, where there were large number of non-resident hunters. The wardens confiscated several deer that had been left in the woods, near the hunting camps, without being properly tagged.

## URGE EXAMPLE OF SELF-DETERMINATION

That friends of Irish independence in the American Congress could make a more effective impression on Great Britain by granting Philippine independence than by merely expressing sympathy with Irish aspirations is the suggestion contained in a statement issued by the Philippine Press Bureau of Washington, D. C.

"Twice in a period of nine months," reads the statement, "the United States Senate went on record as being in sympathy with the aspirations of the Irish people for a government of their own choice."

"Still another way for the friends of Irish independence in the American Congress to make an impressive argument for the grant of the independence of the Philippines have repeatedly demanded, America's own representatives in the senate have officially reported they are ready for independence and have recommended that such independence be granted.

"We submit that the granting of Philippine independence would be likely to be accepted by Great Britain as even stronger proof of America's belief in self-determination than the passage of the Irish resolution, because Great Britain's conciliatory attitude could not then successfully make the point that the American Congress is asking Great Britain to do something the United States itself has been asked to do and has not done."

"The Filipino people have confidence in the word of America and hope that now that the Senate has reiterated its sympathy with the principle of self-determination it will give Great Britain and the other powers of the world a concrete example of consistency and good faith by granting Philippine independence."

## YOUNG FILIPINO WON FRENCH WAR CROSS

Gregorio Galles, a Filipino, recently returned to his Philippine home wearing a French uniform and a Croix de Guerre with palm. Galles in December, 1914, arrived in France and enlisted as a private. He made an excellent record as a soldier. At one time when all the officers of his company had been killed, he took command and led the men in a charge. He was decorated for this act of bravery by the French Government.

# SLEEPER TO HEAR GROVE AND AGENTS

### WILL "SHOW CAUSE" WHY THEY SHOULD NOT BE EXTRADICTED

Lee J. Grove, Arthur Q. Scully and J. P. Sweeney, federal prohibition officers who, with letters from the Chicago officers—C-1118 3 - DG Chicago office of the central division took part in a raid on the Hurley-Mercer, Wis., road October 8 that resulted in the death of John M. Chisputo, Hurley bootlegger, will be at Lansing December 5 to show cause before Governor Albert E. Sleeper why they should not be extradited, for trial in Hurley courts, for the killing of Chisputo.

# Aged Light Keeper Falls Dead On Way To Friend's Funeral

William H. Sweet, aged seventy-five, resident of the Soo for nearly a half century, dropped dead while on his way to attend the funeral of Edward Campbell, an old friend. He was stricken with apoplexy and fell to the street. Friends rushed him home but death took place in less than five minutes after the stroke was suffered. Previously to the attack, Mr. Sweet had apparently been in the best of health for one of his age. Mr. Sweet's death further depletes the very thin ranks of the Soo post of the Grand Army of the Republic. He was one of the less than half-dozen members in 1861, he enlisted in the First Infantry of Illinois. He served in that regiment for sixteen months and was discharged on account of his youth. In March 1862, however, he re-enlisted with the Eighth Michigan cavalry and served for the remainder of the war. He told many times how, during a battle, his regiment had been withdrawn from the field in order that the soldiers might cast their votes. He voted for Lincoln, in 1872. Mr. Sweet was appointed lightkeeper at the Soo and he served for twenty-nine years. In 1894 he was transferred to the Cedar Point ranges where he remained until a year ago last January, when he retired.

**NOTICE TO WATER CONSUMERS**  
City Clerk's Office, Nov. 28, 1922. Under the provisions of ordinance No. 128, your Water Rent is due Nov. 1st. If not paid at the expiration of thirty days your water will be shut off. All water rental is assessed to and payable by the owner of the property.

**BOARD OF FIRE AND WATER COMMISSIONERS** 73-81.

**Valuable Trinkets**  
All over the world the thimble is a symbol of industry. Fashion in thimbles is very luxurious in the East. Wealthy Chinese ladies have thimbles carved out of mother-of-pearl, and sometimes the top is a single precious stone. Thimbles with an agate or onyx mounted in gold are often seen, as well as thimbles encrusted with rubies. The queen of Siam possesses a thimble in the form of a lotus-bud, with her name exquisitely worked in tiny diamonds round the margin.

**Think Before You Speak**  
It is a good thing to say what you think, and to be truthful, but never forget to think what you say and to be thoughtful. A thing may be true, yet should not be said if it helps nobody and hurts somebody.

**This Means You**  
When you get up with a bad taste in your mouth, a flat tired feeling, no relish for food and are constipated, you may know that you need a dose of Chamberlain's Tablets. They not only cause an agreeable movement of the bowels, but cleanse and invigorate the stomach and improve the digestion.

# SEND OVERSEAS PACKAGES NOW

### TIME FOR TRANSIT MEANS EARLY MAILING, SAYS POSTMASTER

If you are sending Christmas gifts to Europe it's high time to mail them. "It takes three weeks or more to get parcels overseas," said Postmaster Miller. "There is far more business of that sort than most people imagine. In a few days our postoffice will be receiving gifts for Europe. The steamers carrying the goods will be in even worse condition, because they must carry such parcels from all over the country."

The United States has now established full postal communication with every country in Europe except Russia, Finland and Jugoslavia. Letters alone will be accepted for Russia, but their delivery cannot be guaranteed. Parcels will not be taken. With Finland and Jugoslavia there is a post convention so that the delivery of letters is practically certain. Parcels to these two countries will be accepted but the United States takes no responsibility for their delivery. A similar restriction on Hungary was lifted this week.

This year the parcels of food, clothing and miscellaneous articles going to Europe are excellent all previous records, postal officials declare. Food drafts and money orders are also being sent in unusual numbers.

Made India "Dry." Masud, the mountain ruler of Ghazni and the plains of the Panjab, a generous patron of letters, an able architect and a warrior of no mean strength, who could lead an elephant at a single stroke and lead a victor's army, first instituted prohibition in Afghanistan and India, in 1600 A. D., says a writer in Asia.

1/2 cup milk  
2 eggs  
1/2 cup melted shortening  
Sift flour, baking powder and salt together; add milk to yolks of eggs; mix thoroughly and add to dry ingredients; add melted shortening and mix in beaten whites of eggs. Bake in well-greased hot waffle iron until brown. Serve hot with maple syrup. It should take about 15 minutes to bake each waffle.

# NEW TANGLES IN THE LIQUOR LAWS

### CANADIAN OWNED VESSEL INJECTS NEW FEATURE IN TO SITUATION

Cabmet. — On the strength of a sworn statement by her engineer, who said he threw twenty-one cases of whiskey overboard, the small steam tug Arbutus, a Canadian-owned vessel, was seized here today by John Saul, federal prohibition enforcement agent.

After seizing the boat, which has been at anchor in Eagle Harbor, with its coal bunkers empty, Saul wired his superior officers in Chicago and St. Paul, Minn., and also to Grand Rapids, for full instructions for further procedure.

Word reached copper country officials Monday that the tug had liquor on board and that members of the crew were selling it. As the vessel was not docked Keweenaw county officials could take no action so the matter was turned over to the deputy customs collector.

**May Make Search**

Saul said last night that he may make a search for the liquor, inasmuch as it was thrown into water not more than 20 feet deep.

"I am not sure what I will do next," said Saul after he had seized the tug. "I have made a full report of the seizure to Chicago and to Grand Rapids and have asked for instructions. The engineer's sworn statement is evidence that John Dow owned the liquor and that the captain of the boat knew it was on board. According to licenses found on board the boat she is owned by Samuel Wright."

The outcome of the case is being awaited with great interest here. The fact that the tug is Canadian owned raises new questions relative to the enforcement of the prohibition law.

**Curing by Suggestion.**

There is nothing new in the attempt to cure disease by means of the mind. Many a shrewd physician of a hundred years ago cured patients with bread pills, and kept his secret. There were probably mental healers in Babylon and Assyria. They are known to have existed in Egypt, Greece and Rome, while the American Indian medicine man was unquestionably an adept in the art of suggestion.

**Shared Fame With Friend.**

It is said that virtually all the plays to which the names of Beaumont and Fletcher are attached were written by Fletcher alone. Beaumont was a friend of Fletcher's and lived with him; they had a kind of David and Jonathan affection for each other, and Beaumont's name is said to have gone on the plays more for sentimental reasons than for any other.

**No Necessity**

Waddle—I am starting a society to discourage buying at present prices. Newman—Don't present prices discourage buying in themselves!—London Tit-Bits.

## THE GIANTESS

ONCE there lived a Giant who had a daughter and, of course, she was a Giantess.

The Giant, like all others of his kind, carried off all the people that came in his path, but his daughter always managed, while her father was asleep, to rescue all the men, as she wished very much to get married.

She thought she might win a husband if she could keep him locked up long enough on bread and water, for she knew that men would promise anything when they wanted a good dinner.

But all the men she locked up had said they would starve before they would have for a wife the big daughter of a Giant.

Now the Giantess was a very vain person, and while she might have

been pretty if she had been a person of ordinary size, she was almost funny to behold with her huge body.

There was one thing about her, though, and that was her hair, which fell around her in golden waves reaching to her feet.

One day her father brought in a Prince, intending to hold him until his father, a rich king, should offer his daughter as a ransom for his son's return.

When the Giantess saw the handsome youth she made up her mind at once to carry him off to her tower and make him promise to marry her, for of all things she most wished to be a Princess.

So while her father was taking a nap she picked up the Prince in one hand and carried him away.

She first locked him in a room with

by which the human mind can grasp the full significance of a billion of anything, but it is a magnificent figure and this billion tons of ore was a precious contribution to the iron and steel industry of the United States, the most important manufacturing industry within its borders. It appears that the season's shipments of iron ore from Lake Superior have definitely and permanently passed the 50-million-ton point. Nothing short of severe set back in industry and business would send the record back, even temporarily, below that figure. Indeed the normal demand is now around sixty million tons per year.

son, and a year of general activity would find use for more than that amount.

## DEATHS BY VIOLENCE NUMBER 272 IN STATE IN MONTH OF OCTOBER

There were 3,344 deaths reported to the Department of State as having occurred in the State of Michigan during the month of October, 1920. This number corresponds to an annual death rate of 19.8 per 1,000 population. The birth and death rates for the State are computed on the new population for 1920.

By ages there were 689 deaths of infants under one year of age; 224 deaths of children aged one to four years inclusive; 978 deaths of elderly persons aged 65 years and over. Upon comparing the number of deaths with those of the previous month it is noted there is a slight increase in the number of deaths of children under one year and also of children aged one to four years and of elderly persons.

Important causes of death were as follows: Pulmonary tuberculosis, 177; other tuberculosis, 25; typhoid fever, 23; diphtheria, 83; scarlet fever, 23; measles, 1; whooping cough, 21; pneumonia and broncho-pneumonia, 155; diarrhea, enteritis under two years, 265; meningitis, 26; influenza, 4; cancer, 278; violence, 272. A slight increase is noted in all important causes with the exception of measles and whooping cough. These causes show a slight decrease.

Among the deaths reported from violence were 33 railroad accidents; 12 electric railway; 52 auto accidents; and 21 homicides, 24 suicides, 10 drownings; 5 electrocutions and 3 from conflagration.

In addition to the important causes noted above there were 3 deaths from poliomyelitis, 4 from tetanus; 5 from lethargic encephalitis; 1 from pellagra and 1 from chicken pox.

The greatest apparent mortality occurred in the county of Lapeer, with a rate of 29.8 per 1,000 estimated population. Wayne County with a rate of 34.1 per 1,000 estimated population shows the highest birth rate for the month. These rates, however, are subject to further analysis before definite conclusions should be drawn, as the population figures used for determining such rates are based on the 1920 census.

There were 4,321 births reported to the Department as having occurred in the State during the month of October, 1920. This number corresponds to an

annual birth rate of 23.3 per 1,000 population. A slight decrease is noted in the number of births as compared with the month immediately preceding. In addition to the above there were 310 stillbirths returned as births.

There were 273 September certificates of birth returned with the October report and 14 certificates of death for children under one year of age.

Hakan Peterson returned Thursday night from visiting at the home of his son Amiel Peterson at Manistique.

The Glory of the Oleanders. This bright morning we looked from the roof of our veranda, and our neighbor's oleander-trees were glowing like a great crimson cloud; and we said, "There! the oleanders have come back!" No nother ideas can give the glory of these trees as they raise their heads in this their native land, and seem to be covered with great crimson roses.—Harriet Beecher Stowe.

## CLEVELAND SIX

### No Other Light Car Offers So Much

There is in the Cleveland Six an unusual degree of power, quick pick-up and extraordinary acceleration. It gives all the speed that any reasonable person would ever want to use, more than most drivers would ever care to use.

And with these qualities of day-in and day-out performance, the Cleveland embraces sturdiness, safety and real comfort.

These are factors that you care about. They mean much in the service and pleasure which you have the right to expect from your motor car.

Throughout, the Cleveland Six is a car of high quality featured by its own exclusive motor, ease of control in driving, most positive brakes, low underlung springs that wipe out the road-bumps, bodies of dignified and graceful design.

Come In and See the Cleveland Six. Ride in It, Drive It.

# STORES HANDLE AMERICAN TOYS

HOME FACTORIES PRODUCING TOYS TO SEND TO FOREIGN LANDS

There will be plenty of American made toys of endless variety for American children this Christmas. Compilation figures based upon statistics of the United States department of commerce prove that the American production of toys of all kinds from the simplest dolls to the most elaborate mechanical playthings, is not only sufficient to supply the needs of our children but also that America has been able to export this year more than \$2,000,000 worth of dolls and playthings. American production of toys for 1920 is estimated at \$80,000,000. Of that total \$15,000,000 represents the production of dolls ranging from the stuffed cloth variety to the finest quality throughout, and surpassing anything in dolls ever produced anywhere in the world.

Included in the balance of \$65,000,000 worth of American toys are playthings of all kinds and all made of honest materials, finest workmanship and durability combined with originality of ideas and design and of educational value and places them in a class by themselves. Articles in the daily press in regard to imported toys have tended to make American mothers believe that during the coming holidays there will not be enough American toys for their children. Toys are national to the country of origin as they have been since the days of the early Egyptians. There should be no good reason why American children should have foreign toys forced upon them when the supply of their own national playthings is abundant. There has been a clamor to cast around the toys of other lands by people who have visited the concentrated toy centers in Europe. The American toy industry has no such centralized character but it would take all of the toy factories of the United States and group them around the "Toy Town" of America, Woburn, Mass., it would make a collection of factories

that would overshadow the toy districts of any other country.

## NEWS OF THE MOVIES

**"ONCE TO EVERY WOMAN"**  
American theatergoers who re-lived in the dramatic wealth of "The Heart of Humanity" and captivated to the irresistible qualities of "The Right to Happiness" are doubtless of the opinion that in these two photodramas Dorothy Phillips and Allen Holubar, star and director, have reached the heights of screen perfection. But the public is asked to reserve its final verdict until it has had a view of "Once to Every Woman", the newest Universal Jewel super production, coming to the Gladstone Theatre Saturday and Sunday.

The popular appeal of "Once to Every Woman" is heightened because it deals with every-day people and treats of a theme that is as old as humanity. Mother love is its keynote and it shows the utter vanity of worldly ambition when not founded on human affection.

Miss Phillips first appears as a school girl the daughter of a village

blacksmith, who, because of her good looks and sweet voice, is the pet of the family. She accepts the sacrifice of her parents and sisters, and when a visitor from New York offers to send her abroad to have her voice trained she leaves home with no regrets.

After many dramatic episodes she finally reaches the goal of her ambition—the creation of the star role in a new grand opera in New York. Her humble home and family are forgotten. Then a tremendous shock causes the loss of her voice. Her new-found friends and admirers leave her. In her mother's great love she finds real happiness at last.

**Women's Auxiliary to Meet**  
The Women's Auxiliary to the American Legion will hold a meeting Friday night at 8:00 o'clock at the Eagles Hall. Every member of all committees are particularly urged to be present as this meeting is held for the purpose of settling all accounts incurred by the Armistice Day banquet.

**Aid Meeting**  
The Ladies Aid of the Swedish Lutheran church will meet Thursday afternoon in the church parlors. Mrs. J. Haglund will be hostess.

### Injures Finger

Isaac Wood while about his duties at the Veneer mill suffered quite a painful injury last Monday when his fourth finger in some manner caught in the machinery and was badly smashed. With medical attention it will soon heal and Mr. Wood will be able to go back to work.

### Fancy Work Sale

The Women's Catholic Order of Foresters will hold a fancy work sale Thursday, December 16 at All Saints Parish Hall. This is to be one of the biggest sales of its kind ever held. There will be many beautiful articles for sale and chances and tickets are sold on a game of the large articles.

The Yeoman organization of this city will give another of its delightful dancing parties Thursday December 2. It is expected a large crowd will attend from both Escanaba and here.

## Washing "EASY" With the

No other method of washing gives the housewife such complete freedom from worry and work on wash day. The reasons are two: first, the "EASY" is the most efficient washing machine because it washes by air pressure and suction.

There is no friction, wear or tear on the clothes; second, the "EASY" eliminates all the labor because there is no work in connection with the preparation of the machine before the washing, during the washing, or after the washing.

The two vacuum cups move up and down 50 times per minute. Before the down stroke they change positions so that the air pressure and suction are applied to all the clothes in the round copper tank. On the down stroke the air in the two vacuum cups forces the hot soapy water through the mesh of the garments—on the up stroke they suck the soapy water through the mesh. Dirt or foreign substances, lodged in the mesh or stuck on the garments, cannot resist this 60 times per minute air pressure and suction. There is no friction, rubbing, jerking or dragging of the clothes—no wear or tear. The "EASY" will wash

the daintiest laces or the sheerest fabrics and silks. Your woollens, flannels and blankets will not only be spotless clean but you will be delighted to find them fluffy and pleasant to the touch.

The "EASY" is made from metals, namely, solid copper, brass, aluminum and steel. It is durable and sanitary. Its simple construction makes it easy to operate and understand. All mechanism, including the famous G. E. motor, is suspended from an iron base under the copper tank and out of the way. It occupies less space and yet has a larger capacity than other washers, which is due to the large round tank which has no corners or crevices to collect foreign substances or dirt. Its three legs, with swivel casters, allow it to be moved about easily.

It is fitted with electric swinging wringer, also gas heater under tank. If desired, its capacity is adjustable to small or large washings.

Demonstration on your next washing in your own home without obligation to you
